SAN FRANCISCO—School, 2 story and base, frame and concrete, $52,500. Architect, Architectural Commission, Temporary City Hall S. F. Owners, City and County of San Francisco. Plans for the Starr King School are complete and bids will be opened for the construction on October 30th. The building will contain 12 class rooms. Stairways will be of concrete. The exterior will be covered with cement plaster on metal lath. Steam heat will be installed. Complete information can be secured from the Board of Public Works. For proposal see under Sealed Proposals in this issue. Bids will be segregated as follows: General construction, heating and ventilating, electric work, plastering and plumbing.

SAN FRANCISCO — School work, blackboards. Cost not stated. Architect, Architectural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on October 30th by the Board of Public Works for furnishing and installing blackboards in the Girls' High School. Slate blackboards are specified.

OAKLAND, CAL. School, 2 story and base, frame, $12,500. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be received on October 28th for the construction of certain repairs and additions to the San Pablo Avenue School. The work will include some structural iron, steam heat and exterior work. Plans can be secured from the Supervising Architect.

LODI, SAN JOAQUIN CO., CAL.—School, 2 story and base, reinforced concrete, $165,000. Architects, Stone & Wright, San Joaquin Valley Bank Bldg., Stockton. Owners, City of Lodi. Advice has been received from Lodi to the effect that bids will be opened on November 1st for the construction of the new $165,000 High School. Separate figures will be received for the general construction, heating and ventilating and for the program clock system.

SANTA BARBARA, SANTA BARBARA CO., CAL.—School, 2 story and base, reinforced concrete and brick, $90,000. Architect, State Architect Woollett, Sacramento. Owners, State of California. As was reported in these columns several weeks ago, all bids for the construction of the Santa Barbara State Normal School buildings have been rejected. New bids are now being called for which are to be opened by the State Board of Control on November 4th at Sacramento. All parts of the work will be segregated. Plans and specifications can be secured from the State Department of Engineering. For official proposal see under Sealed Proposals in this issue.

Contracts Awarded.

EL MODENA, LOS ANGELES CO., CAL.—School, 1 story and base, reinforced concrete. Cost not stated. Architect, H M Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. Contractor, W F. Eden, Orange, general construction, $21,017. Mackaness and Electric Co., L. A., heating and ventilating, $1,404.

SEWERS, STREET WORK AND WATER SYSTEMS.

ALAMEDA, ALAMEDA CO., CAL.—Municipal light plant, reinforced concrete, $150,000. Engineer, Couchot, French Bank Bldg., S. F. Owners, City of Alameda. Bids opened for the complete construction of this plant show Charles C. Moore & Co. of San Francisco low men at $146,885. For a complete list of bidders see under Oakland and Alameda County in this issue.

SAN FRANCISCO—Sewer construction. Cost not stated. Engineering Dept. Panama-Pacific Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids will be opened on October 29th for the carrying out of Contract No. 13 which calls for the construction of sewers on the Foreign Pavilion Site at the Exposition grounds. Full particulars can be secured from the engineers. For official proposal see under Sealed Proposals in this issue.

Contracts Awarded.

SAN FRANCISCO—Road work and sewers. Cost not stated. Engineering Department Panama-Pacific Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for three contracts under this company were opened recently with the following results: Contract No. 10, Fort Mason Roadway, Frank R. Ratche, $12,950. Contract No. 11, North Service Sewer, Pringle-Dunn & Co., $1,231. Contract No. 12, South Garden Sewer, Pringle-Dunn & Co., $3,577. For a complete list of bidders see under San Francisco in this issue.

—STORE BUILDINGS—

LOS ANGELES, CAL.—Stores and offices, 13 story and base. Class A construction, $100,000. Architect W. S. Garrett, Currier Bldg., L. A. Owners, Globe Co. A valuable corner at the southwest intersection of Spring and Franklin streets has been secured for this building. As yet only preliminary plans have been made and no details have been determined. As soon as these details have been settled upon a complete description will appear in these columns.

SAN DIEGO, CAL.—Stores and offices 15 story and base. Class A construction. Cost not stated. Architect, J. Martyn Haenke, Broadway Central Bldg., L. A. Owners' names withheld. The architect has just been commissioned to prepare plans for this work and it will be some little time before information is received relative to details of the building. The site on which the building is to be erected is 100x125 feet. The names of the owners will be made public in a few days.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, reinforced concrete. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, M. J. Connell. The building will cover an area of 40x143 feet. There will be concrete stairways, metal lath partitions, steam heat and elevator service. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans for the work are complete and figures will be taken at once.

SAN FRANCISCO—Stores and lofts, 2 story and base, reinforced concrete. Cost not stated. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, A. L. Elvin. The building will be erected at the corner of 6th and Jessie streets, and will be arranged for one store on the first floor. The second floor will be divided into two lofts. A freight elevator will

be installed. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO.—Stores and offices, 5 story and base, brick and steel. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pope Estate. Preliminary plans only have been prepared for this building and none of the details can be published as yet. Construction will be nearly fireproof. There will be several stores on the first floor and in the neighborhood of 100 offices on the upper floors. Mechanical equipment will include steam heat, elevators and a vacuum cleaning system. The exterior will probably be faced with pressed brick and terra cotta.

OAKLAND, CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Martin E. Marks. The building will have a street frontage of 50 feet and a depth of 100 feet. There will be three stores. Store fronts will be of copper and plate glass. The exterior of the building will be faced with marble. Hardwood will be used for the trim in the display windows. Plans are being prepared and will shortly be out for figures.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Store, 2 story and base, brick, $10,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Mayor of San Luis Obispo. The building has been arranged for two stores on the first floor and a residence above. There will be patent store fronts. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base, reinforced concrete. Cost not stated. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owners, Chapman Bros. The building will cover and area of 50x100 feet and will be of reinforced concrete construction throughout including the roof and floors. Both freight and passenger elevators will be installed. There will be metal sash and frames and fireproof doors. The exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

VENICE, LOS ANGELES CO., CAL.—Stores and offices, 3 story and base, brick. Cost not stated. Architects, Krempel & Erkes, Henne Bldg., L. A. Owners, Maier Brewing Co. There will be three stores on the first floor and a number of modern offices on the upper floors. There will be an automatic elevator, steam heat and hot and cold running water. The exterior will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

WENATCHEE, WASH.—Stores and offices, 2 story and base, reinforced concrete, $50,000. Architect, G. A. Creutzer, Haight Bldg., Seattle. Owners, Tuper and Freeman. Contractor, George C. Dietrich, Globe Bldg., Seattle. Contract price, $50,000.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Monday, November 4, 1912,** said bids then and there to be publicly opened and read, for Physician's Cottages Nos. 2 and 3, Southern California State Hospital at Patton, Cal., in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

FIRST—For the Entire Work.

SECOND—For the Mason Work.

THIRD—For the Carpenter and Mill Work.

FOURTH—For the Finish Hardware.

FIFTH — For the Metal Furring, Lathing and Plastering.

SIXTH—For the Painting, Staining and Glazing.

SEVENTH—For the Plumbing, Sewers and Gas Fitting.

EIGHTH—For the Electric Wiring.

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Five Dollars ($5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, Cal., in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal., and plainly marked on the envelope. "Proposals for Physician's Cottages 2 and 3, Southern California State Hospital."

(Signed) W. F. McCLURE,
State Engineer. (*)

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 oclock p. m. and 3 o'clock p. m. on **Wednesday, the 6th day of November, 1912,** for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Starr King School Building, to be situated at the southeasterly corner of 25th and Utah streets.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within two hundred and forty (240) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at $10,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL,
Secretary.

Separate proposals will also be received on the same date for the following parts of the work in connection with the construction of this school:

(1) The installation of a heating and ventilating system in the Starr King School Building.

(2) The plumbing for the Starr King School Building.

(3)The electric work for the Starr King School Building.

(4) The plastering of the Starr ing School Building.

PROPOSALS FOR BLACKBOARDS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 oclock p. m. and 3 o'clock p. m. on **Wednesday, the 30th day of October, 1912,** for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of slate blackboards in the Girls' High School.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within ninety (90) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at $1,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL,
Secretary.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at **10 a. m. on October 29, 1912,** for the following work:

Contract No. 13.

For constructing Sewers for Foreign Pavilion Sites in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing $5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

CANAL WORK.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until **2 o'clock p. m. November 11, 1912,** for the construction of about 10 miles of the Dodson North Canal, Milk River project, Montana. The work involves the excavation of about 420,000 cubic yards of material and is situated on the north side of Milk River and adjacent to the main line of the Great Northern Railway in the vicinity of Wagner and Exeter, Mont. For particulars address the United States Reclamation Service, Washington, D. C., Helena, Mont., or Malta, Mont. A. P. DAVIS, acting director.

NOTICE TO BIDDERS.

For New Lodi Union High School District Building.

NOTICE is hereby given by the High School Board of Lodi Union High School District of Lodi, California, that sealed bids will be received by the Clerk of said Board in the High School Building in the City of Lodi up to the hour of **2 p. m. on the 1st Day of November, 1912,** at which time and place the said bids will be opened for the furnishing of labor and materials to complete certain School Buildings for the Lodi Union High School District.

Bids shall be for the erection and construction and the furnishing of all and every kind and sort of labor and material according to the plans and specifications, which may be seen at the office of Stone & Wright, Architects, at their office in the San Joaquin Valley Bank Building, Stockton, California, during business hours, and which will comprise everything necessary to complete the buildings described and designated in said plans and specifications, exclusive of a heating and ventilating system.

Bids will be received in accordance with the plans and specifications referred to, for a heating and ventilating system complete, including all oil burners, for said building.

Bids will be received in accordance with the plans and specifications referred to for a program clock system complete, for said building.

Each bidder must accompany his bid by a certified check payable to F. B. Mills, Clerk of the Board, or a certificate of deposit for not less than ten per cent of the amount of his highest bid, conditioned that the successful bidder shall enter into a contract in accordance with such bid, and file with said High School Board, a bond, to be approved by them, within ten days after the acceptance of his bid, which bond shall be conditioned for the faithful fulfillment of the contract entered into and to be for at least fifty per cent of the amount of the contract price for the work to be done thereunder. All work to be done and material furnished shall be in accordance with the plans and specifications herein specified, and all bids hereunder will be opened at the hour of 2 o'clock p. m. on the 1st day of November, 1912, by said High School Board in their office in the High School Building of Lodi Union High School District.

All bids must be submitted on forms obtained from the architects, Wright & Stone; a deposit of $25.00 will be required for each set of plans and specifications taken from the office of the architects; this deposit to be refunded to the bidder upon return of the plans and specifications.

The High School Board reserves the right to reject any and all bids.

Dated October 1st, 1912.

By order of the High School Board of Lodi Union High School District.

By F. B. MILLS, Clerk.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE 2 story and base, frame, $3,000. San Francisco. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, $6,000. San Francisco. Architect, M. Mattanovich, David Hews Bldg., S. F. Owner's name withheld. The dwelling has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine, redwood and hardwood. Oak floors will be used throughout the first story. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be a vacuum cleaning system, automatic hot water heater and garbage chutes. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, $2,500. San Francisco. Architect, M. Purcell, 2527 Lake St., S. F. Owner, Rudolph T. Haas. This house has been designed for a six-room dwelling with bath. All interior finish will be of pine. Some oak floors will be used. There will be open fire places in two of the rooms which will have attractive tile mantels. The exterior of the house will be covered with rustic and klinker brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame $2,500. San Francisco. Architect, none. Owner, Charles Penez, 447½ 4th Ave., S. F. The dwelling will contain six rooms and bath. The interior will be finished throughout in pine and redwood. Oak floors will be used in the living and dining rooms. There will be large open fire places with brick mantels in the living room. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES.—2, 2 story and base, frame, $3,000 each. San Francisco. Architect, none. Owner, W. L. Hemmings, 1566 Hayes St., S. F. Each of these houses will contain seven rooms and bath. The interiors will be finished in pine, redwood and oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with rustic. Plans are complete and the owner will do the work by Day Labor.

RESIDENCES—4, 2 story and base, frame, $2,000 each. San Francisco. Architect, none. Owner, J. B. Stromswald, 3587 16th St., S. F. Each of these houses will contain six rooms and bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and brick mantels. Tile will be used in the baths and kitchens. The exteriors will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, $4,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, John A. Hoots. The house has been designed for an eight-room dwelling with bath. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with brick veneer. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—7 story and base, brick and steel, $65,000. San Francisco. Architect, Harry Skidmore, Foxcroft Bldg., S. F. Owner, W. W. Anderson, 107 Grant Ave., S. F. This work has been mentioned here before

when the architect first started the working drawings. The building will contain in the neighborhood of seven-five apartments, which are to be arranged in two and three room suites with connecting baths. There will be steam heat and elevator service. A vacuum cleaning system will also be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are in the hands of the owner who is taking figures for the various parts of the work.

CHURCH—1 story and base, frame, $10,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Sunset M. E. Church. The building will be erected at 19th avenue and Judah street. Design will be in the Gothic style. The main auditorium will occupy the entire ground floor. Space has been provided in the basement for a large social hall and Sunday school rooms. A hot air system of heating will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SUB-TREASURY—2 story and base. Class A construction, $500,000. San Francisco. Architect, J. Milton Dyer, Cuyahoga Bldg., Cleveland, Ohio. Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Word has been received from Washington to the effect that working drawings for the new $500,000 Sub-Treasury building in this city have been approved and that the official advertisement will be published on November 4th. Bids will be opened on January 6th.

The new building will be located on the site now owned by the Government at the corner of Pine and Sansome streets. It will have a ground area of 85x128 feet, with the main front on Pine street. It will be two stories and basement, and it is designed in the classic style of architecture, using granite for the exterior material. The entire building is solely for use of the Sub-Treasury.

The main entrance will be emphasized by a beautiful classic colonnade, opening into the public banking room, separated from the working space by a suitable bank screen of glass and metal. The banking room will be about thirty-seven feet high, the ceiling being largely taken up by an ornamental ceiling light, an arrangement in accordance with the plans adopted in the most modern banks. Offices of the assistant treasurer open directly from the public banking room, as do also those of the paymaster.

A large storage vault in the basement is supplemented by a daily money vault on the first floor. On the second floor general offices are arranged, reached by an independent exterior entrance on Sansome street. Special provision is made in the designing of the vaults.

FLAT ALTERATIONS—3 story and base, frame, $10,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Herman Market. The present building at the corner of Bush and Octavia streets is to be entirely remodeled. This work will include new plumbing, interior finish, plastering and electric work. The present exterior will also be changed. Plans are complete and figures are being taken.

FLATS—3 story and base, frame, $8,000. San Francisco. Architect, none. Owner, C. S. Allred, 113 Edna St., S. F. The building will cover an area of 27½x70 feet. There will be three modern flats of five and six rooms each. Interior finish will be of pine and redwood with some oak floors. There will be both open fire places and gas grates. Tile mantels will be used. Tile will also be used in the bath rooms and back of the sinks. The exterior of the building will be covered with rustic. Plans are complete and the owner will do the work by Day Labor.

FLATS—2 story and base, frame, $4,000. San Francisco. Architect, none. Owner, A. Cuneo, 246 San Carlos St., S. F. The building has been designed to contain two flats of five and six rooms each with bath. All interior trim will be of pine or redwood. There will be gas grates. Mantels will be of tile. The building will cover a site 25x48 feet. The exterior will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, $6,500. San Francisco. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building will contain two high class flats, each of which will contain six rooms and bath. The interiors will be finished in pine, redwood and some oak. Oak floors will be used in all of the principal rooms. A central heating system will be installed. There will be open fire places with tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—3 story and base, frame, $6,500. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Frank Grannis. The building will be 25x56 feet and will contain three small flats. The interiors will be handsomely finished in pine and redwood with oak floors. There will be open fire places. Mantels will be of brick or tile. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and brick veneer. Plans are complete and the work will be done by Day Labor.

GARAGE—2 story and base, reinforced concrete, $40,000. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner's name withheld. This building will be erected on Van Ness avenue, just above Sutter street, and is to cover a considerable ground area. The front portion of the building will contain sales rooms and offices. Repair shop, shipping rooms and storage space will occupy the rest of the first and second floors. There will be cement floor on the first story. Plans call for steam heat and some metal trim. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

MACHINERY HALL—Frame and cement plaster, $500,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the machinery hall are progressing rapidly. Bids for the excavating are now being taken and will be opened on October 24th. For full particulars and official advertisement see under Sealed Proposals in this issue.

DETENTION HOSPITAL—1 story and base, brick. Cost not stated. San Francisco. Architects, Wright, Rushforth & Cahill, 571 California St., S. F. Owners, Whitcomb Estate. This building will be erected in the rear of the Temporary City Hall, and when complete will be leased to the city. The interior will be finished in pine and tile. There will be a steam heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

HOTEL—4 story and base, brick and steel, $40,000. San Francisco. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, A. Paladini. This work has been mentioned here before when the architects first started the plans. The first floor of the building will be occupied by a large restaurant, which will be handsomely decorated. Upper floors will contain in the neighborhood of sixty rooms and baths. There will be steam heat and elevator service. The ex-

SEWER CONSTRUCTION—Cost not stated. San Francisco. Engineering Dept. Panama-Pacific Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids will be opened on October 29th for the carrying out of Contract No. 13, which calls for the construction of sewers on the Foreign Pavilion Site at the Exposition grounds. Full particulars can be secured from the engineers. For official proposal see under Sealed Proposals in this issue.

STORES AND LOFTS—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, A. L. Elvin. The building will be erected at the corner of 6th and Jessie streets and will be arranged for one store on the first floor. The second floor will be divided into two lofts. A freight elevator will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

STORES AND OFFICES—5 story and base, brick and steel. Cost not stated. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pope Estate. Preliminary plans only have been prepared for this building and none of the details can be published as yet. Construction will be nearly fireproof. There will be several stores on the first floor and in the neighborhood of 100 offices on the upper floors. Mechanical equipment will include steam heat, elevators and a vacuum cleaning system. The exterior will probably be faced with pressed brick and terra cotta.

terior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SCHOOL—2 story and base, frame and concrete, $52,500. San Francisco. Architect, Architectural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the Starr King School are complete and bids will be opened for construction on October 30th. The building will contain 12 class rooms. Stairways will be of concrete. The exterior will be covered with cement

plaster on metal lath. Steam heat will be installed. Complete information can be secured from the Board of Public Works. For proposal see under Sealed Proposals in this issue. Bids will be segregated as follows. General construction, heating and ventilation, electric work, plastering, and plumbing.

SCHOOL WORK Blackboards. Cost not stated. Architect, Architectural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on October 30th by the Board of Public Works for furnishing and installing blackboards in the Girls' High School. Slate blackboards are specified.

Contracts Awarded.

FLATS—2 story and base, frame, $2,000. San Francisco. Architect, L. Mastropasqua, 580 Washington St., S. F. Owner, Pio Cecchi. Contractor, Clemente Posina, 681 Broadway, S. F. Contract price, $2,000.

ROAD WORK AND SEWERS—Cost not stated. San Francisco. Engineering Department Panama-Pacific Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for three contracts under this company were opened recently with the following results. Contract No. 10, Fort Mason Roadway, Frank R. Ratche, $12,950. Contract No. 11, North Service Sewer, Pringle-Dunn & Co., $1,231. Contract No. 12, South Garden Sewer, Pringle-Dunn & Co., $3,577. For a complete list of bidders see under San Francisco in this issue.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE 2 story and base, frame, $6,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr. First National Bank Bldg., Berkeley. Owner Dr. R. N. Rowell. This house has been designed to contain eight rooms, bath and sleeping porch. A portion of the lower floor will be given up to the doctor's offices and operating room. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW — 1 story and base, frame, $3,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner F. A. Muller. The bungalow will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. There will be furnace heat and open fire places. Oak floors will be used in the principal rooms. Mantels will be of brick and tile. Bath room will be finished in tile and will have composition floor. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE 2 story and base, frame $10,000. Berkeley, Alameda Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Dr. F. L. Carpenter. The dwelling will contain ten rooms, two baths and sleeping porch. Besides the usual living rooms there will be a handsomely finished office suite for the use of the owner. Interior finish will be of pine and redwood with oak floors throughout except in the office and bath rooms which will have tile floors and wainscott. There will be furnace heat and open fireplaces. Mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster. The work has been taken in charge by James Cruickshank of Richmond on a percentage basis.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, A. Peterson 2615 Virginia St., Berkeley. The dwelling will contain five rooms and bath. All interior trim will be either pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are now in the hands of the owner who will do the work by Day Labor.

RESIDENCE 2 story and base, frame, $5,500. Berkeley, Alameda Co., Cal. Architect, Harris Osborn, Hearst Bldg., S. F. Owner, Mrs. Lida E. Britan. The house has been designed for a seven-room dwelling with bath, sleeping porch and a garage. The interior will be finished in pine and redwood with oak floors throughout the first story. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exteriors of both the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES 3, 2 story and base, frame, $4,000 each. Oakland, Cal. Architect Clay N Burrell, Albany Bldg., Oakland. Owner, F. A. Muller. These houses are to be erected for sale and will be built in Piedmont Heights. Each will contain seven rooms, bath and sleeping porch. The interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, $5,780. Berkeley, Alameda Co., Cal. Architect, none. Owner, Donald H. McCorkle, 2710 Woolsey St., Berkeley. The house has been desined for a seven-room dwelling with bath and sleeping porch. The interior will be finished in pine, redwood and white cedar with oak floors throughout the first story. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscotting will be used in the bath room and back of the kitchen sink. Composition flooring will be used. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base frame, $4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner Louis Engler, 2714 Benvenue Ave. Berkeley. The house will contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in all principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will be finished in tile with composition floor. Tile will also be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base frame, $6,000. Oakland, Cal. Architect, Engineering Dept. Realty Syndicate, Oakland. Owner, G. C. Bainhart. The house will contain seven rooms, baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Edward Grandin, 2748 Baker St., Berkeley. The house will contain five rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and brick mantels. Tile will be used in the bath and kitchen. The interior will be finished in pine and redwood with some hardwood. Oak floors will be used throughout the first story. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster and shingles. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base frame, $4,200. Oakland, Cal. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner's name withheld. This house has been designed for an eight-room dwelling with baths sleeping porches and a laundry. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath room will be wainscotted with tile and have a composition floor. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, $3,000. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, James Keller. The house will contain seven rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will also be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base frame, $4,500. Oakland, Cal. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner's name withheld. The dwelling will contain eight rooms, baths and sleeping porch. The interior will be finished in pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

FACTORY— 1 story and base, brick Cost not stated. Berkeley, Alameda Co. Cal. Engineer, Tracy, Berkeley. Owners, West Coast Kilsomme Co. Hunter Bldg. S. F. The company has recently purchased a large site on which there is now a two-story brick building. In addition to this building, which is to be entirely remodeled, a one-story structure will be erected. The capacity of the plant will be increased three times and in the course of the next year several other buildings will be erected. Plans for the first building are complete and work will be started at once.

INFIRMARY—2 story and base, frame, $5,000. Oakland, Cal. Architect, B. G. McDougall, Sheldon Bldg., S. F. Owners Alameda County. Plans for a second temporary building for the Alameda County Infirmary are complete and figures are being taken. General plans have been outlined by Architect H. H. Meyers, Kohl Bldg., S. F. for a schedule of competition for a large institution which will be erected on this site as soon as plans can be prepared.

SCHOOL 2 story and base, frame, $12,500. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids be received on October 28th for the construction of certain repairs and additions to the San Pablo Avenue School. The work will include some structural iron, steam heat and exterior work. Plans can be secured from the Supervising Architect.

STORES—1 story and base, brick. Cost not stated. Oakland, Cal. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Martin E. Marks. The building will have a street frontage of 50 feet and a depth of 100 feet. There will be three stores. Store fronts will be of copper and plate glass. The exterior of the building will be faced with marble. Hardwoods will be used for the trim in the display windows. Plans are being prepared and will shortly be out for figures.

MUNICIPAL LIGHT PLANT—Reinforced concrete, $150,000. Alameda, Alameda Co., Cal. Engineer, Couchot, French Bank Bldg., S. F. Owners, City of Alameda. Bids opened for the complete construction of this plant show Charles C. Moore & Co. of San Francisco low men at $146,885. For a complete list of bidders see under Oakland and Alameda County in this issue.

Bids For Alameda Municipal Plant.

A Complete List of Bids Received For Construction of Alameda's New Municipal System.

Bids were opened on October 16th by the Alameda City authorities for the construction work in connection with the erection of a Municipal Lighting System. Editorial Comment.

Four new laws and four proposed constitutional amendmants come up for consideration of the voters at the election on November 5th. First there is a legislative amendment to authorize the acceptance of irrigation district bonds as security for public money deposited in banks. The idea of this amendment is to help develop irrigation districts by allowing public money to be invested in the bonds. There seems to be ample protection provided for the public funds and the act is intended to aid the development of the arid districts.

Next there is the Shanahan amendment providing for free textbooks for all pupils attending the day and evening schools. Under the amendment the books would be published by the State as now and the distribution would be made by the state. The cost of the publication and distribution is estimated at about $200,000 a year. Inasmuch as the schools are supported by the general taxes and the apportionment is made according to school population and attendance the proposed amendment meets generally with popular favor. A large number of other states have such a provision and the results have been satisfactory and gratifying. It induces a large attendance at the schools and makes for public legislation and enlightenment.

The third, fourth and fifth proposals on the ballot are there by Referendum petitions, to submit to The People three Acts of the Legislature passed last December, providing for the office of Registrar of Voters in all counties, said office to be appointed by the Board of Supervisors.

These three acts refer to the same thing and apply to the creation of a new office for the County of Alameda. At present the work of Registrar is performed by the County Clerks of the several counties and there seems to be no reason for creating a new official in all the counties.

The sixth proposal relates to the initiative amendment to the constitution providing for the merging and consolidating of the cities around the bay, or it is the greater San Francisco Amendment. This amendment is opposed by some of the people of Oakland and some people throughout the State. The ground of opposition of the interior is that it would give San Francisco too much power in the Legislature. This seems a far fetched argument as the representatives would be elected by districts the same as now and their interests would be practically the same on all state questions.

The seventh proposition is an initiative measure originating with the race track interests. It is entitled "An Act to Prohibit Bookmaking and Pool-selling, Etc." The proposed law concludes with a provision to authorize betting upon race tracks by the Paris mutual and auction pool systems of betting which is now prohibited by law. As this amendment is for the purpose of restoring the racetrack, it is presumed that all good citizens will vote against it.

The eighth proposal on the ballot is by initiative and is known as the Home Rule in Taxation Amendment. It would allow "any county, city and county, city, town, district or township" to raise revenue in such manner as a majority of its voter may see fit to approve, and to classify property for taxation or "exemption," provided no taxes shall be levied on property set aside for State taxation or otherwise exempt by the Constitution and laws of the State or of the United States.

This amendment is said to have originated with the single taxers and has the approval of all the people who believe that the tax should be on land not on the improvements. It of course has the opposition of the corporations and the large holders who profit by the unearned increment and the advance in price that surrounding improvement gives. This amendment will probably be widely discussed during the next two weeks.

The American Sheet Steel and Tinplate Company at Gary, Indiana, is completing fourteen buildings of monolithic concrete, costing something over $130,000 and furnishing apartments and houses for seventy-four families of workmen in its local mills. This is a question of building a sanitary dwelling instead of a wooden tenement and at a sufficiently low cost for the employes to buy.

The Edison plan for monolithic concrete construction, that of large molds into which the liquid stone is poured, has been improved upon in the newer sectional forms used by the tinplate company. These sectional forms are made in different styles and when set up provide for about 20 different styles of buildings. When the forms are set up each floor becomes a separate entity, in fact, each room becomes a separate entity and is surrounded completely by concrete reinforced with bars of steel or mesh wire. The insmoothed and painted, kalsomined, plastered, sand blasted or tinted according to the plan of the architect.

Building two apartments in this way the cost of a single dwelling is as low as $1803, which is considered a low price there. The detached dwellings cost at least $2750, but in view of their permanence and fire proof qualities they are cheaper than frame construction and more sanitary. The question of housing workmen has always been a vital one to all factories and this method of concrete construction is discussed in the current number of the Scientific American.

Rules and Regulations Governing Claims For Labor And Materials In Federal Buildings.

A circular of instruction has been issued by the Secretary of the Treasury to contracting officers of the Government regarding claims for material or labor in Federal building work. Its provisions are as follows.

1912.

Department Circular No. 45.
Office Supervising Architect.
Treasury Department.
Washington, Sept. 12, 1912.

To whom it may concern:

This statement is issued for the information of persons interested in claims for material and labor supplied and used in the prosecution of work on United States buildings under the control of this department. In reply to your recent inquiry, especial attention is invited to the paragraphs hereon, which are checked, thus:

Mechanic's Lien.

Federal buildings are not subject to mechanic's liens. There is no United States law permitting such a lien, and the several states having ceded to the United States their jurisdiction over Federal building sites, the lien laws of the states are not applicable.

The Heard Law.

The act of Congress of August 13, 1894, however, entitled "An act for the protection of persons furnishing materials and labor for the construction of public works" (as amended by the act of February 24, 1905), provides a remedy at law for the protection of any person, company, or corporation who has furnished material used in the construction or repair of any public work and payment for which has not been made. These laws are as follows:

"An act for the protection of persons furnishing materials and labor for the construction of public works.

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter any person or persons entering into a formal contract with the United States for the construction of any public building, or the prosecution and completion of any public work or for repairs upon any public building or public work, shall be required before commencing such work to execute the usual penal bond, with good and sufficient sureties, with the additional obligations that such contractor or contractors shall promptly make payments to all persons supplying him or them labor and materials in the prosecution of the work provided for in such contract, and any person or persons making application therefor, and furnishing affidavit to the department under the direction of which said work is being, or has been, prosecuted, that labor or materials for the prosecution of said work has been supplied by him or them, and payment for which has not been made, shall be furnished with a certified copy of said contract and bond, upon which said person or persons supplying such labor and materials shall have a right of action, and shall be authorized to bring suit in the name of the United States for his or their use and benefit against said contractor and sureties and to prosecute the same to final judgment and execution. Provided, That such action and its prosecutions shall involve the United States in no expense.

"Sec. 2. Provided that in such case the court in which such action is brought is authorized to require proper security for costs in case judgment is for the defendant.

"Approved August 13, 1894.

"An act to amend an act approved August 13, 1894, entitled 'An act for the protection of persons furnishing materials and labor for the construction of public works.'

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled 'An act for the protection of persons furnishing materials and labor for the construction of public works,' approved August 13, 1894, is hereby amended so as to read as follows.

"'That hereafter any person or persons entering into a formal contract with the United States for the construction of any public building, or the prosecution and completion of any public work, or for repairs upon any public building or public work, shall be required, before commencing such work, to execute the usual penal bond, with good and sufficient sureties, with the additional obligation that such contractor or contractors shall promptly make payments to all persons supplying him or them with labor and materials in the prosecution of the work provided for in such contract, and any person, company or corporation who has furnished labor or materials used in the construction or repair of any public building or public work, and payment for which has not been made, shall have the right to intervene and be made a party to any action instituted by the United States on the bond of the contractor, and to have their rights and claims adjudicated in such action and judgment rendered thereon, subject, however, to the priority of the claim and judgment of the United States. If the full amount of the liability of the surety on said bond is insufficient to pay the full amount of said claims and demands, then, after paying the full amount due the United States, the remainder shall be distributed pro rata among said interveners. If no suit shall be brought by the United States within six months from the completion and final settlement of said contract, then the person or persons supplying the contractor with labor and materials shall, upon application therefor, and furnishing affidavit to the department under the direction of which said work has been prosecuted that labor or materials for the prosecution of such work has been supplied by him or them, and payment for which has not been made, be furnished with a certified copy of said contract and bond upon which he or they shall have a right of action, and shall be, and are hereby authorized to bring suit in the name of the United States in the circuit court of the United States in the district in which said contract was to be performed and executed, irrespective of the amount in controversy in such suit, and not elsewhere, for his or their use or benefit, against said contractor and his sureties, and to prosecute the same to final judgment and execution: Provided, That where suit is instituted by any of such creditors on the bond of the contractor it shall not be commenced until after the complete performance of said contract and final settlement thereof, and shall be commenced within one year after the performance and final settlement of said contract, and not later. And provided further, That where suit is so instituted by a creditor or by creditors, only one action shall be brought, and any creditor may file his claim in such action and be made party thereto within one year from the completion of the work under said contract, and not later. If the recovery on the bond should be inadequate to pay the amount found due to all of said creditors judgment shall be given to each creditor pro rata of the amount of the recovery. The surety on said bond may pay into court, for distribution among said claimants and creditors, the full amount of the sureties' liability, to wit, the penalty named in the bond, less any amount which said surety may have had to pay to the United States by reason of the execution of said bond, and upon so doing the surety will be relieved from further liability. Provided, further, That in all suits instituted under the provisions of this act such personal notice of the pendency of such suits, informing them of their right to intervene as the court may order, shall be given to all known creditors, and in addition thereto notice of publication in some newspaper of general circulation, published in the state or town where the contract is being performed for at least three successive weeks, the last publication to be at least three months before the time limited therefor.'

"Approved February 24, 1905."

While the department will not undertake to construe these laws, it is deemed pertinent to draw attention to the followin points:

Minor Jobs.

These laws refer only to formal contracts. Where the contract price is less than $2,000 or when no work is to be performed at the government building or grounds, the department does not require a formal contract. Therefore, such minor jobs are not usually covered by such bonds as are contemplated by these laws.

Amount of Bond.

When a bond is taken it is usually in the penal sum of 50 per cent of the contract price.

Extent of Protection.

As to how far the protection afforded by such a contractor's bond extends, see Hill v. American Surety Co. et al. (200 U. S. 197), in which it is held that the protection of the contractor's bond extends not only to the immediate subcontractors for the contractor, but indefinitely to persons shown to have supplied material or labor entering into the work and who have not been paid.

Insolvent Surety.

Where the contractor's surety becomes insolvent before the contract is settled, the contractor is called upon to furnish an additional bond, conditioned the same as the original obligation and retroactive. If the contract has been completed, however, at the time the surety becomes insolvent, the department requires an additional bond in an amount only sufficient to insure the performance of the guarantees embodied in the contract (such as water-tightness of roofs, integrity of materials, work, etc.), it being held by the law officers of the department that the law as to the additional obligation for prompt payment for materials and labor was fully complied with by the taking of the original bond so conditioned, and that no obligation rests upon the department to require further security for the protection of such subcontractors.

Final Settlement.

The department treats as the date of final settlement mentioned in said acts the date on which the department approves the basis of settlement under such contract recommended by the supervising architect, and orders payment accordingly. (So far as known, the correctness of this view as to the true date of final settlement has not been decided by the courts.)

One Suit—Intervention.

It will be observed that the statutes provide that but one suit may be brought and that all claimants must intervene therein, and fixes the time within which such intervention must be had.

Priority.

Note also that the United States has a prior right of recovery upon such bond.

Court.

Under the provisions of the so-called judiciary act of March 3, 1911 (36 Stat. U. S., 1167), the United States circuit courts were abolished and their business imposed upon the United States district courts. Therefore, such suit would be brought in the United States district court for the district in which the work is located. (See the decision of the Supreme Court of the United States rendered December 4, 1911, in the case of the United States of America et al., plaintiff in error v. The Congress Construction Co., et al. (222 U. S., 199.)

Certified Copies—Affidavit.

A claimant who wishes to enter suit upon the bond of a contractor who has executed a formal contract and bond, and to be furnished with certified copies of such instruments, must file with the department the affidavit required by the act of August 13th, 1894 (as amended), setting forth that he has supplied material or labor in connection with the federal building and has not been paid therefor. If final settlement of such contract has not yet been made the claimant (unless he requires such a copy for use in an immediate action against the contractor alone, independently of the protection afforded by the additional obligation in such bond pursuant to said acts) must renew his application for such certified copies (if his need therefor still exists) five months after such date of final settlement (which will be communicated to the claimant when made). This postponement of the furnishing of the certified copies of the contract and bond for the suit upon the bond is because under said acts the claimant cannot sue the contractor and his surety until six months after such final settlement, and such copies are withheld for said five months because in the meantime the claim may be disposed of and the labor of making such copies be therefore avoided. If the United States should institute suit against said contractor within six months next following such final settlement, the claimant would be notified of such suit and the desired certified copy forwarded upon notification to the department of the renewal of the application therefor.

Privity.

As its legal advisers hold that said acts of Congress do not establish any privity between the United States and persons who have furnished materials and labor in connection with public works, so as to authorize the officers of the government to satisfy the claims of such persons from moneys due the contractor on the failure of the latter to pay his subcontractors, and as it is also held that no duty is imposed upon the officers of the government to secure the payment of subcontractors, under the additional obligation in the bond required by said laws, of amounts due from them to such material men, laborers, etc., the department, beyond taking such bonds in cases where formal contracts are entered into, will not undertake to recognize subcontractors or to be responsible for, or attempt to aid in the collection of, such claims against contractors for work on or in connection with federal buildings.

Withholding Payments.

Whenever conditions resulting from the contractor's failure to pay his subcontractors becomes so aggravated as to retard the progress of the job, the department takes measures to secure the proper prosecution of the work; but in general earned payments will not be withheld from contractors merely because of their failure to pay subcontractors.

Attempted Assignments.

Touching attempted assignments of contracts with the United States for federal building work, attention is invited to section 3737 of the Revised Statutes of the United States for the law relating to the transfer of government contracts or any interest therein. Also to the case of the Prairie State Bank v. the United States (164 U. S. 227), and to the cases cited in Gould and Tucker's "Notes on the Revised Statutes of the United States" under said section 3737, which law reads as follows:

"No contract or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States are concerned. All rights of action, however, for any breach of such contract by the contracting parties are reserved to the United States."

Usually formal contracts expressly prohibit the assignment thereof.

Power of Attorney to Indorse Checks.

The contractor may, if he chooses, however, give a power of attorney to indorse checks drawn to his order for government payments on account of his contract work. Upon the contractor's written request so to do the department will mail such checks to him in care of the person to whom such power of attorney is given. (Upon application a form for such power of attorney will be furnished.)

Legal Advice.

The department cannot undertake to adjust differences or determine controversies between contractors or subcontractors and persons furnishing material or labor, nor will the department give legal advice as to the best method of securing or collecting such claims. The department's practice with regard to such matters is fully stated here for the information of inquirers, but claimants must consult their attorneys for answers to questions involving the determination of legal points of procedure.

JAMES F. CURTIS,
Acting Secretary.

A MAN WITH A HEART.

The labor record of Hiram W. Johnson, Governor of the State of California, and Progressive candidate for the Vice-Presidency, is one of the most remarkable to be found in the annals of labor legislation. Governor Johnson does not tell the laboring man that he will provide for him wages without labor, if elected; but he does tell him that he will see that every honest man gets his honest due. In his belief this is a government controlled by a few, and he believes that the Progressive platform will meet many of the problems which has to do with injustice to people who labor.

Governor Johnson acknowledges no peer as a fighting man. Since he has been speaking in the East, through New York, Pennsylvania and other states, he has been recognized as a man of marvelous personality and mental strength. That was why he was able to get proper labor legislation in the State of California. After putting the Southern Pacific Railway Company's political machine out of order, he then began to construct proper labor legislation.

Some of the important things accomplished since January, 1911, in his state has been the prohibition of employment of miners under eighteen years of age between ten o'clock at night and five o'clock in the morning, the full-crew bill; a pay check bill prohibiting the payment of wages in any non-negotiable form; an employer's liability act, providing for workmen's compensation arising out of industrial accidents, and revision of the system of taxation whereby corporations bear their just burdens in state support.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $10,000. Architect, M. Dempnick, 722 Page St., S. F. Owner, M. Dempnick. The building will be erected on Page street near Steiner and has been designed to contain six apartments of four rooms and bath each. All suites will be equipped with wall beds. There will be steam heat and a vacuum cleaning system. Interior finish will be of pine with oak floors and some elm panels. The exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel. Cost not stated. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, C. A. Jordon. The building will be erected on a lot with a depth of 120 feet and a street frontage of 50 feet. There will be a total of 56 apartments which have been arranged in two and three room suites. There will be wall beds, steam heat, private baths, a vacuum cleaning system and other modern equipment. Interior finish will be of pine and hardwoods. All baths will be finished with Kompolite floors and walls. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $12,000. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building will be similar in design to several other apartment houses recently constructed by the same owners. There will be a total of 21 apartments of two rooms and bath each. The building will cover an area of 30x90 feet. Interior finish will be of pine and redwood throughout with some oak floors. There will be steam heat and wall beds. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house 6 story and base, brick and steel, $60,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, S. G. and Spencer C. Buckbee. The building will be erected on a corner lot and will contain a large number of two and three room apartments. All suites will have connecting baths and wall beds. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning system. Composition floors will be used in the bath rooms. There will be a large amount of tile used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel, $55,000. Architects, Faleu & Knoll, Hearst Bldg., S. F. Owner, J. H. Hirl. The building will be erected on an inside lot and will cover an area of 67½x120 feet. The interior will be arranged for a number of two and three room apartments, all of which will have connecting baths and wall beds. Interior trim will be of pine and hardwood. Baths will be finished in tile with composition flooring. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with terra cotta. Plans are in the hands of the owner, who is a well known contractor, and who will do the work by Day Labor.

SACRAMENTO, SACRAMENTO CO., CAL.—Apartment house, 7 story and base, brick and steel, $80,000. Architects, Cuff & Diggs, Sacramento. Owner, C. H. Dunn. The building will occupy a corner site and will contain in the neighborhood of 120 rooms which are to be arranged in two, three and four room suites. All suites will have connecting baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will probably be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $11,000. Architects, Rhodes & Marisen, 3372 16th St., S. F. Owner, F. E. Mersereau. This building has been mentioned here before when plans were first started. The first floor will be arranged for stores and the upper two floors will be subdivided into two and three room apartments. All suites will have wall beds and connecting baths. Interior finish will be of pine, redwood and elm. The exterior will be covered with shiplap and rustic. Plans are complete and ready for figures.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete and steel, $55,000. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, Julia Cronan. Plans will go out for figures this week for this work. The building will have a considerable street frontage and extends back a distance of 137½ feet. Office, lobby and housekeepers rooms will occupy the basement floor. The upper floors will be arranged for two and three room apartments. There will be steam heat, elevator service, wall beds, private baths, a vacuum cleaning system and garbage chutes. The exterior will be faced with pressed brick and stone.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel. Cost not stated. Architect, John Ettler, 604 Mission St., S. F. Owners, Bothin Estate. The present building at the northeast corner of Polk and Green streets is to be added to and made into a high-class apartment structure. The building has a frontage on Polk street of 170 feet and now contains stores only. Plans have been prepared for a four-story addition which will cost in the neighborhood of $100,000. Apartments will consist of two, three and four rooms each. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owners, A. W. Ross and Mrs. Frances Zahn. The preliminary plans for this building show a total of 110 rooms, which are to be arranged in two and three room suites. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior will probably be faced with pressed brick. The architect is still engaged on the preliminary plans. Complete details will be given as the plans progress.

LOS ANGELES, CAL. — Apartment house, 2 story and base, frame. Cost not stated. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owner, Robert Nimmo. The building will be 62x126 feet and has been arranged to contain three stores on the first floor and ten two-room apartments on the upper floor. The interior will be finished in pine and redwood. There will be steam heat, wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN PEDRO, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, James W. Hellman. The building will be 90x100 feet and will contain 33 apartments, which have been arranged in two and three room suites with private baths. There will be steam heat and wall beds. The interior will be finished in pine and redwood with some oak floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Contracts Awarded.

VANCOUVER, B. C. — Apartment house, 10 story and base. Class A construction, $600,000. Architect, W. M. Dodd, Canadian Bank of Commerce Bldg., Vancouver. Owners, Telford Bros. Contractors, J. J. Frantz Construction Co., Arts and Crafts Bldg., Vancouver. Contract price, $600,000.

PASADENA, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick, $16,000. Architect, none. Owners, Henry Gray and Joseph Rhodes, Central Bldg., L. A. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price, $16,000.

LONG BEACH, LOS ANGELES CO., CAL. Apartment houe, 1 story and base, reinforced concrete, $50,000. Architect's name not given. Owner, S. P. Bradford. Contractors, Pacific States Investment Co., 107 So. Broadway, L. A. Contract price, $50,000.

STOCKTON, SAN JOAQUIN CO., CAL.

E. H. Williams Chalmer Munday

Munday & Williams

Attorneys-at-Law

Special Attention Given to Building Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

—Apartment house, 4 story and base, brick and steel, $100,000. Architect, Glenn Allen, 1496 Golden Gate Ave., S. F. Owner, Samuel Henry. The following contracts have been awarded for the construction of this building: Structural steel to the Builders' Iron Works, Stockton, $5,500; brick work to A. W. Cowells, Stockton, $8,940; ornamental iron work to Ralston Iron Works, San Francisco, $2,100; marble work to the American Marble and Mosaic Co., San Francisco, $2,300; painting to L. A. Danner, Stockton, $3,170; carpentry and mill work to Continental Fireproofing Co., San Francisco, $21,250; plumbing to Pahl & Harr Co., Stockton, $11,204; sheet metal work to Brandt Bros., Stockton, $2,250; tile work to A. P. Fisher Tile and Marble Co., Stockton, $1,184. A contract has also been awarded to A. W. Cowells of Stockton by the same architect for the basement work in connection with the construction of a four-story and basement brick and steel apartment house to be erected in Stockton for the Home Builders' Investment Co. This contract is for $8,295.

BANKS.

BERKELEY, ALAMEDA CO., CAL.—Bank, 1 story ann base, brick and steel, $20,000. Architect, C. M. Cook, 613 Market St., S. F. Owners, Berkeley Bank of Savings. The building will be 35x100 feet and is designed in the classic style. Interior has been arranged for work space, public office and private offices. The interior finish will be of hardwoods and tile with some ornamental plaster and bronze. A central heating system will be installed. A concrete vault will be provided for in the basement. The exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and will be out for figures shortly.

BRIDGES AND DAMS.

BERKELEY, ALAMEDA CO., CAL.—Bank, 1 story and base, brick and steel, $20,000. Architect, C. M. Cook, 613 Market St., S. F. Owners, Berkeley Bank of Savings. The building will be 35x100 feet and is designed in the classic style. Interior has been arranged for work space, public office and private offices. The interior finish will be of hardwoods and tile with some ornamental plaster and bronze. A central heating system will be installed. A concrete vault will be provided for in the basement. The exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and will be out for figures shortly.

CHIPPS ISLAND, CONTRA COSTA CO., CAL.—Bridge, steel, railroad and highway, $1,600,000. Engineers, Waddell & Harrington, Kansas City, Mo. Owners, Oakland, Antioch and Eastern R. R. Co. The management have announced the selection of Engineers Waddell & Harrington of Kansas City to prepare plans for the $1,600,000 bridge which is to span Suisun Bay at Chipps Island. The railroad company will pay $1,000,000 of the cost and surrounding counties are to pay $600,000. Permission to construct this bridge has been granted by the War Department.

HANFORD, KINGS CO., CAL.—Bridges, concrete and frame. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. The Supervisors have authorized the construction of three new bridges over the Kings River in Kings County. Plans for the work are now being prepared. Bids will be called within a short time. The total cost of the three bridges is not to exceed $10,000.

Contracts Awarded.

LOS ANGELES HARBOR, LOS ANGELES CO., CAL. Wharf, reinforced concrete, $500,000. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Contractors, Healey-Tibbitts Co., San Francisco. Contract price, $497,408. Plans and specifications are nearly complete and will shortly be sent to Washington for approval for a large amount of work to be done under the direction of the Constructing Quartermaster's Office at Fort Mason. These plans include an electric lighting system at Fort Mason, with a concrete sub-station, 20x26 feet, switchboard and switchboard equipment, pole lines and underground distributing system, transformers (Alameda pattern) ornamental lamp posts and the wiring of all officers' quarters at the post and fixtures for the same. This work will cost about $16,000.

Plans are also nearly complete for a fuel oil system at Fort Baker. Six and four-inch wrought iron pipe will be used. There will be two reinforced concrete reservoirs, one of 100,000 gallons and one of 10,000 gallons, and pump house equipment. Cost about $17,000. The sum of $7,000 additional is allowed for oil burners.

A 10-inch water main from the reservoir to the 6-inch distributing system at Fort Scott is planned together with a 10-inch by-pass around the reservoir. Estimated cost $4,000.

An asphalt road from Letterman Hospital to the National Cemetery is to be constructed with a concrete base and 4-inch top and binder is to be constructed at a cost of $25,000. This road is 25 feet wide. Survey has also been made for the extension of the 13th Avenue Boulevard through the Marine Hospital grounds connecting with the Presidio road system. Cost is estimated at $16,000.

The old rock crushing plant at Angel Island is to be remodeled in place of constructing a new plant. There will be a 200-ton barge, new 30-horse power motor, bunkers, etc. Cost about $6,000.

A contract for the alteration to the heating system in General Murray's quarters at Fort Mason has been awarded to Gilley-Schmid Co. of this city. The contract for the oil burning equipment for the new kitchen building at the Letterman Hospital has been awarded to Holbrook, Merrill & Stetson, using the L. T. Jonnson system. Contract price is about $570.

PROPOSALS FOR SEWERS.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 30th day of October, 1912,** for doing the following street work including the furnishing of the necessary labor and materials therefor, to wit:

(1) That a 12-inch vitrified, salt-glazed, iron-stone pipe sewer with 10 Y branches and 1 brick manhole with cast-iron frame and cover and galvanized wrought-iron steps be constructed from the point of intersection of the southerly line of Bosworth street and the center line of Rottick street southwesterly for a distance of 190 feet to a point on the centerline of Rottick street.

(2) That an 8-inch, vitrified, salt-glazed, ironstone pipe sewer with 10 Y branches 1 monolithic tapo trap-hole with cast iron frame and cover and 2 brick manholes with cast iron frames and covers and galvanized wrought iron steps be constructed along the center line of Collingwood street from the southerly line of Twentieth street to a point 222 feet 6 inches southerly therefrom.

(3) That a twelve (12) inch, vitrified, salt-glazed, ironstone pipe sewer with one (1) brick manhole with cast-iron frame and cover and galvanized wrought iron steps be constructed along the center line of Goettingen street between the northerly and southerly lines of Woolsey street, and that an eight (8) inch vitrified, salt-glazed, ironstone pipe sewer be constructed along the center line of Woolsey street between the center and westerly lines of Goettingen street.

Note: Separate proposals will be received for each of the above propositions.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of October, 1912,** for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) That Precita avenue between Forida and Alabama streets, except on that portion required by law to be kept in repair by the railroad company having tracks thereon, be improved by the construction of granite curbs, and an asphalt pavement, consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, on the roadway thereof, where not already constructed.

(2) That the crossing of Army street and Noe street be improved by the construction of granite curbs and artificial stone sidewalks on the angular corners thereof, and by paving the roadway with an asphalt pavement, consisting of a 2-inch asphaltic wearing surface, and by constructing brick cesspools (catchbasins) with cast-iron frames, grating and traps and 10-inch vitrified, salt-glazed, ironstone pipe culverts on the southwesterly northwesterly and southeasterly angular corners thereof.

Note: Separate proposals will be received for each of the above propositions.

SCHOOLS.

OAKLAND, CAL. Schools; 1 and 2 story and base, reinforced concrete and brick, $90,000 and $61,000. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be received on November 18th, for the construction of the Park and Division School, a two-story and base, brick and concrete structure, estimated to cost $61,000 and for the Carrington Avenue School concrete and brick building and base, reinforced concrete building estimated to cost $90,000. Bids will be taken on the general construction with blanks of the alternative propositions. Complete plans and specification together with further particulars can be secured from the Supervising Architect, City Hall Annex, Oakland.

SAN FERNANDO, LOS ANGELES CO., CAL. School, 1 story and base, reinforced concrete, $40,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School District. The domestic science building will be two stories, 137x60 feet, with a base to contain the heating plant. The manual arts building will be a one-story structure 92x88 feet. The construction will be practically fireproof. There will be a concrete foundation, reinforced concrete walls, cement floors and partitions in the first story of the domestic science building. The second story will be frame. The shop building will have a cement floor. Both buildings will have tile roofs, pine trim, plumbing and electric wiring. Plans are being prepared.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—Domestic Science building, 1 story and base, brick and concrete. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Huntington Park Union High School District. The building will be 39x91 feet. The basement will contain a large cafeteria and the main floor is arranged for a number of special rooms devoted to domestic science. There will be a central heating system. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

GLENDALE, LOS ANGELES CO., CAL. School, 1 story and base brick. Cost not stated. Architects, Schwertzen & Fairchild, 405 Maryland Ave., Glendale. Owners, Glendale School District. The building will contain four class rooms and principal's office. The time for opening bids has been extended to November 7th. The exterior of the building will be faced with pressed brick. Plans can be obtained from the architects or from C. S. Westlake, Clerk of the Board of Education.

LOS ANGELES, CAL. School, 3 story and base, brick and concrete, $250,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, City of Los Angeles. Bids for the general construction of the Boyle Heights Intermediate School will be opened on November 11th. The division of the plans involves the omission of the boiler house, plunge and gymnasium and changes in the specifications. The building will be a three story and basement structure, 224x102 feet with concrete foundation, tile basement, hopestry brick exterior facings, tile and concrete and wood floors, concrete stairways and corridor floors, brick and metal lath partitions, Oregon pine trim throughout and tile roofs, skylights, structural steel roof framing. The electric wiring is included in the general contract but will be taken later on. The heating, ventilating and engineering system. The cost is $250,000 available for the building.

"WAINWRIGHT"

GALVANIZED

STEEL CORNER BAR

FOR PROTECTING EDGES OF CONCRETE CURBS STEPS, COLUMNS, ETC.

The Only Effective

CONCRETE EDGE PROTECTOR

Offered to the Contracting Public

WAINWRIGHT PATENTS—March 9, 1897.
November 22, 1898. May 5, 1903.
March 26, 1907. Aug. 29, 1907.
Aug. 2, 1910.

This bar has been in public use for more than ten years as the main feature of the

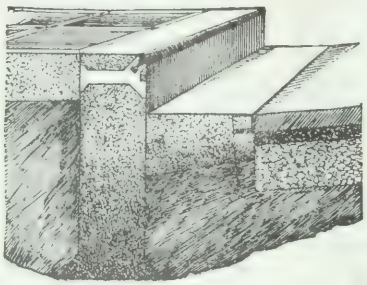
Wainwright Steel-Bound Concrete Curb

THE BEST IN THE WORLD

OVER THREE MILLION FEET

In Use in More Than Three Hundred Cities in the United States

ABSOLUTELY NON-BREAKABLE--CHEAPER THAN GRANITE



Handsomer Than Granite and much stronger. Continuous In Construction, hence never out of line. GALVANIZED STEEL CORNER BAR Prevents Chipping or Breaking on Edges. This Curb is Mechanically Perfect and Unequalled for Curved Corners.

This Curb Will Stand Harder Use And Last Ten Times As Long As Plain Concrete Curb

CONTRACTORS can make money by laying this curb.
CITY ENGINEERS can save money by specifying it.
ARCHITECTS are invited to read pages 242 and 243 "Sweet's Index."

OAKLAND AND ALAMEDA COUNTY.

BANK—1 story and base, brick and steel, $20,000. Berkeley, Alameda Co., Cal. Architect, C. M. Cook, 613 Market St., S. F. Owners, Berkeley Bank of Savings. The building will be 35x100 feet and is designed in the classic style. Interior has been arranged for work space, public office and private offices. The interior finish will be of hardwoods and tile with some ornamental plaster and bronze. A central heating system will be installed A concrete vault will be provided for in the basement. The exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and will go out for figures shortly.

AUDITORIUM—2 story and base. Class A construction, $500,000. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids for the excavating and concrete pile work for this building were opened on October 21st. Foster-Vogt Co., S. F., were low at $66,897 and will probably be awarded the contract. For a complete list of all figures see under Oakland and Alameda County in this issue.

HOTEL ADDITION—5 story and base, reinforced concrete, $175,000. Berkeley, Alameda Co. Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Shattuck Hotel Co. The construction of this addition will complete the carrying out of the original plans for this hotel. The new portion will double the present capacity of the building. Construction will be fireproof throughout. There will be steam heat, probably from the present plant, elevator service and a vacuum cleaning system. The interior will be finished in pine, redwood and hardwoods. The exterior of the building will be faced with cement plaster. Plans are being prepared and work will be undertaken by the first of the coming year.

FLATS—2 story and base, frame, $7,000. Berkeley, Alameda Co., Cal. Architect, Joseph J. Rankin, 2705 Virginia St., Berkeey. Owner's name withheld. The building has been designed to contain three modern five and six room flats. Interior finish will be of pine and redwood with some oak floors. There will be open fire places. Mantels will be of tile or brick. Tile will be used in the baths. The exterior of the building will be covered with cement plaster on metal lath and shingles. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, $7,500. Oakland, Cal. Architect, John Carson, Bacon Bldg., Oakland. Owner, J. Hartery. The building will contain four flats of four and five rooms each with baths. Interior trim will be largely of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. The exterior of the building will be covered with brick veneer and rustic. Plans are in the hands of the owner who is now taking figures on the work.

STATION—1 story, frame. Cost not stated. Oakland, Cal. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, Oakland, Antioch and Eastern R. R. Co. he building will be erected at Shafter and 40th streets. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owner, Henry Lundgren, 1011 Grayson St., Berkeley. The building has been designed for an eight-room dwelling with bath, sleeping porch and laundry. The interior will be finished in ine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $5,000. Alameda, Alameda Co., Cal. Architect, C. M. Cook, 613 Market St., S. F. Owner, H. Harron. The building will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms and library. There will be furnace heat, open fire places and a Ruud water heater. Tile will be used in the bath room and kitchen. Mantels will be of brick. The exterior of the house will be covered with cement plaster. Plans are being prepared.

RESIDENCE — 2 story and base, frame, $4,000. Aalmeda, Alameda Co., Cal. Architect, C. M. Cook, 613 Market St., S. F. Owner, J. B. Ough. The dwelling has been designed for a seven room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and a Ruud water heater. Several of the rooms will have open fire places and tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

BUNGALOWS—2, 1 story and base, frame, $2,000 each. North Oakland, Cal. Architect, C. M. Cook, 613 Market St., S. F. Owner, Joe Hinch. These bungalows will be built for sale. Plans are now being prepared.

Contracts Awarded.

SCHOOLS—2 buildings, brick and steel and concrete. Costs as follows. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Large & Bergstrom, S. F., were awarded the contract for the Emerson and Longfellow Schools, both over $100,000, and Moore & Burlingtme the contract for the Washington School. For a complete list of all bids submitted on these buildings see under Oakland and Alameda County in this issue.

Bids For Three New Oakland Schools.

Work on The Washington, Longfellow and Emerson Schools Attracts A Large Number of Figures.

A total of 24 bids were opened by the Oakland Board of Education at the regular Monday Evening session, October 21st. Eight bids were received for the Washington School, seven for the Emerson and nine for the Longfollow. Owing to the overlapping of the deduction of the several propositions submitted on heating systems and electric work, it is impossible to determine at this time the lowest bids.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BRIDGE—Steel, railroad and highway, $1,600,000. Cripps Island, Contra Costa Co., Cal. Engineers, Waddell & Harrington, Kansas City, Mo. Owners, Oakland, Antioch and Eastern R. R. Co. The management are announced the selection of Engineers Waddell & Harrington of Kansas City to prepare plans for the $1,600,000 bridge which is to span Suisun Bay at Cripps Island. The railroad company will pay $1,000,000 of the cost and surrounding counties are to pay $600,000. Permission to construct this bridge has been granted by the War Department.

RESIDENCE—2 story and base, frame, $4,000. Kensington Tract, Contra Costa Co., Cal. Architect, John Hudson Thomas First National Bank Bldg., Berkeley. Owner, Herbert Offield The dwelling is designed for an eight-room house with bath and sleeping porch largely of pine. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors will be used in some of the rooms. Bath room will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

BRIDGES—Concrete and frame. Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The Supervisors have authorized the construction of three new bridges over the Kings River in Kings County. Plans for the work are now being prepared. Bids will be called within a short time. The total cost of the three bridges is not to exceed $10,000.

LOS ANGELES AND SOUTHERN CALIFORNIA.

REFRIGERATING PLANT—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owners, Merchants' Ice and Cold Storage Co. The building will be of semi-fireproof construction with a concrete foundation 5x10 feet. There will be a complete steel frame and brick walls. Asbestos and mineral wool insulation will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL—4 story and base, reinforced concrete, $80,000. Long Beach, Los Angeles Co., Cal. Architects, Pacific States Investment Co., 117 So. Broadway, L. A. Owners, G. W. McLester, C. R. Parsons and S. P. Bradford. The building will be 100x153 feet. The first floor will contain seven stores, hotel office and lobby. The upper floors have been arranged for 110 guest rooms, 55 baths and an open air cafe. There will be steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine. The exterior of the building will be faced with white enameled brick. The work will be done under the percentage basis and a cost guaranty by the Pacific States Investment Co.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owners, A. W. Ross and Mrs. Frances Zahn. The preliminary plans for this building show a total of 110 rooms, which are to be arranged in two and three room suites. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior will probably be faced with pressed brick. The architect is still engaged on the preliminary plans. Complete details will be given as the plans progress.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owner, Robert Nimmo. The building will be 62x126 feet and has been arranged to contain three stores on the first floor and ten two-room apartments on the upper floor. The interior will be finished in pine and redwood. There will be steam heat, wall beds and connecting baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Pedro, Los Angeles Co., Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, James W. Hellman. The building will be 90x100 feet and will contain 33 apartments which have been arranged in two and three room suites with private baths. There will be steam heat and wall beds. The interior will be finished in pine and redwood with some oak floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

TERMINAL STATION—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Architectural Dept. Pacific Electric Railway, Los Angeles. Owners, Pacific Electric Railroad Co. The ground area to be utilized is 130x148 feet in size. The station will be of brick construction. 18x130 feet, a new steel bridge will be erected connecting the old terminal station with the new. There will also be a series of open platforms erected. Plans are being prepared.

SCHOOL—1 story and base, reinforced concrete, $40,000. San Fernando, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School District. The domestic science building will be two stories, 137x69 feet, with a basement to contain the heating plant. The manual arts building will be one-story structure, 92x88 feet. The construction will be practically fireproof. There will be a concrete foundation, reinforced concrete walls, cement floors and partitions in the first story of the domestic science building. The second story will be frame. The shop building will have a cement floor. Both buildings will have tile roofs, pine trim, plumbing and electric wiring.

DOMESTIC SCIENCE BUILDING—1 story and base, brick and concrete. Cost not stated. Huntington Park, Los Angeles Co., Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Huntington Park Union High School District. The building will be 39x91 feet. The basement will contain a large cafeteria and the main floor is arranged for a number of special rooms devoted to domestic science. There will be a central heating system. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

SCHOOL—1 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Schwertzen & Fairchild, 405 Maryland Ave., Glendale. Owners, Glendale School District. The building will contain four class rooms and principal's office. The time for opening bids has been extended to November 7th. The exterior of the building will be faced with pressed brick. Plans can be obtained from the architects or from C. S. Westlake, Clerk of the Board of Education.

SCHOOL—3 story and base, brick and concrete, $250,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, City of Los Angeles. Bids for the general construction of the Boyle Heights Interfediate School will be opened on November 14th. The revision of the plans involves the omission of the boiler boiler house, plunge and gymnasium, and changes in the specifications. The building will be a three-story and basement structure, 225x192 feet, with concrete foundation and basement, tapestry brick exterior facing, slate roof, concrete and wood floors, maple finish floors, concrete stairways and corridor floors, brick and metal lath partitions, Oregon pine trim, marble and tile finish in toilets, skylights, structural steel, vacuum cleaning. The electric wiring is included in the general contract. Bids will be taken later on the plumbing, heating and ventilating, and program clock system. The sum of $250,000 is available for the building.

STORES AND OFFICES—10 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Shirley Ward and associates. The building is to be erected on Olive street just north of 7th, and will cover a site 50x165 feet. Negotiations for the leases are now underway and none of the construction details will be determined until the leases are closed. Full particulars will be printed later.

STORES—1 story and base, brick, $20,000. Los Angeles, Cal. Architect, none. Owner, A. L. Hill 432 Mason Bldg., L. A. The building will cover an area of 100x172 feet and will contain ten stores. There will be a cement floor and patent store fronts. The exterior will be faced with pressed

brick. Plans are being prepared and when complete the work will be done by Day LaLbo.r

THEATRE—3 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Little Theatre Co. The main auditorium will have a seating capacity of about 400 people. Besides the theatre proper there will be handsomely finished quarters for the Egan Dramatic School. Construction will be fireproof with a steel frame, brick exterior walls and terra cotta interior partitions. There will be steam heat. The exterior will be faced with pressed brick. Plans are now being prepared.

HOTEL—12 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owners, Robert Marsh and Hugh W. Bryson. The proposed building will cover an area of 50x90 feet. Present plans show 15 guest rooms and 6 baths to the floor. Negotiations for a lease are pending and drawings will not be completed until terms are arranged. Plans have also been prepared for a loft building on the same site. Hugh W. Bryson, one of the owners, is manager of the F. O. Engstrum Co.

POST OFFICE ELEVATORS—Cost not stated. San Diego, Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, U. S. Government. Bids will be opened on November 1st for furnishing and installing two passenger elevators in the United States buildings, one at San Diego and one at Bellingham, Wash. Full particulars can be secured from the Supervising Architect at Washington, D. C.

STORES AND LOFTS—6 story and base reinforced concrete. Cost not stated. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owners, Chapman Bros. The building will cover an area of 50x100 feet and will be of reinforced concrete construction throughout including the roof and floors. Both freight and passenger elevators will be installed. There will be metal sash and frames and fireproof doors. The exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

STORES AND OFFICES—3 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architects, Krempel & Erkes, Henne Bldg., L. A. Owners, Maier Brewing Co. There will be three stores on the first floor and a number of modern offices on the upper floors. There will be an automatic elevator, steam heat and hot and cold running water. The exterior will be faced with pressed brick. Plans are now being prepared.

STORES AND OFFICES—13 story and base. Class A construction, $400,000. Los Angeles, Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Globe Co. A valuable corner at the southwest intersection of Spring and Franklin streets has been secured for this building. As yet only preliminary plans have been made and no details have been determined. As soon as these details have been settled upon a complete description will appear in these columns.

STORES AND OFFICES—15 story and base. Class A construction. Cost not stated. San Diego, Cal. Architect, J. Martyn Haenke, Broadway Central Bldg., L. A. Owners' names withheld. The architect has just been commissioned to prepare plans for this work, and it will be some little time before information is received relative to the details of the building. The site on which the building is to be erected is 100x125 feet. The names of the owners will be made public in a few days.

STORES AND LOFTS—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, M. J. Connell. The building will cover an area of 40x143 feet. There will be concrete stairways, metal lath partitions, steam heat and elevator service. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans for the work are complete and figures will be taken at once.

Contracts Awarded.

Contractor, W. F. Eden, Orange, general construction, $21,017. Machinery and Electric Co., L. A., heating and ventilating, $1,404.

SEATTLE AND WASHINGTON.

GARAGE—1 story and base, reinforced concrete, $22,000. Seattle, Wash. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, James Plummer. There is at present a one-story structure on this site which will be altered and two additional stories added. The entire first floor will be used for sales rooms and offices. Steam heat will be installed and a large freight elevator. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

GARAGE—1 story and base, reinforced concrete, $25,000. Seattle, Wash. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, W. I. Roe. The building has been designed for a commercial garage and will cover an area of 121x121 feet. The location is the corner of 12th and Union streets. There will be a cement floor and special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Metal window sash and frames will be used. Plans are now being prepared.

HOTEL—11 story and base. Class A construction. $800,000. Vancouver, B. C. Architects, Painter & Swales, Metropolitan Bldg., Vancouver. Owners, Vancouver Hotel Co. The building will have a complete steel frame with exterior walls of reinforced concrete. Floors and stairways will be of concrete. Interior partitions will be fireproof. The central portion of the building will be 11 stories high with wings on either side. There will be three passenger elevators and one freight. Steam heat and all other mod-

ern conveniences will be installed. The exterior will probably be faced with pressed brick and terra cotta. Plans are now out for figures.

LIBRARY—2 story and base, reinforced concrete, $35,000. Seattle, Wash. Architects, W. Marbury and Harlan Thomas, associated, Somervell Bldg., Seattle. Owners, City of Seattle. Preliminary plans for this building have been completed and are now in the hands of the Carnegie people for approval. Working drawings will be completed on receipt of word from New York.

HOSPITAL—2 tory and base, reinforced concrete, $100,000. Seattle, Wash. Architect, Daniel Huntington, Seattle, Owners, Anti-Tuberculosis Hospital Association. Plans will be ready for figures in sixty days for the first unit of this group, which will be two stories high; two, two-story hospitals; four, two-story open air pavilions, and a two-story power house.

APARTMENT HOUSE—6 story and base, reinforced concrete, $75,000. Vancouver, B. C. Architect, T. H. Bamforth, Riggs-Selmar Bldg., Vancouver. Owner's name withheld. The building will cover an area of 50x115 feet. There will be in the neighborhood of 75 apartments, which are to be arranged in suites of two and three rooms each. All apartments will have wall beds and connecting baths. Plans call for steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

BRIDGES—Steel and concrete. Cost not stated. Chehalis, Lewis Co., Wash. Engineer, County Surveyor, Chehalis. Owners, Lewis County. The County Surveyor, John Ward, is engaged in locating the sites for several new bridges which are to be erected shortly from funds recently provided by a bond election. None of the details of construction are available at this time.

LIBRARY—1 story and base, concrete and stone, $10,000. Auburn, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, City of Auburn. This work has been mentioned here before. Plans have been completed and the Library Trustees are taking figures for the construction. A central heating system will be installed. The exterior will be faced with pressed brick and stone.

Contracts Awarded.

STORES AND OFFICES—2 story and base, reinforced concrete, $50,000. Wenatchee, Wash. Architect, G. A. Creutzer, Haight Bldg., Seattle. Owners, Tuper and Freeman. Contractor, Geo. C. Dietrich, Globe Bldg., Seattle. Contract price, $50,000.

APARTMENT HOUSE—10 story and base. Class A construction, $600,000. Vanvouver, B. C. Architect, W. M. odd, Canadian Bank of Commerce Bldg., Vancouver. Owners, Telford Bros. Contractors, J. J. Frantz Construction Co., Arts and Crafts Bldg., Vancouver. Contract price, $600,000.

LODGE HALL—7 story and base, steel and conerete, $200,000. Seattle, Wash. Architect, John Carrigan, Oriental Bldg., Seattle. Owners, Elks' Hall Association. Contractors, Puget Sound Bridge and Dredging Co., Central Bldg., Seattle. Contract price, $200,000.

BRIDGE—Concrete and steel. Cost not stated. Bellingham, Wash. Engineer, County Surveyor, Bellingham. Owners, City of Bellingham. Contractor, W. G. Hyatt, Arlington, concrete and earth approaches for Nooksack Bridge. Contract price, $12,554.92.

PORTLAND AND OREGON.

GARAGE—2 story and base, reinforced concrete, $15,000. Portland, Ore. Architect not selected. Owner, William Reidt, Portland. A site for this building has just been purchased. The structure will cover an area of 100 square feet and is to be designed for a commercial garage. There will be a cement floor, special storage tanks for gasoline and metal window sash and frames. Sales rooms and offices will occupy the front portion of the building. The exterior will be faced with cement plaster. Plans will be prepared at once.

STORES—2 story and base, brick. Cost not stated. Portland, Ore. Architect, C. A. Duke, Failing Bldg., Portland. Owner's name withheld. The first floor of this building will be arranged for retail stores and the upper floor for modern offices. There will be steam heat and patent store fronts. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

MARKET—1 story and base, reinforced concrete, $20,000. Portland, Ore. Architect, City Building Inspector, Portland. Owners, City of Portland. This work has been mentioned here several times before. Detail plans are now complete and show a structure in the Mission style which provides for 24 booths and space for 111 wagons. The exterior will be faced with cement plaster. Plans are nearly complete and bids will be called for before the end of the month.

RAILROAD STATION—1 story and base, brick, $20,000. Eugene, Ore. Architect, Chief Engineer L. B. Wickersham, care of Oregon Electric R. R. Co., Portland. Owners, Oregon Electric R. R. Co. The building will be 30x130 feet. The exterior will be faced with pressed brick. A large ornamental marquis will be erected. Engineer Wickersham announces that working drawings are nearly complete and that figures will be called for shortly.

APARTMENT HOUSE—3 story and base, brick and steel, $100,000. Portland, Ore. Architects, Root & Hoose, Commercial Bldg., Portland. Owners' names withheld. The building will cover a site of 120 feet square and is to be arranged around an open court 36x60 feet. There will be a number of large family apartments of six and seven rooms besides bachelor suites. All apartments will have sleeping porches, private bath and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. The design is in the Tudor Gothic style. Plans are being prepared and will be ready for figures shortly.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick and steel, $26,000. Portland, Ore. Architects, McNaughton & Raymond, Concord Bldg., Portland. Owners, Blanchard and Clemson. Contractors, brick work, Wright & Branch; carpentry, John Almeteer; heating, Kendall Heating Co., and plumbing, I. P. Arnold.

BREWERY ADDITION—Brick construction, $12,000. Portland, Ore. Architect, Joseph Jacoberger, Board of Trade Bldg., Portland. Owners, Gambrinus Brewery Co. Contractors, Freeberg Bros., Oregonian Bldg., Portland. Contract price, $12,000.

REFRIGERATING PLANT—1 story and base, brick and steel, $15,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Bambrines Brewing Co. Contractors, Friber Construction Co., Portland. Contract price, $15,000.

BUILDING RECORD IN WESTERN CANADA.

Edmonton.

That building operations in Edmonton will aggregate more than $14,000,000 during the present year is the opinion of those in close touch with Edmonton's year of progress in the line of new construction. September permits aggregated $2,023,075, as compared to $369,970 for the same month of 1911. The year's total to October 1 aggregates $12,274,551, compared to $3,076,750 for the same period of last year. Skilled workers are scarce and it is hard for the contractors to keep full crews on a job. There is also trouble in keeping up delivery of building materials. This holds back work considerably. The fault for the non-arrival of supplies is laid to the doors of the railroads, which are said to be very slow in handling deliveries.

Calgary.

Calgary building permits for the first eight months of this year total close to sixteen million dollars, breaking all previous records. The actual total of the building permits from January to August, inclusive, of this year is $15,861,326, more than $5,000,000 ahead of the first eight months of last year, when the figures for the same period were $10,860,978.

The record for August, 1912, is $4,170,360, for 314 buildings, and for August, 1911, the figures were $930,210 for 268 permits. Calgary bank clearings for August of this year show an increase of more than $7,000,000, as compared with the same month of last year.

Winnipeg.

Building permits for the year in Winnipeg are more than two millions short of the figure set for the 1912 mark, but if a fair average for the next two months is maintained, there seems no reason why they should not reach $20,000,000 before January 1, 1913. There are a number of buildings in sight, though unless they are commenced shortly, little more than the foundation will be attempted this year.

During the month of September, 1912, 67 building permits were issued to the value of $101,035, as compared to September, 1911, with 26 permits to the value of $84,185. This makes the nine months returns total $1,414,113, as compared to $911,477 for the same period in 1911.

CANAL COMPANY ASKS PERMIT FOR BOND ISSUE.

The State Railroad Commission has taken under consideration the application of the Sutter Butte Canal Company for permission to issue $129,000 6 per cent bonds. At the hearing on the application the company's Vice President, W. M. Sheldon, and the Chief Engineer, H. T. Corey, testified that $52,000 of the new bonds were to be used for refunding a prior bond issue and $77,000 worth were to be sold to obtain funds for improvements and construction.

Sheldon said that since the organization of the company in January, 1907, the capital stock, par value $1,250,000, had been used to acquire the Butte County Canal Company and the assets of the Sacramento Valley Farms Company.

CIVIL SERVICE EXAMINATIONS.

The United States civil service commission announces that the examinations listed below will be held in San Francisco at an early date.

Application blanks and further information relative to the examinations may be obtained from the secretary twelfth civil service district, room 241, Post Office Building.

Alloy chemist, male, bureau of miner. salary $2400 to $3000 per annum.

Junior alloy chemist, male. bureau of mines, salary $1500 to $1800 per annum.

Land law clerk, salary $900 to $1600 per annum.

Stenographer and typewritter, male, departmental service, salary $900 per annum.

Mine surgeon, bureau of mines, salary $2000 to $3000 per annum.

Metallurgical engineer, male, bureau of mines, salary $1800 to $3000 per annum.

RAILROAD BRIDGE NOT A MONOPOLY.

SACRAMENTO, Oct. 25.—Apprehension lest the permit granted the Oakland, Antioch and Eastern Railroad for a bridge across Suisun Bay at Chipps Island would give that road a monopoly was cleared away today by the import of a telegram received by the Chamber of Commerce from Robert Shaw Oliver, Acting Secretary of War. at Washington.

The message reads as follows:

Mr. S. Glen Andrus, Chamber of Commerce, Sacramento, Cal.—Replying to your wire of October 22d, Oakland, Antioch and Eastern Railway Company will be required to incorporate in the instrument of approval of plans for a bridge across Suisun Bay a provision permitting its use by other railroads upon reasonable compensation. Confimatory letter follows. ROBERT SHAW OLIVER.

Acting Secretary of War.

Washington, D. C., October 25, 1912.

It has been intimated in dispatches from Washington that the permit recently granted the railroad by the War Department did not insist upon the sharing of the bridge by other lines. To settle all doubts and clear up the confusion that had arisen. Secretary Andrus wired Acting Secretary Oliver a few days ago asking the true status of the bridge matter. Oliver's telegram this morning is the result.

THE REQUIREMENTS OF SAND AND LIMESTONE FOR GLASS MAKING.

The United States Geological Survey has received so many requests for information concerning glass sand that the stock for free distribution of the principal special bulletin on this subject has been exhausted. The Survey has therefore republished, in the advance chapter from Mineral Resources for 1911 on "Glass Sand, Other Sand, and Gravel," by E. F. Burchard, the essential facts given in the former publications, although there has been no opportunity since 1906 for supplementary field work in the areas described nor for new field work in other areas.

During 1905 and 1906 several important glass-manufacturing districts were visited by Survey geologists, and careful investigation has been made of the sands and other raw materials used in the manufacture of glass. The results of this work are summarized in Mr. Burchard's report.

The data were derived from a brief study of the glass sands of certain States in the Mississippi basin and West Virginia. Glass manufacture admits of such slight variations in the character of its raw materials that the materials described are regarded as representing very fairly the grade demanded for the industry at large. The report will serve as a guide to persons who wish to know whether certain sandstones or limestones may be suitable for glass making.

BLUE SKY LAW URGED.

LOS ANGELES, October 24.—A State-wide campaign has been launched by the Los Angeles Realty Board against stock-selling corporations which fleece the public through the lure of advertisements promising the investors huge profits. The first step in the campaign will be the investigation of certain concerns in Southern California, and plans were perfected for the prosecution of fraudulent companies. The campaign also includes the introduction of a bill in the next session of the Legislature which is to be more drastic than the "blue sky law" of Kansas.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo. for free report on patentability. All business confidential. HAND-BOOK FREE. Explainseverything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. Address,

Box 239 Willson Bldg. WASHINGTON, D. C.

SAND AND GRAVEL WORTH 21 MILLION DOLLARS.

Extensive Industry Reported on by United States Geologicel Survey.

One of the important industries in the United States of which comparatively little is written is the production of sand and gravel. In 1911, according to a report by E. F. Burchard, just issued by the United States Geological Survey, the production of sand and gravel amounted to 66,846,959 short tons, valued at $21,158,583. The production of sand of all kinds was 40,253,977 tons, valued at $14,438,500, and that of gravel was 26,592,982 tons, valued at $6,720,683. The production of glass sand was valued at $1,547,;?50, an increase over the figures for 1910; the sand used for building in 1911 was valued at $7,719,286, a slight decrease as compared with 1910. This was accounted for by less activity in 1911 in the building trades, including that of concrete construction. The production of molding sand in 1911 was valued at $2,132,469, a marked decrease as compared with 1910. The production of all other sands in 1911, such as sand for grinding and polishing, fire sand, engine sand, and filtration sand, was valued at $3,043,012, an increase of over a million dollars in value as compared with 1910.

Editorial Comment.

With the police scandals in New York and the evidences of graft around us we are sometimes led to think that we are degenerate sons of patriotic parents and that things in public life are steadily growing worse. This is not the case, however, as an occasional retrospect will show but it is an encouraging sign of an awakening conscience. That graft existed in other days is noticeable by the following article from Mr. Raymond B. Fosdick in a recent number of the Outlook:

From 1840 to 1865, when Tweed came into power, the political history of New York reads like a debauch. Assessments for improvements never actually made were laid on the taxpayers. The aldermen participated in all the profitable jobs. Convicts were allowed to escape from Blackwell's Island on condition that they voted as their keepers ordered. Prisoners whose terms had expired were kept at public expense until election day to get their votes. The inmates of the almshouse and the penitentiary were forced to manufacture articles for the use and profit of the officials of those departments. In 1851 the so-called "forty thieves" were in power in the board of aldermen. Election frauds were so numerous that they failed to excite comment. Ballot boxes were stolen. Boys and paupers voted without interference. The police, who were appointed for one year by the board of aldermen, were utterly demoralized.

In 1851 the Eighth and Ninth Avenue Railroad franchises were purchased from the board of aldermen by a coalition of $50,000. The Third Avenue Railroad franchise was purchased by $20,000 paid in bribes. The Williamsburg Ferry lease was purchased by a $20,000 bundle fund. The Wall Street Ferry lease was similarly disposed of. The board of aldermen sold the Gansevoort Market property to a Tammany politician for $160,000 in the face of other bids of $225,000 and $300,000 respectively.

In fact, as was stated at the time, bribery was considered a joke. The aldermen, the police and all the city officials extorted vast sums of money in every possible way. And note this: Such was the condition of public opinion that the people paid it. It was part of the game. Those were the good old days!

Perhaps this picture is a gloomy one. But at least we can be sure of this. There were no good old days. Insidious influences in American politics have not just appeared in our times. We are not the degenerate sons of our fathers. If we have sinned in our generation, so did they in theirs.

There is ground, however, for a great deal of hope in what we have been reviewing. It is true today, as it was fifty years ago, that corruption steals in when the door is open, and the price of liberty is eternal vigilance. But no one who is intimately acquainted with the details of municipal government can deny that the steady advance of recent years represents a permanent gain.

Macedonia, the native land of Philip and Alexander the Great, who made himself master of the known world long years ago, is now the scene of a war that has convulsed southern Europe. This country which has long been misgoverned by the Turks has broken out in revolt and the people of its sister states have all declared war against the common enemy, the unspeakable Turk. The oppressed people, including Bulgarians, Servians and Greens, have appealed to their kinsmen in the surronding kingdoms with the result that public sentiment in the surrounding nations has been raised to the boiling point and the Balkan states have all united in a declaration of war. Their object is to compel Turkey to put the government of Macedonia under the supervision of the Christian Balkan states and the European powers. Turkey is of course resisting this for it means the loss of her European possessions and the important place of holding the balance of power.

This war is really a revolt resulting from a long period of oppression and religious contentions and persecutions. It serves to remind Americans anew of their polyglot population. Thousands of men are now going Europeward to fight the Turks. Greeks, Armeians, Bulgarians, Syrians, Servians, Roumanians, are departing for the fatherland to participate in whatever fighting there is to do. And perhaps one reason that so many are going is that they have some relatives or friends that have suffered at the hands of the Turks and they are glad to get a chance to even up the score. There is hatred of long standing, a feud of generations, existing between the Christian nations of Balkan Europe and the Moslem Empire that hold control of the Bosphorus straits.

The men who are going to fight for their fatherland are generally physically fit. Like all men who take chances they are usually endowed with energy and initiative. Since 1820 we have received from Europe 28 million emigrants. And while Southern Europe has not always furnished the most desirable class, a good portion of them have been those who would not stand for the industrial and political conditions that surrounded them and sought a field of wider freedom that our country affords.

The Lock Operating Machinery And The Control System Of The Panama Canal.

The design of a control system for the lock-operating machinery of the Panama Canal is of vital importance to the successful operation of the canal. The importance of securing a rapid safe and economical control of the movements of the gates and valves cannot be over estimated. This design is the work of a Wisconsin man, Edward Schildhauer, '97, E. E. '11, the chief electrical and mechanical engineer at Culebra. The system is described in a recent number of the Canal Record as follows:

The gates, valves, and fender chains of the locks will be operated by electricity, and remotely controlled from a central point, that is, there will be a central control station for each of the series of locks at Gatun, Pedro Miguel, and Miraflores. In passing a ship through the locks it will be necessary to open and close miter gates weighing from 300 to 600 tons, fill and empty lock chambers containing from three and one-half to five million cubic feet of water, raise and lower fender chains weighing 24,098 pounds each, and to tow the vessels through the locks. All these operations, except that of towing, will be controlled by one man at a switchboard. The towing will be done by electric locomotives running along the lock walls.

The control system for Gatun Locks is typical. Water is let into the lock chambers or withdrawn from them by means of culverts under the lock floor, which connect with large culverts in the lock walls, through which water is carried from the higher to the lower levels. The main supply culverts are 18 feet in diameter, and the flow of water through them is controlled by rising-stem gate valves, which can be completely opened or closed in one minute. In the center wall the culvert feeds both lock chambers, and therefore at each outlet into the lateral culverts there is a valve of the cylindrical type, in order that water may be let into or withdrawn from either chamber at will. A complete opening or closing of these cylindrical valves takes ten seconds. The miter gates are never opened or closed with a head of water on either side of them, the chambers being first emptied or filled by means of the valve and culvert system. The time required either to open or close the miter gate is two minutes.

A ship to be raised to the lake level will come to a full stop in the forebay of the lower lock, prepared to be towed through one of the duplicate locks by electric towing locomotives. The water in the lower lock chamber will be equalized with the sea-level channel after which the miter gates will be opened, the fender chain lowered and the vessel passed into the first chamber, where the water is at sea level. Then the miter gates will be closed. The rising-stem gate valves in the center wall culverts will be closed while those above will be opened, allowing water to flow from an upper level into the lower chamber, which, when filled, will raise the vessel 28 1-3 feet, to the second level. This operation will be repeated in the middle and upper locks until the ship has been raised to the full height of 85 feet above the level of the sea. At Gatun in the passing of a large ship through the locks, it will be necessary to lower four fender chains operate six pairs of miter gates and force them to miter, open and close eight pairs of rising-stem gate valves for the main supply culverts, and thirty cylindrical valves. In all no less than 98 motors will be set in motion twice during each lockage of a single ship, and this number may be increased to 142, dependent upon the previous condition of the gates, valves and other devices.

Each gate leaf, valve and fender chain is operated by a separate motor mounted near the machinery in chambers in the lock wall, the motors acting through suitable gears or pump in the fender chains upon the various machines. In each machinery chamber will be erected a starting panel containing contactors by which current will be applied to the motor and these panels will in turn be controlled from a main unit in the central control house. Some of the machinery chambers at Gatun will be 2,500 feet distant from the point of control 90 per cent of them will be within 2,000 feet, and 50 per cent of the total within 1,200 feet.

All contactors will be operated directly from the central control house without the intervention of relays, and without resistance in the control circuit. Small and medium-sized motors will be started and reversed by throwing directly on the line which will normally be 220 volts and 25 cycles. The larger motors, above 25 horse-power, will have in addition one starting point in each direction with resistance in the primary. All motors are of the squirrel-cage type, except the locomotive traction motors which are of the slip-ring type. Starting resistance is specified in preference to compensators in order to obtain the simplest possible arrangement with a minimum number of contactors, and to obtain an unlimited range of adjustment in the starting resistance. Reversing will be done by double pole contactor mechanically interlocked, and, in order to have all contactors on a panel alike, when a starting resistance is used, the resistance will be in two legs out of the three-phase circuit, and shortcircuited by means of a double-pole contactor. Single-phase alternating current of 220 volts and 25 cycles will be supplied for the operating circuit of all contactors. Contactors will be designed for normal operation at 150 voltage, but shall continue to operate successfully at the voltage at the contactor coil terminals fall as low as 70 per cent of normal.

The motor for the rising-stem gate valve machine will have a rating of about 50 horse-power, miter gate moving and guard valve motors, 35 horse-power; cylindrical valves and other motors, 7½ horse-power; the chain fender pump motor will probably be rated at about 25 horse-power. In all there will be a total of 951 motors of all sizes and descriptions at all the locks, this total including 207 motors required to drive various pumps and pumping machinery.

The station from which control will be exercised over the movement of all the machines will be on the center wall at the lower end of the upper flight of locks at Gatun, and similarly placed at Pedro Miguel and Miraflores. It will be in a building raised high enough above the top of the wall to allow a towing locomotive to pass under, a height of 16 feet, and to command an uninterrupted view of every part of the locks. In this house will be a double control board duplicated to conform to the duplication in locks. The control board will be in the nature of a bench or table, 32 inches above the floor, containing a representation, part model and part diagrammatic, of the flight of locks controlled by the respective series of switches. Standing at his switchboard the operator will throw the switches, and before him will see in model or diagram the progress of the fender chains as they rise and fall, the movement of the miter gates inch by inch, the opening and closing of the gate valves in the main culverts at every stage, the operation of the cylindrical valves, and, in addition, indication of the gradual rise or fall of the water in the lock chambers. The switches controlling the various motors, together with their indicators, will be mounted upon the board in the same relative position as the machines themselves in the lock walls. Some distortion of scale will be allowed to give room for the switches. The board must not be over four feet in width, in order that the operator may be able to reach beyond the middle of it, and the length of the board is limited to 30 feet at Gatun, and proportionally at the other locks.

The system will be interlocking, so that certain motors cannot be started in a certain direction until other motors are operated in a proper manner to obtain consistent operation on the whole, and to avoid any undesirable or dangerous combinations in the positions of valves, gates, or fender chains. In this way and by the use of limit switches the factor of the personal equation in operating the machines is reduced to a minimum, almost mechanical accuracy being obtained. Before the operating pair of valves in the main culverts can be opened at least one pair of valves at the other ends of the the locks, both up-stream and down-stream, must first be closed. This limits an operator to

the act of equalizing water levels between locks, and keeps him from allowing water to flow from, say the lake level to the middle lock past the upper lock, thus preventing a possible flooding of the lock walls and machinery rooms. Interlocks devoted to the control of action between the gate valves in the main culverts and the miter gates, prevent valves being opened a lock length above or below a miter gate which is being opened or closed, and thus prevent an operator causing a flow of water while the miter gates are being moved. Interlocks for the cylindrical valves guarding the openings from the center wall culvert to the lateral culverts will keep those of one side or the other closed at all times, except when it may be desired to cross-fill the chambers, when they may be opened by special procedure. An interlock prevents the operator from starting to open the miter gate before unlocking the miter forcing machine. The miter gate guarded by a fender chain must be opened before the chain can be lowered, and the chain mut be raised again before the gate can be closed, or more exactly the switches must be thrown in this order, but the operations may proceed at the same time. The simple interlocks will prevent such a mistake as leaving the chain down through lapse of memory when it should be up to protect the gate

A commutation switch is used in connection with the miter gate moving machinery, and serves two functions First, when the miter gates come to the closed position, and not until then, it complete a circuit from the control house, by means of which the miter forcing machine may be closed, for forcing and holding the gates in proper miter. In this way there is given an interlock by virtue of which, the operator in the control station cannot close the miter forcing machine too soon. The other function is to alter the circuits controlling the rising and falling of the handrail of the foot walk over the gates, so that should the hand rails be up when the gates start to open they will be automatically lowered. The circuits for raising the handrails are disconnected so that they cannot be raised as long as the gates are open. If the handrails were allowed to be up when the gates are opened back into the recesses of the lock wall they would interfere with a passing towing locomotive.

An auxiliary cut out switch is provided for the miter gate strut. The gates are opened and closed by means of a strut or connecting rod acting between the gate and crank pin on a large driving gear. The relation of parts is such that a toggle effect is produced near the ends of travel, and the motor would be capable of doing damage to some of the parts should the gate meet with an obstruction. One end of the strut is allowed telescoping movement of a few inches against the action of a nest of stiff springs. These springs oppose equally a lengthening or shortening of the strut and hold the telescoping parts against stops with sufficient initial tension so that with ordinary water resistance to the gate in normal operation there will be no change in length of the strut. Should the gate meet a solid obstruction near one end of travel, where the motor is capable of producing overload on the mechanical parts, the strut is compressed or extended according to direction of forces. The cut-out switch is mounted upon one end of the telescoping members, while a rod entering the switch casing is attached to the other. The movement of this rod in and out of the casing operates the switch to open the control circuit and stop the motor. It is necessarily arranged so that if the switch is operated by compression of the strut, that side of the control circuit is opened which produces a rotation of motor corresponding to compression, and the other circuit remains unbroken for reversing and drawing the gate away from the obstruction. If operated by tension and the motor is stopped, it is possible to reverse and apply compression to the strut.

Limit switches for opening the control circuit when a machine has reached the proper point in its travel will be attached to all machines. It will be necessary for the operator in the control house to follow up the progressive movements of some machines, such as rising-stem gate valves and miter gates. These will accordingly be provided with synchronous indicating devices which will show by means of instruments on the control switchboard the movement and position of the machines at all times. In the case of certain other machines, like cylindrical valves and miter forcing machines, it is necessary for the operator to know only when the movement is completed. For this purpose there will be attached to the limit switch an indicator switch, which will indicate by lighting lamps or otherwise, that a machine has reached the end of its travel.

In the masonry walls float-wells are provided and connected to all lock chambers. At these wells suitable apparatus will be installed for operating instruments on the control board, which instruments will show at all times the water levels in the various locks and approaches.—Wisconsin Engineer.

OIL MIXED CONCRETE.

Reprinted From the Wisconsin Engineer.

A bulletin of the Department of Agriculture, Office of Public Roads, has recently been issued which describes investigations of the effect of mixing oil with concrete.

While experimenting in the Office of Public Roads in an attempt to develop a nonabsorbent, resilient, and dustless road material, one capable of withstanding the severe shearing and raveling action of automobile traffic, the writer's investigations led him into a very promising discovery. He found that, when a heavy residual oil was mixed with Portland cement paste, it entirely disappeared in the mixture, and, furthermore, did not separate from the other ingredients after the cement had become hard. The possibilities of oil-cement mixtures for waterproofing purposes were recognized and extensive laboratory tests were immediately begun to determine the physical properties of concrete and mortar containing various quantities of oil admixtures..

Many valuable data have been obtained from these investigations. The damp-proofing properties of concrete mixtures containing oil have been demonstrated very definitely by laboratory and by service tests which establish this material as one of great merit for certain types of concrete construction. It has also been shown that the admixture of oil is not detrimental to the tensile strength of mortar composed of 1 part of cement and 3 parts of sand when the oil added does not exceed 10 per cent of the weight of the cement used. The compressive strength of mortar and of concrete suffers slightly with the addition of oil, although when 10 per cent of oil is added the decrease in strength is not serious. Concrete mixed with oil requires a period of time about 50 per cent longer to set hard than does plain concrete, but the increase in strength is nearly as rapid in the oil-mixed material as in the plain concrete. Concrete and mortar containing oil admixtures are almost perfectly nonabsorbent of water, and so they are excellent materials to use in damp-proof construction. Under pressure, oil-mixed mortar is very efficient in resisting the permeation of water. Laboratory tests show that oil-mixed concrete is just as tough and stiff as plain concrete, and furthermore its elastic behavior within working limits of stress is identical to steel reinforcement is much decreased when plain bars are used. Deformed bars, however, and wire mesh or expanded metal will reinforce this material with practically the same efficiency as in ordinary concrete.

A very interesting experiment showing the nonabsorbent and nonpermeable character of oil-mixed mortar when subjected to low pressure was made in the laboratory. Four mortar vessels, 8 inches in outside diameter, 2½ inches high, and about ½ inch thick, after hardening in moist air for one week, were immersed in water to a depth of about 2 inches. A mortar mixture of 1 part of cement to 3 parts of sand was used. Vessel No. 1 contained no oil in the mixture. About one minute after immersion a damp spot showed on the bottom. After one hour the whole vessel was wet even above the water level, since the water had climbed by capillarity. Within a few days waters had penetrated the plain mortar vessel until the water level inside was the same as that outside. The remaining three vessels, made of 1:3 mortar and mixed with 5, 10 and 20 per cent of oil, respectively, have remained perfectly dry on the inside during immersion for one year.

All of these experiments have given very encouraging results and point to the use of oil-mixed mortars and concretes as a cheap and effective solution of the problem of waterproofing for a great many types of concrete construction.

BRAZIL.

Depots for Fuel Supply.

The Minister of Agriculture has ordered the publication of specifications for construction of 40 coal and oil fuel depots for supplying steamers plying on the various rivers of the Amazon Basin. Tenders will be received up to December 30.

Latest Practice In Gravel Preparation

Plant Of The Niles Sand, Gravel And Rock Company At Niles, California, Marks An Epoch In Crushing, Screening And Washing Of Concrete Materials.

At Niles, Alameda County, California, about forty miles southeast of San Francisco, the Niles Sand, Gravel and Rock Company has recently completed a new plant, the following description, of which will be of considerable interest. Before contemplating design of the plant, Howard G. Plummer secretary and vice-president of the company, a thoroughly practical gravel man, brought out the East with the object of obtaining and incorporating all the good ideas and latest improvements he could find and after obtaining a satisfactory design for the new construction was begun under the supervision of Mr. Plummer, who spared neither time nor expense in making the plant

[illegible] cars, which are operated by a [illegible] mounted on a turntable on top of the [illegible] tower. The turntable is carried on a trestle work made portable. By moving the joint on the turntable and the trestle each portion of track can easily be changed to suit the location of the excavator in the pit. Said pit is always worked in a direction away from the operating tower.

From the pit, upon which the gravel is loaded, it proceeds on the main 30-inch belt conveyor, approximately 700 feet centers. This belt conveyor operates on an incline of about 15 degrees and delivers the gravel to across [illegible] passing over the railroad to the screens from the bunkers. This screens, and also the water, is delivered by gravity through steel spouts into the small or forward ends of the next following set of screens.

Every screen is provided with a pipe nozzle extending a short distance into it, and by this arrangement all the rejection must pass through a spray of clean water before leaving the screens. These nozzles are arranged so that the water used in giving the rejections the final washing will not go with the rejections in the bins, but follows and mixes with the material passing through the perforations into the next screens, this process being repeated from one set of screens to the next, until from the last set of screens all but fine sand and water, together with

General View Of Plant Of The Niles Sand, Gravel And Rock Company At Niles California.

one of the best built and equipped in the country. This plant has a rated capacity of 1000 yards of screened and washed gravel per day, but produces from 1,200 to 1,500 yards per day.

The type of plant is one [illegible] gravel is obtained from the river bed [illegible] on cable excavators to a [illegible] screening bed from which point it passes on gravity [illegible] to the [illegible] washing and [illegible] drying [illegible] ready for loading into cars.

The gravel is taken from the pit by [illegible] and conducted to a [illegible] wood elevating [illegible] to a [illegible] concrete bunker [illegible] Meese & Gottfried Company, [illegible] by means of large [illegible] conveyor is also 30 inches in width and about 700 feet centers, and delivers the material to a battery of Meese & Gottfried Company conical screens.

When the material leaves the main conveyor it just before passing into the screens it is discharged into a copper chute in two compartments and arranged so as to split the material in two. The material is then mixed with water and from the copper chute passes, said and fortunately, by gravity into the first set of conical screens.

Next the bunkers there are two of these bunkers and also two settling tanks. After the water and gravel have been separated into the first set of conical screens, all gravel, etc. that passes through the perforation of the all impurities which have been passing through from screen to screen, are led into the separators, and here the water and impurities pass off through an overflow, the sand after settling to the bottom of the separators being automatically discharged into the sand bin.

All the oversize or rejections from the first set of screens, material which needs to be crushed, pass by cross belt conveyor located between the bunkers and the conveyor trestle to the crusher bin. From the crusher bin, which is directly under the 30-inch main belt conveyor. The boulders are fed through a heavy rack and pinion gate into the crusher, and after passing through the crushers the material is fed on to a 24-inch belt conveyor, which runs parallel with the 30 inch main belt conveyor.

delivering the crushed material back to the 30-inch main conveyor, and so to the screens again for separation.

Through the above arrangement the company is now obtaining five separations of clean, washed gravel and sand, and it will be seen from the foregoing description that all material which is delivered to the plant will be washed and screened, the separators finally discharging all the fine sand into the sand bins. Nothing is wasted, even the water used in washing being piped to nearby orchards for irrigation purposes, while the dirt and impurities, being found of value as fertilizer, are used for that purpose. In loading the cars for shipment, the bunkers are provided with sixteen Meese & Gottfried Company "quadrant" bin gates with balanced car loading chutes arranged on both sides of the bins designed so that a gate can be opened with one hand, while the car loading chute can be adjusted with the other hand. The "quadrant" gates are provided with cast iron hand levers and operate very easily against the pressure from the material in the bin on account of the arc of the gate over coming any necessity of lifting the material back in the bins when opening or closing. The carloading spouts are counter balanced so by this arrangement the work in loading the cars is reduced to the minimum.

The Niles Sand, Gravel and Rock Company was fortunate in securing control of a large section of the river bed and adjoining lands where the deposited gravel and sand is almost unlimited in quantity and of a very superior quality, being remarkably free from foreign matter injurious to concrete. The resulting product being clean washed, dry and perfectly graded and available at a point within easy reach of the large concreting districts is the cause of the company's evident success from the very start.

The company has just installed a 36-inch Symon Disc Crusher in addition to the gyratory crusher heretofore installed, and they are now installing additional trackage and storage system that will hold 50,000 cubic yards in storage, to be delivered only in case of unforseen accidents or floods or demand for greater quantity of material than can be turned out in a single day.

The Niles Sand, Gravel and Rock Company is also about to erect bunkers on its property on the Western Pacific Railway side, which will permit shipments via W. P. R. R. as well as S. P. R. R. They are also erecting storage yards in San Francisco and Oakland so that materials may be delivered by wagon where less than carload lots are required or where the room on the streets in front of new buildings is insufficient to hold large quantities of concrete materials at one time.

All the transmission, elevating and conveying machinery used throughout the plant was manufactured by the Meese & Gottfried Company, San Francisco, the concern having successfully competed against the eastern manufacturers of this class of machinery for many years, equipping as it has most of the largest plants along the Pacific Coast.

Looking Up Thirty Inch Conveyor, Belt Not In Position. Steel Idlers Used.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, $150,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Realty and Rebuilding Co. The contemplated building will be erected at the southeast corner of Eddy and Fillmore streets, and is a part of the extensive improvements which will be undertaken on the property of the old Chutes Theatre, destroyed by fire some time ago. This building will have a frontage on Fillmore street of 85½ feet and a depth of 130 feet. The first floor is to be arranged for stores while the upper floors will contain a total of 105 rooms which are to be arranged in two and three room suites. There will be connecting baths, wall beds, steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. The property extends from Turk to Eddy streets along Fillmore and the Turk street corner will shortly be improved by the construction of a similar building. Intervening property along Fillmore street will be built up to one-story brick and steel store buildings with foundations heavy enough to support additional stories. Plans for the first of the above mentioned buildings are complete and figures will be called for at once.

SAN FRANCISCO—Apartment house, 9 story and base. Class A construction, $500,000 or more. Architect Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Court Apartment Co. This building will be erected at the northwest corner of Sacramento and Mason streets, and when complete will be one of the most modern apartment house structures in the west The building will cover a lot 150 feet square and will be of the Class A type of construction throughout. Suites will range from two rooms up to seven and eight rooms with from one to three private baths. The mechanical equipment will include all of the most modern improvements. The interiors of the apartments and public rooms will be elaborately finished. The exterior of the building will be faced with pressed brick and terra cotta. Plans will be completed and out for figures within the next week or ten days.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $17,000. Architect, J. F. Dunn, Monadnock Bldg., S. F Owner, J P. Lorden. The building will occupy a corner lot and is to cover an area of 50x66 feet. The interior has been arranged to contain twelve apartments of two and three rooms each. All apartments will have connecting baths and wall beds. Interior finish will be of pine and redwood. There will be a central heating system. The exterior will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, alteration from flats, $3,000. Architect, Roode & Mariselli, 3372 16th St., S. F. owners, O'Connor Bros. The present building, which contains nine flats, will be altered into an apartment house containing 18 apartments of two and three rooms each. Some changes will be made in the plumbing and wall beds will be installed. There will be no exterior alteration. Plans will be ready for figures within a few days.

OAKLAND, CAL.—Apartment house, 3 story and base frame, $16,000. Architect, Robert Morgenthau, 1611 Telegraph Ave., Oakland. Owner's name withheld. The building is to be erected on Oak street near 17th and will contain 36 apartments of two rooms and bath each. There will be steam heat, wall beds and a vacuum cleaning system. The interior will be finished in pine and redwood with some hardwoods. A hot water heater will be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are now being prepared.

OAKLAND, CAL. Apartment house, 3 story and base, frame alterations, $10,000. Architect Ivan C Satterlee, 470 13th St., Oakland. Owner, C M MacGregor. The present 2 story and frame building, which contains six flats, will be altered so as to contain 24 apartments of two rooms and bath. There will be new electric work, plumbing and interior finish. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done at Day Labor.

OAKLAND, CAL. Apartment house, 3 story and base, frame, $20,000 Architect, C. W. Purcell, Central Bank Bldg., Oakland. Owner, Dr. P. E. Jordan. The building is to be erected at the corner of Oak and Lake streets, and has been designed to contain 24 apartments of two and three rooms each. There will be wall beds, steam heat and a vacuum cleaning system. Interior finish will be of pine, redwood and oak A hot water heater will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

LOS ANGELES, CAL. – Apartment house, 3 story and base, brick Cost not stated. Architect, J. E. Borgmeyer, Stimson Bldg., L. A owner Lewis E. Paulson. The building will cover an area of 50x111 feet and will contain 60 rooms arranged in two and three room suites with wall beds and connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick Plans are complete and figures will be taken shortly.

LOS ANGELES, CAL. – Apartment house, 3 story and base, brick. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A Owner, C. M Carter. The building will be 50x145 feet and will contain 81 rooms in the upper two stories. These will be arranged in 31 two-room suites and five three room suites. All apartments will have connecting baths and wall beds Plans provide for steam heat and elevator service. Interior finish will be of pine and redwood with some oak. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL. – Apartment house, 3 story and base, brick and steel, $85,000. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, Jacob Morris. Revised drawings for this building have been completed and show the structure reduced ten feet and covering an area of 100x108 feet There will be a total of 120 rooms arranged in two and three room suites. All apartments will have wall beds and connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. Bids will be called for at once.

LOS ANGELES, CAL. – Apartment house, 3 story and base, brick. Cost not stated. Architect, A. W. Riewe, California Bldg., L. A. Owner, W. R. Neelands. The building will contain a total of 75 rooms arranged in suites of two and three rooms each with private baths and wall beds. There will be a concrete foundation 118x50 feet. The exterior will be faced with pressed brick. The interior will be finished in oak throughout with oak floors. There will be steam heat, elevator service and a vacuum cleaning system. Plans are nearly complete.

LOS ANGELES, CAL. Apartment house, 3 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner., E. C Bower. The building will contain 80 guest rooms, which will be arranged in two and three room suites. There will be private baths, wall beds, steam heat and a vacuum cleaning system. Interior finish will be of pine and redwood with some oak floors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO—Apartment house 3 story and base, brick and steel, $20,000 Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, D. L. Reynolds. Contractor, J. B. Reite, 402 Kearny St., S. F. Contract price, $20,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, $120,000. Architect's name not given Owners, Central and Pacific Improvement Co. Contractor, J. A. Jardine, 36 West 31st St., L. A. Contract price, $120,000.

BRIDGES, DAMS AND HARBOR WORK.

SEATTLE, Wash.—Harbor Improvements, $550,000. Engineer, Paul P. Witham, Central Bldg., Seattle. Owners, Port of Seattle. Plans for the improvement of the East Waterway have been approved and are now out for figures. Bids will be opened by the Port Commissioners on November 27th. The work has been divided into six parts with alternative propositions on the first three items. Those of (1) excavation and slope protection; (2) substructure, (3) construction and alteration of water mains and other

public utilities. Other divisions are: (4) superstructure, (5) Whatcom avenue concrete roadway support, and (6) railway tracks.

Involves Much Building.

This project involves much building, namely, two creosoted pile docks, 1,000 feet long and 108 feet wide each, a warehouse on each dock, 2 stories high for the first 200 feet from the shore line and one story high for the balance of the 800 feet. To be 90 feet wide and of frame construction. The ground floor area will be 85,913 square feet.

A slip 221 feet wide will also be dredged between the docks from the East Waterway into the foot of Whatcom avenue, Stacey and Lander streets. The work involves the removal of about 5,000 cubic yards of material.

Contracts Awarded.

SEATTLE, WASH. — Bridge piers, concrete, $60,000. Engineering Dept., Northern Pacific R. R. Co., Seattle. Owners, Northern Pacific R. R. Co. Contractors, International Contract Co., Central Bldg., Seattle. Contract price, $60,000.

—CHURCHES—

VAN NUYS, LOS ANGELES CO., CAL.—Church, brick construction. Cost not stated. Architect, E. R. Jeffery, Citizens' Bank Bldg., L. A. Owners, Van Nuys Methodist Church. The building will cover an area of 75 feet square and will contain a main auditorium with a seating capacity of 250 people besides Sunday school rooms, parlors and a pastor's study. The exterior will be faced with pressed brick. Plans are being prepared.

COURT HOUSES.

SEATTLE, WASH.—Court house, 9 story and base. Class A construction, $900,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle and King County. Plans have been officially approved for the construction of a city and county building which is to be erected in the city of Seattle. None of the details of the construction are available at this time, but will be printed as soon as available.

FACTORIES & WAREHOUSES.

SAN FRANCISCO — Warehouse, 5 story and base, brick and steel, $60,000. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, O. W. Nordwell Estate. The building will have a frontage of 52 feet and will extend back to a rear street, a distance of 160 feet. Offices and display rooms will occupy the entire first floor. The entire structure has been leased to Albert Pick & Co. of Chicago who will use the upper floors for warehouse purposes. Construction will be of the extra heavy type. There will be steam heat, elevator service and metal window sash and frames. The exterior of the building will be faced with pressed brick. An automatic sprinkler system will be installed. Plans are now out for figures.

OAKLAND, CAL. — Warehouse, 5 story and base, reinforced concrete, $70,000. Architect, C. M. Cook, 612 Market St., S. F. Owner's name withheld. This building was mentioned in the last issue. As stated at that time there will be six stores on the first floor and lofts above. The building will cover an area of 100x120 feet. Plans are nearly complete and figures will be called for shortly.

LOS ANGELES, CAL. — Laundry buildings, reinforced concrete, $100,000. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Excelsior Laundry Co. Only preliminary plans for this work have been prepared and a description of the building is not possible at this time. There will probably be two or more structures, one of one story and the other of two stories. Construction will be fireproof throughout. The most modern laundry machinery and equipment will be installed. The exterior of the buildings will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Warehouse 4 story and base, brick. Cost not stated. Architect, Edward C. Cobb, Central Bldg., L. A. Owner, D. Oyharzadal. The building is to cover an area of 127x300 feet and will be of heavy mill construction. There will be several freight elevators. Metal window sash and frames will be used. There will be fireproof doors and an automatic sprinkler system. The exterior will be faced with stock brick. Plans will be ready for figures within a week or ten days.

Contracts Awarded.

VANCOUVER, B. C.—Warehouse, 2 story and base, reinforced concrete, $75,000. Architect, Thomas Hooper, Vancouver. Owners, Merchants' Ice Co. Contractors, Norton Construction Co., Vancouver, B. C. Contract price, $75,000.

LOS ANGELES, CAL.—Warehouse, 2 story and base, concrete and brick, $12,000. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Sperry Flour Co. Contractor, R. W. Martin, Builders' Exchange, L. A. Contract price, $12,746.

PORTLAND, ORE.—Warehouse, 5 story and base, brick, $55,000. Architects, MacNaughton & Raymond, Concord Bldg., Portland. Owners, Wadhams & Kerr Co. Contractors, Advance Construction Co., Henry Bldg., Portland. Contract price, $55,000.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, C. E. Laye. The building has been designed to contain two modern flats of five and six rooms each with bath. It will have a frontage of 25 feet and a depth of 59 feet. Interior finish will be of pine and redwood with some oak floors. There will be gas grates. Tile will be used in the baths and kitchens. The exterior will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats 2 story and base, frame, $5,500. Architect, John J. Foley, Monadnock Bldg., S. F. Owner, Mr. Cella. The building will be erected on 1st avenue, near Hugo street, and is to contain two large flats. The interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. A brick vestibule will be a feature of the house. The exterior will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, $16,000. Architect, Alfred Voyce, Foxcroft Bldg., S. F. Owner, J. Mocke. The building will be 25x70 feet and has been arranged to contain six small flats. Interior finish will be of pine and redwood throughout. There will be gas grates. The exterior will be covered with white cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

GARAGES.

BERKELEY, ALAMEDA CO., CAL.—Garage, 2 story and base, frame, $2,500. Architect, none. Owner, C. R. Bates, 2460 Webster St., Berkeley. The building has been designed for a private garage with storage space on the first floor and living rooms above. A cement floor will be used over the ground area. The exterior will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

RICHMOND, CONTRA COSTA CO., CAL.—Garage, 1 story, reinforced concrete, $5,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Mt. Diablo Garage. This work has been mentioned here before when plans were first started. Bids have been taken and a contract will be awarded within a day or two. The building is designed for a commercial garage and will cover an area of 25x100 feet. The exterior will be faced with cement plaster. Bids are now in and under advisement.

GOVERNMENT WORK AND SUPPLIES.

Reclamation Work.

The Secretary of the Interior has authorized the Reclamation Service to reconstruct the sublateral system of the Okanogan irrigation system, Wash., and the service will take over, operate and maintain the sublateral system of the project and deliver water to each individual tract of five acres and over, when all the owners of the lateral from which the land is supplied have subscribed to the contract approved by the department for the carrying out of this matter upon the following conditions:

1. The sublateral system will be reconstructed and proper measuring de-

vices installed by the United States, the expense to be considered part of the proposed increased construction, charge provided for by order of June 6 1912, and covered by the contract to be executed by the water users.

2. For such parts of the present sublateral system as have been constructed by individuals and which can be incorporated in the reconstructed system good title shall be conveyed to the United States free of cost.

3. Delivery of water will be made to each individual tract as shown by ownership on October 1, 1912, except that the United States will not undertake, in any case, to make delivery to individual tracts subdivided after October, 1, 1912, will be made only on payment of extra cost of providing for such deliveries, including cost of necessary sublaterals, flumes, pipe lines, measuring devices, and other work or expense necessary on that account.

Canal Work.

The Secretary of the Interior has authorized the Reclamation Service to complete the west canal system, to reconstruct the south canal inlet, small canal flume, and structures on the Lonitsseizer Canal and to purchase the necessary right-of-way for the completion of the east canal, Uncompahgre Valley Irrigation project, Colo. This work is necessary for the permanent and proper consolidation of the system and the extension of the canal to new lands under the project. The total expenditure involved is estimated at $43,[illegible]

North Yakima, Wash., Elevator.

The contract for installing an electric passenger elevator in the U. S. public building at North Yakima, Wash., has been awarded to the Otis Elevator Co., New York city, at $4,429. Time to complete December 21, 1912.

Canal Work.

Under circular 730, furnishing and erecting structural steel framework of permanent shop buildings at [illegible], bids opened October 18.

U. S. Steel Products Co., 30 Church street, New York city, bid A for furnishing and erecting all of the structural steelwork for all buildings including erecting the crane rails, $41,523.26; bid B, for furnishing a portion of the structural steelwork, delivered, unloaded, and stored at the building site by the contractor, but not erected or field painted by him, $8,745.

Floating Crane for Canal.

The purchasing officer of the Isthmian Canal Commission is about to call for bids for furnishing two floating cranes of the revolving type of 250 tons capacity. The cranes are intended for handling heavy removable loads, such as boilers, engines, guns, armor, locks and lock gates, steam shovels, locomotives, machinery, etc. They must be capable of operation in the canal locks, which have a clear width of 110 feet, and their ability to handle heavy loads over one end while operating in this constricted space is an essential requirement. They must not be endangered by waves which reach the deck when the crane is holding a load in a seaway.

Each crane shall be of the revolving type, consisting of a steel pontoon carrying a steel superstructure, which shall comprise an arm or jib capable of complete revolution about an axis approximately at the general plane of the deck of the pontoon and capable of lifting or revolving or tilted about an axis parallel to said plane at such wise as to enable it to be lowered and overhang two sides and one end of the pontoon to afford in each case the fullest reach and capacity specified and to deposit on its own deck any loads within the maximum rated capacity. The superstructure shall be composed of steel members that is to say standing and whip rope sheaves, long rods, etc., steel not to rust.

Crow Indian School.

All bids received by the Commissioner of Indian Affairs, Washington, D. C., for constructing a second horse and heating system paint in the Crow Indian School Montana have been rejected.

U. S. M. C. Cells.

Bids were opened at the office of the assistant quartermaster U. S. Marine Corps, Washington, D. C. for [illegible] ing ten steel cells in the new marine [illegible] at the navy yard, Puget Sound, Bremerton, Wash.

Stewart Iron Works Co., Cincinnati, Ohio, $1,[illegible] (lump sum).

Concrete Iron Co., Marion, Ohio, $1,[illegible] (lump sum).

Pacific Iron Engineering Co. & Equipment, $1,[illegible] (lump sum).

Van Dorn Iron Works Co., Cleveland, O., $1,[illegible].

McKee & [illegible] Co., [illegible], Mo., $[illegible] (lump sum).

F. J. Berger Iron Works, Detroit, Mich., $1,[illegible].

Portland, Ore., Postoffice.

The contract for [illegible] the superstructure of the new U. S. postoffice, Portland, Ore., has been awarded to Parker & Donnelson at $[illegible].

—HALLS & SOCIETY BLDGS.—

SACRAMENTO, CAL.—Architect [illegible] building, 1 story and base, class A construction, $[illegible]. Architect F. C. Hummel, Inc., K. S. [illegible] Owner, Young Men's Christian Association. The building will cover a large corner lot and is to be fire A in all parts of construction. There will be a complete steel frame and exterior walls faced with pressed brick and [illegible]. The interior has been specially arranged to meet the requirements of the owners. A large amount of special gymnasium equipment will be used. There will be a steam heating system and elevator service. Plans are complete and bids are being taken.

LOS ANGELES, CAL.—Lodge hall, 2 story and base, reinforced concrete. Cost not stated. Architect J. H. Seaborn, 328½ Chas. St. L. A. Owners, Woodmen of the World. The building will cover an area of 100x125 feet. The first floor is arranged for four stores and a lodge room, billiard hall etc. The upper two stories will be subdivided into about sixty modern apartments with private baths and wall beds. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are being prepared.

AGNEWS, SANTA CLARA CO., CAL.—Hospital work, boiler, etc. Cost not stated. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids were opened on October 28th by the State Board of Control for addition to the boiler room at Agnews State Hospital. Robert Dolore, a low at $5,580. For a complete list of bidders see under San Jose and La Santa Clara Valley in this issue.

Contracts Awarded.

LOS ANGELES, CAL.—Hospital group, 3 reinforced concrete buildings. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Children's Hospital. Contractors, F. C. Engstrum Co., Fifth and Seaton Sts., L. A. Contract price not stated.

TROPICO, LOS ANGELES CO., CAL.—Hospital, 1 story and base, cement block construction. Cost not stated. Architect Walter Webber, Ferguson Bldg., L. A. Owner, Dr. D. B. Rockwell. Contractors, Home Builders, Los Angeles. Contract price not stated.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, $40,000. Architect Max Geist, Lick Bldg., S. F. Owners name withheld. The building is to be erected on Howard street between 4th and 5th streets and will cover a large ground area. The first floor will contain stores and the hotel lobby. The upper five floors will be subdivided into about 100 guest rooms and a number of baths. Plans provide for steam heat, elevator service and running hot and cold water. The exterior will be faced with cement plaster. Plans will be complete and ready for figures in about three weeks.

SAN FRANCISCO—Hotel, 7 story and base brick and steel, $70,000. Architect, W. H. Weeks, 75 Post St., S. F. Owner, Charles C. Judson. The building will have a reinforced concrete frame with exterior walls faced with pressed brick. There will be the main office, lobby and parlors on the first floor. The upper floors will contain a total of about 150 rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and other modern improvements. Plans are now being prepared.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, $90,000. Ar-

chitect's name not given. Owner, Dr. C. F. Buckley, Elkan Gunst Bldg., S. F. The building is to occupy a corner lot covering a large ground area. There will the hotel lobby, offices, parlors and stores on the first floor. The upper floors are to contain in the neighborhood of 180 rooms which will have connecting baths. Plans provide for steam heat, elevator service, running water and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and now in the hands of selected contractors.

SAN FRANCISCO.—Hotel, 5 story and base, reinforced concrete, $35,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, A. Tonn. The building will be erected in Post street, between Taylor and Jones, and will contain in the neighborhood of 120 guest rooms, nearly all of which will have private baths. There will be steam heat, elevator service and running hot and cold water. Construction will be of reinforced concrete throughout. Exterior walls will be faced with cement plaster and stone. The interior will be finished in pine. Plans are being prepared.

SAN FRANCISCO—Hotel, 3 story and base, brick, $10,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, A. L. Altmark. This work has been mentioned here before. The first floor will be occupied by a restaurant and the upper floors divided into single rooms. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Bids have been taken and are now under advisement in the architect's office.

SAN FRANCISCO—Hotel, 2 story and base, brick, $15,000. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will cover an area of 37½x110 feet. There will be several stores on the first floor and about forty guest rooms on the upper floor. Hot and cold running water is to be supplied to all rooms. The exterior of the building will be faced with pressed brick. Bids on the work have been taken and are now under advisement in the architects' offices.

SAN FRANCISCO—Hotel, 6 story and base, brick and steel, $70,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, W. J. Yore and J. M. Kane. This work has been mentioned here several times before. Plans have recently been out for figures and all bids are now in. Figures have been taken under advisement by the architects and a contract will probably be awarded within a few days.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, Hiram Kivel. The building will be triangular in shape with a frontage of 180 feet on San Pedro street, 198 feet on Wilmington street, and 138 feet wide at the rear. It will contain 16 stores on the ground floor and 102 rooms and 6 bathrooms in the upper floors. Each room will have a lavatory with hot and cold water. The exterior will be faced with pressed brick. The interior trim will be of pine. There will be plate glass store fronts, composition roof, steel beams and columns, electric wiring, gas pipes, etc. Plans are nearly complete.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, S. H. Pardue. The building will contain about 50 guest rooms and 20 baths. The interior will be finished in pine and birch. There will be steam heat. Running water is to be supplied to all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 6 story and base. Class A construction. Cost not stated. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owners, Lawrence B. Burkhard Dr. Walter Jarvis. The building will be 66x166 feet and will contain stores and the hotel lobby on the first floor. Upper floors are arranged for 70 guest rooms and 70 baths. Construction will be of reinforced concrete with exterior walls of pressed brick and terra cotta. The lobby will be finished in marble and tile and the interior of the rooms in birch and pine. There will be steam heat, elevator service and a vacuum cleaning system. There is a possibility that the edifice may be increased to ten stories. Plans are being prepared.

LOS ANGELES, CAL. — Hotel, 3 story and base, brick and steel. Cost not stated. Architects, Ye Planry Co. L. A. Owner, E. A. Huene, Title Ins. Bldg., L. A. The building will cover an area of 100x120 feet. There will be four stores and a moving picture theatre on the first floor and a total of 86 rooms and 26 baths on the upper floors. Plans include steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS GATOS, SANTA CLARA CO., CAL.—Residence additions and alterations, $20,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, W. B. Wellman. This work has been mentioned here before when plans were first started. Working drawings are complete and figures are being taken. The work will include both interior and exterior changes, new plumbing, electric work, painting, interior finish and plastering.

PALO ALTO, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, $10,000. Architect, Max Geist, Lick Bldg., S. F. Owner's name withheld. The dwelling will contain in the neighborhood of twelve rooms, several baths, sleeping porch and a laundry. Interior finish will be of pine, redwood and hardwood. Oak floors will be used throughout except in the bath rooms which will be finished in tile and composition. There will be furnace heat and open fire places. Mantels will be of tile and brick. The exterior of the house will be covered with cement plaster on metal lath. Plans will be ready for figures within two weeks.

SCHOOLS.

OAKLAND, CAL.—School, 1 story and base, frame, $15,000. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Bids for the construction of the San Pablo Ave. School opened by the Board of Education show O. B. Ackerman & Son low men at $15,881. For a complete list of all figures see under Oakland and Alameda County.

SAN FRANCISCO.—School blackboards. Cost not stated. Architec-

tural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Whitaker & Ray Co. were low at $1,295 for furnishing the slate blackboards in the Girls' High School. For a complete list of these figures see under San Francisco in this issue.

BLOOMINGTON, SAN BERNARDINO CO., CAL.—School, 1 story and base, brick, $15,000. Architects, Tuttle & Hopkins Delta Bldg., L. A. Owners, Bloomington School District. New figures are to be taken for this work. The low men on the previous contract have discovered an error in their figures and have withdrawn from the contract. Bids will be opened on November 16th.

EL MODENA, ORANGE CO., CAL.—School, 1 story and base, brick. Cost not stated. Architect, H. M. Patterson & T. Johnson Bldg., L. A. Owners, El Modena School District. New figures for this building will be called for at once. Revised drawings show considerable alterations in both size and interior finish. Plans are now out for figures.

SEATTLE, WASH.—Schools, 1 to 2 story and base, reinforced concrete, $60,000. Architect, Edgar Blair, 300 Alaska Bldg., Seattle. Owners, City of Seattle. School Architect Blair states that he has started the working drawings for the four new schools which are to be located as follows: North Queen Anne, South Park, Lake School District and one at N. 55th Street.

Nothing definite has been done in regard to the construction of the $60,000 parental school addition for girls on Mercer Island, with the exception of the working out of further details on the preliminary sketches. This work will be ready for contractors probably by the first of the year as will also the plans for the $20,000 reinforced concrete power house building at the same school.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Sewer work, $3,000. Engineering Dept. P. P. I. E. Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for the construction of sewers on the Foreign Concession sites were opened recently by the Fair Commissioners and show G. R. Stevens low at $3,030. For a complete list of these figures see under San Francisco.

Contracts Awarded.

SEATTLE, WASH.—Power house, 2 story and base, reinforced concrete. Cost not stated. Engineer, H. Bittnan, White Bldg., Seattle. Owners, Olympic Power Co. Contractors, Joe Stangler & Co., Seattle. Contract price not stated.

STORE.

BERKELEY, ALAMEDA CO., CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, none. Owners, Union Investment Co., 1132 Valencia St., S. F. The building has been designed to contain a number of stores which will have patent store fronts and plate glass windows. Interior work will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Stores and offices, 10 story and base. Class A construction. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Shirley Ward and associates. The building will cover an area of 50x165 feet. The three upper floors have been leased to the Knickerbocker Club and will be handsomely fitted up for their exclusive use. The ground floor will contain the elevator lobby entrance, and one store. The six other floors will be arranged for lofts. Construction will be of reinforced concrete with the exterior faced with pressed brick and terra cotta. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 4 story and base, reinforced concrete, $41,450. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, M. J. Connell. Contractors, Gragan-McCutcheon Co., Union Oil Bldg., L. A. Contract price, $51,810.

LOS ANGELES, CAL.—Stores and lofts, 4 story and base. Class A construction. Cost not stated. Architect, none. Owner, A. L. Czarney. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated.

SEALED PROPOSALS.

NOTICE INVITING STREET WORK PROPOSALS.

PURSUANT to Statute and to Resolution No. 2363, N. S. of the Council of the City of Oakland passed October 29, 1912, directing this notice, said Council invites sealed proposals or bids for the following street to be done according to the plans and specifications for said work posted and on file.

(a) That a cement sidewalk six feet in width be constructed on the southern side of East Fourteenth street in said city from the eastern line produced of Twenty-fifth avenue as said Twenty-fifth avenue exists between East Fourteenth street and East Sixteenth street to the western curb line of Twenty-sixth avenue, where not already laid in cement or bitumen.

The portion not already laid in cement and bitumen are shown on plans and specifications on file in the office of the City Clerk of the City of Oakland.

(b) That a cement sidewalk six feet in width be constructed on both sidewalks of East Valdez street, in said city from the southern line produced of Richmond avenue to the northern line of Dennison street, where not already laid in cement or bitumen.

(c) That a cement sidewalk six feet in width be constructed on the eastern sidewalk of Fifteenth avenue, in said city, from the northern line of East Sixteenth street to the southern curb line of East Nineteenth street, where not already laid in cement or bitumen.

(d) That a cement sidewalk six feet in width be constructed on the southern sidewalk of East Twentieth street in said city from the eastern line of Seventeenth avenue to the western line of Eighteenth avenue, where not already laid in cement or bitumen.

(e) That a cement sidewalk six feet in width be constructed on the northern sidewalk of Twenty-sixth street in said city from the eastern line of Chestnut street to the western line of Linden street, where not already laid in cement or bitumen.

(f) That a cement sidewalk six feet in width be constructed on both sidewalks of Raymond street in said city from the northern line of Alcatraz avenue to the southern line of Sixty-sixth street, where not already laid in cement or bitumen.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said city, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland on November 18th, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m. At the expiration of the said hour, the Council will open, and examine and publicly declare all bids received.

Note: All of the above mentioned work is to be bid on as separate propositions. For official proposal and complete information address Frank R. Thompson, City Clerk.

PROPOSALS FOR CANAL WORK.

CANAL WORK.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Malta, Mont., until **2 o'clock p. m., December 2, 1912,** for the construction of about 46 miles of the Vandalia South Canal, Milk River project, Mont. The work involves the excavation of about 891,000 cubic yards of material and is situated on the south side of Milk River, adjacent to the main line of the Great Northern Railway, in the vicinity of Vandalia, Tampico, Glasgow, and Nashua, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C., Helena, Mont., or Malta, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Sealed proposals indorsed "Proposals for Five Magazine Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. December 21, 1912,** and then publicly opened, for five magazine buildings at the naval magazine Oahu Isuand, Pearl Harbor, Hawaii. Amount available, $50,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, Hawaii. H. R. STANFORD, chief of bureau.

PROPOSALS FOR SEWER.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 13th day of November, 1912,** for doing the following work to wit:

The construction of sewers and appurtenances in Drumm street from Commercial street to Jackson street and in Jackson street from Drumm street to the Bay.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made,

and must be commenced within fifteen (15) calendar days and completed within one hundred and eighty (180) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at $15,000.00.

All proposals offered shall be accompanied by a check, certified by a responsible bank, payable to the order of the clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

Reclamation Service, Mitchell, Neb.; 519 Commonwealth Building, Denver, Colo., or Washington, D. C. A. P. DAVIS, acting director

PROPOSALS FOR CONCRETE WALL, IRON FENCE AND PIPE LINE.

SEALED bids or proposals are invited to be delivered to the Board of Park Directors of the City of Oakland, at its office, City Hall Annex, 1728 Broadway, Oakland, California, on **Thursday, the 7th day of November, 1912, between the hours of 2 o'clock and 3 o'clock p. m.,** for furnishing necessary labor and materials for and in the construction of a concrete wall with iron fence at Linda Vista Park, and the laying of a pipe line from Lakeside Park to East Shore Park for the Board of Park Directors of the City of Oakland, Alameda County, California, said concrete wall, iron fence and pipe line to be constructed by successful bidders therefor in accordance with the plans and specifications therefor, said plans and specifications being on file in the office of said Board of Park Directors, to which reference is hereby made for full details and description of said work. Proposals shall be made upon blank forms which will be furnished by the secretary of the Board of Park Directors upon application. All work done and material furnished shall be to the approval of and to the acceptance of the Board of Park Directors.

PROPOSALS FOR SAFETY STATION.

PURSUANT to Charter of City of Oakland and Resolution No. 3922 N. S., passed October 29, 1912, the Council of the City of Oakland will receive sealed bids on **November 11th, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.** of said day for the furnishing of necessary labor and material required in the construction of a safety station on East Fourteenth street at Fruitvale avenue in the City of Oakland. The successful bidder shall be required to enter into a contract to construct said safety station within ten days after the award thereof. The said station shall be constructed by the successful bidder therefor, in accordance with the plans and specifications therefor adopted October 29th, 1912, and filed in the office of the City Clerk of the City of Oakland, to which reference is hereby made for full details and description of said work. The construction of said safety station shall be to the satisfaction of the Superintendent of Streets of the City of Oakland and to the satisfaction and acceptance of the Council of the City of Oakland.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—9 story and base. Class A construction, $500,000 or more. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Court Apartment Co. This building will be erected at the northwest corner of Sacramento and Mason streets, and when complete will be one of the most modern apartment house structures in the west. The building will cover a lot 150 feet square and will be of the Class A type of construction throughout. Suites will range from two rooms up to seven and eight rooms with from one to three private baths. The mechanical equipment will include all of the most modern improvements. The interiors of the apartments will be elaborately finished. The exterior of the building will be faced with pressed brick and terra cotta. Plans will be completed and out for bigures within the next week or ten days.

APARTMENT HOUSE 4 story and base, brick and steel, $150,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Realty and Rebuilding Co. The contemplated building will be erected at the southeast corner of Eddy and Fillmore streets, and is a part of the extensive improvements which will be undertaken on the property of the old Orpheum Theatre, destroyed by fire some time ago. This building will have a frontage on Fillmore street of 85½ feet and a depth of 150 feet. The first floor is to be arranged for stores while the upper floors will contain a total of 105 rooms which are to be arranged in two and three room suites. There will be connecting baths, wall beds, steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. The property extends from Turk to Eddy streets along Fillmore and the Turk street corner will shortly be improved by the construction of a similar building. Intervening property along Fillmore street will be built up to one-story brick and steel store buildings with foundations heavy enough to support additional stories. Plans for the first of the above mentioned buildings are complete and figures will be called for at once.

APARTMENT HOUSE—3 story and base, frame, $17,000. San Francisco. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, J. P. Lorden. The building will occupy a corner lot and is to cover an area of 50x65 feet. The interior has been arranged to contain twelve apartments of two and three rooms each. All apartments will have connecting baths and wall beds. Interior finish will be of pine and redwood. There will be a central heating system. The exterior will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE 3 story and base, frame, alteration from flats, $3,000, San Francisco. Architects, Reuben & Mariisch, 3372 16th St., S. F. Owners, O'Conner Bros. The present building, which contains nine flats, will be altered into an apartment house containing

18 apartments of two and three rooms each. Some changes will be made in the plumbing and wall beds will be installed. There will be no exterior alteration. Plans will be ready for figures within a few days.

WAREHOUSE—5 story and base, brick and steel, $60,000, San Francisco. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, O. W. Nordwell Estate. The building will have a frontage of 52 feet and will extend back to a rear street, a distance of 160 feet. Offices and display rooms will occupy the entire first floor. The entire structure has been leased to Albert Pick & Co. of Chicago who will use the upper floors for warehouse purposes. Construction will be of the extra heavy type. There will be steam heat, elevator service and metal window sash and frames. The exterior of the building will be faced with pressed brick. An automatic sprinkler system will be installed. Plans are now out for figures.

FLATS—2 story and base, frame, $4,000, San Francisco. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, C. E. Laye. The building has been designed to contain two modern flats of five and six rooms each with bath. It will have a frontage of 25 feet and a depth of 59 feet. Interior finish will be of pine and redwood with some oak floors. There will be gas grates. Tile will be used in the baths and kitchens. The exterior will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, $5,500. San Francisco. Architect, John J. Foley, Monadnock Bldg., S. F. Owner, Mr. Cella. The building will be erected on 1st avenue, near Hugo street, and is to contain two large flats. The interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. A brick vestibule will be a feature of the house. The exterior will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame, $16,000, San Francisco. Architect, Alfred Voyce, Foxcroft Bldg., S. F. Owner, J. Mocke. The building will be 25x70 feet and has been arranged to contain six small flats. Interior finish will be of pine and redwood throughout. There will be gas grates. The exterio will be covered with white cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

RESIDENCE — 2 story and base, frame, $2,500. San Francisco. Architect, none. Owner, A. R. Lapham, 1853 McAllister St., S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine and redwood throughout. Some oak floors will be used. There will be an open fire place with brick or tile mantel. The exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, $2,000. San Francisco, Architect, none. Owners, Homeland Building Co., Merchants' Exchange Bldg., S. F. The bungalow will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be an open fire place and brick or tile mantel. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $9,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The dwelling has been designed for an eight-room house with every modern convenience. There will be two baths. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath rooms and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are nearly ready for figures.

RESIDENCE — 2 story and base, frame, $2,000. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th Ave. The dwelling will contain six rooms and bath. Interior finish will be of pine, redwood and elm. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCES—2, 2 story and base, frame, $3,000 each, San Francisco. Architect, none. Owner, E. Ginley, 131 5th avenue, S. F. Each of these houses has been designed to contain 6 rooms and bath. The interiors will be finished in pine and redwood throughout. Oak floors will be used. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the baths and kitchens. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, $2,800 each, San Francisco. Architect, none. Owner, C. A. Hall 1318 5th Ave., S. F. These houses will each contain six rooms and bath. Interiors will be finished in pine and redwood throughout. Some oak flooring will be used. There will be open fire places and tile or brick mantels. The exteriors will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $2,500. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, E. Hall. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood with oak floors in the living and dining rooms. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, $6,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg.. S. F. Owners, Urban Realty Co., Phelan Bldg. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with klinker brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $10,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with two baths, laundry and sleeping porch. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in all principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. There will be a vacuum cleaning system installed and an automatic water heater. The exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of terra cotta tile. Plans are complete and the work will be done by Day Labor.

HOTEL—6 story and base, reinforced concrete, $40,000. San Francisco. Architect, Max Geist, Lick Bldg., S. F. Owner's name withheld. The building is to be erected on Howard street, between 4th and 5th streets, and will cover a large ground area. The first floor will contain stores and the hotel lobby. The upper five floors will be subdivided into about 100 guest rooms and a number of baths. Plans provide for steam heat, elevator service and running hot and cold water. The exterior will be faced with cement plaster. Plans will be complete and ready for figures in about three weeks.

HOTEL—7 story and base, brick and steel, $70,000. San Francisco. Architect, W. H. Weeks, 75 Post St., S. F. Owner, Charles C. Judson. The building will be erected in the north line of Ellis street near Mason, and will have a reinforced concrete frame and exterior walls faced with pressed brick. There will be the main office, lobby and parlors on the first floor. The upper floors will contain a total of about 150 rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and other modern improvements. Plans are now being prepared.

HOTEL—5 story and base, brick and steel, $90,000. San Francisco. Architect's name not given. Owner, Dr. C. F. Buckley, Elkan Gunst Bldg., S. F. The building is to occupy a corner lot covering a large ground area. There will be the hotel lobby, offices, parlors and stores on the first floor. The upper floors are to contain in the neighborhood of 180 rooms which will have connecting baths. Plans provide for steam heat, elevator service, running water and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and now in the hands of selected contractors.

HOTEL—5 story and base, reinforced concrete, $35,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, A. Tonn. The building will be erected in Post street, between Taylor and Jones, and will contain in the neighborhood of 120 guest rooms, nearly all of which are to have pri-

vate baths. There will be steam heat, elevator service and running hot and cold water. Construction will be of reinforced concrete throughout. Exterior walls will be faced with cement plaster and stone. The interior will be finished in pine. Plans are being prepared.

HOTEL—3 story and base, brick, $10,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, A. L. Altmark. This work has been mentioned here before. The first floor will be occupied by a restaurant and the upper floors divided into single rooms. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Bids have been taken and are now under advisement in the architect's office.

HOTEL—2 story and base, brick, $15,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will cover an area of 37½x110 feet. There will be several stores on the first floor and about 40 guest rooms on the upper floor. Hot and cold running water is to be supplied to all rooms. The exterior of the building will be faced with pressed brick. Bids on the work have been taken and are now under advisement in the architects' offices.

HOTEL—6 story and base, brick and steel, $70,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, W. J. Yore and J. M. Kane. This work has been mentioned here several times before. Plans have recently been out for figures and all bids are now in. Figures have been taken under advisement by the architects and a contract will probably be awarded within a few days.

SCHOOL BLACKBOARDS—Cost not stated. San Francisco. Architectural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Whitaker & Ray Co. were low at $4,295 for furnishing the slate blackboards in the Girls' High School. For a complete list of these figures see under San Francisco in thi sissue.

SEWER WORK—$3,000. San Francisco. Engineering Dept. P. P. I. E. Co., Exposition Bldg., S. F. Owners, Panama-Pacific Exposition Co. Bids for the construction of sewers on the Foreign Concession sites were opened recently by the Fair Commissioners and show G. R. Stevens low at $3,030. For a complete list of these figures see under San Francisco.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and base, frame, $40,000. Oakland, Cal. Architect, Robert Morgenier, 1644 Telegraph Ave., Oakland. Owner's name withheld. The building is to be erected on Oak street near 12th and will contain 36 apartments of two rooms and bath each. There will be steam heat, wall beds and a vacuum cleaning system. The interior will be finished in pine and redwood with some hardwoods. A hot water heater will be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, alterations, $10,000. Oakland, Cal. Architect, Ivan C. Satterlee, 170 13th St. Oakland. Owner, C. M. MacGregor. The present three-story frame building, which contains six flats, will be altered so as to contain 24 apartments of two rooms and bath. There will be new electric work, plumbing and interior finish. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE -3 story and base, frame, $30,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, Dr. F. R. Jordan. The building is to be erected at the corner of Oak and Lake streets, and has been designed to contain 21 apartments of two and three rooms each. There will be wall beds steam heat and a vacuum cleaning system. Interior finish will be of pine, redwood and oak. A hot water heater will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

WAREHOUSE 5 story and base, reinforced concrete, $70,000. Oakland, Cal. Architect, C. M. Cook, 613 Market St., S. F. Owner's name withheld. This building was mentioned in the last issue. As stated at that time there will be six stores on the first floor and lofts above. The building will cover an area of 100X120 feet. Plans are nearly complete and figures will be called for shortly.

RESIDENCE — 2 story and base, frame, $6,500. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, J. W. Hupp. The house will contain seven or eight rooms, bath, sleeping porch and laundry. Interior finish will be of pine and redwood. Oak floors will be used throughout. There will be a coal furnace and open fire places. Mantels will be of tile and brick. A Ruud heater will be installed. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

BUNGALOW — 1 story and base, frame, $2,600. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co, 2025 Addison St., Berkeley. The house has been designed for a five-room bungalow with bath and sleeping porch. Interior finish will be of pine throughout. Floors will be of oak. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. E. Borgmeyer, Stimson Bldg., L. A. Owner, Lewis E. Paulson. The building will cover an area of 50x111 feet and will contain sixty rooms arranged in two and three room suites with wall beds and connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be taken shortly.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, L. W. Hellman Bldg., L. A. Owner, C. M. Carter. The building will be 90x110 feet. There will be 89 rooms in the upper two stories. These will be arranged in 37 two-room suites and five three-room suites. All apartments will have connecting baths and wall beds. Plans provide for steam heat and elevator service. Interior finish will be of pine and redwood with some oak. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick and steel, $85,000. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, Jacob Morris. Revised drawings for this building have been completed and show the structure reduced ten feet and covering an area of 100x108 feet. There will be a total of 120 rooms arranged in two and three room suites. All apartments will have wall beds and connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. Bids will be called for at once.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. W. Riewe, California Bldg., L. A. Owner, W. R. Neelands. The building will contain a total of 75 rooms, arranged in suites of two and three rooms each with private baths and wall beds. There will be a concrete foundation 148x50 feet. The exterior will be faced with pressed brick. The interior will be finished in birch throughout with oak floors. There will be steam heat, elevator service and a vacuum cleaning system. Plans are nearly complete.

LAUNDRY BUILDINGS—Reinforced concrete, $100,000. Los Angeles, Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Excelsior Laundry Co. Only preliminary plans for this work have been prepared and a description of the building is not possible at this time. There will probably be two or more structures, one of one story and the other of two stories. Construction will be fireproof throughout. The most modern laundry machinery and equipment will be installed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

WAREHOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Edward C. Cobb, Central Bldg., L. A. Owner, D. Oyharzadel. The building is to cover an area of 127x300 feet and will be of heavy mill construction. There will be several freight elevators. Metal window sash and frames will be used. There will be fireproof doors and an automatic sprinkler system. The exterior will be faced with stock brick. Plans will be ready for figures within a week or ten days.

LODGE HALL—3 story and base, reinforced concrete. Cost not sitated. Los Angeles, Cal. Architect, I. H. Seehorn, 328½ Clay St., L. A. Owners, Woodmen of the World. This building will cover an area of 116x125 feet. The first floor is arranged for four stores and a lodge room, billiard hall, etc. The upper two stories will be divided into about sixty modern apartments with private baths and wall beds. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTEL—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, Hiram Kivel. The building will be triangular in shape with a frontage of 180 feet on San Pedro street, 198 feet on Wilmington street and 138 feet wide at the rear. It will contain sixteen stores on the ground floor and 102 rooms and six bath rooms in the upper floors. Each room will have a lavatory with hot and cold water. The exterior will be faced with pressed brick. The interior trim will be of pine. There will be plate glass store fronts, composition roof, steel beams and columns, electric wiring, gas pipes, etc. Plans are nearly complete.

HOTEL—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, S. H. Pardue. The building will contain about fifty guest rooms and twenty baths. The interior will be finished in pine and birch. There will be steam heat. Running water is to be supplied to all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Lawrence B. Burck and Dr. Walter Jarvis. The building will be 60x160 feet and will contain stores and the hotel lobby on the first floor. Upper floors are arranged for 140 guest rooms and 70 baths. Construction will be of reinforced concrete with exterior walls faced with pressed brick and terra cotta. The lobby will be finished in marble and tile and the interior of the rooms in birch and pine. There will be steam heat, elevator service and a vacuum cleaning system. There is a possibility that the height may be increased to ten stories. Plans are being prepared.

HOTEL—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Ye Planry Co., L. A. Owner, E. A. Huene, Tital Ins. Bldg., L. A. The building will cover an area of 100x120 feet. There will be four stores and a moving picture theatre on the first floor and a total of 86 rooms and 26 baths on the upper floors. Plans include steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

SCHOOL—1 story and base, brick. Cost not stated. Bloomington, San Bernardino Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Bloomington School District. New figures are to be taken for this work. The low men on the previous contract have discovered an error in their figures and have withdrawn from the contract. Bids will be opened on November 16th.

SCHOOL—1 story and base, brick. Cost not stated. El Modena, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. New figures for this building will be called for at once. Revised drawings show considerable omissions in both size and interior finish. Plans are now out for figures.

STORES AND OFFICES—10 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Shirley Ward and associates. The building will cover an area of 50x165 feet. The three upper floors have been leased to the Knickerbocker Club and will be handsomely fitted up for their exclusive use. The ground floor will contain the elevator lobby entrance and one store. The six other floors will be arranged for lofts. Construction will be of reinforced concrete with the exterior faced with pressed brick and terra cotta. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, E. C. Bower. The building will contain 80 guest rooms, which will be arranged in two and three room suites. There will be private baths, wall beds, steam heat and a vacuum cleaning system. Interior finish will be of pine and redwood with some oak floors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

CHURCH—Brick construction. Cost not stated. Van Nuys, Los Angeles Co., Cal. Architect, E. R. Jeffery, Citizens' Bank Bldg., L. A. Owners, Van Nuys Methodist Church. The building will cover an area of 75 feet square and will contain a main auditorium with a seating capacity of 250 people besides Sunday school rooms, parlors and a pastor's study. The exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

HOSPITAL GROUP—3 reinforced concrete buildings. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laugalin Bldg., L. A. Owners, Childrens' Hospital. Contractors, F. O. Engstrum Co., 5th and Seaton Sts., L. A. Contract price not stated.

HOSPITAL—1 story and base, cement block construction. Cost not stated. Tropico, Los Angeles Co., Cal. Architect, Walter Webber, Ferguson Bldg., L. A. Owner, Dr. D. B. Rockwell. Contractors, Home Builders, Los Angeles. Contract price not stated.

Hotel—5 story and base, brick, $45,000. Ocean Park, Los Angeles Co., Cal. Architects, Eager & Eager, Story Bldg., L. A. Owner, E. A. Allen. Contractors, Alta Planing Mill Co., 820 McGarry St., L. A. Contract price, $45,000.

STORES AND LOFTS—5 story and base, reinforced concrete, $54,480. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, M. J. Connell. Contractors, Gavagan-McCutcheon Co., Union Oil Bldg., L. A. Contract price, $54,840.

STORES AND LOFTS—4 story and base. Cost not stated. Los Angeles, Cay. Architect, none. Owner, A. L. Cooley. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated.

APARTMENT HOUSE—4 story and base, brick and steel, $120,000. Los Angeles, Cal. Architect's name not given. Owners, Central and Pacific Improvement Co. Contractor, J. A. Mathis, 336 West 31st St., L. A. Contract price, $120,000.

WAREHOUSE—2 story and base, concrete and brick, $12,000. Los Angeles, Cay. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Sperry Flour Co. Contractor, R. W. Martin, Builders' Exchange, L. A. Contract price, $12,746.

SEATTLE AND WASHINGTON.

SCHOOLS—4, 2 story and base, reinforced concrete, $60,000. Seattle, Wash. Architect, Edgar Blair, 901 7th Ave., Seattle. Owners, City of Seattle. School Architect Blair states that he has started the working drawings for the four new schools which are to be located as follows: North Queen Anne, South Park, Lake School District and one at N. 55th Street.

Nothing definite has been done in regard to the construction of the $50,000 parental school addition for girls on Mercer Island, with the exception of the working out of further details on the preliminary sketches. This work will be ready for contractors probably by the first of the year, as will also the plans for the $20,000 reinforced concrete power house building at the same school.

HARBOR IMPROVEMENTS—$450,000. Seattle, Wash. Engineer, Paul P. Witham, Central Bldg., Seattle. Owner, Port of Seattle. Plans for the improvement of the East Waterway have been approved and are now out for figures. Bids will be opened by the Port Commissioners on November 7th. The work has been divided into six parts with alternative propositions on the first three items. Those of (1) excavation and slope protection, (2) substructure; (3) construction and alteration of water mains and other public utilities. Other divisions are: (4) superstructure, (5) Whatcom avenue concrete roadway support, and (6) railway tracks.

Involves Much Building.

This project involves much building, namely, two creosoted pile docks, 1,000 feet long and 108 feet wide each, a warehouse on each dock, 2 stories high for the first 200 feet from the street line and one story high for the balance of the 800 feet. To be 90 feet wide and of frame construction. The ground floor area will be 85,913 square feet.

A slip 22[illegible]feet wide will also be dredged between the docks from the East Waterway into the foot of Whatcom avenue, Stacey and Lander streets. The work involves the removal of about 5,000 cubic yards of material.

COURT HOUSE—9 story and base. Class A construction. $900,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle and King Co. Plans have been officially approved for the construction of a city and county building which is to be erected in the city of Seattle. None of the details of the construction are available at this time, but will be printed as soon as available.

Contracts Awarded.

WAREHOUSE—2 Story and base, reinforced concrete, $75,000. Vancouver, B. C. Architect, Thomas Hooper, Vancouver. Owners, Merchants' Ice Co. Contractors, Norton Construction Co., Vancouver. Contract price, $75,000.

HOTEL—6 story and base, brick and steel, $70,000. Vancouver, B. C. Architect, Otto Moberg, Ins. Court Bldg., Vancouver. Owner, M. Walsh. Contractor, H. Murray, Vancouver. Contract price, $70,000.

POWER HOUSE—2 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Engineer, H. Bittnan, White Bldg., Seattle. Owners, Olympic Power Co. Contractors, Joe Stangler & Co., Seattle. Contract price not stated.

BRIDGE PIERS—Concrete, $60,000. Seattle, Wash. Engineering Dept. Northern Pacific R. R. Co., Seattle. Owners, Northern Pacific R. R. Co. Contractors, International Contract Co., Central Bldg., Seattle. Contract price, $60,000.

PORTLAND AND OREGON.

Contracts Awarded.

WAREHOUSE—5 story and base, brick, $55,000. Portland, Ore. Architects, MacNaughton & Raymond, Concord Bldg., Portland. Owners, Wadhams & Kerr Co. Contractors, Advance Construction Co., Henry Bldg., Portland. Contract price, $55,000.

REQUISITES OF GOOD GLASS SAND.

Sand is the main constituent of glass, constituting from 52 to 65 per cent of the mass of the original mixture, or from 60 to 75 per cent of the finished product after melting has driven off carbon dioxide and other volatile materials. On the quality of the sand depend the transparency, brilliancy, and hardness of the glass. For the finest flint ware, such as that used for optical and cut glass, "water whiteness," absolute transparency, great brilliance, and uniform density are required, and only the purest sand can be employed, since

slight impurities, especially small quantities of iron, tend to destroy these effects. For plate and window glass, which are commonly pale green, absolute purity is not so essential, but generally the sand should not carry more than 0.2 per cent of iron oxide. Green and amber glass for bottles, jars and rough structural work can be made from sand relatively high in impurities. An excess of the chief impurity, iron, is usually avoided in the quarries by a careful selection of the whitest sand, although the whitest sand is not invariably the purest. Repeated washing tends to remove the iron. Magnetic separators also have been resorted to, especially when the iron is present in the form of magnetite. Clay materials are objectionable because they cloud the glass. Washing helps to remove them, since they occur usually in a very finely divided state. Magnesia, which is more apt to be introduced into glass materials through limestone than through sand, is troublesome because it renders the batch less fusible. In examining sand in order to ascertain its value for glass making, inspection with a magnifying glass is the best preliminary test. The following points should be observed: The sand should be nearly white and of medium fineness (passing a 20 to 50 mesh horizontal sieve); the grains should be uniform in size, even, and angular; less preferably they may be rounded. A simple chemical test consists in heating the sand in a dilute acid. Effervescence indicates the presence of lime; loss of color shows the presence of clay impurities. Iron in the most minute quantity may be detected by dissolving sand in hydrofluoric acid and adding potassium ferrocyanide, which produces a blue precipitate if iron is present. Complete quantitative analyses as well as a furnace test should be made as a final determination of the character of a prospective glass sand.

(From Advance Chapter, Mineral Resources of the United States for 1911.)

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth street, N. W., Washington, D. C.

A complete copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of 10 cents. Persons ordering copies must give number of patent.

1,040,019. Safety Device for Elevators, Chas. Carson and E. B. Timmerman, Chicago, Ill.

1,041,042. Window Locking Device. I. A. Dean, Niagara Falls, N. Y., assignor to F. N. C. Jerauld, Niagara Falls, N. Y.

1,042,048. Fireproof Structure. W. E. Edwards, Jr., Kansas City, Mo.

1,041,147. Hinge. Wm. L. Murphy, San Francisco, Cal., assignor to Murphy Wall Bed Co.

1,041,245. Building Construction. L. K. Davis, New York, N. Y.

1,041,305. Latch and Lock. Wm Kraft, Detroit, Mich.

1,041,389. Concrete Wall Construction. Enrest Wiederholdt, St. Louis, Mo.

1,041,446. Sliding Door Hanger. O. W. Dolph, Cincinnati, assignor to The O. Armleder Co., Cincinnati, O.

1,041,551. Apparatus for Molding Concrete Stair Cases. C. H. Wittnooht, St. Louis, Mo., assignor to Wittnooht Collapsible Concrete Forms Co.

BIG REALTY DEAL IN VALLEJO IS COMPLETED.

Local Bank Building May Be Built on Waldorf Block.

VALLEJO, October 28.—The biggest realty deal consummated in this city for years was put through Saturday when Dr. Walter S. Thompson and Attorney Harlow Greenwood purchased the Waldorf block at Georgia and Marin streets. The price was not given out but will reach large figures. The site is the finest described in Vallejo. The property was sold by W. R. Acock. It is probable that a San Francisco bank will locate on the premises.

TRAP ROCK YIELDED FOR 1911.

The value of the output of trap rock in the United States in 1911 was $6,399,[illegible] decrease of $63,[illegible] as compared with 1910. California and Massachusetts, according to the United States Geological Survey, were the two States showing the largest value of production. Crushed stone for concrete increased in value.

Editorial Comment.

October showed up to some extent in the building operations compared to previous years although it showed an increase over the next preceding two months. The record for last month registered $1,918,839, which was divided as follows: Brick and concrete, $916,352; frame construction, $846,060; additions and alterations, $156,427. October, 1911, showed a total of $1,928,826 hence this month shows a decrease of only $10,000, which is practically an even break. Real estate sales, however, reported reached the high mark for October. The city's purchases of ground for the Civic Center helped to swell this total so it is to be expected that real estate transfers of city property naturally means building construction.

As it is the average for the year has been better than two millions a month. Totals for the several months are as follows:

January	$1,692,810
February	1,696,232
March	2,146,011
April	3,435,334
May	3,153,910
June	2,058,224
July	2,217,215
August	1,797,408
September	1,886,743
October	1,918,839

Compared with other years the monthly record for the past ten years are as follows.

October, 1903	$1,269,184
October, 1904	1,398,524
October, 1905	1,490,510
October, 1906	6,836,331
October, 1907	4,980,508
October, 1908	3,032,047
October, 1909	2,083,385
October, 1910	1,772,952
October, 1911	1,928,826
October, 1912	1,918,839

Generally speaking the month has been about an average in building construction. Sacramento reports a record month and California cities generally seem to be up to the usual mark. By the end of the year San Francisco ought to be well along the line on many improvements and the beginning of the new year ought to witness a growing activity in all lines.

So far as the election goes it is all over now but a part of the shouting. It has been a remarkable campaign in many respects. It has been revolutionary in that the movement for popular government crystallized in both the old parties and the result was that the machine rule of the party in power trying to impose the rule of the minority on a majority sentiment broke the Republican party in two. The result has been beneficial to the advocates of popular government. It has forced the issue and exposed the methods of bosses and made a clean cut line of demarkation between the advocates of popular government and those who favor the rule of an aristocracy. The old differences of opinion that divided the parties at the time of the Civil War no longer hold. A new era has arrived and hereafter the issue will be between progressives and conservatives.

Now that the election is over business should settle down to its ordinary routine. Wilson has announced his intention to carry out the progressive policies upon which he was nominated. The California Taftites should be satisfied that they have defeated the progressives and the Democrats are jubilant in that they have won the first time in a generation. Consequently there should be an era of good feeling and general confidence established.

As there is a democratic majorit both houses of the national legislature it will be up to Mr. Wilson to do something to carry out his pledges to the people. The way will now be clear. He will have a working majority in both houses. He will have to overcome the opposition of the reactionaries who will work against innovation in the existing order of things.

One thing at least was demonstrated. That the steal of the Chicago convention was without warrant and that as Hiram W. Johnson said, Taft was a neglible quantity in the campaign. Had the progressives been seeking victory or a division of political spoils and allied themselves with the Democrats the result wodld have been even more demonstrative. The result against the Taft administration was complete.

Major W. S. Scott, the erstwhile champion of the Mechanics' Lien Law, which was passed after such a monumental struggle, is elected as a representative from the 28th Assembly District. He goes in with a handsome majority which is due to his own indefatigable efforts in a great measure as it was due to his untiring labors that the new lien law was passed. The "Builder" congratulates Assemblyman Scott upon his success and builders generally can rest asured that they will have a wide awake representative in the legislature as well as the 28th Assembly District.

There is a plan afoot to establish a school for reformed convicts at Folsom. It is a departure in the methods to redeem the wayward and establish some sort of self respect for those who have fallen in the race. This is a step in the right direction and is intended to give to those who have within themselves some desire to regain their lost foothold some grounds to start life anew and forget the past.

This is much more commendable than

a lot of misdirected sentiment one sees in the newspapers nowadays. And it sets out something of practical value that can be taken advantage of by all alike.

While these things are all right for the reform and care of criminals, like all other diseases it is much better to establish means of prevention than devise any kind of cures. To exercise judicious care over the young; to establish wholesome amusements; to remove pitfalls from the community; to give aid to the discouraged and provide them with employment are details which society can better employ for the prevention of crime than the reform of those who have lost out in the race.

As population increases new demands are made for territory in different parts of the world to provide a place for the people. As a result new territories are opened and new districts acquired. Chief among the developments of new territory throughout the world is that of railroad building. Aside from the scheme of the Frenchman to let the waters of the Mediterranean into the Sahara desert, which are more or less chimerical, the French government proposes to build a railroad known as the Trans-Sahara line which will cross the great desert and connect the French provinces of Algeria and Morocco on the northern border with the same nation's colonies on the Congo and the Niger.

A great advantage will be gained not only commercially to the French nation but also for military purposes as it will allow free and direct transportation of troops to all the provinces and even to the mother country under protection of the fleet.

Preliminary surveys of the region have been made and it is thought the entire plan for the railroad can be drawn up before the end of the year. This marks a development in that country. If it does not go through now it will be long before it does. The Sahara desert is as large as the United States. It lays under the tropical sun and possesses the possibilities for untold agricultural production. What parts of it may be reclaimed remain yet to be seen. As population increases and demands are made for more and more territory we may expect the southern continents of Africa and South America to be developed and become the habitations of active European races. The great hindrance to the development of these continents have been the sanitary conditions and lack of stable government. With the progress of science we may expect much of the disease bearing region to be conquered. Railroads and avenues of traffic will bring it under the dominion of white man and materially increase the world's productions.

The United States Supreme Court has announced a number of important changes and improvements in the rules governing the issue of injunctions and temporary restraining orders, and other equity proceedings, in all the Federal Courts.

These reforms are designed to enable more even handed justice, to lessen cost and avoid needless delay.

The progressive agitation has not been without fruit in that it has accomplished this much. The old antiquated forms that were in use previous to the revolution and not adapted to our own times and should have been discarded a half century ago. It is this engrafting of old forms on modern conditions that enables those in power to take advantage of the general public.

Many unsuccessful hunters may read with cynical distrust the estimate of an official of the State Fish and Game Commission that there are 50,000 deer running wild in California.

It appears, however, that the figures are not mere guess-work but based on careful inquiry and observation.—Sacramento Bee.

At the coming charter amendment election it is proposed to ask the people for authority to sell the library bonds authorized in 1904 for the purpose of securing money to erect a one million dollar public library building in the Civic Center. The bonds authorized only 3½ per cent interest which is a lower rate than even the savings banks pay so it is almost impossible to sell them on the market.

The city needs a splendid building for its public library. Whether we agree in the propriety of accepting the Carnegie gift or not there is no question that we should do the best we can under the circumstances to erect a suitable temple for the archives of the learning of the world. For books have advanced the progress of mankind more than all the churches and our public library should be a temple where all can go and worship at the shrine of knowledge.

It is said that $500,000 of the Carnegie gift will be available for the new building, so that if permission is given to sell the authorized bonds below par, there will be available enough funds to finance the project. The new library building will be a valuable addition to the monumental buildings of the Civic Center. Together with the opera house, that is soon to be built, and the auditorium and the City Hall the Civic Center should present an imposing appearance by 1915 and give the visitors to the Exposition City a favorable impression at least of the city's civic pride.

The reports state that the investigation into the express rates of the State shows a profit of 800 per cent for the express company. This is a fact which every thinking person knew or at least expected to be the case. And this 800 per cent profit is the reason that there is no parcels post established in this country, or at least, the cause of the continuous delay.

The Progressive Party has polled upward of 4 million votes. It has elected numerous representatives and congressmen and most signally defeated the machine which nominated Taft by fraudulent votes. It has carried important states and is the second party in amount of prominence and popular support. Considering the fact that 90 per cent of the people ordinarily vote as their father's voted the showing of the new party is the most remarkable one in American politics. If there was any question as to the result of the primary elections in the states where the delegates were stolen by the Chicago convention one has only to look at the results of the recent ballot. Progressive democrats and progressive republicans have everywhere been victorious.

The war in the Balkan States seems to have been about the most effective and the shortest on record. The Balkan states were evidently prepared and the occasion offered itself at the close of the conflict with Italy and the allies of Southern Europe struck at the opportune time. They had waited long for the opportunity. Years of misrule and fearful atrocities by the Turkish soldiers lay behind the ostensible cause of the conflict. The Turks are Mohammedan fanatics with a fierce and ruthless hatred of Christians, a hatred that is only born of ignorant religious prejudice and they knew no laws of justice or right in their dealing with their Christian subjects. The Turkish civilization belongs to the middle ages. It has been imposed and sustained in Southern Europe by the selfishness of the great powers and a Christian people has been compelled to suffer the atrocities and butcheries of this inhuman ruler because a few of the great christian states of Europe feared that some other state might acquire some advantage if the Turk was driven from Europe.

It has been said that the Turks have butchered more people in the Balkan states than the present number of their inhabitants. They have ever been plunderers and robbers. Their only idea of rule is robbery and profit and they recognize no duty toward conquered territory. The officials seem to have been entirely corrupt. The common soldier is still a great fighter. His fanatic belief makes him of desperate valor and devoid of fear as he believes that if he dies in battle he will be immediately translated into the seventh heaven. He is a trained athlete and capable of almost super human endurance.

Modern warfare is, however, a different thing from hand to hand mediaeval fighting. Battles are now fought at long range. The army that has supplies and is capable of quick mobilization and transportation is the one that secures the point of vantage. The individual soldier counts for less than formerly. It is preparedness for war that enables a nation to throw its fighting strength where it is most needed and gain a position where it is hard to dislodge them. It is the case of Japan and Russia over again. Only in the Balkan states the territory is adjacent and limited and the action has been quick and decisive.

FIRST EXPOSITION TAX PAID BY RAILROADS.

SACRAMENTO, November 9.—The first Panama-Pacific exposition taxes assessed against the railroads of California at the rate of .044 cents on the $100 assessed valuation, and the only ad valorem tax assessed by the State in the counties, have been paid into the State treasury. Those companies which paid are: Southern Pacific, $490.26; same company, $11,165.74; Nevada and California Railway, $243.46; Hanford and Summit Lake Railway Company, $13.03, and the Central Pacific Railroad Company, $1805.83.

CONSTRUCTION DETAILS.

A Brief, Practical Consideration of the Essentials of Design and the Requirements of Dependability.

By E. Brown.
Professor of Applied Mechanics and Hydraulics, McGill University, Montreal, Que.
(From a paper read before the Montreal Builders' Exchange.)

Concrete construction has many followers, ranging from the rabid enthusiast who will assert that it is the thing for almost every kind of building, to the more modest and perhaps more effective advocate who realizes at one and the same time its advantages and its limitations. There was a day when it had its opponents; but its record of actual achievement in the past few years has established its claim to being one of the principal forms of construction at the present day. The opponents have become friendly critics or even converts, and I imagine there are now very few who are so blind as to ignore the facts of the situation.

There are, however, some who seem to think that a designer in reinforced concrete is drawing on his imagination (shall I say) to a much greater extent than a designer of steel work. Some steel designers—at all events until recently—would almost give you the impression that there work was calculated to such a nicety as compared with that possible in reinforced concrete work, that the latter by comparison had very little claim to exactitude. I am not here advocating one form of construction as against another, nor any particular type of either form, but I do say that if we set down the exact conditions of the problems confronting a designer in the rival forms of construction, there is not much to choose in the matter of exactitude. I am not here concerned with any consideration of actual construction. We can have good and bad work in any kind of construction. I am speaking of the conditions of design. The problem is always this, no matter whether it is a design for a large building or for an office building or store:

1. To make some estimate more or less exact, of the forces which will probably be brought to bear on the structure considered—floor loads, wind loads, etc.

2. By some theory, more or less exact, to determine the forces which the above estimated loads will produce in the component parts of the structure.

3. From our knowledge more or less exact, of the physical characteristics of the materials employed in the various parts of the structure, to proportion those parts so that they may withstand successfully, or an indefinite period, the forces which are estimated to come upon them.

After that, it is necessary to have the work carried out in strict conformity to the designs, by efficient labor, under the best supervision. In the matter of the first two processes above, designers of steel work, and of reinforced concrete work are on the same footing.

As regards the third point, our knowledge of the properties of concrete and of the effects of changes in its composition, is of considerable extent, and I do not think that a conservative designer need have any anxiety in regard to the behavior of his structure if reasonable, sound specifications are lived up to. Steel designers, in recent years, have come to consider much more carefully than heretofore the probably effects of eccentricity in some of their details; and in this, reinforced concrete designers can learn from them. In the particular case of columns consisting of angle and other sections latticed and tied together, we are only in the early stage of finding out how they really act. I could show you experimentally the actual conditions of stress in such a member as a tie-bar made up of two angles back to back, connected by a plate at their ends, and separated at intervals by distance pieces—one of the commonest forms of construction imaginable. Experiments of a very interesting character are being made by one of our staff at McGill on this matter; and all I need say to emphasize the point I am now making, is that any steel designer who thinks that even such a simple built-up member acts as one piece has another "think" coming to him. No, gentlemen, we are all engaged in "estimating" something. Formulae expressing the complex action which is going on either in a steel structure or in one of reinforced concrete, may be forthcoming, but of this I have grave doubts, and, even if they are, we shall, for practical purposes, make such modifications of them as will eliminate from them any complexities that are due to effects which are either of small magnitude or which can be allowed for in a simpler manner.

A survey of the development of our professional work generally will show that whenever and in so far as it has been possible to exalt any branch, of that work to the rank of a science, the progress has been due to the gradual but certain development of a few fundamental ideas. Our great electrical industries of today have developed by applications of the great principle discovered by Faraday when he found that a closed coil of wire moved across a magnetic field generated an electric current. And while few of our branches of engineering science are as scientifically exact as the one I have just mentioned, in all or most of them there is such a mass of practical experience and of results of tests to couple with some simple fundamental ideas expressing actual conditions but incidentally, that we can go ahead with our designs with complete confidence in the results. The science of hydraulics is an instance of this phase of the work of our profession.

So that while I, for one, should not be prepared to admit that the steel designer can figure the actualities to a much finer degree of accuracy than the reinforced concrete designer, I do think that the latter depends to a tremendous extent on the honesty and sincerity with which his plans are carried out. Structural mild steel is manufactured in our steel mills under reasonably uniform conditions; and speaking broadly, of course, an engineer buys it in the open market with considerable confidence in its physical properties. He knows that he can figure safely on 16,000 pounds per square inch in tension, and that if he is cutting his sections as finely as possible, he may reduce them by say 10 per cent and increase his unit stress accordingly. The properties of his material are not altered. **He is not taking an unknown risk.**

But in concrete construction the material by which the compressive forces in the structure are carried is made and laid on the spot, and is liable to such variations in mixing as may occur in practice, quite apart from any variations in quality due to change of composition. If we reduce cement by, say, 10 per cent, use an inferior sand, or change the nature of the aggregate without definite knowledge of the effects of this change—if we do all or any of these things, we are altering to an uncertain extent the physical properties of our concrete. **We are taking an unknown risk,** and one which to my mind is entirely different in character from that involved in a cut of a definite per cent on steel sections.

We know from experience that certain expectations in the properties of mild steel will almost certainly be lived up to; and it is the power of those engaged in reinforced concrete work to produce a concrete equally uniform and reliable. A successful designer has always in mind certain possible differences between assumed and actual conditions, and it is in a proper realization of such differences, and in the capacity of the designer to appreciate the extent of their influence, that reliance must be placed. If, for any reason, he may fear that the concrete will stand a compression stress of only 400 pounds per square inch, instead of perhaps 600 pounds, his opportunities to make both a successful and an economical design are at once limited. Steel concrete is much the same weight per cubic foot as good concrete; and if the concrete is poor, and capable of safely carrying only a small compressive stress, more is required to sustain a given compresssion load, and more steel is required to carry the extra dead load necessitated. But we **can** get uniformly high-grade concrete if proper care is exercised. At the end the calculation of a design may be rendered of little avail if the actual work is not carried out in a thoroughly conscientious manner.

Any theory of reinforced beams starts from the assumption that the several layers of the beam are lengthened or shortened by an amount proportional to their distance from the plane separating tension and compression areas. Careful experiment shows while this is not rigidly true in all cases, it is conformed to with a reasonable accuracy in most cases. Accepting it as true, we shall get different results for the bending moment which the beam can carry, according as we assume:

(a) Variable modulus following assigned law.

(b) Modulus uniform during loading.

(c) Different values for the uniform modulus.

Assume a rectangular beam 10 inches deep, with, say, 1 per cent reinforcement. Then, taking average concrete, one should find that under working loads the distance from the steel line to the point in the section where the resulting compression acts, is about:

8 feet 6 inches if we assume a variable modulus with the definite law of variation.

8 feet 8 inches if we assume a uniform modulus of 3x10 raised to the sixth power pounds per square inch.

The safe bending moment on the beam is the product of the allowable force in the steel and one or other of the above numbers. It is evident that the difference shown in the safe bending moments is only some 2½ per cent and any attempt to figure to such a degree of supposed accuracy is foolish. Rods, in practice, may easily be displaced by an amount affecting strength calculations far more than do these different theories.

These figures neglect concrete tension, and their differences indicate the extent to which different methods of calculation affect the broad features of design. Under the specifications adopted by the American Society for Testing Materials, the American Society of Civil Engineers, and the Maintenance of Way Association, all concrete is now taken to have the same modulus, a great change since the days when cinder concrete, rock concrete, gravel concrete, etc., were all supposed to have a different modulus, following a different law of variation as the load increased. It has been amply demonstrated that all these were unnecessary refinements, and the Standard Specifications recently drawn up have swept them away. Similar simple specifications were drawn up earlier by the Royal Institute of British Architects, and I would urge the adoption of some such standards here. I do not believe you have any such standards at present. When in Toronto a couple of years ago attending the Cement Association Congress, I learned that their building by-laws prohibited a designer from figuring any continuity in reinforced concrete floor systems, and I believe that foolish and unjustifiable prohibition still stands. It seems to me to eliminate competition to a great extent, and to leave a clear field for the steel construction. Here, in Montreal, I do not think you are hampered by any by-laws on such matters, it is more of a go as you please. You are more familiar than I am be with the results of this, but unless something miraculous happens, the usual result of such conditions is to find one design called for according to one set of specifications, another design according to another set, and so on. Now, even if all these varied specifications are beyond reasonable criticism which is questionable — would it not be better to have a working standard? Our railroad bridges and highway bridges are built under standard specifications, and it seems to me desirable that there should be some standards in this matter also. I am sure it would be advantageous to have something of the kind, whether the architect prepares the plans in his own office or has them prepared independently by an outside firm. Cement World.

DETERMINING QUALITY OF SET CONCRETE.

How to Tell Good From Poor Concrete in a Completed Structure.

There is no generally accepted test by which the quality of the concrete in a completed structure may be measured, says "Engineering and Contracting." A floor beam is molded, the concrete sets, hardens, and gets strength. What is the measure of its strength, density, hardness? The cement and the aggregate of which the concrete is mixed are tested, and their values determined, but these tell us little of the strength and soundness of the concrete in the molded beam, for the workmanship may have been such as to negate the worth of the materials. A test of the concrete in the beam is the only means of knowing in measurable terms the quality of the product of workmanship and materials combined.

Various tests have been suggested for concrete in the structure. In a paper before the International Association of Testing Materials, Mr. Clovd M Chapman, Testing Engineer for Westinghouse, Church, Kerr & Co., lists the more familiar of these proposed tests. The enumeration of Mr Chapman gives twelve separate tests, all of these however, are varieties of tension compression or indentation tests. Using this abbreviated classification, the several tests are sufficiently described as follows:

Tests in tension may be made either by pulling a formed briquette of concrete, or by withdrawing an embedded bar having a head which tears out a cup or cone-shaped piece of concrete. The older form of the briquette tests was to pull a briquette molded from a portion of the concrete being put into, say, the floor beam constructed. The main objection to this test was that the concrete in the briquette was not the concrete in the beam, and because of easily possible differences in methods of molding or conditions of hardening, it could be a quite different character of concrete. To obviate this objection, the proposal was made to cut by core drill or otherwise a piece from the concrete of the beam, and, after proper shaping, to pull this briquette. The actual concrete of the beam was secured for testing by this method, but it had the obvious objections that often the specimen could not be taken from the desired place because of interference of the reinforcement, that the taking of the specimen marred the beam, and that the cutting process might well weaken the concrete in the specimen.

Tests in tension by withdrawing a bar had their origin in the rather crude practice of moding the end of a deformed reinforcing bar into the concrete, pulling it out and measuring the pull. The next development was to use a special bar with an expanded end such that the pulling would detach a piece of concrete without breaking the bond between the bar and the concrete. A third modification of this test suggested is to drill a hole in the concrete to be tested, and insert in it an expansion plug, which is pulled. This form of test is simple and is easily made; it tests the concrete actually in the structure; it can be made at any point in the structure desired; but the results are not easily measured, nor do we know how to interpret them.

Tests in compression comprise crushing tests of molded specimens and of specimens cut from the structure. The objections to both forms are substantially those named to tension tests of similarly prepared specimens. The test is on the whole more simple and can be more exactly conducted than the tension tests, but otherwise it has perhaps no superiority.

Indentation tests determine little more than hardness. The first crude form proposed is to drive a nail of given size into the concrete, but the results cannot be measured or interpreted with any accuracy. The second form of indentation test is the ball test, used for determining the hardness of metal and sometimes that of wood. It consists in pressing steel balls into the concrete, and measuring the penetration and pressure. Obviously the ball test has all the application of the tension test by withdrawing embedded bars, and like this test, it is difficult to interpret. Also the heterogeneous nature of concrete would tend to make necessary averages from a number of tests in different places to obtain fair results.

There is a fourth class of tests which is important. This comprises the testing of molded members, such as columns or beams, constructed at the same time and of the same concrete as are the corresponding members in the actual structure. Sometimes the test members are full size, and sometimes they are reduced models. As determinations of the structure, these tests are open to the same objections as are urged against tests of molded compression or tension specimens.

Of the several tests outlined, it is apparent that only three are truly tests of concrete actually in the structure. These are the cut specimen test, the indentation test, and the tension test by pulling embedded bars. Of these three direct tests of concrete in structure, the last named seems the most generally promising. Would it not be a task worth while for some of our college testing laboratories to study means of making this test, and methods of measuring and interpreting the results." Such experiments would be well within the means of any testing laboratory. We believe that engineers would be widely interested in the results of such experiments. Cement World.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 1 story and base, brick, $25,000. Architect, none. Owner, J. Sockolov, 1857 O'Farrell St., S. F. The building will be erected on a corner lot and will cover a considerable ground area. The interior has been arranged for 18 apartments of two, three and four rooms each. There will be private baths, wall beds and a vacuum cleaning system. Steam heat and elevators have also been incorporated in the plans. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $18,000. Architect, John H. Powers, 460 Montgomery St., S. F. Owner, Mrs. Hayes F. Igoe. The building will cover an area of 46x62½ feet. Interior has been arranged for six large apartments of four and five rooms each. There will be wall beds and private baths. A central heating system will be installed. Interior finish will be of pine, redwood and oak. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $40,000. Architect, none. Owner, Frederick F. Heine, 1180 Stanyan St., S. F. The building has been designed by the owner, who is a well known contractor and builder. A site in the east line of Van Ness avenue, having a frontage of 47 feet and a depth of 185 feet, has just been purchased and construction will be started at once. Interior of the building has been arranged for two, three and four room suites with baths and wall beds. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system. A vacuum cleaning system will also be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, W. L. Garrett, Currier Bldg., L. A. Owner, Earl D. Clark. The first floor will be arranged for six stores and the upper floors for 27 apartments suites. There will be wall beds, steam heat and a vacuum cleaning system. Interior will be finished in pine and hardwood. The exterior of the building will be faced with glazed brick and cement plaster. Plans are ready for figures.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, S. L. Weintraus. The building will cover an area of 50x90 feet and will contain 54 rooms, arranged in two and three room suites, besides a large amusement room and public lobby. All apartments will have wall beds and private bath rooms. Steam heat will be installed and automatic water heaters. The exterior will be faced with pressed brick. Entrance will be finished in tile and marble. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL. — Apartment house, 3 story and base, frame, $27,000. Architects, T. Beverley Keim, Jr., & Co., Title Ins. Bldg., L. A. Owner, W. Declez. The building will contain 70 rooms, which are to be arranged in two and three room suites, all of which will have connecting baths and wall beds. The interior will be finished in pine. There will be steam heat. Composition flooring will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Apartment house, 3 story and base, frame. Cost not stated. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Dr. H. C. Haughawout. The building will cover an area of 40x60 feet and will contain 56 rooms arranged in two-room suites. All apartments will be equipped with wall beds and will have connecting baths. The interior will be finished in pine. Baths will have composition floors. There will be steam heat and a vacuum cleaning system. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, $13,000. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Dr. Hirsheiser. Contractor, Alfred Legault, 3999 West St., Oakland. Note: This contract has been taken on the percentage basis.

LOS ANGELES, CAL. — Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, none. Owner, Mrs. Lydia Monteith. Contractors, Pacific States Investment Co., 107 So. Broadway, L. A. Contract price not stated.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $17,000. Architect, none. Owner, Mrs. Hoffman. Contractor, T. R. Thomas, I. W. Hellman Bldg., L. A. Contract price, $17,000.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $20,000. Architect, none. Owner, O. E. Brookins, Germain Bldg., L. A. Contractors, Western Building and Investment Co., Third and Hill Sts., L. A. Contract price, $20,000.

BRIDGES, DAMS AND HARBOR WORK.

MILK RIVER PROJECT, MONT.—Canal Construction, excavating, etc. Cost not stated. Engineers, U. S. Reclamation Service., Malta, Mont. Owners, United States Government. Bids will be opened on December 2nd by the Reclamation Service Engineers at Malta for the excavation of about 891,000 cubic yards of materials in the Vandalia South Canal of the Milk River Project. For complete particulars of this work address the United States Reclamation Service, Federal Bldg., Mont.

SAN JACINTO, RIVERSIDE CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, City Engineer, San Jacinto. Owners, Town of San Jacinto. Plans have been approved for the construction of a concrete and steel bridge over the San Jacinto River at Main street. Bids will be called for at once. Full particulars can be secured from the City Clerk.

LESTER, WASH.—Bridge, steel and concrete. Cost not stated. Engineers, Engineering Dept. Northern Pacific R. R., St. Paul Minn. Owners, Northern Pacific R. R. Co. This company has announced its intention of constructing a 1,200 foot steel span bridge on its line between Lester and Easton. The bridge will be 145 feet high. Plans are also being prepared in the company's offices for a $150,000 steel span bridge to be erected shortly at Lewiston, Idaho. The bridge will span the Clearwater River. Bids will be called for as soon as the working drawings can be completed.

Contracts Awarded.

VANCOUVER, WASH.—Bridge, steel span, $7,000. Engineer's name not given. Owners, Town of Vancouver. Contractors, Coast Bridge Co., Portland, Ore. Contract price, $6,880.

—CHURCHES—

INGLEWOOD, LOS ANGELES CO., CAL.—Church, brick and concrete construction. Cost not stated. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Church of the Holy Faith, Episcopal. The building will cover an area of 106x67 feet. The building will contain a main auditorium seating 200 people, besides nave, chapel, baptistry, choir and organ chamber. A plenum system of heating will be installed. The exterior of the building will be faced with pressed brick and Santa Barbara sandstone. Plans are complete and figures are now being taken by the architects.

LOS ANGELES, CAL.—Church, frame construction. Cost not stated. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, Hobart Boulevard M. E. Church. This work has been mentioned here before. Plans are now complete and the architects are taking figures on the work. The building will contain an auditorium 53x53 feet, League room seating 150 people, pastors study and ten class rooms. There will be furnace heat. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath.

SEATTLE, WASH.—Synagogue, 2 story and base, steel and brick. Cost not stated. Architects, Thompson & Thompson, Mutual Life Bldg., Seattle. Owners, Chevra Bekur Cholum. The main portion of the building will be 74x128 feet. There will be a large main auditorium and several class rooms, study and smaller lecture room. There will be steam heat. The exterior of the building will be faced with pressed brick. The concrete foundation was placed about a year ago at a cost of $18,000. Bids are now being taken on the general construction.

615 Phelan Building, San Francisco

FACTORIES & WAREHOUSES.

SAN FRANCISCO — Warehouse, 3 story and base, reinforced concrete, $60,000. Architect, W. H. Crim, Jr., 125 Kearny St., S. F. Owner, Nat Rafael. This building will be erected at the corner of Second street and South Park avenue. The structure will have a concrete foundation 122x137½ feet. Construction will be of the heavy reinforced concrete type throughout and will be practically fireproof. There will be freight elevators, metal window sash and frames and fireproof doors. An automatic sprinkler system will probably be installed. The exterior of the building will be faced with cement plaster. Plans are nearly for figures.

SAN FRANCISCO — Warehouse, 1 story, frame and iron. Cost not stated. Architect, none. Owners, L. A. Norris & Co., Monadnock Bldg., S. F. The building will cover an area of 128x275 feet with an L 50x80 feet. Construction will be of frame with the exterior covered with corrugated iron. Plans have been prepared by the owners and the work will be done by Day Labor. Construction will be started at once.

SAN FRANCISCO — Warehouse, 2 story and base, brick and steel, $15,000. Engineer, Anderson, Globe Flour and Milling Co., S. F. Owners, Globe Flour and Milling Co. The building will be 39x92 feet, and has been designed entirely for storage purposes. There will be neither interior finish or plumbing. Construction is to be extra heavy. In connection with this above work a brick wall 173 feet long and 18 feet high will be constructed. Plans are complete and have been acted on by the Board of Directors. Figures will be called for at once.

CROCKETT, CONTRA COSTA CO., CAL.—Warehouse, 2 story and base, reinforced concrete and steel, $150,000. Architect, W. H. Crim, Jr., 425 Kearny St., S. F. Owners, California-Hawaii Sugar Co. The warehouse is one of the largest structures in the United States, covering an area of 120x320 feet. There will be a complete steel frame with exterior walls and floor of reinforced concrete. The second floor has been designed to carry a load of 1,500 pounds to the square foot. The building will be fireproof. There will be metal sash and frames and fireproof doors. The exterior will be faced with cement plaster. Plans are complete and in the hands of George Ralph Crockett, who is directing the work for the owners. A contract for the steel has been let and work on the pile foundation is now underway.

LOS ANGELES, CAL. Factory, 5 story and base, reinforced concrete. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Ford Motor Car Co. This building will cover an area of 150x220 feet and has been designed for use as a service building for the company. Construction will be of the mushroom type of reinforced concrete. Both passenger and freight elevators will be installed. There will be metal window sash and frames and fireproof doors. The exterior will be faced with pressed brick and artificial stone. Plans are complete and figures are being taken.

LOS ANGELES, CAL. Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Lyon Fireproof Storage Co. The building is in the nature of an addition to the present four-story building. Construction will be fireproof throughout with metal window sash and frames. The exterior will be faced with cement plaster. Plans are now being prepared.

SEATTLE, WASH. Warehouse, 1 story, brick or concrete, $20,000. Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. Plans are now being prepared by the Engineering Dept. for a one-story warehouse, which is to be erected on the municipal dock at the foot of West Harrison street. Plans will be complete and ready for figures by November 15th.

PORTLAND, ORE.—Factory, 2 story and base, brick, $25,000. Architects, Roberts & Roberts, Portland. Owners, Hawthorne Estate. The building will cover an area of 100x100 feet and has been designed for a shirt factory. A long term lease has been made between the owners and H. Wolf & Sons. Construction will be of the heavy mill type. There will be steam heat and a freight elevator. Metal window sash and frames will be used. The exterior will be faced with pressed brick. It is reported that the owners have selected a contractor to do the work, but will not announce his name. Construction will be started at once.

Contracts Awarded.

SEATTLE, WASH.—Brewery addition, 2 story and base, brick, $10,000. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Independent Brewing and Malting Co. Contractor, J. N. Johnson, 4272 Whitman Ave., Seattle. Contract price, $10,000. About $10,000 more is to be expended within a short time for other work in connection with this project.

LOS ANGELES, CAL.—Warehouse, 3 story and base, reinforced concrete, $13,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. Contractors, J. F. Hall-Martin Co., Stimson Bldg., L. A. Contract price, $13,000.

FLATS.

SAN FRANCISCO—Flats, 7, 2 story and base, frame, $4,000 each. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. These buildings are to be erected on the east line of Masonic avenue, north of Hayes street. The same owners have built extensively in this district but this is the largest undertaking in some time. Each building will contain two flats of five rooms and bath each. Interiors will be finished in pine, redwood and oak. Oak floors will be used. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic, shiplap and brick veneer. Work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000. Architect, W. Chester Gilligan, 1655 12th Ave., S. F. Owner, J. P. Curley. The building will cover an area of 25x60 feet and will contain a store on the first floor and one modern flat on the second floor. Interior trim will be of pine and redwood. There will be gas grates and tile mantels. The exterior of the building will be covered with shiplap and rustic. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, $6,000. Architect, none. Owner, J. C. Keenan, 300 Webster St., S. F. The building will be 25x57½ feet, and has been arranged to contain three flats of four and five rooms each. The interior will be finished in pine and redwood with some oak floors There will be open fire places and brick mantels. Water heaters will be installed. Bath rooms will be finished in tile. The exterior of the building will be covered with brick veneer and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owners, B. Rosin and associates. The building will cover a ground area of 50x125 feet and has been designed for a commercial garage. There will be a cement floor, heavy roof trusses and metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, A. Reif, Higgins Bldg., L. A. Owner, Dan Morris, 410 Mariposa Ave., L. A. The building will cover an area of 100x160 feet and will be used for a commercial garage. There will be a cement floor over the entire area. Plans provide for metal window sasr and frames. Construction throughout will be fireproof. The exterior will be faced with grey pressed brick. Plans are complete and in the hands of the owner who is taking figures on the work.

LOS ANGELES, CAL.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, H. W. Pettebone. The building has been designed for a commercial garage and will cover a ground area of 50x160 feet. A cement floor will be used and metal window sash and frames. The roof will be of the Howe truss type. Special storage tanks are specified. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, George B. Easton.

The building is to cover an area of 100x130 feet and is designed for a commercial garage. Construction will be fireproof. A cement floor and metal window sash and frames. Construc- The exterior of the building will be faced with paving brick and artificial stone trim. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, brick, $12,500. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, T. L. Duque. Contractor, Alf. Nelson, 137 27th St., L. A. Contract price, $12,500.

LONG BEACH, LOS ANGELES CO., CAL.—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Austin & Lochridge, 18 Locust Ave., Long Beach. Owner, Allen C. Walker. Contractor, Richard Loynes, Long Beach, brick work only. Contract price not stated. Note: The architects are now taking figures for all other parts of this work.

SEATTLE, WASH.—Garage, 2 story and base, reinforced concrete, $22,000. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, James Plummer. Contractor, Hans Rathe, 6726 20th Ave., Seattle. Contract price, $22,000.

GOVERNMENT WORK AND SUPPLIES.

Canal Requisitions.

Requisitions have been received at the office of the Isthmian Canal Commission for the purchase of the following material and supplies for use on the Panama Canal as follows:

61,000 machine bolts, square head and square nut.
75 galvanized sprinkling cans, 4-gal.
600 cold chisels.
400 galvanized stovepipe elbows, 6-in.
144 plain engine lubricators, ¾-in.
400 lbs square spiral packing.
600 galvanized stovepipe lengths.
13,000 cone-head rivets.
36 gro brass wood screws, flat head.
94 gro brass wood screws, oval head.
650 bars carbon tool steel, octagon.
40,000 cross ties, No. 1.
50 brass angle valves.
10,000 ft drill casing pipe.
1,600 ft cast iron soil pipe.
150 cast iron soil bends.
50 plain brass compression bibb cocks.
150 brass hose compression cocks.
6,000 ft black wrought steel pipe, 1-in. standard.
8,000 ft galvanized wrought steel pipe, ½-in.
15,000 ft galvanized wrought steel pipe, 1¼-in.
6,000 ft galvanized wrought steel pipe, 1½-in.
30,000 ft galvanized wrought steel pipe, 2-in.
5,000 ft galvanized wrought steel pipe, 6-in.
2,000 ft lead pipe, ¾-in diam.
100 brass gate valves, 2-in.
3,200 brass globe valves.
42 clothes hampers.

Dredging, Los Angeles Harbor, Cal.

The contract for dredging Los Angeles outer harbor, California, bids for which were opened October 8, has been awarded to the Standard American Dredging Co., Central Bldg., Los Angeles, Cal., at 33.9c per cubic yard for material deposited at sea or 30c per cubic yard if impounded by bulkhead.

Earthwork.

The director of the Reclamation Service is asking for proposals for earthwork on the first 25 miles of the Low Line (Interstate) Canal in connection with the North Platte irrigation project, Neb. The work is located about seven miles north of Minitare and Bayard, Neb. It involves the excavation of approximately 591,000 cubic yards of material. The bids will be opened on November 26, 1912, at the office of the Reclamation Service at Mitchell, Neb.

Fort Worden, Wash., Wharf.

Bids for constructing extension to wharf at Fort Worden, Wash., were received by Capt. J. R. Pourie, U. S. A., quartermaster, Seattle, Wash., on October 24 as follows.

International Contract Co., Seattle, Wash., $2,393.

Ward & Scherer, Seattle, Wash., $2,-487.

R. H. Travers & Co., Seattle, Wash., $2,449.

The Sunset Construction Co., Tacoma Wash, $1,772.

Everett Construction Co., Everett, Wash., $1,995.

Port Townsend Pile Driving Co., Port Townsend, Wash., $3,000.

Oahun Island Magazine.

Plans and specifications have been completed by the engineers of the Bureau of Yards and Docks, Washington, D. C., for five reinforced concrete magazine buildings. The official advertisement has been published calling for bids which will be opened on December 21st. Plans can be secured from either the Bureau of Yards and Docks at Washington or from the Commandant, Naval Station, Pearl Harbor.

—HALLS & SOCIETY BLDGS.—

SAN FRANCISCO—Labor Temple, 5 story and base. Class A construction. Cost not stated. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Temple Association. The Association has secured a large site at the northeast corner of 16th and Capp streets and have completed all financial arrangements for the construction of the building. The first floor will be arranged for the offices of the various unions and of the association. Upper floors will contain large meeting rooms, lounging rooms and a banquet hall. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Association building, 3 or 4 story and base, brick or reinforced concrete, $60,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Oakland Young Women's Christian Association. There are at present two sites under consideration for the building, and until a decision is reached working drawings cannot be prepared. It is the intention of the association to erect one of the most complete institution buildings on the Pacific Coast, and plans are now underway to substantially increase the amount of the building fund. As soon as a site is selected and the amount available for construction is settled working drawings will be made. Construction will not be undertaken until the first of the year.

SACRAMENTO, CAL.—Armory work. Cost not stated. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids were opened on November 4th by the State Board of Control for metal furring and lathing, ornamental iron work and finish hardware for the Sacramento Armory. For a complete list of these figures see under Sacramento-Stockton and Northern California in this issue.

LOS ANGELES, CAL.—Armory, 3 story and base. Class A construction. $200,000. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids were opened by the State Board of Control in Sacramento on November 4th for the general construction of the State Armory at Los Angeles, and figures show Robert Trost of San Francisco low at $205,000. For a complete list of all figures submitted see under Los Angeles and Southern California in this issue.

SAN DIEGO, CAL. - Association building, 4 story and base, brick and steel, $100,000. Architects, Bristow & Lyman, Timken Bldg., San Diego. Owners, Young Women's Christian Association. Architects have just received the commission to prepare plans for this building, and other than the preliminary details nothing can be published at this time. The first floor of the building will contain gymnasium, reception rooms and library. The upper floors will be arranged for class rooms and dormitories. Construction will be Class A throughout. The exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

POCATELLO, IDAHO—Lodge hall, 3 story and base, brick and steel, $75,-000. Architect's name not given. Owners, Pocatello Elks' Hall Association. Contractors, Visser & Elliott, Twin Falls, Idaho. Contract price, $75,000.

HOSPITALS.

SAN FRANCISCO—Hospital, 3 or 4 story and base, brick and reinforced concrete, $65,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Dr. Francis B. Wakefield. It is the intention of Dr. Wakefield to construct one of the most completely equipped private hospitals in the west on property recently purchased at the southeast corner of Post and Hyde streets. Preliminary plans have been made and show a large amount of the valuable ground space devoted to terraced gardens and walks. The building proper will include a large number of private suites, operating rooms and special treatment rooms. Special mechanical and hospital equipment will be included. Preliminary plans only have been prepared.

LOS ANGELES, CAL. Hospital, 4 story and base, brick and steel, $50,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will cover an area of 36x85 feet, and will contain 12 patients rooms with private baths, dressing rooms and diet kitchens. There will also be a large house, offices and dining rooms. Construction

will be fire proof with concrete foundation and exterior walls of brick faced with blue pressed brick and artificial stone. Interior finish will be of birch and mahogany. There will be steam heat, elevator service, a vacuum cleaning system and modern hospital equipment. Plans are complete and figures are being taken.

PATTON, LOS ANGELES CO., CAL.—Hospital cottage, etc. Cost not stated. Architect, State Architec Woollett, Sacramento. Owners, State of California. Bids opened on November 1th by the State Board of Control show R. S. K. McMillen of San Francisco low on all of the various work to be done at this institution. For a complete list of these figures see under Los Angeles and Southern California in this issue.

—HOTELS—

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, S. H. Pardue. The building will contain in the neighborhood of 50 guest rooms and 20 baths. The interior will be finished in pine and hardwoods. Baths will be finished in tile. There will be steam heat and a vacuum cleaning system. Hot water heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick, $28,000. Architects, Starbuck & Clark, Fresno. Owner, Jacob Richter. The building will cover an area of 72x125 feet. The first floor will contain three stores with patent fronts and large plate glass display windows. The second floor is to be arranged for a number of modern hotel rooms. There will be several bath rooms. Steam heat will be installed. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. $50,000. Architects, Stibolt & Pardee, Ferguson Bldg., L. A. Owner, George C. Paonessa. The building will cover an area of 50x120 feet. There will be a total of 60 guest rooms and 12 baths. Each room will be provided with a lavatory and steam heat. The exterior will be faced with pressed brick. Plans are now being prepared and will be out for figures within a day or two.

Contract Awarded.

VENICE, LOS ANGELES CO., CAL.—Hotel, 5 story and base, brick, $45,000. Architects, Eager & Eager, Story Bldg., L. A. Owner, E. L. Allen. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A. Contract price, $45,000. Note: This contract does not include the plumbing, heating, electric work, eelvators, painting, finish hardware or tile work.

—LIBRARIES—

AUBURN, WASH.—Library, 1 story and base, hollow tile, $10,000. Architect, David C. Myers, Cornish Bldg., Seattle. Owners, Auburn Library Trustees. This building has been mentioned here a number of times before. Plans were recently out for figures and all bids are now in the hands of the Trustees for consideration. An award of contract will be made within the next few days.

RAILROAD CONST., STATIONS AND EQUIPMENT.

VAN NUYS, LOS ANGELES CO., CAL.—Passenger station, 1 story and base, frame. Cost not stated. Engineer, M. C. Haley, Pacific Electric Bldg., L. A. Owners, Pacific Electric Railway Co. The building will be in the Mission style with a cement plaster exterior and clay tile roof. The interior will contain waiting rooms, baggage room, offices and toilet rooms. Plans are complete and the owners have announced their intention to erect the building by Day Labor.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $6,000. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. This dwelling is to be erected on the west line of 10th avenue, near Balboa street and has been designed for an eight-room house with bath and laundry. SCHOOLS.

SAN FRANCISCO—School, 2 story and base, frame and concrete, $62,500. Architect, Architectural Commission, San Francisco. Owners, City and County of San Francisco. Plans for another school building similar in design and arrangement to the Starr King School, a contract for which has just been let, were approved by the Board of Education at its last meeting. The building will be of frame construction with concrete halls and stairways. There will be a central heating system, blackboards, a vacuum cleaning system and special wiring. The exterior will be covered with shakes. Plans will be ready for figures within a week or ten days. Separate bids will be called for on the various parts of the work.

SAN FRANCISCO—School, 2 story and base, frame and concrete, $62,500. Architects, Architectural Commission. Owners, City and County of San Francisco. Bids were opened by the Board of Public Works for the Starr King School, and show the following men low: General construction, F. H. Born, $41,467; plastering, Robert Trost, $3,871; electric work, Standard Electric Co., $1,924; plumbing, Turner Co., $4,780; and heating and ventilating, Victor Eng. Co., $3,051. For a complete list of all figures see under San Francisco in this issue.

BERKELEY, ALAMEDA CO., CAL.—Campanile, granite and steel, $200,000. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Regents of the University of California.

The massive bell tower will cost $200,000 to construct, while an additional $25,000 will be expended for the crane. The tower is to be 300 feet in height and will measure at the base 56x56. It is proposed to erect the tower at the site of the present flag pole in front of the old library building provided a firm foundation can be secured at this point. In this case the structure will be able to be seen far out at

sea, as it will be directly in front of the Golden Gate.

The Campanile will be a Class "A" structure throughout, with steel frame surrounded by white granite. It is estimated that two years' time will be taken to build the tower from the time ground is first broken. Plans have received the approval of the Regents and construction will be ordered within a short time. The Campanile is a gift to the University from the Sather family.

OAKLAND, CAL.—Schools, 2, 2 story and base, brick and concrete. Cost not stated. Architect, J. J. Donovan. Owners, City of Oakland. The following is a complete list of the bidders who have asked for plans for the two new schools now out for figures:

Dewey School.

Ackerman, Moore & Burlingame, C. A. Johnson, C. Christensen, Williams Bros. & Henderson, W. W. Anderson, F. Rolandi, Van Sant-Houghton Co.

Park and Division School.

Peterson & Perrson, Maxwell Hardware Co., J. O. Price, O. B. Ackerman & Son, Lange & Bergstrom, W. W. Anderson, F. Rolandi, Van Sant-Houghton Co, Nils Anderson.

LODI, SAN JOAQUIN CO., CAL.—School, 2 story and base, reinforced concrete, $165,000. Architects, Stone & Wright, San Joaquin Valley Bank Bldg., Stockton. Owners, Lodi Union High School District. Bids opened recently for the construction of the Lodi High School show Arthur Arlett low on the general construction at $125,290, and he has been awarded the contract. Bids for the heating and ventilating and program clocks have been taken under advisement. For a complete list of all bids on this work see under Sacramento, Stockton and Northern California in this issue.

SANTA BARBARA, SANTA BARBARA CO., CAL.—School, 2 story and base, brick, steel and concrete. Cost not stated. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids opened by the State Board of Control on November 4th for the work at the State Normal School at Santa Barbara show Lewis A. Hicks Co. of San Francisco low at $79,990. For a complete list of these bids see under Los Angeles and Southern California in this issue.

ORANGE, ORANGE CO., CAL.—Schools, 2, 2 story and base, brick and frame, $40,000. Architect, Fred H. Eley, Hervey-Finley Bldg., L. A. Owners, Orange School District. The science building will be 50x100 feet and the manual training building 30x60 feet. Construction will be of brick and frame with the exterior walls covered with cement plaster. There will be modern heating and ventilating systems installed. Working drawings are to be prepared at once. Plans have received the approval of the Board of Education.

HERMOSA BEACH, LOS ANGELES CO., CAL.—School auditorium, 1 story, hollow brick construction. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Hermosa Beach School District. The architect has been commissioned to prepare plans for this building which will have a seating capacity of 800 people. Interior finish will be of pine. The exterior will be lined with terra cotta. Plans are being prepared. Funds for the construction must be secured from a bond issue.

SEWERS, STREET WORK AND WATER SYSTEMS.

OAKLAND, CAL.—Cement sidewalks, etc. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Bids will be opened on November 18th by the City Council for a large amount of sidewalk work. All sidewalks are to be six feet in width and will have concrete base and cement binder. Plans and full particulars may be obtained from the City Engineer's office.

TEHACHAPI, KERN CO., CAL.—Water System, pipe, hydrants, etc. Cost not stated. Engineer, Frank A. Lathrop, Higgins Bldg., L. A. Owners, Town of Testchapi. Plans for a municipal water supply system have been completed and have received the approval of the authorities. Bids are now being taken and will be opened late in the month of December. For full particulars of this work apply to the engineer.

Contracts Awarded.

GRANDVIEW, WASH.—Water system, pump house, mains, etc., $12,000. Engineer's name not given. Owners, Town of Grandview. Contractor, R. D. Gould, Hood River, Ore. Contract price, $12,000.

—STORE BUILDINGS—

OAKLAND, CAL.—Stores and offices, 13 story and base. Class A construction. Cost not stated. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owners, United Cigar Stores Co. This building is to be erected at the corner of 15th and Washington streets. Preliminary plans only have been prepared and these have recently been sent to the eastern headquarters of the owners for approval. Construction will be fireproof throughout, and the most modern finish and mechanical equipment will be installed. Complete details of the building cannot be given until plans have been returned.

OAKLAND, CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, Charles Cohen, St. Marks Hotel, Oakland. Owner, Martin E. Marks. The building is to be erected on a site proposed for a much larger structure, and is of a temporary nature. A number of retail stores will occupy the building, all having patent store fronts and large plate glass windows. Interior trim will be of pine and hardwoods. The exteriors will be faced with pressed brick. Considerable structural steel will be used. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Stores, 1 story and base, frame. Cost not stated. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The building has been designed to contain two modern stores with large display windows. Interior will be finished in pine and oak. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

GLENDALE, LOS ANGELES CO., CAL.—Stores, 2 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owner, George A. Fulmer. The building will be 48x85 feet. The first floor has been arranged for stores. The second floor will contain a number of offices and several living apartments. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for within the course of the next few days.

SEATTLE, WASH.—Stores, 4 or 5 story and base. Class A construction. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle. Owners, Bon Marche Co., Frank McDermott, president. It is reported from reliable parties that the owners contemplate the carrying out of their original building scheme, which will include the construction of a similar building to the one erected last year at a cost of $750,000. Two or three ways of doing this are now under consideration by the company, and Mr. McDermott states that a decision will be reached within a few days. Full particulars will appear in the Building and Industrial News at that time.

SEATTLE, WASH.—Stores and lofts, 8 story and base, steel and concrete, $150,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, Samuel Crawford. Preliminary plans for a modern commercial structure to be erected on 3rd avenue, between Pike and Pine streets, are now being prepared. Other than the height of the building and a rough estimate of its cost no particulars can be given at this time. Further announcements will be made as the plans progress.

Contracts Awarded.

HOLLYWOOD, LOS ANGELES CO., CAL.—Stores and offices, 2 story and base, brick, $15,000. Architect, none. Owner, Dr. Palmer. Contractor, C. S. Albright, Toberman Bldg., Hollywood. Contract price, $15,000.

LOS ANGELES, CAL.—Stores and lofts, 4 story and base. Class A construction, $41,000. Architect's name not given. Owner, A. L. Cheney. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, $41,000.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Barnett, Haynes & Barnett, St. Louis, Mo., George D. Barnett, Wright and Callender Bldg., L. A., local representative. Owner, John Brockman. Contractors, W. A. Schumacher Construction Co., Wrght and Callender Bldg., L. A., general contract. Contract price not stated. Watson & Spicer have the subcontract for the excavating, and a contract for the steel has been awarded to McClintock-Marshall Co., Pittsburgh.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 742—Proposals for Wheat Bran, Cottonseed Hulls, Cottonseed Meal and Sucrene Dairy Feed.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m November 25, 1912**, at which time they will be opened in public for furnishing the above mentioned articles. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR IRON GATES.

CAST IRON GATES, HOIST, ETC.—U. S. Reclamation Service, Montrose, Colo.—Sealed proposals will be received at this office until **November 23, 1912,** for furnishing eight rising screw cast iron gates and eight double ball-bearing sand wheel base stands, 36 inches in diameter, cast iron hand wheel. Further information may be had upon application to T. C. PEASE, engineer.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 20th day of November, 1912,** for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

The improvements of Douglass and Elizabeth streets around the Noe Valley school by the construction of granite curbs and artificial stone sidewalks where directed and by the construction of an asphalt and basalt block pavement where directed.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

INVITATION FOR PROPOSALS.

TREASURY DEPARTMENT—Office of the Supervising Architect, Washington, D. C., November 4, 1912.—Sealed proposals will be received at this office **until 3 o'clock p. m. on the 6th day of January, 1913,** and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, vacuum cleaning system and [illegible] of the United States Subtreasury Building at San Francisco, Cal. The building is to be two stories and basement, of approximately 10,000 square feet ground area, faced with granite, and of fireproof construction throughout. Drawings and specifications may be obtained from J. Milton Dyer, Architect, 825 Cuyahoga Building, Cleveland, Ohio, from J. W. Roberts, Supervising Superintendent of Construction, 403 Post Office and Courthouse Building, San Francisco, Cal., or at this office, at the discretion of the Supervising Architect. OSCAR WENDEROTH, Supervising Architect. (*)

These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—4 story and base brick, $25,000. San Francisco. Architect, none. Owner, J. Sockolov, 1857 O'Farrell St., S. F. The building will be erected on a corner lot and will cover a considerable ground area. The interior has been arranged for eighteen apartments of two, three and four rooms each. There will be private baths, wall beds and a vacuum cleaning system. Steam heat and elevators have also been incorporated in the plans. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, $18,000. San Francisco. Architect, John H. Powers, 460 Montgomery St., S. F. Owner, Mrs. Hayes P. Igoe. This building will cover an area of 16X62½ feet. Interior has been arranged for six large apartments of four and five rooms each. There will be wall beds and private baths. A central heating system will be installed. Interior finish will be of pine, redwood and oak. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

APARTMENT HOUSE—3 story and base, frame, $10,000. San Francisco. Architect, none. Owner, Frederick F. Heine, 1180 Stanyan St., S. F. The building has been designed by the owner, who is a well known contractor and builder. A site in the east line of Van Ness avenue, having a frontage of 47 feet and a depth of 185 feet has just been purchased and construction will be started at once. Interior of the building has been arranged for two, three and four room suites with baths and wall beds. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system. A vacuum cleaning system will also be installed. The exterior of the building will be covered with brick veneer and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

WAREHOUSE—3 story and base, reinforced concrete, $60,000. San Francisco. Architect, W. H. Crimm, Jr., 425 Kearny St., S. F. Owner, Nat Rafael. The building will be erected at the corner of Second street and South Park avenue. The structure will have a concrete foundation 122X137½ feet. Construction will be of the heavy reinforced concrete type throughout and will be practically fireproof. There will be freight elevators, metal window sash and frames and fireproof doors. An automatic sprinkler system will probably be installed. The exterior of the building will be faced with cement plaster. Plans are nearly ready for figures.

WAREHOUSE—1 story, frame and iron. Cost not stated. San Francisco. Architect none. Owners L. V. Norris & Co. Monadnock Bldg., S. F. The building will cover an area of 125X275 feet with an L 50x80 feet. Construction will be of frame with the exterior covered with corrugated iron. Plans have been prepared by the owners and the work will be done by Day Labor. Construction will be started at once.

WAREHOUSE—2 story and base, brick and steel, $15,000. San Francisco. Engineer, Anderson, Globe Flour and Milling Co., S. F. Owners, Globe Flour and Milling Co. The building will be 39X92 feet and has been designed entirely for storage purposes. There will be neither interior finish or plumbing. Construction is to be extra heavy. In connection with the above work a brick wall 173 feet long and 18 feet high will be constructed. Plans are complete and have been acted on by the Board of Directors. Figures will be called for at once.

FLATS—7, 2 story and base, frame, $4,000 each. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. These buildings are to be erected in the east line of Masonic avenue, north of Hayes street. The same owners have built extensively in this district, but this is the largest undertaking in some time. Each building will contain two flats of five rooms and bath each. Interiors will be finished in pine redwood and oak. Oak floors will be used. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic, shiplap and brick veneer. Work will be done by Day Labor.

FLATS—2 story and base, frame, $4,000. San Francisco. Architect, K. Chester Gilligan, 1655 12th Ave., S. F. Owner, J. P. Curley. The building will cover an area of 25X60 feet and will contain a store on the first floor and one modern flat on the second floor. Interior trim will be of pine and redwood. There will be gas grates and tile mantels. The exterior of the building will be covered with shiplap and rustic. Plans are being prepared.

FLATS—3 story and base, frame, $6,000. San Francisco. Architect, none. Owner, J. C. Keenan, 300 Webster St., S. F. The building will be 25X57½ feet and has been arranged to contain three flats of four and five rooms each. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. Water heaters will be installed. Bath rooms will be finished in tile. The exterior of the building will be covered with brick veneer and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, $6,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. This dwelling is to be erected in the west line of 40th avenue, near Balboa street, and has been designed for an eight-room house with bath and laundry. Interior finish will be of pine, redwood and mahogany. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

LABOR TEMPLE—5 story and base, Class A construction. Cost not stated. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Temple Association. The Association has secured a large site at the northeast corner of 16th and Capp streets, and has completed all financial arrangements for the construction of the building. The first floor will be arranged for the offices of the various unions and of the Association. Upper floors will contain large meeting rooms, lounging rooms and banquet hall. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOSPITAL—3 or 4 story and base, brick and reinforced concrete, $65,000. San Francisco. Architect, Benj. B. McDougall, Sheldon Bldg., S. F. Owner, Dr. Francis B. Wakefield. It is the intention of Dr. Wakefield to construct one of the most completely equipped private hospitals in the west on property recently purchased at the southeast corner of Post and Hyde streets. Preliminary plans have been made and show a large amount of the valuable ground space devoted to terraced gardens and walks. The building proper will include a large number of private suites, operating rooms and special treatment rooms. Special mechanical and hospital equipment will be included. Preliminary plans only have been prepared.

RESIDENCE—2 story and base, frame, $8,000. San Francisco. Architect, Theo. S. Boehn, Hewes Bldg., S. F. Owners, Peckman & Co., Mills Bldg., S. F. The dwelling is to contain seven rooms and bath. Interior finish will be of pine and redwood with oak floors in the principal rooms. Furnace heat and open fire places will be installed. Mantels will be of brick. Bath room will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath and klinker brick veneer. Plans are in the hands of the owners and the work will be done by Day Labor.

SCHOOL—2 story and base, frame and concrete, $62,500. San Francisco. Architect, Architectural Commission, San Francisco. Owners, City and County of San Francisco. Plans for another school building similar in design and arrangement to the Starr King School, a contract for which has just been let, were approved by the Board of Education at its last meeting. The building will be of frame construction with concrete halls and stairways. There will be a central heating system, blackboards, a vacuum cleaning system and special wiring. The exterior will be covered with shakes. Plans will be ready for figures within a week or ten days. Separate bids will be called for on the various parts of the work.

SCHOOL—2 story and base, frame and concrete, $62,500. San Francisco. Architect, Architectural Commission, San Francisco. Owners, City and County of San Francisco. Bids were opened by the Board of Public Works for the Starr King School and show

the following men low: General construction, F. H. Born, $41,467; plastering, Robert Trost, $3,871; electric work, Standard Electric Co., $1,924; plumbing, Turner Co., $4,780, and heating and ventilating, Victor Eng. Co., $3,051. For a complete list of all figures see under San Francisco in this issue.

City Bids Opened.

An exceptionally large number of figures were opened by the Board of Public Works at the Monday afternoon session in the Temporary City Hall. Construction of the Starr King School seemed to appeal most strongly to the bidders. The following is a complete list of all figures submitted for this work:

General Construction Starr King School

H. A. Klyce	$56,585
Commary-Peterson Co.	53,777

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE ALTERATIONS—$2,000. Oakland, Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, Mrs. J. Haines. The work will include new plumbing, painting, electric work and plastering. Complete new interior trim will be installed. There will also be considerable exterior alterations. Plans for this work are complete and in the hands of the contractors for figures.

RESIDENCE — 2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, B. B. Hotchkin, Bacon Bldg., Oakland. Owner, Miss Rosa M. Wampfler. The dwelling has been designed for a six-room house with bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is taking figures on the work.

RESIDENCE — 2 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. J. Krieger, Kittridge St., Berkeley. The dwelling will contain six rooms and bath. Interior finish is to be of pine throughout. There will be an open fire place in the living room with an attractive tile or brick mantel. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. Bath room will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $5,000. Berkeley, Alameda Co., Cal. Architect, Edward B. Seely, 2615 Etna St., Berkeley. Owner, Mrs. C. J. Switzer. The dwelling will contain eight rooms, bath, sleeping porch and a laundry. The interior will be finished in pine, redwood and white enamel. Oak floors will be used throughout except in the bath which will have composition flooring and tile wainscott. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOWS—11, 1 story and base, frame, $2,000 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. Each of the eleven Bungalows will contain five rooms and bath. Interior finish will be of pine and redwood. Some oak flooring will be used. There will be open fire places and tile or brick mantels. The exteriors will be covered with cement plaster, rustic and shingles. Plans are being completed as rapidly as possible and figures will be taken for the construction by the owners.

RESIDENCE — 2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Robert Burns. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

BUNGALOW — 1 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The bungalow will contain six rooms and bath. All interior trim will be of pine. Oak floors will be used in the living and dining rooms. The sum of $30 is allowed for mantels. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, Frank M. May, 2145 Center St., Berkeley. Owner, P. S. Persons. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some oak. Oak floors will be used in the principal rooms. Bath room will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared. A contractor has already been selected to do the work.

RESIDENCE — 2 story and base, frame, $3,400. Berkeley, Alameda Co., Cal. Architect, B. W. Estey, 1815 Hearst Ave., Berkeley. Owner, Charles R. McNulty. The dwelling will contain seven rooms, bath and sleeping porch. All

interior trim will be of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with white cement plaster. Plans are being prepared.

RESIDENCE — 2 story and base, frame, $4,500. Alameda, Alameda Co., Cal. Architect, W. H. Crim, Jr., 425 Kearny St., S. F. Owner, James Eschen. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. Interior finish will be of pine, redwood and oak. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, $4,000. Oakland, Cal. Architect, J. F. Haner, 220 Lexington Ave., S. F. Owners name withheld. The dwelling will contain seven rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Bath room will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOWS — 2, 1 story and base, frame, $2,500 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. Each of these bungalows will contain six rooms and bath. All interior finish will be of pine. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exterior will be covered with rustic, cement plaster and shingles. Plans are complete and the work will be done by Day Labor.

ASSOCIATION BUILDING—3 or 4 story and base, brick or reinforced concrete, $60,000. Oakland, Cal. Architect Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Oakland Young Women's Christian Association. There are at present two sites under consideration for this building, and until a decision is reached working drawings cannot be prepared. It is the intention of the association to erect one of the most complete institution buildings on the Pacific Coast, and plans are now underway to substantially increase the amount of the building fund. As soon as a site is selected and amount available for construction is settled working drawings will be made. Construction will not be undertaken until the first of the year.

RESIDENCE — 2 story and base, frame, $4,000. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner's name withheld. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. A garage will also be erected on the rear of the lot. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Charles A. Werner, 2416 10th St., Berkeley. The house will contain 5 rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the dining room and living room. There will be open fire places and tile or brick mantels. Tile will also be used in the bath room. The exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $3,000. Oakland, Cal. Architect, A. J. Mazurette, 1322 Broadway, Oakland. Owner, A. J. Mazurette. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. Interior finish will be entirely of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, I. W. Button, 5930 Telegraph Ave., Oakland. The house will contain seven rooms, bath and sleeping porch. Interior trim will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

BUNGALOWS—7, 1 story and base, frame, $2,000 each. Oakland, Cal. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, William H. Creuner. Each of these buildings will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and tile or brick mantels. Exteriors of the bungalows will be covered with rustic, cement plaster and shingles. Plans are now complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW — 1 story and base, frame, $2,000. Oakland, Cal. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, John D. Ganeston. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the dining and living rooms. There will be an open fire place in the living room with a brick mantel. Marshall-Stearns wall beds are specified. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

CEMENT SIDEWALKS, ETC.—Cost not stated. Oakland, Cal. Engineer, City Engineer, Oakland. Owners, City of Oakland. Bids will be opened on November 15th by the City Council for a large amount of sidewalk work. All sidewalks are to be six feet in width and will have concrete base and cement binder. Plans and full particulars may be obtained from the City Engineer's office.

CAMPANILE — Granite and steel, $200,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Regents of the University of California.

The massive bell tower will cost $200,000 to construct, while an additional $25,000 will be expended for the chimes. The tower is to be 300 feet in height and will measure at the base 36x36. It is proposed to erect the tower on the site of the present flag pole in front of the old library building, providing a firm foundation can be secured at this point. In this case the structure will be able to be seen far out at sea, as it will be directly in front of the Golden Gate.

The Campanile will be a Class "A" structure throughout, with steel frame surrounded by white granite. It is estimated that two years' time will be taken to build the tower from the time ground is first broken. Plans have received the approval of the Regents and construction will be ordered within a short time. The Campanile is a gift to the University from the Sather family.

SCHOOLS—2, 2 story and base, brick and concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan. Owners, City of Oakland. The following is a complete list of the bidders who have asked for plans for the two new schools now out for figures:

Dewey School.

Ackerman, Moore & Burlingame, C. A. Johnson, C. Christensen, Williams Bros. & Henderson, W. W. Anderson, F. Rolandi, Van Sant-Houghton Co.

Park and Division School.

Peterson & Pearson, Maxwell Hardware Co., J. O. Price, O. B. Ackerman & Son, Lange & Bergstrom, W. W. Anderson, F. Rolandi, Van Sant-Houghton Co, Nils Anderson.

STORES AND OFFICES—13 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owners, United Cigar Stores Co. This building is to be erected at the corner of 15th and Washington streets. Preliminary plans only have been prepared and these have recently been sent to the eastern headquarters of the owners for approval. Construction will be fireproof throughout and the most modern finish and mechanical equipment will be installed. Complete details of the building cannot be given until plans have been returned.

STORES—1 story and base, brick. Cost not stated. Oakland, Cal. Architect, Charles Cohen, St. Marks Marks. The building is to be erected on the site proposed for a much larger structure, and is of a temporary nature. A number of retail stores will occupy the building, all having patent store fronts and large plate glass windows. Interior trim will be of pine and hardwoods. The exteriors will be faced with pressed brick. Considerable structural steel will be used. Plans are complete and the work will be done by Day Labor.

STORES—1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The building has been designed to contain two mod-

ern stores with large display windows. Interior will be finished in pine and oak. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, frame, $13,000. Oakland, Cal. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Dr. Hirsheiser. Contractor, Alfred Legault, 3999 West St., Oakland. Note: This contract has been taken on the percentage basis.

Plans are complete and figures are being taken.

WAREHOUSE— story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Lyon Fireproof Storage Co. The building is in the nature of an addition to the present four-story build-

ing. Construction will be fireproof throughout with metal window sash and frames. The exterior will be faced with cement plaster. Plans are now being prepared.

WAREHOUSE—3 story and base, reinforced concrete, $13,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. Contractors, J. F. Hall-Martin Co., Stimson Bldg., L. A. Contract price $13,000.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owners, B. Rosin and associates. The building will cover a ground area of 50x125 feet, and has been designed for a commercial garage. There will be a cement floor, heavy roof trusses and metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans are being prepared.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. Reif, Higgins Bldg., L. A. Owner, Dan Morris 110 Mariposa Ave., L. A. The building will cover an area of 100x150 feet and will be used for a commercial garage. There will be a cement floor over the entire area. Plans provide for metal window sash and frames. Construction throughout will be fireproof. The exterior will be faced with grey pressed brick. Plans are complete and in the hands of the owner who is taking figures on the work.

GARAGE—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, H. W. Pettebone. The building has been designed for a commercial garage and will cover a ground area of 50x160 feet. A cement floor will be used and metal window sash and frames. The roof will be of the Howe truss type. Special storage tanks are specified. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, George B. Easton. The building is to cover an area of 100x130 feet and is designed for a commercial garage. Construction will be fireproof. A cement floor and metal window sash and frames are specified. The exterior of the building will be faced with paving brick and artificial stone trim. Plans are being prepared

ASSOCIATION BUILDING—4 story and base, brick and steel, $100,000, San Diego, Cal. Architects, Bristow & Lyman, Timken Bldg., San Diego. Owners, Young Women's Christian Association. Architects have just received the commission to prepare plans for this building, and other that the preliminary details nothing can be published at this time. The first floor of the building will contain gymnasium, reception rooms and library. The upper floors will be arranged for class rooms and dormitories. Construction will be Class A throughout. The exterior will be faced with pressed brick. Plans are being prepared.

HOTEL—3 story and base, brick, $50,000. Los Angeles, Cal. Architects, Silvolt & Purdee, Ferguson Bldg., L. A. Owner, George C. Paonessa. The building will cover an area of 50x120 feet. There will be a total of sixty guest rooms and twelve baths. Each room will be provided with a lavatory and steam heat. The exterior will be faced with pressed brick. Plans are now being prepared and will be out for figures within a day or two.

PASSENGER STATION—1 story and and base, frame. Cost not stated. Van Nuys, Los Angeles Co., Cal. Engineer, M. C. Haley, Pacific Electric Bldg., L. A. Owners, Pacific Electric Railway Co. The building will be in the Mission style with a cement plaster exterior and clay tile roof. The interior will contain waiting rooms, baggage room, offices and toilet rooms. Plans are complete and the owners have announced their intention to erect the building by Day Labor.

SCHOOL AUDITORIUM — 1 story, hollow brick construction. Cost not stated. Hermosa Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Hermosa Beach School District. The architect has been commissioned to prepare plans for this building, which will have a seating capacity of 800 people. Interior finish will be of pine. The exterior will be faced with terra cotta. Plans are being prepared. Funds for the construction must be secured from a bond issue.

STORES—2 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owner, George A. Fulmer. The building will be 48x85 feet. The first floor has been arranged for stores. The second floor will contain a number of offices and several living apartments. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for within the course of the next few days.

Contracts Awarded.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, none. Owner, Mrs. Lydia Monteith. Contractors, Pacific States Investment Co., 107 So. Broadway, L. A.. Contract price not stated.

HOTEL—5 story and base, brick, $45,000. Venice, Los Angeles Co., Cal. Architect, Eager & Eager, Story Bldg., L. A. Owner, E. L. Allen. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A. Contract price, $45,000. Note: This contract does not include the plumbing, heating, electric work, elevators, painting, finish hardware or tile work.

APARTMENT HOUSE—3 story and base, brick, $17,000. Los Angeles, Cal Architect, none. Owner, Mrs. Hoffman. Contractor, T. R. Thomas, I. W. Hellman Bldg., L. A. Contract price, $17,000.

APARTMENT HOUSE—3 story and base, brick, $20,000. Los Angeles, Cal. Architect, none. Owner, O. E. Brookins, Germain Bldg., L. A. Contractors, Western Building and Investment Co., Third and Hill Sts., L. A. Contract price, $20,000.

GARAGE—1 story and base, brick, $12,500. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, T. L. Duque. Contractor, Alf. Nelson, 137 27th St., L. A. Contract price, $12,500.

GARAGE—2 story and base, brick and steel. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Austin & Lochridge, 18 Locust Ave., Long Beach. Owner, Allen C. Walker. Contractor, Richard Loynes, Long Beach, brick work only. Contract price not stated. Note: The architects are now taking figures for all other parts of this work.

STORES AND OFFICES—2 story and base, brick. $15,000. Hollywood, Los Angeles Co., Cal. Architect, none. Owner, Dr. Palmer. Contractor, C. S. Albright, Toberman Bldg., Hollywood. Contract price, $15,000.

STORES AND LOFTS—4 story and base. Class A construction, $41,000. Los Angeles, Cal. Architect's name not given. Owner, A. L. Cheney. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, $41,000.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Barnett, Haynes & Barnett, St. Louis, Mo., George D. Barnett, Wright and Callender Bldg., L. A., local representative. Owner, John Brockman. Contractors, W. A. Schumacher Construction Co., Wright and Callender Bldg., L. A., general contract. Contract price not stated. Note: Watson & Spicer have the subcontract for the excavating, and a contract for the steel has been awarded to McClintock-Marshall Co., Pittsburgh.

Bids Opened For State Work.

(By Special Wire)

Bids were opened as follows by the State Board of Control for the construction of the State Normal School at Santa Barbara:

General Construction at Santa Barbara.

Lewis A. Hicks Co.	$79,990
Magnus Johnson	81,000
F. O. Engstrum Co.	81,000
Beer & Kling Co.	81,086
Somers & Lund	84,400

Bids were opened as follows for the general construction of the Los Angeles Armory:

General Construction Los Angeles Armory.

Robert Trost	$205,000
Somers & Lund	217,935
J. V. McNell	226,600
F. O. Engstrum Co.	227,168
Lewis A Hicks Co.	244,000
Weymouth-Crowell	254,000
Willard Slater Co.	297,000

Bids were opened as follows for the conscruciton of the Southern California State Hospital at Patton:

Cottage H, at Patton.

R. S. K. MacMillen	$22,220
Beer & Kling Co.	22,590
Fluth & Morton	24,209
Somers & Lund	24,840
David Irvine	25,129
Willard Slater Co.	25,510
Robert B. Ogden	28,400

Cottage I, at Patton.

R. S. K. MacMillen	$22,037
Beer & Kling Co.	22,140
Fluth & Morton	23,747
Somers & Lund	24,400
David Irvine	25,121
Willard Slater Co.	24,000
Robert B. Ogden	28,200

Cottages Nos. 2 and 3, at Patton.

R. S. K. MacMillen	$7,524
Fluth & Morton	8,194
Somers & Lunds	7,600
Willard Slater Co.	9,200
Robert B. Odgen	7,750

SEATTLE AND WASHINGTON.

CANAL CONSTRUCTION—Excavating, etc. Cost not stated. Milk River Project, Mont. Engineers, U. S. Reclamation Service, Malta, Mont. Owners, United States Government. Bids will be opened on December 2nd by the Reclamation Service Engineers at Malta for the excavation of about 891,000 cubic yards of materials in the Vandalia South Canal of the Milk River Project. For complete particulars of this work address the United States Reclamation Service, Federal Bldg., Malta Mont.

BRIDGE—Steel and concrete. Cost not stated. Lester, Wash. Engineers, Engineering Department Northern Pacific R. R., St., Paul, Minn. Owners, Northern Pacific R. R. Co. This company has announced its intention of constructing a 1,200 foot steel span bridge on its line between Lester and Easton. The bridge will be 145 feet high. Plans are also being prepared in the company's offices for a $150,000 steel span bridge to be erected shortly at Lewiston, Idaho. Tre bridge will span the Clearwater River. Bids will be called for as soon as the working drawings can be completed.

CHURCH—Brick and concrete construction. Cost not stated. Inglewood, Los Angeles Co., Cal. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Church of the Holy Faith, Episcopal. The building will cover an area of 106x67 feet. The building will contain a main auditorium, seating 200 people, besides nave, chapel, baptistry, choir and organ chamber. A plenum system of heating will be installed. The exterior of the building will be faced with pressed brick and Santa Barbara sandstone. Plans are complete and figures are now being taken by the architects.

CHURCH—Frame construction. Cost not stated. Los Angeles, Cal. Architects, Walker & Vawter, Hiberman Bldg., L. A. Owners, Hobart Boulevard M. E. Church. This work has been mentioned here before. Plans are now complete and the architects are taking figures on the work. The building will contain an auditorium 53x53 feet, League room seating 150 people, Pastor's study and ten class rooms. There will be furnace heat. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath.

WAREHOUSE 1 story, brick or concrete, $20,000. Seattle, Wash. Engineer, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. Plans are now being prepared by the Engineering Department for a one-story warehouse, which is to be erected on the municipal dock at the foot of West Harrison street. Plans will be complete and ready for figures by November 15th.

LIBRARY—1 story and base, hollow tile, $10,000. Auburn, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, Auburn Library Trustees. This building has been mentioned here a number of times before. Plans were recently out for figures and all bids are now in the hands of the Trustees for consideration. An award of contract will be made within the next few days.

STORES—4 or 5 story and base. Class A construction. Cost not stated. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Bon Marche Co., Frank McDermott, president. It is reported from reliable parties that the owners contemplate the carrying out of their original building scheme, which will include the construction of a similar building to the one erected last year at a cost of $750,000. Two or three ways of doing this are now under consideration by the company, and Mr. McDermott states that a decision will be reached within a few days. Full particulars will appear in the Building and Industrial news at that time.

STORES AND LOFTS—8 story and base, steel and concrete, $150,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, Samuel Crawford. Preliminary plans for a modern commercial structure to be erected on 3rd avenue, between Pike and Pine streets, are now being prepared. Other than the height of the building and a rough estimated cost, no particulars can be given at this time. Further announcements will be made as the plans progress.

Contracts Awarded.

Bridge—Steel span, $7,000. Vancouver, Wash. Engineer's name not given. Owners, Town of Vancouver. Contractors, Coast Bridge Co., Portland, Ore. Contract price, $6,880.

BREWERY ADDITION—2 story and base, brick, $10,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Independent Brewing and Malting Co. Contractor, J. N. Johnson, 4272 Whitman Ave., Seattle. Contract price, $10,000. About $40,000 more is to be expended within a short time for other work in connection with this project.

GARAGE—2 story and base, reinforced concrete, $22,000. Seattle, Wash. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, James Plummer. Contractor, Hans Rathe, 6726 20th Ave., Seattle. Contract price, $22,000.

LODGE HALL—3 story and base, brick and steel, $75,000. Pocatello, Idaho. Architect's name not given. Owners, Pocatello Elks' Hall Association. Contractors, Visser & Elliott. $75,000.

WATER SYSTEM — Pump house, mains, etc., $12,000. Grandview, Wash. Engineer's name not given. Owners, Town of Grandview. Contractor, R. D. Gould, Hood River, Ore. Contract price, $12,000.

PORTLAND AND OREGON.

FACTORY—2 story and base, brick, $25,000. Portland, Ore. Architects, Roberts & Roberts, Portland. Owners, Hawthorne Estate. The building will cover an area of 100x100 feet, and has been designed for a shirt factory. A long term lease has been made between the owners and H. Wolf & Sons. Construction will be of the heavy mill type. There will be steam heat and a freight elevator. Metal window sash and frames will be used. The exterior will be faced with pressed brick. It is reported that the owners have selected a contractor to do the work but will not announce his name. Construction will be started at once.

UNITED STATES CIVIL SERVICE EXAMINATION.

METALLURGICAL ENGINEER (Male.)

November 25, 1912.

The United States Civil Service Commission announces an open competitive examination, for metallurgical engineer, for men only. From the register of eligibles resulting from this examination certification will be made to fill a vacancy in this position in the Bureau of Mines, Department of the Interior, for service in the Western States, at a salary ranging from $1,800 to $3,000 a year, and vacancies in positions requiring similar qualifications as they may occur, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The duties of this position will be to conduct investigations and inquiries into metal and metallurgical problems, and especially the investigation of ores with reference to their constitution and treatment, both mechanical and chemical, including smelter operations.

Competitors will not be required to appear at any place for examination, but will be rated upon the following subjects, which will have the relative weights indicated:

Subjects.	Weights.
1. General education and scientific training	30
2. Professional experience and fitness	40
3. Published or manuscript reports	30
Total	100

An educational training equivalent to graduation from college or university of recognized standing, and training to include courses in geology, chemistry, physics, and metallurgy, and at least five years' actual experience in metal mining and metallurgical work including smelting operations, are prerequisites for consideration for this position.

Applicants must have reached the twenty-fifth but not their fortieth birthday on the date of the examination.

Statements as to education, training, experience, and fitness are accepted subject to verification.

Applicants will be admitted to the examination regardless of their place of residence, but under an act of Congress only those who have been actually domiciled in the State or Territory in which they reside for at least one year previous to the date of the examination will be eligible for appointment to any vacancy which may occur in the apportioned service in Washington, D. C. Those who cannot show such residence and domicile will be eligible for appointment only to vacancies which may occur in the field service, that is, to vacancies in positions with headquarters outside of Washington, D. C.

Recently the Commission has established an appropriation, whereby it is now able to have examined certain scientific, technical and professional subjects men who have not otherwise connected with the Government

service and who are recognized authorities in such subjects. In passing upon the qualifications of candidates in this examination the Commission will have the assistance of such an expert examiner.

This examination is open to all male citizens of the United States who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for Form 304 and special form to the United States Civil Service Commission, Washington, D. C., or Post Office, San Francisco. No application will be accepted unless properly executed and filed with the commission at Washington in complete form, together with the material required, prior to the hour of closing business on November 25, 1912. In applying for this examination the exact title as given at the head of this announcement should be used.

UNITED STATES CIVIL SERVICE EXAMINATION.
Mechanical Draftsman (Male)

IMMIGRATION SERVICE.
November 25, 1912.

The United States Civil Service Commission announces an open competitive examination for mechanical draftsman, for men only. From the register of eligibles resulting from this examination certification will be made for temporary employment in the position of mechanical draftsman in the Immigration Service, Ellis Island, New York, and vacancies as they may occur requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

Appointments will be made at from $5 to $6 per diem and will continue for a period of about six months.

For the position of mechanical draftsman, competitors should be qualified to draw plans and specifications for steam heating, plumbing work and electric wiring, and be qualified to inspect and test the installation of the above trades. They should have at least five years experience as inspector and five years drafting experience.

Competitors will not be required to appear at any place for examination, but will be rated upon the elements of education, training, experience, and fitness, as shown in their application and examination forms and by corroborative evidence. They will be required to give detailed answers to the questions in application and examination Form 1312 and to submit the names and addresses of not less than three nor more than five persons who are competent to judge of their qualifications and are willing to certify thereto in writing, if requested.

Statements as to education, training, experience, and fitness, are accepted subject to verification.

This examination is open to all male citizens of the United States who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for Form 1312 to the United States Civil Service Commission, Washington, D. C., or the secretary of the Board of Examiners, Post Office Bldg., San Francisco.

UNITED STATES CIVIL SERVICE EXAMINATION.
Architectural Draftsman (Male.)

IMMIGRATION SERVICE.
November 25, 1912.

The United States Civil Service Commission announces an open competitive examination for architectural draftsman, for men only. From the register of eligibles resulting from this examination certification will be made for temporary employment in the position of architectural draftsman in the Immigration Service, Ellis Island, New York, unless it is found to be in the interest of the service to fill the vacancy by reinstatement, transfer, or promotion.

Appointments will be made at from $5 to $6 per diem and will continue for a period of about six months.

For the position of architectural draftsman, competitors should be qualified in general building construction, structural engineering, reinforced concrete work, specification writing for general building construction, and be qualified to superintend work. They should have at least five years experience as inspector on construction work, and five years drafting experience.

Competitors will not be required to appear at any place for examination, but will be rated upon the elements of education, training, experience, and fitness, as shown in their application and examination forms and by corroborative evidence. They will be required to give detailed answers to the questions in application and examination Form 1312 and to submit the names and addresses of not less than three nor more than five persons who are competent to judge of their qualifications and are willing to certify thereto in writing, if requested.

Statements as to education, training, experience, and fitness, are accepted subject to verification.

This examination is open to all male citizens of the United States who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for Form 1312 to the United States Civil Service Commission, Washington, D. C., or the secretary of the Board of Examiners, Post Office Bldg., San Francisco.

ARIZONA GREAT COPPER STATE.
Has Produced Nearly Three and a Half Billion Pounds of the Red Metal.

Arizona has a recorded production of 3,494,333,111 pounds of copper, or 21.38 per cent of the total output of the United States since mining began. In 1911 Arizona produced 303,202,532 pounds of blister copper, as compared with 297,250,528 pounds in 1910. This is the largest output in the history of the State, according to B. S. Butler, of the United States Geological Survey, and continues Arizona in first place among the copper-producing States. She produced 27.63 per cent of the total output of the country for 1911.

The steady output of copper from Arizona began about 1875, though there was intermittent production prior to that date, the earliest record of production being for 1862. Since 1880 the growth of the industry has been steady and rapid.

Nine copper-smelting plants operated within the State during the year.

CATALOGUES AND SAMPLES WANTED.

The Phoenix Construction Company has opened offices at 1104 Nevada Bank Building, 11 Montgomery street, San Francisco, and will be pleased to receive samples and catalogues of everything pertaining to the building line.

CARRARA MARBLE BECOMING SCARCE.

Contrary to general belief, the Carrara Mountains, or Apuan Alps, are not composed entirely of marble, although the group, which extends nearly parallel with the Italian coast for about forty miles from Anlia to Lucca, are said to be. Undoubtedly the largest and best deposits are at or near Carrara, where there are 495 quarries out of a total of 722 in the entire district in active operation.

The product of these Carrara quarries has been known for centuries throughout the civilized world; and, although other marble has been sought and many deposits have been discovered and developed in other countries, it is stated in Consular and Trade Reports that no superior or equal of the Carrara product has yet been found.

This is shown by the fact that the demand steadily increases despite the advanced cost of production of recent years, which has caused higher prices. In fact, the demand for certain qualities of Carrara marble is often greater than the supply. This was the case in 1911, when 290,651 metric tons of rough marble and marble manufactures were shipped from the Carrara and neighboring quarries and studios.

This marble was quarried as far back as several centuries before Christ, when the Etruscans, with no other tools than sledge and wedge, split off the outcropping strata by main force. After them came the Romans, who continued to quarry Carrara marble until the fall of the empire. After that it was apparently forgotten for centuries, until the great religious awakening of the early middle ages took place. This renewed the demand for marble, and, being followed by the artistic revival of the fifteenth century, gave the industry an impetus which has lasted to the present time.—American Architect.

CAPITAL OF RAILWAYS AND OTHER INDUSTRIES.

According to the estimates of the national wealth of the United States made by the Bureau of the Census, the value of the railways increased but little more than half as fast as the value of the property from 1890 to 1904.

From 1900 to 1910 the capital value of agriculture increased from $20,439,991,164 to $40,991,449,090, the capital value of manufactures from $8,975,256,000 to $18,428,270,000, the cost of road and equipment of the railways from $10,265,313,400 to $14,387,816,099.

The gross value of the products of

manufacture increased from $11,406,927,000 in 1900 to $20,672,052,000 in 1910. The total operating revenues of the railways increased from $1,487,044,814 to $2,750,667,435. Thus the increase of 81.2 per cent in the gross value of manufactured products was accompanied by an increase of 105.3 per cent in manufacturing capital, while the increase of 85 per cent in the total operating revenues of the railways was accompanied by an increase of only 40 per cent in their cost of road and equipment.

The capital value of agriculture includes all farm property, land, buildings, implements, machinery and live stock as enumerated by the census. The capital value of manufactures, as defined by the census, includes the value of property employed for the purposes of production, excepting rented property, but does not include any allowance for patent rights or good will. The capital value of the railways used in this comparison is the "cost of road and equipment" as it stands on their books and as reported by them to the Interstate Commerce Commission.

The report of the Bureau of the Census for 1900 indicated that the gross capitalization of the industrial combinations then in existence was more than twice as great as their capital value. The gross capitalization of the railways was about 12 per cent greater than the cost of road and equipment in 1900 and 28 per cent greater in 1910. The net capitalization of the railways, which is the amount for which they are responsible to the public, almost exactly coincides in 1910 with the cost of road equipment.—Bureau of Railway Economics.

TIME CHANGETH MEN AND AFFAIRS.

Has the Arch-enemy spoken?

The racing game's bitterest opponent has emitted what is believed to be its only broadside against a revival of the grand old sport, California. The "Bulletin" in a **mild** editorial last week has passed the "buck." It neither condemns nor recommends the initiative measure that will come before the voters of California on November 5th. But why the change in attitude?—is the question asked in sporting haunts and on the street corner?

California race-followers have too vivid a recollection of the Bulletin's fight against racing to overlook its present attitude. The Older-Williams vendetta is still fresh in memory. No fight was ever waged with equal bitterness against racing by the Bulletin save that leveled on the puppets in the Graft Prosecution Drama. The Bulletin claims the fight and victory their own—and no one ever disputed it.

As the superstitious old lady would say: "Knock wood" and we are. The Bulletin has many days yet to wage an effective fight against a revival of racing in California **but to people in the know** of affairs, no such fight is going to be made. The Older-Williams vendetta had its origin in the graft cases and is believed to have been buried along with other animosities.

Let's hope so.

MINERAL OIL EXPORTS IN 1912.

Mineral oil exports from the United States in 1912 will show a larger total, both as to quantity and value, than in any earlier year. The quantity exported will, according to the latest figures of the division of statistics of the Department of Commerce and Labor, approximate 1,800,000,000 gallons, or an average of 5,000,000 gallons a day, and the value $120,000,000, or an average of about $333,333 a day.

The history of the export trade in mineral oils touches the half century line with the year 1912, the first statistical record of the exportation of mineral oils being that of the year 1862, when the value of the exports, including both crude and refined, was about $1,500,000. By 1872 the exportation had risen to $34,000,000; in 1882, $51,000,000; in 1892, $45,000,000; in 1902, $72,000,000, and in the fiscal year 1912, $112,000,000, while in the calendar year 1912 the total will approximate $120,000,000. The total value of the mineral oils exported in the half century since the export movement began is almost $3,000,000,000, and the total during the last decade nearly $1,000,000,000.

Ninety-five per cent of this exportation, measured by value, goes in the manufactured form. The latest reports of the Department of Commerce and Labor show for the eight months ending with August, 1912, $81,000,000 worth exported, of which $40,000,000 worth was illuminating oil, $19,000,000 worth lubricating and heavy paraffine oil, $13,000,000 worth gasoline and other light products of distillation, $4,500,000 worth crude oil, and between $3,000,000 and $4,000,000 worth gas and fuel oil.

The distribution of our mineral oil exports extends over a wider area than perhaps any other single article of exportation. The countries and colonies to which it is exported exceed eighty in number. Europe is by far the largest customer, taking a little more than one-half of the illuminating oil, three-fourths of the lubricating and over one-half of the gasoline and naphthas exported, while North America (chiefly Canada, Mexico, Panama and Cuba) takes about two-thirds of the crude petroleum exported.

Of the more than 1,000,000,000 gallons of illuminating oil exported in the fiscal year 1912, the United Kingdom took 166,000,000 gallons; Japan 109,000,000, Germany 92,000,000, China 68,000,000, and British India 57,000,000 gallons. Of the 202,000,000 gallons of lubricating oil exported in that year 63,000,000 gallons were sent to the United Kingdom, 25,500,000 to France and 24,000,000 gallons to Germany. Of the 171,000,000 gallons of gasoline, napthas and other lighter products of distillation exported in 1912, 34,000,000 went to Canada, 27,000,000 to the United Kingdom and 15,000,000 to Germany. Of the 208,000,000 gallons of crude mineral oils exported, 76,000,000 went to Canada, 37,000,000 to France, 28,000,000 to Panama and 23,000,000 to Mexico.

The petroleum production of the United States made its highest record in 1911—9,250,000,000 gallons, against a little less than 3,000,000,000 gallons in 1901, a decade earlier, 2,250,000,000 gallons in 1891, a little more than 1,000,000,000 gallons in 1881, 218,000,000 gallons in 1871, and 89,000,000 gallons in 1861. The United States now produces practically two-thirds of the petroleum of the world, the share in 1910, according to an accepted authority, having been 64 per cent, against 43 per cent in 1900.

ELKS ACCEPT HOME.

GRASS VALLEY (Nevada Co.), November 8.—At a meeting of the Elks' Hall Association Wednesday afternoon the magnificent new home of Grass Valley Lodge of Elks, costing in excess of $60,000, was formally accepted and the final payment was made to Campbell & Turner, Sacramento contractors.

Architect Mooser filed a certificate stating that the plans and specifications had been complied with and Contractor Turner gave the Elks' Directors a satisfactory guarantee on the building.

MORE ROOM REQUIRED.

The warehouse site at Fifth and Bluxome streets, San Francisco, with spur track privileges, formerly occupied by the Holmes Lime Co., has been leased by Parrott & Co. for their Contractors Equipment Department in conjunction with the manufacture of Collins Interlocking Studding.

Parrott & Co. have steadily advanced the scope of their business, particularly in the line of contractors equipment and the building supply line. When you deal with Parrott & Co. you get honest values and square treatment.

WIRELESS MESSAGE RECEIVED AT GREAT DISTANCE.

SAN DIEGO, November 8.—Messages were exchanged last night by the Navy wireless station on Point Loma and the big new Navy wireless station at Arlington, Va., near Washington, D. C., approximately 3500 miles across the country. This is the first time messages from the wireless station near Washington have been so distinct on this Coast.

The new plant at Point Loma is one of the most powerful in the world as a result of improvements completed recently. The aerial now is 300 feet above ground, and about 800 feet above sea level. The signals were unusually clear and distinct, say the local operators, who predict that since the Arlington station has now been tuned correctly they will be able to receive the signals sent out every evening.

PANAMA EXPOSITION POSTAGE.

The Postmaster-General recently in approving the designs prepared by the Bureau of Engraving and Printing for the special issue of postage stamps to commemorate the opening of the Panama Canal, directed the [illegible] one cent, 150,000,000 two cent, 5,000,000 five cent and 5,000,000 ten cent stamps be prepared and that they be placed on sale beginning January 1st, 1913.

The series comprises four denominations, as set forth above. The stamps are about three fourths of an inch high by one and a sixteenth inches wide, at the top appear the words "P

S. Postage" and "San Francisco 1915." In the left hand border is a branch of laurel and in the right hand border a palm branch, a numeral expressing the denomination is shown within a circle of each lower corner, with the word "cents" between. The one-cent stamp is green and in the center appears within a circle, a bust of Balboa, discoverer of the Pacific Ocean, looking to the left, and wearing a cuirass and a helmet with a plume. On either side of the background are palm trees with the ocean in the foreground. Below the portrait, is a horizontal tablet bearing the circle, are words "Balboa, 1513."

The two-cent stamp is red. It represents the Gatun locks of the Panama Canal, with a merchant steamer emerging from one lock and warship in the other. The mountains of the isthmus appear in the distance, and palm trees on the right hand side of the locks. Beneath the picture are the words "Gatun Locks."

The five-cent stamp is blue, and presents the Golden Gate of San Francisco harbor, with the setting sun in the background and a steamer and a sailing vessel in the bay. The words "Golden Gate" appear below the picture. The ten-cent stamp is dark yellow. The subject is "Discovery of San Francisco Bay," from a painting which represents the discovering party looking out upon the distant bay. All of the new designs are fine examples of the engravers' art.

CONSTRUCTION WORK ABROAD.

MEXICO.

Concession for Railway Construction.

A contract is announced as having been entered into between the Mexican Ministry of Public Works and Senor J. Casasus for construction of a railway between Monclova, in Coahuila, and the city of Chihuahua or some other point on the Mexican Central Railway. Between that place and Santa Rosalia Powers are also granted for the building of two branches.

HIGH PRESSURE SYSTEM FOR EXPOSITION.

The extension through the exposition grounds of the high-pressure mains of the auxiliary fire protection system has been requested by the Panama-Pacific International Exposition Company and the Board of Public Works has directed the City Engineer to report his recommendations concerning the matter. It is proposed to make connections with the pipe already laid in Van Ness avenue at two points, Bay and Francisco streets, and the exposition company offers to defray the cost of the work. The city has on hand a large extra quantity of high-pressure pipe and part of this can be utilized if the application is granted.

BOND ELECTION FOR MERCED.

MERCED, Nov. 9.—Announcement has been made that at a meeting of the county board of education Saturday it was voted to ask the supervisors to issue a call for a bond election to raise $50,000 for enlarging and improving the Merced high school. The matter will be formally presented to the supervisors November 12th. The board of education, wishes to spend $30,000 on two additions to the present high school building, and the remaining $20,000 of the remaining $50,000 for remodeling the old building to conform with the new wings, and furnishing the building throughout.

The tentative plans of the school board include the improvement of the high school grounds also. A feature of the proposed new building will be a large assembly hall, where the students can meet in body and where such things as the Lyceum Course and the high school entertainments can be staged.

CROP-MOVING A BIG TASK.

While Western Canada shows a large increase in crop acreage and early reports indicated a yield of 200,000,000 bushels of high grade wheat, the unsettled weather worked great damage to the farmer of the West. Excessive and continuous rains during the harvest season not only delayed thrashing operations but reduced the quality of wheat, and in some districts practically ruined the crops.

Western Canada is face to face with a serious condition. No one doubts that the congestion of the railroads in moving the crops, when it is ready for the market, will be the greatest in the history of the West. The harvest is three weeks behind that of last year, when conditions became so serious that a large quantity of the grain was diverted to American elevators.

The lack of sufficient elevator capacity in Western Canada last year put the railroads on their mettle, and the West is largely supplied with empty cars ready to move the wheat as soon as it is received. Many additions have been made, tapping new grain growing areas, and had the harvest been early the conditions would have been much better. It is generally believed that there will be considerable congestion in moving the crop this year.

The Province of Manitoba has perhaps suffered more by reason of untoward weather conditions than either of the other prairie provinces, but both Saskatchewan and Alberta have had difficulty in their harvests. There was, to begin with, a shortage of farm hands, although it is estimated that there were upward of 75,000 harvesters taken in from Eastern Canadian points and points in the United States along the International boundary.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. *Address,*

Box 239 Willson Bldg. WASHINGTON, D. C.

SAN FRANCISCO LEADS THE WORLD.

To San Francisco belongs the credit of being the first in the world to manufacture a window frame and sash of bronze where all the joints are dove tailed-interlocked.

About four hundred and fifty frames and pairs of sash are now being made at the factory of the San Francisco Cornice Company for the Standard Oil Company, Bush and Sansome streets. It is an interesting sight and well worth the trip to the factory to see how the job is being done. Everything is in bronze.

The windows too are of the Simplex Patent, that have no weights and cords and are reversible.

Editorial Comment.

Reports from about fifty different cities, representing building centers throughout the country, made to the American Contractor, Chicago, show a gain of a little more than 8 per cent for October as compared with the same month of last year. This notwithstanding the fact that New York showed a loss of about 11 per cent over October 1911. The largest gains were made in some of the minor cities, Los Angeles showing a gain of about one million. Particulars are found in the following table:

City.	October, 1912. Cost.	October, 1911. Cost.
Akron	$ 190,845	$ 293,436
Atlanta	2,115,267	335,403
Baltimore	1,019,554	539,028
Buffalo	1,616,000	916,000
Chicago	8,745,600	8,785,700
Cincinnati	798,625	2,624,970
Columbus	341,983	421,578
Denver	450,510	432,300
Des Moines	255,809	112,860
Detroit	2,544,005	1,522,649

Wilkes-Barre	281,104	171,252
Worcester	741,569	547,537
Total	$49,729,019	$45,721,324

For the same cities in first ten months of the year showed an aggregate gain of 1 1-5 per cent over the same months last year so that notwithstanding the fact that this has been a Presidential year with the practical assurance that the administration would change, the building record has kept up to a normal increase.

Theodore Roosevelt has issued a statement upon the results of the election and the future of the Progressive Party and definitely stated that it has come to stay. He enumerates the things it has accomplished and comments upon the fact that with its short life it has polled upwards of four million votes, showing that a great per cent of the people are in sympathy with its aims and objects. In conclusion he states:

"I am proud, indeed, that the great good fortune has been mine to fight shoulder to shoulder with the men and women, who, in the ranks and in various positions of leadership, have waged this great battle for social and industrial justice. So far from being over, the battle has just begun. We will not rest content until every feature of the Progressive programme has been put into effect; and when this has been done unquestionably there will have been opened to us new avenues along which it will still be a duty to work for the moral and economic betterment of our people.'

Nothing was in greater contrast than the type of men and women who composed the leadership of the Progressive Party and the veteran politicians and bosses that dominated the councils of the old parties. The men and women who have stood for good government in their public life, the workers in the factories and tenements who have met social and industrial conditions as they are were noticeable for the active and prominent part they took in the formation of the party and its platform.

The Progressives generally have cheerfully accepted the popular verdict in the election of Governor Wilson. He has been a courageous fighter for good causes in New Jersey. The Democratic Party and Mr. Bryan did themselves honor in choosing their candidate. He comes to a vastly wider field of activity and assumes greater responsibilities. Undoubtedly his generous and fine spirit cherishes high hopes of achievement for the common good. In attempting to realize these ideals in the Nation's life he can depend on the cordial support of the members of the powerful new party that with this campaign has become a permanent feature of American politics. Nor will the country generally be inclined to be captious or overcritical of his policies so long as they tend for the general good. And the great human policies of the Progressive platform do not in vital points as

they were before election and the party stands just as it stood before for collective action to insure a healthful, normal, happy childhood for every boy and girl, to protect the helpless from exploitation, to safeguard the life of families through social insurance; to conserve the Nation's human resources.

Today it stands for the same policies. A protected childhood, a decent family life, an independent old age, are just as worth fighting for now as ever they were.

The Bell Telephone System is reported to have a plan to capitalize its properties at ten million dollars for the purpose of providing a pension fund to take care of its superannuated employes. This is undoubtedly a just provision. For it is well nigh impossible under present conditions for many people to secure a competence for their age and especially in the employ of so large a corporation. The great majority of the employes must remain at comparatively the same level as the opportunity for advancement is comparatively small. This action by the great corporations is the collective idea applied to social and industrial conditions. The corporations and labor unions have brought about this condition of things. It is this fact that has changed the political aspect of government in this country and brought about a socialistic condition rather than a Democracy.

Charter amendments come up for election on December 10th. Some of them are wise and the expediency of some are questionable. The one relating to the sale of library bonds below par is undoubtedly wise, as otherwise no sale can be effected. Both the purchase of parks and improvements that are not a necessity are questionable under the present state of the city's finances.

Taxes are already high. The western portion of the city is in urgent need of a sewer system. We must purchase the Spring Valley Water property and obtain a water supply from Hetch-Hetchy. These are first considerations. The Civic Center and its buildings are about all we can stand at present in the way of monumental improvements and it is well not to capitalize posterity beyond its capacity.

The new pipe line system for burning oil in the Presidio reservation has been established by the United States Government and the Engineer reports that it works like a charm. Oil is delivered from a central reservoir just as water is delivered and the result is said to effect a saving of $100,000 a year in the price of fuel.

Cleanliness and convenience are also important factors in the system. The oil is always on tap, there are no ashes or soot and the heating effect is entirely satisfactory. This is another illustration of the many advantages of fuel oil.

EIGHTEEN DAYS.

In 1453 the Turks took Constantinople, by no title except that of the sword, and then afterwards overran Greece and the Balkan states. They were finally driven out of Greece and gradually excluded from the Balkans, but the large territory of Turkey in Europe remained, and remains still, a monument to the cowardice of Europe. —its importance to regain by the sword what was taken by the sword. Now, after nearly half a thousand years of oppression, the Near Eastern allies have suddenly risen, and in eighteen days—the shortest big war in history—they have crushed Turkey. The Christian provinces are in their hands, and they are at the gates of Constantinople itself.

There is nothing to prevent finishing the job except the ponderous Concert of Europe. And let us hope that the impotence of that Concert will for once be its virtue. Invincible for inaction, the Concert has been powerless to act. It may agree that the war shall stop. The only thing on which it ever agrees is that everything shall stop. But suppose Bulgaria does not stop? Mere inaction can not force the stoppage. Bulgaria may say, "we will stop when you stop us." That calls for action, not inaction. And if the Powers can not agree on what action, Bulgaria meantime goes ahead. Finally, peace comes, by the surrender of Turkey. Then terms are imposed, either by the Allies or by the Powers. Let us hope the Powers will be again dead-locked and unable to agree on terms. For then the Allies can impose the oldest and the simplest terms of war—"We will keep what we take, and divide it among ourselves." Those were the terms of the Turkish conquest, and they are the proper terms of reconquest. Let the Turks be put clear out of Europe. So much there is hope of. And if possible, let Constantinople itself, once the capital of the world, and still the key to the East and the West, be Europeanized. If the government is European the Turks will move out. Or, if they stay, they will have to behave themselves.

It is almost too much to hope. War is the only crucible in which the Near East can be fused. But Europe has been able to forbid that fusion, and may yet. It is a pity. War in Western Europe would be a crime against civilization. Peace in Southeastern Europe is a crime against humanity. If Europe will but let them fight, they will work out their own salvation—and the Turks, for the quickest entry to Paradise, by the Mohammedan plan of salvation, is to be killed in war. Surely a month, or even a year of bloody war is better than to bind once more on the cradle of European civilization the half-thousand years of Turkish oppression. Fresno Republican.

Crop reports for the year are certainly encouraging. The estimate of the government is that the ten leading crops of the United States at prevailing prices will amount to two billions more than last year. This means $20 more money for each of the 100 million inhabitants of the country. So that along with the high cost of living there will be more money for each of us in the value of the products of the year. Business ought therefore to be good. The money for these crops has not yet all been received by the farmer but the incentive to buy is there and the wholesalers and jobbers are everywhere reported as doing a good business.

Railway companies are enjoying greater traffic and greater net earnings. Agriculture is the basis of all prosperity. When there are bumper crops and plenty to eat there is bound to come increased activity in all lines dependent upon the basic occupation.

The sale of 60,000 acres of land in the Sutter Basin between the Feather and Sacramento rivers, emphasizes the fact that the people of the country are looking upon California as the land of opportunity. Land like this which is virtually delta land that has to be reclaimed is the richest in agricultural possibilities. With its reclamation and subdvision it will protect the valleys from flood waters and introduce to Superior California a settlement of independent farmers, who will no doubt become prosperous citizens and a distinct asset to the state. The age of gold and cattle and wheat has passed and now is the period of intensive cultivation an smaller farms. The great possibilities of the state are still untouched. The next ten years will witness a great development.

The Argonaut, San Francisco's prize weekly and standpat organ, has this to say of the Turkish disaster

"The age-long habit of obedience and cohesion under one head received a deathblow when Abdul Hamid was deposed, and when a Constitution transformed the center of gravity from the apex of the social pyramid to its base. No Nation has ever yet survived a democracy, and we should naturally expect to find the poison acting with peculiar rapidity in the case of an Oriental people suddenly snatched from their ancient anchorage of obedience and discipline."

That is this sycophant's idea of free government. This is a fine experssion for an editor who is always prating of loyalty to the Constitution. Democracy is a poison which is very dangerous to such governments as are favored by the bootblack editor of the Argonaut.

There seems to be a great shindy in the House of Commons over the question of Home Rule for Ireland. In the matter of making a Donnybrook out of it the Englishmen seem to have it on the Irishmen themselves. Had the scenes that have lately happened in the British parliament happened in this country the Britishers would have had a lot to say about those "blawsted Hamericans." As it is the Britishers are just about the same as anybody else and about as fit for self-government.

The Chronicle comes forward with a loud call to everybody to help chain up Governor Wilson. The idea of his calling an extra session to put tariff reform into actual operation has caused alarm. The idea of the reactionaries in voting for Wilson was that he would be so tied up by political affiliations that he would not be able to do anything. He is starting out as if he intended to do something so this is the cause of great alarm in all protected industries whether the tariff enjoyed by them is justifiable or not. The Chronicle is strong for protection, not because of its protection to American labor or the people generally, but because it helps the interests that it serves.

DECORATION IN ARCHITECTURE.

Historic and Analytic Treatment Of An Interesting Subject.

By W. P. Major, A.R.I.B.A., Calgary.

From the Western Canadian Contractor.

The subject of this article, Decoration in Architecture, might be divided into two principal heads Decorated Construction and Construction Decoration. Decorated Construction is most adequately exemplified in the style of architecture, which we call Gothic, and there is scarcely a feature of this style in its pure form that is not Construction Decorations. The pillar arches, groined ceilings, windows, the wonderful tracery, buttresses, pinnacles, parapets and beautiful ornamented wooden roofs are, all of them, necessary to the stability and purpose of the structure and yet beautiful examples of decorative art.

I might entitle my paper Decoration in Architecture, and divide it under two principal heads, Decorated Construction and Constructed Decoration. Later I intend to suggest a third, and one which, I think, you will agree with me applies more nearly to the methods of decoration which are, or perhaps rather should be, adopted in these days. Decorated Construction is as we all no doubt aware, most adequately exemplified in the style of architecture we term Gothic, and there is scarcely a feature of this style in its pure form that is not Construction Decorated. The pillars, arches, groined ceilings, windows, wonderful tracery, buttresses, pinnacles, parapets and beautiful ornamental wooden roofs. All of them necessary to the stability and purpose of the structure, and yet beautiful examples of decorative art.

The Greeks, too, undoubtedly decorated their constructions and in doing so tended to give their construction the appearance of even greater stability,—for example the entasis to the columns and other means adopted to correct optical delusions. In other words, they realized that it was essential that their buildings should appear structurally correct in order that they might appear beautiful. So that whether we turn to Classic or Gothic architecture we find the best examples of either style to be Construction Decorated.

The Necessity of Appearance of Strength.

These two styles are the foundation of the architecture of the present day, and one would therefore naturally expect the vital principles of those styles to be carefully followed. Is this so as regards decoration? As we turn to the Architecture of the present day what a very different aspect it presents to us, and how glaring are many of its faults! How frequently as one walks down the streets of any city on this continent can one see a molded beam perhaps two feet or even three feet deep made to represent a monolith of sandstone spanning a distance of twenty-five feet or more and resting on piers at eight and eighteen inches to thirty inches wide composed of similar material or of brick; then piled on top of this beam is a mass of stone, brick, terra cotta or similar material twenty to one hundred feet high which this stone beam is evidently intended to appear to support. How signally the intended effect fails is apparent to all of us, and yet we go on repeating this same obvious mistake day after day, year after year. Then consider the supporting piers. How absurdly small they are for all the tremendous weight that they appear to have to uphold.

Take again that favorite abortion of some of us which we see only too frequently. I mean a row of bricks on edge across an opening with ten or twenty feet of brickwork above it. We know and even the most uneducated readily realizes that by the simple laws of nature it should fall to the ground without any mass of brickwork above it to help push it down.

Then we see the brick work just continued straight across an opening which renders the result more deplorable than ever, and without doubt those people who have no knowledge of construction at all must sometimes wonder how the bricks and terra cotta stay in place, and possibly sometimes say to themselves that wonderful mortar must have been used in that building. The next glaring misuse of decorative features that comes to mind is the use of a wide span segmented arch, frequently of brick work, with abutments of a very slender nature. Sometime you can see this feature high up in a business block, sometimes at second floor level, also in dwellings and any and every kind of building, and if one did not know the secrets of the construction it would be a matter of amazement, however, the structure held together, and we should be wagering on the hour of the day at which it would fall. One can hardly omit mentioning the methods sometimes adopted —more especially over a store front— of decorating the upper stories of a building with a series of brick or stone pilasters which the convenience of the designer has prompted him to place anywhere but directly over the piers on the lower story. The effect given is necessarily that the pilasters are by some sticky method attached to the wall instead of appearing to be the main point of support. There are many other instances of a similar nature where decorative features which should represent to the eye at least support and stability and give to the senses a feeling of restfulness fail in their purpose because of the lack of truth in their application. I think we may rightly interpret these things to be a failure on the part of the architect to solve the problem of his elevation and it may not be inappropriate to mention here that if the architect was a scientifically trained man in the design of Architectural Decoration frequently fails in the complete solution of the problems put before him, we can the man who has had no such training expect to find that his design when executed consists of any thing but a jumble of badly imitated features and grotesque detail. And yet we find civic authorities continuing to allow at least the small civic buildings to be designed by all sorts and conditions of self-styled artists with the result that the building that was intended to beautify a park, square or civic center, is not only a cause for dissatisfaction in itself but has a soiling effect on its entire surroundings.

The failures, some of which have been mentioned, are not confined to any particular grade of architects, if there are grades, but are faults of which all are capable and culpable. It is apparent that with more study of the problems in design before us, we can eliminate some of the more glaring instances of incorrect application of decorative features. We can certainly eliminate some, such as the brick on edge arch, by discontinuing their use.

Buildings of a Top-Heavy Appearance.

In designing the decorative part of a building it is necessary to adhere most faithfully to the natural expression of the material in which we are working. For instance, if we build the wall the lower portion is not strong enough to support the top. Why? Because granite by its appearance impresses to the mind a sense of great strength and weight, whereas brickwork naturally appears to be a much lighter and weaker material, and therefore by their natural expressions the granite should be placed at the lower story and should support the brickwork. No doubt in many such cases the walls and facing material are supported on a steel frame and therefore the building is not affected structurally, but should we not characterize such as foolish if in building solid constructural walls he puts his brickwork on the lowest story and his granite or stonework on the top story? And is it being so are we not equally foolish when we try to decorate a building by reversing the order of materials?

Each material has its expression entirely its own and is naturally suited to fill certain portions in a building and fulfil certain requirements. If, then, its characteristics are not considered in the design it will invariably appear to be out of place when the design is executed. How, for instance, can we expect to make a plaster arch appear to support several stories of brickwork and yet we see it attempted. It may do it on a drawing. Plaster is expressly suited to positions in a building where it has no structural capacity, but is merely a protection from the elements and is therefore suitable for panel and similar positions.

[illegible] we [illegible] may have the idea to my mind of seeing Decorated Construction. We know by beautiful examples of an ancient past. Constructed Decoration we know from a [illegible] the [illegible] of the [illegible] over

again the problem of Decorated Construction in our day we may adhere to our designs most faithfully to what I term Decorative Construction. This is more distinct from Constructed Decoration than at first appears, inasmuch as the latter is not always decorative in fact far too seldom it is so.

The second rule, which is only second because there cannot be two firsts, is that the different features of the elevation should be so designed that they appear to be carrying out their entire function in helping to uphold the building of which they are a part. It may not be practicable to design the beam mentioned before so deep that if it were composed of a monolith of sandstone it would withstand the stress of all the weight appearing to rest upon it, but it is possible even under modern conditions to increase its depth considerably from that usually in practice and, by careful designing, eliminate to a great extent the appearance of the weight of the superstructure. Or why should it not be treated in large buildings so that it occupied the space of a whole story and thus obtain sufficient depth to counteract the weight above? These are only suggestions and there may be other means which some of us can devise to gain a satisfactory result.

Then in regard to the cap of the piers, how obviously out of place is a Corinthian or Ionic cap on the lowest story where there is great weight above. The situation calls for a cap which is sturdy and strong in appearance a cap which appears to be doing its work. Piers obviously should line exactly over those below and thereby appear to transmit directly the weight of the various stories above. A series of segmental arches may in a building on an inside lot find additional abutment in the adjoining building and when on a corner lot abutment can be obtained usually by planting the two end piers close together and using a semicircular area between them. If this end feature is carried up through the height of the building as a sort of tower it will by its superincumbent weight appear a stouter abutment. moldings play an important part in the elevation and it is essential that they be designed to fit the particular position they are intended for. The third rule would apply to sculpture and carving, and it is very necessary to remember that these things have their proper place in a façade. It is a fallacy to imagine that a building can be made beautiful by covering the façade with carving and sculpture, as we sometimes see done. We are fortunately spared that danger in this city as the cost of such work prohibits a people such as ours. Perhaps the keynote of all these things is to be sounded in two words, Proportion and Unity.

Proportion and Unity.

Proportion is everything and Unity of part will result so that nothing looks out of place but all the individual features of the façade fit together to form a complete whole. And above all let our building be constructive in their decoration. It is comparatively easy matter to make a well designed building look pretty or cut on paper, by putting in a few brick lines and some scrolls, but when it becomes a question of finding how to work out the elevation tell them the true working out shows up and the moulding which was hidden on the drawing by a multiple of lines stands out in all the nakedness of its horrible proportions. Architects in these days have to construct their decoration but if we would conscientiously do so as nearly as is possible along the lines of Decorative Construction our buildings would undoubtedly show a vast improvement in architectural quality. It is not intended to question the fact that there are buildings erected in these days of which the design fulfils the requirements of Decorative Construction, but it is intended to bring to our special notice some of the features which, though entirely inartistic inasmuch as they suggest a false method of construction, have crept into the façades of buildings through the cleverness and ingenuity of our methods of construction in order to suggest that, although we are able to apply all kinds of magic in our decoration, we are still hidebound to a certain extent by the rules which governed our ancestors who constructed in stone and brick, if we wish our buildings to look as if they were erected with an eye to beauty as well as to use. This is for the present until we can thing of some method of decorating our buildings more applicable to our present day than by the use of brick, stone and terra cotta. This is a steel age—our buildings are erected in steel or reinforced concrete. Why cannot we design our elevations in the same material, decorating our construction? That I think is the real problem before us and if those clever Greek artists or those wonderful Gothic architects had lived in these times they would surely have found some means of decorating the buildings of these days in the material of which they are constructed.

Possibly if we had not the examples of the past to draw upon, and if those examples were not drummed into our heads by every possible means education can employ if we could, in a word, obliterate all that has gone before, forget our stone, terra cotta and brick, we naturally might develop steel construction to a thing of beauty, but under the conditions which rule in these days we are permitted no developing process of that kind.

Ornamental Steel Construction.

The architect who is bold enough to ornament the construction of a steel-frame building has to first have a fully developed and thought-out design and has to stake his reputation on that design which will be compared with the best buildings in the usual materials. He has, moreover, to contend with the taste of the public, who have become naturalized to buildings of stone, terra cotta and brick. That is enough to frighten any man away from that kind of originality unless he is independent enough and rich enough to test his ideas in a building of his own. To give an outline suggestion of what might be done, there would in the first place have to be some method of treating steel invented to eliminate the action of the weather, but we will suppose this done. Imagine the steel columns each carried up in one long continuous panel with ornamental steel brackets at the floor joists to support the horizontal girders, which could be suitably moulded. The panels filled in with copper or some metal, or even brick, terra cotta, stone or plaster, the windows of metal and the whole building crowned by an ornamental iron cornice not cast in the forms we are so familiar with, but executed in a design suitable to the material, say for instance along the designs for theatre canopies, though of course not with the same amount of projection. The store front would be a simple matter to deal with in metal and glass and the space below the window could be carried out in metal, marble or some other suitable material. The entrance would readily adapt itself to being designed in ornamental steel, copper or iron and thereby a maximum amount of light could be obtained to light the interior hall or lobby. In fact, the whole design would readily lend itself to the uses of man inasmuch as the maximum amount of light could be obtained. The difficulty is to make the exterior appearance of the building such that it would be a pleasure to look at both from the view of the public and that of the trained architect. The interior of the buildings could still be decorated with imitations of a past art or possibly some original and progressive method of decoration could be devised.

This is, architecturally an age of adapting the highly developed arts of the past to our present needs and in many cases merely copying and imitating them; often bad imitations at that. The Greeks developed classical art to its highest pinnacle and ancient Greece would tell us that we are endeavoring to apply an art to our ten-story buildings which they found only applicable to one story. The steel buildings of today cry out for some radical change in design, some radical change in the principles of design, some change in the principles of proportion, for the eye does not demand that the principles of proportion adopted for classical columns should be repeated in a steel stanchion.

A change of this nature must inevitably take place sooner or later, and when it does we shall be once more carrying out the principles of decorated construction. Let our thoughts be directed towards this end, and in the meantime, as we can do no better, let us do no worse than carry out in our designs the principles of decorative construction as far as it is possible under modern conditions.

HIGHWAY BONDS SOLD.

SACRAMENTO, November 13.—State Treasurer Roberts yesterday offered at auction $2,050,000 worth of San Francisco harbor and State highway improvement bonds. The State Board of Control purchased $250,000 worth of bonds at par and accrued interest with money available from the State school land fund. They will be deposited with the State Treasurer for the State school fund and the interest paid into the fund.

The State Treasurer was authorized to sell in all $1,250,000 worth of the issue. When no other bids were recorded the State Treasurer announced a continuance of the sale.

State highway bonds to the amount of $800,000 were also to have been sold. No bids were made for these and they will be placed on sale again Thursday.

With the sale to the State of 250 shares of the San Francisco harbor bonds an even $1,000,000 worth of the authorized $9,000,000 bond issue have been disposed of to date.

The sale of highway bonds to date has been $1,600,000.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. This building is to be erected at the southeast corner of Powell and Clay streets. There will be three stores on the first floor and fifteen apartments on the upper floors. Apartments will be arranged in two and three room suites with wall beds and connecting baths. Interior finish will be of pine. Tile and composition will be used in the bath rooms. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are complete and out for figures.

OAKLAND, CAL.—Apartment house, 3 story and base, brick, $37,000. Architect, W. W. Dixon, 1844 5th Ave., Oakland. Owner, E. J. Turner. The building has been arranged for nineteen apartments of two, three and four rooms each. All suites will have connecting baths and wall beds. There will be a large reception room and billiard parlor. Interior trim will be of pine and redwood with some oak floors There will be steam heat. The exterior of the building will be faced with pressed brick. Considerable tile and marble will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LOS ANGELES, CAL. — Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, Mrs. Ida Hanst. The building will cover an area of 75x95 feet and will contain 51 two and three room apartments besides a large amusement room, ladies' parlors, office and lobby. All apartments will have connecting baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning plant. Construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. Plans have been completed and are now out for figures.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $45,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg. L. A. Owner, Laura Winters. The building is to be 45x138 feet and will contain sixty rooms which are to be arranged in two and three room suites with private baths and wall beds. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood with some oak floors. Baths will be finished in tile and will have composition floors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Apartment house, 2 story and base, brick, $45,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Lorenzo Vignolo. The building will cover an area of 80x160 feet and will contain 72 rooms which are to be arranged in apartments of two and three rooms each. All suites will have connecting baths and wall beds. The interior of the apartments will be finished in pine and redwood with some oak floors. Bath rooms will be finished in tile and will have composition flooring. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and out for figures.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, $25,000. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, William A. Young. The building will contain 75 rooms, which will be arranged in two and three room suites. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. All suites will have private baths and wall beds. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

HOLLYWOOD, LOS ANGELES CO., CAL.—Apartment house, 2 story and base, frame, $20,000. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owner, Mrs. B Kendall. Contractor, Henry Getz, 3443 Fifth Ave., L. A. Contract price, $19,000.

BANKS

SAN FRANCISCO — Subtreasury, 2 story and base. Class A construction. $500,000. Architect, Milton J. Dyer, Cuyahoga Bldg., Cleveland, Ohio. Owners, United States Government. Plans and specifications for this building have reached the coast and are now out for figures. The building is in the classical style with complete steel frame and exterior walls of white marble resting on a granite base. Construction will be Class A throughout. Mechanical equipment will include a number of special features. The basement will contain two large money vaults. Bids will be opened at Washington, D. C., on January 3rd, 1913. Plans can be secured from Superintendent of Construction Roberts, Postoffice Bldg., S. F., or from the Supervising Architect at Washington, D. C.

Contracts Awarded.

TACOMA, WASH.—Bank and offices, 3 story and base, reinforced concrete. $75,000. Architects, Heath & Grove, National Bank Bldg., Tacoma. Owners National Realty Co. Contractor, Hans Pederson, Madison Block, Seattle. Contract price, $75,000.

ALHAMBRA, LOS ANGELES CO. CAL.—Bank, 1 story and base. Class A construction, $20,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Alhambra Savings Bank. Contractor, H. F. Roberts 203 North Marguerita Ave., Alhambra. Contract price, $17,800.

CHURCHES.

SAN FRANCISCO Church, 2 story and base. Class A construction, $175,000. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, First Congregational Church. Plans are being prepared for the new and magnificent building which is to the future home of Dr. Charles F. Aked's First Congregational Church in this city.

Built of white stone in the Italian Renaissance style and supported by massive Corinthian columns on all sides, the building will be one of the most handsome and stately churches in the country.

It will cost $175,000. Its seating capacity will exceed 1,500 and the building will be provided with an additional lecture hall, a large Sunday school room with nine class rooms, several withdrawing rooms, a library, a dining room and kitchen, in addition to the spacious auditorium and accommodation for the minister and trustees.

The building departs from the conventional church style and form and no efforts have been spared to make convenience stand hand in hand with beauty. The new First Congregational Church is to be a building of which San Francisco will be proud.

The whole building covers an area of 104 by 137 feet. The main entrance is made through a vestibule 26 by 76 feet in area and bordered by a Corinthian colonnade.

The auditorium, lighted from the Roman ceiling by a large art glass skylight, will match in splendor the stately edifice of Cubla Kahn in Xanada-Cu. The walls will be of Caen stone inset with colored glass windows of a Brune-Jones design. A sloping floor with accommodation for 1,100 people will be entered by a six-foot aisle for ceremonial purposes.

The pulpit platform is to be surrounded by a wide, semi circular space and surmounted by a dome with a seating capacity of forty.

The organ at present in use in the church on Post and Mason streets will be transferred to the new church. This organ was built since the fire and is of the most modern type of construction.

LOS ANGELES, CAL.—Church auditorium, 1 story brick and stone. Cost not stated. Architect, C. C. Rittenhouse Wilcox Bldg., L. A. Owners, Knox Presbyterian Church. The building will be a the nature of an addition to the present building, and will be 48x56 feet. The auditorium will have a seating capacity of 400 people. There will be a central heating system installed. The exterior will be faced with artificial stone. Plans are being prepared.

LOS ANGELES, CAL. Church, 1 story and base, frame. Cost not stated. Architects, Walker & Vawter, Huberman Bldg., L. A. Owners, Hobart Boulevard M. E. Church. This work has been mentioned once before when the architects were first commissioned to prepare the plans. The building will be 80x102 feet and will contain an auditorium 54x63 feet. Besides the main auditorium there will be Sunday school rooms, social rooms and a gymnasium. The exterior of the building will be covered with cement plaster on metal lath. Plans will be ready for figures in a few days.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Laundry, 1 story and base, frame, $5,000. Architect William Knowles, Hearst Bldg., S. F. Owners, William Ede Estate. The building will have concrete floor and pine interior finish. Laundry machinery will be installed by the lessees. The exterior will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete, $70,000. Engineer, N. M. Lones, 11 West 11th St., New York city. Owners, American Can Co., Mills Bldg., S. F. The company have received complete plans and specifications from the east and are now taking steps for the construction of a modern warehouse building on their property on the corner of 16th street and Third avenue. The building will cover a ground area of 100x120 feet and is to be of the fire resistive warehouse type of construction. No interior finish will be used. Steel will be metal window sash and frames and fireproof doors. A freight elevator will be installed. The exterior of the building will be faced with cement plaster. Plans can be secured from the owners.

PRESIDIO OF SAN FRANCISCO—Laundry, 2 story and base, reinforced concrete, $16,000. Engineers, Constructing Q. M. Dept., Fort Mason. Owners, United States Government. Plans for a laundry building covering an area of 120x32 feet are now completed and bids will be asked for within a few days. Besides the $16,000 available for construction and appropriation of $8,000 has been made for machinery. The exterior of the building will be faced with cement plaster. This work will be awarded through the office of the Constructing Q. M. Dept. at Fort Mason.

SAN DIEGO, CAL.—Factory, 6 shop units, each 1 story and base, steel and reinforced concrete, $100,000 to $500,000. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, McCumber Rotary Engine Co. This firm has secured a tract on the San Diego water front comprising 18 acres and will develop thereon one of the largest manufacturing plants on the Pacific Coast. The scheme as it now being worked out by Architect Haenke, is essentially one in which a community interest of the employer and employee has been carefully considered. In the main the project is being developed along the same lines as the famous Port Sunlight scheme in England. There will be a large administration building, auditorium and club house besides the six large factory units. Residences for the officials of the company will be built on the higher ground. All of the buildings will be connected by a system of boulevards to the industrial center. Each of the six shop units will be 1000x80 feet with a single span. This group will include a draughting building, lavatory and a receiving and shipping building. A large dining hall for the employees will also be erected in the heart of the industrial center. A spur track is to be built along one side of the entire factory group, passing directly through the receiving and shipping building to the main unit. Several small docks will be built along the water front. A mile track will also be built on the company's property which will be used for testing out motor, launch and aeroplane engines. All buildings will be modeled along the Mission style of architecture, taking the old Mission Dolores in San Francisco as typical. According to agreement the construction of the first unit must be started within sixty days. Architect Haenke's plans well underway and states that there will be no delay.

FIRE HOUSES AND JAILS.

VANCOUVER, B. C.—Jail, 5 story and base, steel and reinforced concrete. Cost not stated. Architect, W. A. Bacon, Arts and Crafts Bldg., Vancouver. Owners, City of Vancouver. Complete plans and specifications have been accepted for this building and bids for the construction will be opened on November 25th. Only two stories are to be erected at this time. All of the cells to the extent of 500 go to make up a modern jail building have been incorporated in the plans. Construction will be of the class A type throughout. Besides the cell blocks, department headquarters and guard room there will be a modern hospital ward, gymnasium and prisoners' exercise gallery. The exterior of the building will be faced with pressed brick and terra cotta.

LOS ANGELES, CAL.—Fire house, 2 story and base, brick, $20,000. Architect, J. J. Backus, Chief Building Inspector, L. A. Owners, City of Los Angeles. The building will cover an area of 40x72 feet, and will accommodate one engine company. The second floor will be arranged for dormitories and baths. There will be a central heating system. The exterior of the building will be faced with blue pressed brick. Plans for a similar building are also being prepared by Architect Backus and will be completed shortly.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, $5,000. Architect, C. Fantoni, 1 Columbus Ave., S. F. Owner's name withheld. The building will be 60x110 feet and will contain a saloon on the first floor and one large residencial flat above. Interior finish will be of pine and redwood. Some oak flooring will be used. There will be open fire places and brick or tile mantles. Considerable marble and terrazzo will be used. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

GARAGES.

SAN FRANCISCO—Garage, 1 story and mezzanine floor, reinforced concrete, $50,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, Lloyd Estate. The building will cover a ground area of 18,600 square feet and will have a cubic contents of 36,600 feet. Construction will be fireproof. There will be metal window sash and frames. An electric freight elevator will be installed. The exterior will be faced with cement plaster. Plans are complete and in the hands of the contractors for figures.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, $85,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Charles A. Tilden. The building has been mentioned here several times before. Plans are now complete and figures are being taken on the work. The structure will cover an area of 109x120 feet. Floor space has already been leased to three automobile firms. Construction will be of the reinforced concrete type and practically fireproof. There will be a cement floor on the first story. Metal window sash and frames will be used. Interior of the offices and sales rooms will be handsomely finished. The exterior will be faced with Caen stone and cement plaster. A contract for the excavating has been let and others will follow at once.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, $25,000. Architects, Ross & Burgren, 340 California St., S. F. Owners, Newbauer Investment Co. The building will be erected on Geary street west of Jones, and is to have a cement floor on the first story. There will metal window sash and frames. Interior finish will be of pine. The exterior of the building will be faced with glazed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, $90,000. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owner's name withheld. Preliminary plans for the largest commercial garage in this city have been made and several leases on space have been signed. Construction will be fireproof throughout. The main floor will be arranged for storage space and the second floor for offices and a repair department. There will be a large elevator. Metal sash and frames and fireproof doors will be used. Special gasoline storage tanks are to be installed. The exterior of the building will be faced with cement plaster. The site on which the building is to be erected is 120x237 feet. Working drawings will be started shortly.

SAN FRANCISCO—Garage, 1 story and base, brick, $13,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, G. Lachman. The building is to be erected on Geary street, and has been designed for a small commercial garage. There will be a cement floor, modern plumbing and metal window sash and frame. The exterior will be faced with pressed brick. Plans are now underway.

Contracts Awarded.

MERCED, MERCED CO., CAL.—Garage, 2 story and base, reinforced concrete, $25,000. Architects, Crowell &

Bedesen, Merced. Owner, R. Shaffer, Jr., Contractors, Graham & Jensen, Merced. Contract price, $25,000.

Much Government Work Announced.

Constructing Quartermaster's Office Has Plans For Extensive Improvements for Posts.

The most interesting announcement from the Constructing Quartermaster's Office at Fort Mason is that relative to the clearing off of a large ground space on the north side of the road running from the General Hospital to the Band Barracks and the proposed construction thereon of a large number of modern reinforced concrete buildings which will be turned over to the Exposition Company for use in connection with the Live Stock Exhibit at the 1915 Fair.

Presidio Improvements.

This work is to be completed by the end of 1913 and will envolve an expenditure of $300,000. Preliminary plans are now underway for the removal of the old buildings and sketches have been made for a number of modern reinforced concrete structures, which will accommodate 1500 head of horses and mules. The main stables will be 165 feet in length and 35 feet wide. There will be four of these buildings erected for the cavalry, 18 for the quartermaster's department and one each for the signal corps and medical corps, besides 8 wagon sheds, 2 granaries, 4 shop buildings, 3 guard houses, a veterinary hospital and a number of other structures. All of these buildings will be located to the north of the National Cemetery and below the batteries.

Car Line For Fort Mason.

Other news of interest to the public and showing development at the Presidio and other army posts in the vicinity, includes the granting of permission to the United Railroads to construct a street railroad through Fort Mason, ending in a loop at Laguna street, between Beach and North Point streets. The road will connect with the present Polk street line and be constructed along Polk street to Bay street, out Bay street to Fort Mason and through the reservation to its terminal at Laguna street. Sixty pound rails and outside poles will be used. Work is to be started at once and completed within 90 days.

Plans for the electric lighting system at Fort Mason have been completed and are now in Washington awaiting the approval of the War Department.

At Fort Winfield Scott.

Provision has been made in the December Congress Bill for the following buildings at Fort Winfield Scott: A reinforced concrete barracks to cost $40,000; three non-commissioned officers' quarters, to cost $18,000; a reinforced concrete apartment house, to cost $30,000; three sets of double officers' quarters, to cost $54,000; an engineer's store house, $14,000, and a reinforced concrete fire engine house, $4,000.

A New Laundry Building.

Plans and estimates have been prepared for the new two-story and basement reinforced concrete laundry building which is to be erected at the Letterman General Hospital and the funds for construction will be asked for at the next session of Congress. The building will cover an area of 120x73 feet and is designed for the most modern laundry equipment possible. An estimate of $16,000 has been placed on the building and $8,000 allowed for new and up-to-date machinery.

A contract for a portion of the 1000 foot asphalt roadway in the Presidio will be let very shortly while the balance of the roadway, which is to be constructed in Fort Winfield Scott, will not be undertaken until after the rainy season. All grading will be done by the military prisoners.

Rock Crusher at Angel Island.

A new rock crushing plant will shortly be erected at Angel Island station and about two-thirds of the money allotted for the construction has already been allowed. Oil burning equipment for all buildings at this station will very likely be advertised for within a short time. Plans and specifications for this work have been completed and sent to Washington for approval

Oil Burner For Fort Baker.

Plans and specifications for the big oil burning system to be installed at Fort Baker have also been completed and sent to Washington for approval. This work includes the construction of two large reinforced concrete oil reservoirs, motors, pumps, a pump house, oil mains and oil burners. An estimated cost of $35,000 is placed on this work. Bids will be advertised for as soon as the plans receive the offical approval of the Department.

The new gravity oil system recently installed in the Presidio has been in successful operation for the past week and is giving most excellent satisfaction. With the completion of the other proposed systems of this type in the military posts around San Francisco Bay it is estimated that an annual saving of $100,000 over the cost of coal will be effected.

The above work is all to be handled through the Constructing Quartermaster's Office at Fort Mason with Lt. Col. George McK. Williamson as officer in charge and Engineer O. W. Degen, Chief Engineer.

San Francisco, Cal., Filing Equipment.

Wentworth & Boyce, Yawman & Erbe Mfg. Co., Sanborn, Vail Co., and the H. S. Crocker Co. have been awarded the contracts for installing certain filing equipment in the U. S. custom house, San Francisco, Cal., at $780.36, $1,074.90, $115.37, and $1,031.50, respectively.

Canal Work.

The director of the Reclamation Service is asking for proposals for the construction of about 46 miles of the Vandalia south canal, Milk River irrigation project, Mont. The work involves the excavation of about 891,000 cubic yards of material and is situated on the south side of Milk River, adjacent to the main line of the Great Northern Railway in the vicinity of Vandalia, Tampico, Glasgow, and Nashau. The bids will be opened at the office of the Reclamation Service at Malta, Mont., on December 2, 1912.

Cement, Reclamation Service.

The Secretary of the Interior has authorized the Reclamation Service to accept the proposal of the Ogden Portland Cement Co., of Ogden, Utah, for furnishing 130,000 barrels of cement for use on the Arrowrock dam, Boise irrigation project, Idaho. The contract price is 99c per barrel f. o. b. cars at Bakers, Utah. The engineers are also authorized to enter into negotiations for proposals for an additional 130,000 barrels.

Puget Sound, Steel Shelving.

The following bids were received by the quartermaster in charge of the U. S. Marine Corps headquarters, Washington, D. C., for furnishing steel shelving and counters in the new marine barracks, navy yard, Puget Sound, Wash.:

Merritt & Co., Camden, N. J., $1,890.55.

Art Metal Construction Co., Jamestown, N. Y., $3,610.

H. H. Schultz, Gowanda, N. Y., $2,500.

Watson Manufacturing Co., Jamestown, N. Y., $3,997.

Berger Manufacturing Co., Canton, Ohio, $2,512.

Lyon Metal Manufacturing Co., Aurora, Ill., $1,691.

Steel Fixture and Manufacturing Co., Topeka, Kan., $2,890.

Fireproof Furniture Construction Co., Miamisburg, Ohio, $1,950.

Van Dorn Iron Works Co., Cleveland, Ohio, $1,650.

Gates and Valves, Lahontan Dam.

H. W. Johns-Manville Co., Madison avenue and 41st street, New York city.

Penn Bridge Co., Beaver Falls, Pa.

R. S. Bishop, Washington, D. C.

W. N. Conemon Co., San Francisco Cal.

Spaulding Construction Co., Portland, Ore.

U. S. Steel Products Co. 30 Church street, New York city.

—HALLS & SOCIETY BLDGS.—

SAN FRANCISCO—Club building, 4 story and base, brick and steel, $75,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, York Realty Co., San Francisco Press Club, lessee. Plans for the new building for the San Francisco Press Club have been completed and figures on the construction are being taken. The first floor of the building will be arranged for stores. Two upper floors have been leased to the Press Club and will be fitted up by them. Leases with other similar organizations are pending for space on the other floors. The exterior of the building will be faced with pressed brick and terra cotta.

OAKLAND, CAL.—Association building, 4 or 5 stories and base, brick and steel or reinforced concrete, $160,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Oakland Young Women's Christian Association. This building was mentioned here some weeks ago. At that time it was not decided how much would be spent for construction. Funds now available assure the organization one of the most completely equipped institutions of the kind on the coast. Construction will be undertaken early in the coming year.

VANCOUVER, B. C.—Association building, 8 story and base, reinforced concrete, $350,000. Architect, H. S. Griffiths, Dominion Trust Bldg., Vancouver. Owners, Vancouver Young Men's Christian Association. The new structure will occupy a prominent site at the corner of Georgia and Burrard streets and covers a large area. The main floor will contain the general offices, reading rooms, etc. The basement has been arranged for a plunge and the bathing departments. Special apparatus rooms and the gymnasium will occupy the second, third and fourth floors. The remaining stories will be arranged for sleeping rooms. Construction will be fireproof throughout. There will be steam heat. The exterior will be faced with pressed brick and terra cotta. Plans are complete and out for figures.

SAN DIEGO, CAL.—Club house, 6 story and base, reinforced concrete, $200,000. Architect, Harrison Albright, Laughlin Bldg., L. A. Owners, Cabrillo Club. The club has just purchased a large holding at the corner of D and State streets from John D. Spreckels. Only preliminary plans have been prepared and construction details are not obtainable at present. W. G. Johnson, secretary of the club, states that the building will be fireproof throughout, and that construction will be started within three months. Mr. Johnson may be addressed at the club.

Contracts Awarded.

SACRAMENTO, CAL.—Association building, 4 story and base, brick and steel, $125,000. Architect, E. C. Hemmings, 1005 K St., Sacramento. Owners, Young Men's Christian Association. Contractors, Ransome Concrete Co., Sacramento, general construction, $108,934; structural steel, Palm Iron Works, Sacramento, $12,095. For a complete list of all figures see under Sacramento, Stockton and Northern California in this issue.

HOSPITALS.

SAN DIEGO, CAL.—Hospital addition, 2 story and base, brick and steel, $75,000. Architects, Quayle Bros., San Diego. Owners, San Diego County. The Board of Supervisors has just commissioned the architects to prepare plans for a large addition to the County Hospital. No details of the building have been worked out as yet, and it will be sometime before a description can be published.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, $90,000. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owners, S. and G. Gump. The building will be erected at the northeast corner of Geary and Jones streets. There will be stores on the first floor and over 150 guest rooms on the upper floors. Nearly all rooms will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. All rooms will be supplied with running hot and cold water. The exterior of the building will be faced with white cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel addition, 6 stories, reinforced concrete. Cost not stated. Architect, E. P. Antonovich, 333 Kearny St., S. F. Owner, F. A. Hihn. This owner recently started the construction of a one-story store building at the corner of Bush and Kearny streets, and since has determined to add six stories, which will be arranged for a modern commercial hotel. Construction will be fireproof. There will be in the neighborhood of 140 guest rooms, nearly all of which will have connecting baths. There will be steam heat and hot and cold running water and elevator service. Interior will be finished in pine and hardwood. Baths will be finished in tile. The exterior will be covered with cement plaster. Plans are nearly complete.

SAN FRANCISCO—Hotel, 3 story and base reinforced concrete, $12,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Choong Hoy. The building is the second modern hotel structure designed by the same architects and which is to be erected in Chinatown. A site 20x60 feet is to be improved. There will be seven guest rooms on each of the floors, including the first floor. Besides these there will be several baths. Interior finish will be of pine throughout. Running water will be supplied to all rooms. The exterior of the building will be faced with stock brick. Plans are now being prepared.

SAN FRANCISCO—Hotel, 7 story and base. Class A construction, $85,000. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner's name withheld. The building will be erected at the corner of McAllister and Leavenworth streets and will cover a large area. Plans provide for about 200 rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwood. Bath rooms will be finished in tile with composition floors. Main office and lobby will be handsomely finished. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Hotel, 10 story and base. Class A construction, $900,000 or more. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owners, Charles L. Fisher et al. This is the largest hotel project recently conceived for San Francisco and involves the property at the gore corner of Hayes and Market streets at Ninth. This lot has frontages on Market and Hayes streets of approximately 275 feet. Mr. Fisher recently purchased the property from the Dow Estate, and has interested eastern capital that is now engaged in extensive hotel business in New York. Preliminary plans show a building of the highest type of construction and with a total of 1200 guest rooms and 1200 baths. The first floor will be arranged for a large hotel lobby, offices and public dining room besides several stores. The main entrance will be at the gore. Lobby, dining room and office will be handsomely finished. There will be steam heat, elevator service and a vacuum cleaning system. There will be a complete steel frame and exterior walls of reinforced concrete faced with pressed brick and terra cotta. The owners of the property will conduct the hotel under their personal management. Working drawings will be completed as rapidly as possible and construction will be started early in 1913.

SAN FRANCISCO—Hotel, 6 story and base, brick and steel, $85,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Board Realty Co. The building will occupy a corner site and is to cover an area of 55x87 feet. There will be three stores besides the hotel lobby and offices on the first floor. Upper floors will contain a total of 100 rooms, all of which will have connecting baths. There will be steam

heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick and terra cotta. Plans are complete and the architects are taking seggregated figures on the work.

Contracts Awarded.

SACRAMENTO, CAL.—Hotel, 6 story and base. Class A construction, $221,000. Architects, Cuff & Diggs, Sacramento. Owners, Marsh Investment Co. Contractors Ransome Concrete So., Sacramento. Contract price, $221,000.

SPOKANE, WASH.—Hotel, 14 story and base Class A construction, $2,000,000. Architects, Cutter & Malgren, Paulson Bldg., Spokane. Owner's name not given. Contractors, Dinwiddie Construction Co., Portland, Ore. Contract price, $2,000,000.

R R CONST

LOS ANGELES, CAL. Hotel, 3 story and base, brick and steel, $20,000. Architect, Charles E. Shattuck Mason Bldg., L. A. Owner, S. H. Pardue. Contractor, George M. Easton, 436 West 30th St., L. A. Contract price, $19,000.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Passenger depot, 1 story and base, reinforced concrete, $15,000. Architect, Eng. Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a new station at Third and University strets in Berkeley have been approved and work will be started shortly. The building will be in the Mission style and will contain two waiting rooms, offices and baggage room. There will be steam heat. Interior finish will be of pine and redwood. The exterior will be faced with cement plaster. The roof will be of clay tile. Plans will be completed within a short time.

PETALUMA, SONOMA CO., CAL.—Passenger station, 1 story and base, brick or concrete. Cost not stated. Architect, Engineering Dept. Northwestern Pacific R. R. Co., Phelan Bldg., S. F. Owners, Northwestern R. R. Co. It is announced that the company has secured a site at Washington and Hopper streets and will erect a suitable station on the property within a few months. Preliminary plans have been prepared outlining two schemes, and these are now before the directors. As soon as a definite amount of money is set aside for construction plans will be prepared in accordance.

RESIDENCES.

SAN FRANCISCO — Bungalow, 1½ story and base, frame, $2,000. Architect, none. Owner, Andrew Lyon, 182 Liberty St., S. F. The dwelling will contain six rooms and bath. Doors and window shutters of fireproof construction. Window sash of steel. Dimensions of the various buildings are to be as follows: Primer house, 55 ft 9 ins x 25 ft; magazine, 141 ft 9 ins x 50 ft; fixed ammunition house, 201 ft 9 ins x 50 ft; high explosie house, 55 ft 9 ins x 25 ft. All buildings are one story high, with bottom chord of roof truss 12 ft above floor.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 745—Proposals for Switches, Switch Stands, Galvanized Steel or Iron Sheet Copper, Sheet Brass, Yellow Metal, Bronze Bars, Babbitt Metal, Lock Washers, Chain, Cold Chisels, Track Wrenches, Wrench Parts, Shovels, Tacks, Pliers, Saws, Scythes, Snaths, Machetes, Ratchet Braces, Hand Oilers, Fog-Signal Bells, Galvanized Buckets, Roofing and Paint Brushes, Life Preservers, Metalic Tapes, Boxwood Rules, Emery Cloth, Chamois Skins, Fire brick, Vitrified Sewer Pipe, Rubber Belting, Rawhide Belt Lacing, Magnesia Pipe Covering, Magnesia Boiler Lagging, Asbestos Cement, Oakum, Excelsior, Rock Salt, Green Enamel Paint, and Turpentine.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C. until **10:30 a. m. December 2, 1912,** at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 745) may be obtained from this office or the office of the assistant purchasing agent, 1058 North Point street, San Francisco,

Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR HARBOR WORK.

PORT OF SEATTLE COMMISSION, 843 Central Building, Seattle, Wash., October, 25, 1912.—Sealed proposals for dredging, slope protection, piling, bulkhead, and water main improvements on the East Waterway designated as the "East Waterway Project" of the Port of Seattle Commission, will be received at this office until **noon (standard time), November 27, 1912,** and will then be publicly opened. Plans and specifications for said work are on file in office of the Port Commission above stated, subject to public inspection. C. E. REMSBERG, Secretary. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 744—Proposals for Tool Steel Machine Bolts, Rivets, Horseshoe Nails, Screws, Cold Chisels, Wrought Iron or Steel Pipe, Soil Pipe, Stovepipe, Lead Pipe, Valves, Cocks, Engine Lubricators, Rakes, Sprinkling Cans, Clothes Hampers, Coal Baskets, Doormats, Spiral Packing, Paper Clips, Twine, Bond Paper and Crossties.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10.30 a. m November 26, 1912,** at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 744) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR GATES AND MACHINERY.

GATES AND MACHINERY—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Fallon, Nev., until **2 p. m. November 21, 1912,** for furnishing gates, valves, operating machinery and appurtenances for Lahontan Dam, Truckee-Carson project, Nevada. For particulars address U. S. Reclamation Service, Fallon, Nevada; Portland, Ore., or Washington, D. C. A. P. DAVIS, acting director.

PROPOSALS FOR BUILDING.

THE BOARD OF EDUCATION of the City of Oakland, State of California, requests and will receive proposals or bids for the furnishing of all materials labor and workmanship required in connection with the construction and completion of a one-story reinforced concrete and wood frame School Building, to be known as the College Avenue School, and to be erected on the block of land situated at the intersection of the southerly line of Birch Court with the easterly line of College avenue in the City of Oakland, California.

All materials, labor and workmanship required for the construction of said building shall be in accordance with the plans, drawings and specifications prepared therefor and now on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the city, through the Supervising Architect, and shall be enclosed in a sealed envelope, endorsed "Bid for College Avenue School," addressed to the Board of Education, and deposited by the bidder, or his agent, with the Board, while in session, between the hours of **7:30 and 8 o'clock p. m., Pacific Time, on the 5th day of December, 1912,** in the rooms of the Board in the City Hall Annex, No. 1728 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The contract for the furnishing of all the labor and material entering into the construction and completion of the work of said school building, including Plumbing, Heating, Ventilating, Electric Work and other Equipment indicated on the drawings or called for in the specifications, is to be let or awarded as a whole or general contract.

No proposal or bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank R. Thompson, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of award.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California.

Dated November 7, 1912.

R. B. S. YORK,

Sec. of the Board of Education of the City of Oakland.

PROPOSALS FOR STREET WORK.

PURSUANT to Statute and to Resolution of the Council of the City of Oakland passed November 12th, 1912, directing this notice, said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

(1) That Fourteenth street in said City, from the eastern line of Jackson street to the western line of Oak street, be graded, curbed with concrete, paved with an asphalt pavement, and guttered with a concrete gutter two (2) feet in width.

Also that a sewer, having an interna. diameter of eight (8) inches, be constructed along a line described as follows, to wit: Beginning at a point on the center line of Oak street distant

forty (40) feet northerly from the southern line of Fourteenth street; thence westerly, parallel to the southern line of Fourteenth street, to a point distant two hundred sixty (260) feet westerly from the center line of Madison street.

Also that two (2) brick manholes, having tops of cast iron, be constructed on the aforesaid proposed sewer as follows to wit: One each on the center lines respectively, of Oak street and Madison street.

Also that a lamphole, having a top of brick and cast iron, be constructed at the western terminus of the aforesaid proposed sewer.

Also that "Y" branches having six (6) inch openings be constructed on the aforesaid proposed sewer so as to provide one such branch for each fifty-foot lot, and fractional lot remaining, into which the abutting property frontage, taken block by block, is capable of being divided.

(2) That a sewer having an internal diameter of six inches, be constructed along the center line of Herzog street from the existing lamphole in Sixty-first street to a point distant two hundred and fifty-five (255) feet southerly from said lamphole, also

That a lamphole, having a top of brick and cast iron, be constructed at the southern termination of said sewer, also

That "Y" branches having five inch openings, be constructed on the aforesaid sewer so as to provide one such branch for each forty-foot lot, and fractional lot remaining, into which the abutting property frontage is capable of being divided.

The aforesaid sewer, "Y" branches and lamphole (excepting the top thereof) shall be constructed of best quality vitrified sewer pipe.

(3) That Wesley avenue from a line drawn at right angles to the eastern line of Wesley avenue at its intersection with the southern line of Hillsborough street to the northern line of Cleveland street, be graded and paved with an oil macadam pavement also

That Wesley avenue from the northern line of Cleveland street to a line drawn parallel to and distant sixty feet northerly from the southern line of Prospect avenue (as said Prospect avenue exists between Wesley avenue and Capital street) be regraded and paved with an oil-macadam pavement; also

That Wesley avenue from the aforesaid line drawn at right angles to the eastern line of Wesley avenue to the center line of Cleveland street be graded with redwood, and guttered with a broken rock gutter, three feet in width, on the western side of Wesley avenue, and four feet in width on the eastern side of Wesley avenue, also

That the northwestern quarter of the crossing of Cleveland street with Wesley avenue be curbed with concrete and the western side of Wesley avenue from the center line of Cleveland street to the center line produced of Prospect avenue be curbed with concrete and guttered with a concrete gutter, three feet in width, also

That three corrugated iron and concrete culverts be constructed one such culvert (having two barrels) in the opposite termination of Hillsborough street and Wesley avenue and one such culvert (having three barrels) in the crossing of Cleveland street with Wesley avenue, and one such culvert (having a branch in the opposite termination of Prospect avenue) along a line drawn parallel to and distant fourteen feet easterly from the western line of Wesley avenue and extending from the southern line, produced, of Prospect avenue to a line drawn parallel thereto and distant sixty feet northerly therefrom; also

That a wooden bridge be constructed in the northwestern quarter of the crossing of Wesley avenue with Cleveland street.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland, on **November 25, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.** At the expiration of said hour, the Council will open, examine and publicly declare all bids received

Note: Separate estimates are to be submitted on each of the above propositions.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

BUNGALOW — 1½ story and base, frame, $2,000. San Francisco. Architect, none. Owner, Andrew Lyon, 182 Liberty St., S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $5,000. San Francisco. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner, C. N Arques, 1138 Leavenworth St., S. F. The house has been designed for an eight-room dwelling will all modern conveniences. Interior finish will be of pine, redwood and white enamel. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors will be used in the principal rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $2,500. San Francisco. Architect, none. Owner, P. Prasse, 370 Lombard St., S. F. The dwelling will contain six rooms and bath. All interior trim will be of pine. There will be one open fire place with a brick mantel. Modern plumbing will be installed. The exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

APARTMENT HOUSE 3 story and base, brick and steel. Cost not stated. San Francisco. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. This building is to be erected at the southeast corner of Powell and Clay streets. There will be three stores on the first floor and fifteen apartments on the upper floors. Apartments will be arranged in two and three room suites with wall beds and connecting baths. Interior finish will be of pine. Tile and composition will be used in the bath rooms. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are complete and out for figures.

SUBTREASURY—2 story and base. Class A construction, $500,000. San Francisco. Architect, Milton J. Dyer, Cuyahoga Bldg., Cleveland. Owners, United States Government. Plans and specifications for this building have reached the coast and are now out for figures. The building is in the classical style with complete steel frame and exterior walls of white marble resting on a granite base. Construction will be Class A throughout. Mechanical equipment will include a number of special features. The basement will contain two large money vaults. Bids will be opened at Washington, D. C., on January 3rd, 1913. Plans can be secured from Superintendent of Construction Roberts, Postoffice Bldg., San Francisco or from the Supervising Architect at Washington, D. C.

LAUNDRY—1 story and base, frame, $5,000. San Francisco. Architect, William Knowles, Hearst Bldg., S. F. Owners, William Ede Estate The building will have a cement floor and pine interior finish. Laundry machinery will be installed by the leasees. The exterior will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

CHURCH—2 story and base. Class A construction, $175,000. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, First Congregational Church. Plans are being prepared for the new and magnificent building which is to the future home of Dr. Charles F. Aked's First Congregational Church in this city.

Built of white stone in the Italian Renaissance style and supported by massive Corinthian columns on all sides, the building will be one of the most handsome and stately churches in the country.

It will cost $175,000. Its seating capacity will exceed 1,500 and the building will be provided with an additional lecture hall, a large Sunday school room with nine class rooms, several withdrawing rooms, a library, a dining room and kitchen, in additon to the spacious auditorium and accommodation for the minister and trustees.

The building departs from the conventional church style and form and no efforts have been spared to make convenience stand hand in hand with beauty. The new First Congregational Church is to be a building of which San Francisco will be proud.

The whole building covers an area of 104 by 137 feet. The main entrance is made through a vestibule 20 by 76

feet in area and bordered by a Corinthian colonnade.

The auditorium, lighted from the Roman ceiling by a large art glass skylight, will match in splendor the stately edifice of Cubla Kahn in Xanada-Cu. The walls will be of Caen stone inset with colored glass windows of a Brune-Jones design. A sloping floor with accommodation for 1,100 people will be entered by a six-foot aisle for ceremonial purposes.

The pulpit platform is to be surrounded by a wide, semi circular space and surmounted by a choir with a seating capacity of forty.

The organ at present in use in the church on Post and Mason streets will be transferred to the new church. This organ was built since the fire and is of the most modern type of construction.

WAREHOUSE—3 story and base, reinforced concrete, $30,000. San Francisco. Engineer E. M. Loney, 447 West 14th St., New York city. Owners, American Can Co., Mills Bldg., S. F. The company have received complete plans and specifications from the east and are now taking figures for the construction of a modern warehouse building on their property at the corner of 19th street and Treat avenue. The building will cover a considerable area and is to be of the heavy warehouse type of construction. No interior finish will be used. There will be metal window sash and frames and fireproof doors. A freight elevator will be installed. The exterior of the building will be faced with cement plaster. Plans can be secured from the owners.

LAUNDRY—2 story and base, reinforced concrete, $16,000. Presidio of San Francisco. Engineers, Constructing Q. M. Dept., Fort Mason. Owners, United States Government. Plans for a laundry building covering an area of 120x73 feet have been completed and bids will be called for within a few days. Besides the $16,000 available for construction an appropriation of $8,000 has been made for machinery. The exterior of the building will be faced with cement plaster. This work will be handled through the office of the Constructing Q. M. Dept. at Fort Mason.

FLATS—2 story and base, frame, $5,000. San Francisco. Architect, C. Fantoni, 4 Coumbus Ave., S. F. Owner's name withheld. The building will be 60x110 feet and will contain a saloon on the first floor and one large residential flat above. Interior finish will be of pine and redwood. Some oak flooring will be used. There will be open fire places and brick or tile mantels. Considerable marble and terrazzo will be used. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

GARAGE—1 story and mezzanine floor, reinforced concrete, $50,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, Ruben H. Lloyd Estate. The building will cover a ground area of 18,600 square feet and will have a cubic contents of 36,600 feet. Construction will be fireproof. There will be metal window sash and frames. An electric freight elevator will be installed. The exterior will be faced with cement plaster. Plans are complete and in the hands of the contractors for figures.

GARAGE—2 story and base, reinforced concrete, $85,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Charles A. Tilden. The building has been mentioned here several times before. Plans are now complete and figures are being taken on the work. The structure will cover an area of 109x120 feet. Floor space has already been leased to three automobile firms. Construction will be of the reinforced concrete type and practically fireproof. There will be a cement floor on the first story. Metal window sash and frames will be used. Interior of the offices and sales rooms will be handsomely finished. The exterior of the building will be faced with Caen stone and cement plaster. A contract for the excavating has been let and others will follow at once.

GARAGE—2 story and base, reinforced concrete, $25,000. San Francisco. Architects, Ross & Burgren, 310 California St., S. F. Owners, Newbauer Investment Co. The building will be erected on Geary street west of Jones, and is to have a cement floor on the first story. There will be metal window sash and frames. An electric will be of pine. The exterior of the building will be faced with glazed glazed brick. Plans are complete and figures are being taken.

GARAGE—2 story and base, reinforced concrete, $90,000. San Francisco. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owner's name withheld. Preliminary plans for the largest commercial garage in this city have been made, and several leases on space have been signed. Construction will be fireproof throughout. The main floor will be arranged for storage space and the second floor for offices and a repair department. There will be a large elevator. Metal sash and frames and fireproof doors will be used. Special gasoline storage tanks are to be installed. The exterior of the building will be faced with cement plaster. The site on which the building is to be erected is 120x237 feet. Working drawings will be started shortly.

GARAGE—1 story and base, brick, $13,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, G. Lachman. The building is to be erected on Geary street and has been designed for a small commercial garage. There will be a cement floor, modern plumbing and metal window sash and frames. The exterior will be faced with pressed brick. Plans are now underway.

CLUB BUILDING—4 story and base, brick and steel, $75,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, York Realty Co., San Francisco Press Club, lessee. Plans for the new building for the San Francisco Press Cub have been completed and figures on the construction are being taken. The first floor of the building will be arranged for stores. Two upper floors have been leased to the Press Club and will be fitted up by them. Leases with other similar organizations are pending for space on the other floors. The exterior of the building will be faced with pressed brick and terra cotta.

HOTEL—6 story and base, reinforced concrete, $90,000. San Francisco. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owners, S. and G. Gump. This building will be erected on the northeast corner of Geary and Jones streets. There will be stores on the first floor and over 150 guest rooms on the upper floors. Nearly all rooms will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. All rooms will be supplied with running hot and cold water. The exterior of the building will be faced with white cement plaster. Plans are complete and figures are being taken.

HOTEL ADDITION—6 stories, reinforced concrete. Cost not stated. San Francisco. Architect, E. P. Antonovich, 333 Kearny St., S. F. Owner, F. A. Hilm. This owner recently started the construction of a one-story building at the corner of Bush and Kearny streets, and since has determined to add six additional stories which will be arranged for a modern commercial hotel. Construction will be fireproof. There will be in the neighborhood of 140 guest rooms, nearly all of which will have connecting baths. There will be steam heat and hot and cold running water and elevator service. Interior will be finished in pine and hardwood. Baths will be finished in tile. The exterior will be faced with cement plaster. Plans are nearly complete.

HOTEL—3 story and base, reinforced concrete, $12,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Chong Hoy. The building is the second modern hotel structure designed by the same architects and which is to be erected in Chinatown. A site 20x60 feet is to be improved. There will be seven guest rooms on each of the floors, including the first floor. Besides these there will be several baths. Interior finish will be of pine throughout. Running water will be supplied to all rooms. The exterior of the building will be faced with stock brick. Plans are now being prepared.

HOTEL—7 story and base. Class A construction, $85,000. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner's name withheld. The building will be erected at the corner of McAllister and Leavenworth streets and will cover a large area. Plans provide for about 200 rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile with composition floors. Main office and lobby will be handsomely finished. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

HOTEL. 10 story and base. Class A construction $900,000 or more. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owners, Charles L. Fisher et al. This is the largest hotel project recently conceived for San Francisco, and involves the property at the gore corner of Hayes and Market streets at Ninth. The lot has frontages on Market and Hayes streets of approximately 275 feet. Mr. Fisher recently purchased the property from the Low Estate and has interested eastern capital that is now engaged in extensive hotel business in New York. Preliminary plans show a building of the highest type of construc-

tion, and with a total of 1200 guest rooms and 1200 baths. The first floor will be arranged for a large hotel lobby, offices and public dining room besides several stores. The main entrance will be at the gore. Lobby, dining room and offices will be handsomely finished. There will be steam heat, elevator service and a vacuum cleaning system. There will be a complete steel frame and exterior walls of reinforced concrete faced with pressed brick and terra cotta. The owners of the property will conduct the hotel under their personal management. Working drawings will be completed as rapidly as possible and construction will be started early in 1913.

HOTEL—6 story and base, brick and steel, $85,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Board Realty Co. The building will occupy a corner site and is to cover an area of 55x87 feet. There will be three stores besides the hotel lobby and offices on the first floor. Upper floors will contain a total of 100 rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick and terra cotta. Plans are complete and the architects are taking seggregated figures on the work.

RESIDENCE—2 story and base, frame, $4,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F Owner, Thomas Scobie, 363 14th Ave, S. F. The dwelling is designed for an eight-room house with bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND AND ALAMEDA COUNTY.

BUNGALOW — 1 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The house will contain five rooms, bath and sleeping porch. Interior finish will be of pine, redwood and some hardwood. Oak floor will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with cedar shingles. Plans are complete and the owners will do the work by Day Labor.

BUNGALOW — 1½ story and base, frame, $2,500. Oakland, Cal. Architects Hunt & Davis, 1520 Broadway, Oakland. Owner, C. F. Bentley. The house has been designed for a six-room dwelling with bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place with an attractive brick mantel in the living room. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—1½ story and base, frame, $5,000. Oakland, Cal. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, P. E. Crabtree. The dwelling has been designed for a nine-room house with bath, sleeping porch and laundry. Interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat, open fire places and an automatic water heater. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, $3,600. Piedmont, Alameda Co., Cal. Architect, none. Owner, C. A. Chichester, 645 Fairmont Ave., Oakland. The dwelling will contain seven rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. The bath room will be finished in tile. Tile will also be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $5,000. Alameda, Alameda Co., Cal. Architect, C. N. Cook, 613 Market St., S. F. Owner, H. Harron. This dwelling has been mentioned here before. Plans are now complete and figures are being taken by the architect. The interior will be handsomely finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat, open fire places, brick mantels and an automatic water heater. The exterior will be covered with cement plaster on metal lath.

RESIDENCE — 2 story and base, frame, $4,500. Alameda, Alameda Co., Cal. Architect, C. N. Cook, 613 Market St., S. F. Owner, J. B. Ough. The dwelling is designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat, open fire places, brick and tile mantels and an automatic water heater. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW — 1½ story and base, frame, $2,500. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, Frank C. Howe. The bungalow is designed for a six-room house with bath and sleeping porch. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick, $37,000. Oakland, Cal. Architect, W. W. Dixon, 1844 5th Ave., Oakland. Owner, E. J. Turner. The building has been arranged for 19 apartments of two, three and four rooms each. All suites will have connecting baths and wall beds. There will be a large reception room and billiard parlor. Interior trim will be of pine and redwood with some oak floors. There will be steam heat. The exterior of the building will be faced with pressed brick. Considerable tile and marble will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

ASSOCIATION BUILDING — 4 or 5 story and base, brick and steel or reinforced concrete, $160,000. Oakland, Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Oakland Young Women's Christian Association. This building was mentioned here some weeks ago. At that time it was not decided how much would be spent for construction. Funds now available assure the organization one of the most completely equipped institutions of the kind on the coast. Construction will be undertaken early in the coming year.

PASSENGER DEPOT—1 story and base, reinforced concrete, $15,000. Berkeley, Alameda Co., Cal. Architect, Eng. Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a new station at 3rd and University streets in Berkeley have been approved and work will be started shortly. The building will be in the Mission style and will contain two waiting rooms, offices and baggage room. There will be steam heat. Interior finish will be of pine and redwood. The exterior will be faced with cement plaster. The roof will be of clay tile. Plans will be completed within a short time.

RESIDENCE—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The dwelling has been designed for a five-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, $4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, P. S. Persons, 1539 Spruce St., Berkeley. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior will be finished in pine and redwood. There will be oak floors in the principal rooms. Furnace heat and open fire places will be used. Mantels will be of tile and brick. Bath room will be finished in tile with composition floors. Tile will be used in the kitchen. The exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner will do the work by Day Labor. Labor.

SCHOOL—1 story and base, reinforced concrete, $90,000. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected on College avenue and Birch streets, and, owing to the large tract of land available at this place, the architect has made use of the group plan. Construction will be practically fireproof. Interior finish will be of pine. Hardwood floors will be used. There will be steam heat, vacuum cleaning and a program clock system. The exterior of the building will be faced with cement plaster. Plans are complete and have received the approval of the Board of Education and figures will be opened on December 5th. Plans may be secured from the office of the Supervising Architect.

FUNERAL SERVICES FOR HENRY RHODES.

The funeral of Henry Rhodes, Assistant Secretary of the Builders' Exchange of Oakland for the last six years, was held at the funeral parlors of C. H. Wever in Alameda Tuesday. A large number of the members of the Builders' Exchange were present at the services.

Mr. Rhodes during his long service in the Exchange had endeared himself to all by his cheerful and faithful performance of his duties.

Building Contracts Awarded.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE — 2 story and base, frame, $3,500. Albany, Contra Costa Co., Cal. Architect, R. H. Macbeth, 1050 Stabbage Ave., Albany. The house has been designed for a six-room dwelling with bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. There will be an automatic water heater. Tile will also be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and out for figures.

PASSENGER STATION—1 story and base, brick or concrete. Cost not stated. Petaluma, Sonoma Co., Cal. Architect, Engineering Dept. Northwestern Pacific R. R. Co., Phelan Bldg., S. F. Owners, Northwestern R. R. Co. It is announced that the company has secured a site at Washington and Hopper streets and will erect a suitable station on the property within a few months. Preliminary plans have been prepared outlining two schemes and are now before the directors. As soon as a definite amount of money is set aside for construction plans will be prepared in accordance.

Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—4 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg.,L. A. Owner, Mrs. Ida Hanst. The building will cover an area of 75x95 feet and will contain 51 two and three room apartments besides a large amusement room, ladies' parlors, office and lobby. All apartments will have connecting baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning plant. Construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. Plans have been completed and are now out for figures.

APARTMENT HOUSE—3 story and base, brick, $45,000. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Laura Winters. The building is to be 45x138 feet and will contain sixty rooms which are to be arranged in two and three room suites with private baths and wall beds. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood with some oak floors. Baths will be finished in tile and will have composition floors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—2 story and base, brick, $45,000. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Lorenzo Vignolo. The building will cover an area of 80x160 feet and will contain 72 rooms which are to be arranged in apartments of two and three rooms each. All suites will have connecting baths and wall beds. The interior of the apartments will be finished in pine and redwood with some oak floors. Bath rooms will be finished in tile and will have composition flooring. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and out for figures.

FACTORY—6 shop units each 1 story and base, steel and reinforced concrete $700,000 to $800,000. San Diego, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, MacComber Rotary Engine Co. This firm has secured a tract on the San Diego water front of 186 acres and will develop thereon one of the largest manufacturing plants on the Pacific Coast. The scheme as is now being worked out by Architect Haenke is essentially one in which the community interest of the employer and employee has been carefully considered. In the main the project is being developed along the same lines as the famous Port Sunlight scheme in England. There will be a large administration building, auditorium and club house besides ten six large factory units. Residences for the officials of the company will be built on the higher ground. All of the buildings will be connected by a system of boulevards to the industrial center. Each of the six shop units will be 1000x80 feet with a single span. This group will include a receiving building, lavatory and a recieving and shipping building. A large dining hall for the employees will be erected in the heart of the industrial center. A spur track is to be laid along one side of the entire factory group passing directly through the receiving and shipping building back to the back units. Several small docks will be built along the water front. A table track will also be built on the company's property which will be used for testing out motor, launch and aeroplane engines. All buildings will be modeled along the Mission style of architecture, taking the old Mission Dolores in San Francisco as typical. According to an agreement the construction of the first unit must be started within sixty days. Architect Haenke has plans well underway and states that but will be no delay.

STORES AND LOFTS 9 story and base, reinforced concrete Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owners, Stephen M. White Estate. The building will be erected in the east line of Broadway, between 8th and 9th streets, and will cover an area of 60x150 feet. The reinforced concrete walls will be faced with glazed terra cotta. There will be metal store fronts and a large amount of plate glass. Metal window sash and frames will be used. There will be steam heat, elevator service and a vacuum cleaning system. Store entrances will be finished in marble and tile. Plans are now being prepared and work will be started within short time.

APARTMENT HOUSE—4 story and base, brick, $25,000. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, William A. Young. The building will contain 75 rooms which will be arranged in two and three room suites. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. All suites will have private baths and wall beds. The exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

CHURCH AUDITORIUM—1 story, brick and stone. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners, Knox Presbyterian Church. The building will be in the nature of an addition to the present building and will be 88x55 feet. The auditorium will have a seating capacity of 600 people. There will be a central cooling system installed. The exterior will be faced with artificial stone. Plans are being prepared.

CHURCH—1 story and [illegible] feet. Cost not stated. Los Angeles, Cal. Architects, Walker & Vorhies, Hibernian Bldg., L. A. Owners, [illegible] and M. E. Church. This work has been mentioned [illegible] contracts were just [illegible] to prepare the plans. The building will [illegible] 92 feet and will [illegible] an addition one story high. Besides the auditorium there will be a Sunday school room, social rooms and a gymnasium. The exterior of the building will be of cement plaster on metal lath. Plans will be ready for figures in a few days.

FIRE [illegible] story and base, brick [illegible] Angeles, Cal. Architect [illegible] Bldg., L. A. Owners, City of Los Angeles. The building will cover an area of [illegible] feet and will accommodate one engine [illegible]. The second floor will be arranged for dormitories and offices. There will be a complete heating system. The exterior of the building will be faced with [illegible] pressed brick. Plans for a similar building are also being prepared. Architect Jackson and will be completed shortly.

CLUB HOUSE—2 story and [illegible] addition, cost not [illegible] San Diego, Cal. Architect Harrison Albright, Lankershim Bldg., L. A. Owners, Catalina Island Club. The club has just purchased the holding of the corner of 10th and State streets from John D. Spreckels. Only preliminary plans have been prepared and construction details have not been worked out at present. W. G. Johnson, secretary of the club, states that the building will be fireproof throughout and that construction will be started within three months. All bids may be addressed to the [illegible].

HOSPITAL ADDITION—1 story and base, brick and steel, $75,000. San Diego, Cal. Architect Quayle Bros., San Diego. Owners San Diego County. The Board of Supervisors has just completed the contracts to prepare plans for a large addition to the County Hospital. No details of the building have been worked out as yet and [illegible] some time before a decision will be reached.

SCHOOL—2 story and [illegible] Class A construction, $50,000. Los Angeles, Cal. Architect A. F. Rosenheim, 1 W. Hellman Bldg., L. A. Owners, City of Los Angeles. The following was received by the Board of Education on the completion of the Lake Heights Intermediate School. All bids were rejected, and [illegible] new bids under advertising.

[illegible] for the work [illegible] substituting Meyer system [illegible] follow the [illegible] specified in [illegible] Meyer [illegible] floor [illegible] Sweet [illegible] for the [illegible] Sweet & Lund [illegible] $2,000 [illegible] $2,000 [illegible] A. F. Alexander [illegible] $2,500, [illegible] $2,000 [illegible] $1,000 [illegible] $1,000 [illegible] $1

bid, (c) sold $14,000, (d) deduct $2,300, (e) (1) $6,000, (f) add $9,000.

The Mechanical and Electric Co were low men on the heating and ventilating at $39,913.

Contracts Awarded.

STORES AND OFFICES—2 story and base. Class A construction. Cost not stated. Los Angeles Co. Architects, Parkett, Hayes & Barnett, St. Louis, Mo., represented by George D. Barnett, Wright and Callender Bldg., L. A. Owner, John Brockman. Contractors, W. G. Schumacher Construction Co., Wright and Callender Bldg., L. A., general construction. McClintock-Marshall Co., Pittsburgh, steel work, and Wattson & Spicer, Wright and Callender Bldg., L. A., excavating.

APARTMENT HOUSE—2 story and base frame, $20,000. Hollywood, Los Angeles Co., Cal. Architects, Krucker & Becklar, Ferguson Bldg., L. A. Owner, Mrs. B. Kendall. Contractor, Henry Getz, 343 Fifth Ave., L. A. Contract price, $19,000.

BANK—1 story and base. Class A construction. $20,000. Alhambra, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright & Callender Bldg., L. A. Owners, Alhambra Savings Bank. Contractor, H. F. Roberts, 203 North Marguerita Ave., Alhambra. Contract price, $17,800.

HOTEL—3 story and base, brick and steel, $20,000. Los Angeles, Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, S. H. Pardue. Contractor, George M. Easton, 436 West 30th St., L. A. Contract price, $19,000.

STORES—1 story and base, reinforced concrete, $10,500. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Josh Borelli. Contractor, M. Hurwitz, 212 North Main St., L. A. Contract price, $10,500.

LOFTS—1 story and base, reinforced concrete, $30,000. Los Angeles, Cal. Architect's name not given. Owners, Crescent Creamery Co. Contractor, Jean Redman, Citizens' National Bank Bldg., L. A. Contract price, $30,000.

SEATTLE AND WASHINGTON.

JAIL—3 story and base, steel and reinforced concrete. Cost not stated. Vancouver, B. C. Architect, W. A. Doctor. Arts and Crafts Bldg., Vancouver. Owners, City of Vancouver. Complete plans and specifications have been accepted for this building, and bids for the construction will be opened on November 25th. Only two stories are to be erected at this time. All of the various features which go to make up a modern jail building have been incorporated in the plans. Construction will be of the class A type throughout. Besides the cell blocks, department headquarters and guard room there will be a modern hospital ward, gymnasium and photograph gallery. The exterior of the building will be faced with pressed brick and terra cotta.

ASSOCIATION BUILDING—3 story and base reinforced concrete, $350,000. Vancouver, Wash. Architect, P. S. Griffiths, Dominion Trust Bldg., Vancouver. Owners, Vancouver Young Men's Christian Association. The new structure will occupy a prominent site at the corner of Georgia and Burrard streets and covers a large area. The main floor will contain the general offices, reading room, etc. The basement has been arranged for a plunge and the bathing departments. Special apparatus rooms and the gymnasium will occupy the second, third and fourth floors. The remaining stories will be arranged for sleeping rooms. Construction will be fireproof throughout. There will be steam heat. The exterior will be faced with pressed brick and terra cotta. Plans are complete and out for figures.

THEATRE—3 story and base. Class A construction. $500,000. Vancouver, B. C. Architect, E. W. Houghton, Collins Bldg., Seattle. Owners, Seibury and Boyd. A site at the corner of Pender and Bernard streets has been secured and plans for a class A theatre building are rapidly being completed. The first four floors will be arranged for modern offices. Construction will be fireproof throughout with a complete steel frame and exterior walls faced with pressed brick and terra cotta. There will be steam heat, elevator service and all other modern improvements. Metal trim will be used throughout. The theatre will have a seating capacity of 1800 people. Plans are being prepared.

STORES—3 story and base, steel and brick $150,000. Seattle, Wash. Architect, Joan Graham Lyon Bldg., Seattle. Owner, Semple Crawford, of Crawford & Canovet, Seattle. The building will be erected on 3rd avenue, between Pike and Pine streets. The first floor will contain retail stores and the upper seven floors will be arranged for lofts. The construction will be mostly of steel, with metal window sash and frames and fireproof doors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

Owners, Pacific Tel. and Tel. Co. Contractors, Sound Construction Co., Lowman Bldg., Tacoma. Contract price, $30,000.

RIVER VOLUMES MEASURED.

United States Geological Survey Issues Report Containing Valuable Data on Principal Streams of California.

The material progress of California has in large part been measured by its water supply development. In the days of '49 its first great boom was the result of finding gold in a creek bottom, and throughout the early gold days the rapid growth of California was made possible by the development of water supplies for use in placer mining. In later years came the great irrigation activities, and especially in Southern California have the agricultural products become so valuable that in that part of the State water is probably worth more than it is anywhere else in the country.

Throughout the Sacramento and San Joaquin Valleys water has the same relatively large values for irrigation. Still later came the recognition of the enormous importance of California water powers. In a very few years the development of water power has grown until California ranks second only to New York, the total installed horsepower in the State in the year 1911 being over 500,000.

Importance of the Study of Stream Flow.

It is apparent that in a State so thoroughly dependent upon its water supplies investigations which will reveal the amount of water available in the streams and beneath the ground are of the highest importance. The people of California have recognized this and for many years have through their legislature co-operated with the United States Geological Survey in the determination of stream flow and the location of underground supplies.

Records Are Available to the Public.

The Geological Survey has just issued Water-Supply Paper 291, on the surface water supply of the Pacific Coast in California, 1910, by W. B. Clapp, F. F. Henshaw, and H. D. McGlashan. This report contains the results of measurements of some of the California rivers, made during the year 1910, at regular stations maintained by the Survey in co-operation with the office of the State Engineer. All the important rivers of the State were covered in this investigation, and in addition many of the smaller tributaries and irrigation canals. There are in all 98 stations for which data are reported in this publication, and work has been carried on in a way that affords for almost every stream reported a daily record of the discharge. A copy of the report can be procured free of cost on application to the Director of the United States Geological Survey, Washington, D. C.

ALASKA INCREASES COPPER OUTPUT.

The copper production from Alaska in 1911 was 22,314,889 pounds, as compared with 4,311,026 pounds in 1910. The large increase in the output in 1911, according to the United States Geological Survey, is due to the entrance of the Copper River district into the producing list. The mine production of copper for 1911 was 27,267,878 pounds, but a considerable portion of this had not been smelted at the close of the year.

Important production of copper from Alaska began about 1903, since which time it has been a steady contributor of that metal. To the close of 1911 the total production of blister copper has been 59,126,334 pounds.

BIG LAND DEAL.

Sutter Basin Sold For Reclamation and Subdivision.

SACRAMENTO, Nov. 11.—Initial pay-

ments have been made on 60,000 acres of the lower end of the Sutter Basin by Chicago capitalists. $608,000 were paid yesterday to E. Wineman, of San Bernardino, for his share in the lands included in the purchase. W. E. Gerber of Sacramento represented the purchasers and the evident intention is reclamation and subdivision.

The project as now outlined is practically the same as was framed by R. G. Hanford some years ago, and abandoned after considerable expense in investigation, because of unfavorable financial conditions. It takes in all the unreclaimed lands between the Feather and the Sacramento Rivers, from the junction of these rivers north to District No. 1. Aside from the Wineman piece, the largest single holdings in the district are owned by the Alta Valle Farm Lands Company (the unreclaimed portion of the old Rideout ranch) and by Charles Silva.

Investment of Five Million.

If the owners decide to reclaim and it is hardly conceivable that they would have made the investment unless immediate reclamation was part of the plan—the investment in land, reclamation works and development will aggregate over $5,000,000.

What the reclamation, subdivision and population of 60,000 acres of this rich land means to the progress of the valley can easily be conceived.

Fits Into Flood Control Plan.

There is, however, an even more important phase of the enterprise. In making reclamation of their lands, the Chciago capitalists will necessarily complete a large portion—almost all—of the work called for by the flood control plan in the Sutter Basin, and at an expenditure of over $1,500,000.

This will bring that much nearer to completion the great plan which will insure absolute safety and protection to the entire valley, a fixed flood plane beyond which no flood can rise or prove a menace to levees and the speedy reclamation and use for intensive cultivation of every acre of land now idle because of overflow conditions. There will no longer be occasion to raise levees and millions of dollars will alone be saved in that single item to the owners of the valley.

WILLIAM V. MURRAY COMPANY ESTABLISHES OFFICES.

The William V. Murray Contracting Company, who have the contract for the Alameda Federal Building, will establish permanent offices in the City of Oakland within a few days. Mr. Murray is well pleased with conditions in San Francisco and Oakland and has announced his intention of continuing his business in this section. San Francisco offices of the firm will be opened within a short time.

The Murray Contracting Company are making a specialty of heavy construction and will undoubtedly meet with success in this territory This firm has been engaged in construction work throughout the northwest for a number of years during which time they have erected many of the largest buildings.

SCRIPTURAL QUOTATIONS.

A Sunday school teacher in Salinas asked each pupil to recite a verse of Scripture as he dropped his mite in the contribution box. One little fellow put in a nickel and volunteered the text: "A fool and his money are soon parted."

MEDITATIONS OF THE ALFALFA SAGE.

A red nose and a look of saintly signation do not harmonize.

An epigram is an artistic way of lying something that is not so.

When a man sings his own praises he generally pitches the tune too high.

The ungovernable temper temporarily quits business when it encounters a muscular man who has no respect for it.

A woman is always worrying about somebody's staying out late at night; if it isn't her husband the cat will do.

LARGE TONNAGE OF GRAPES SOLD.

LODI (San Joaquin Co.), November 14.—The largest amount of wine grapes ever handled by the outside buyers was shipped during this season when independent buyers secured 10,000 tons of grapes, or approximately the crop from 2,000 acres.

One reason given for the large sale to outiside buyers is that one of the large independent wineries here advised all growers to sell their grapes to the outsiders, as it would relieve the cooperage, which was partially full of wine from the former season. The shipments were spread over the country from Montana to Portland, Ore., and along the Coast as far south as Port Harford, Cal.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

GOLD DEPOSITS DESCRIBED.

Trinity County, California Described by Government Geologist.

The "Gold Lodes of the Carrville District, Trinity County, California," is the subject of a brief report by D. F. Macdonald, of the United States Geological Survey, just issued as Bulletin 539-D.

In 1909 Mr. Macdonald visited the Carrville district and gathered some data on its mining geology, and a report on the gold gravels of the region was published by the Survey in Bulletin 539. But the author's baggage and notes were mixed before anything on the geology of the gold lodes was written. Another visit to the region was therefore made and the results are now given out. The growing economic importance of this mining district, Mr. MacDonald states, merits notice and he expresses the hope that his report will attract attention to the end that mining in general may be benefited. The total gold output of the district from 1890 to 1910 is stated to be $7,747,906.

The future prospects of the district are believed to be very good and it is thought that before long several small to moderate-sized gold properties will be put on a paying basis. Of course a branch railroad connecting with the Southern Pacific Railroad would greatly benefit the district. Such a railroad would bring income not only from the quartz and placer mining interests but from the rich agricultural lands in the valley bottoms and from the lumber business. It is true that much of the timber is within the Trinity National Forest, but the ripe product is sold off at intervals and this together with the timber from private holdings makes the lumbering industry important.

FREE TEXT-BOOKS TO COST STATE $500,000.

SACRAMENTO, November 13.—Five hundred thousand dollars is the approximate value of State text-books now in use by children of the elementary schools of California. State Superintendent of Public Instruction Hyatt has stated.

Data showing these figures have been gathered for the purpose of showing how much money it will require to supply the public schools with free text-books for the pupils under the amendment of the Constitution just adopted.

It is thought that the law will prove that these books now in the possession of the children and being used by them will continue to be used temporarily.

RIVETING MACHINE FACTORY FOR CHICO.

CHICO (Butte Co.), November 11.—W. J. Miller, President of the First National Bank of Nottingham, City Treasurer, and William Perley, President of the Chico Construction Company, [illegible] prominent men here, are planning the establishment at Chico of a factory for the manufacture of [illegible] riveting machines. The factory will employ a large number of men, and will materially to Chico's pay roll besides bringing Northern attention to this city.

J. A. [illegible] employed in a local harness shop, is inventor of the machine.

STEEL MANUFACTURES.

Iron and steel manufactures are now [illegible] at the rate of a million dollars a day. The value of iron and steel manufactures exported [illegible]

seven months ending with July is stated by the bureau of statistics of this city at $16,000,000. To this may be added $5,000,000 worth of agricultural implements, $18,500,000 worth of automobiles, $4,500,000 worth of electrical machinery, and $750,000 worth of bicycles, motorcycles, etc., exported during the same period, all of which are composed chiefly of iron and steel and therefore entitled to be included in the general classification of iron and steel manufactures exported.

REPORT ON ALASKAN RAILROAD.

WASHINGTON, November 11.—The geological survey has issued a report on railway routes in Alaska which summarizes all the data available on the location of a railway to connect Fairbanks, on the Tanana, with one of the several possible coastal terminals on the Pacific seaboard. The distance to tidewater by the several routes varies from 250 to 600 miles.

Engineers have estimated the average cost per mile of constructing this line at $40,000. Any one of the several proposed railways would render accessible the great resources of Central Alaska, a quadrangular area of 200,000 square miles, extending from the Pacific seaboard to the Arctic circle. Central Alaska has produced from its placers gold worth $75,000,000, its output in 1911 being over $9,000,000. It includes several antimonious lode districts and two important copper belts. Central Alaska also includes high-grade coal in the Behring river and Matanuska fields.

SEATTLE TO VOTE ON SCHOOL BONDS.

SEATTLE, November 11.—The Board of Seattle School Directors have decided to place before the people in December the proposition of voting the sum of $875,000 in bonds to be used in the construction of school buildings.

The sum will include four two-story brick-proof grammar school buildings to be erected in South Park, Queen Anne, W. 55th street and Green Lake, at a cost of about $30,000 each or a total of $75,000; additional dormitory building for girls on Mercer Island, costing $30,000; a power plant costing $20,000 and minor alterations and addition totaling $10,000, a new parental school project for boys near Georgetown costing $100,000 additions to several existing school buildings including the West Woodland school and others at a cost of about $75,000, and the balance of from $100,000 to $200,000 in the purchase of property, equipment and making minor changes.

BIG DEPOSITS IN POSTAL BANKS.

WASHINGTON, November 9.—Postmaster General Hitchcock announced today that approximately $28,000,000 had been deposited to date in postal savings depositories by 290,000 individuals, averaging $86 per depositor. The system is now operated in 12,573 postoffices, and 7,357 banks have qualified to receive postal savings funds.

BIG PRICE FOR SUGAR LAND.

YUBA CITY (Sutter Co.), November 12.—An agent of the Alameda Sugar Company was the successful bidder in the Superior Court Saturday, Judge K. S. Mahon acting as auctioneer, on 132 acres of land included in the estate of the late Richard Conclasure, not, however, until he had made the unprecedented price of $210 an acre. At administrator's sale this piece of land went for $22,981, and on Saturday Judge Mahon was called upon to confirm the figures. When he called for the customary advances on the bid there was rapid-fire bidding in the court room, and the piece was finally "knocked down" to W. O. Wood, of Meridian.

TONOPAH BULLION.

TONOPAH (Nev.), November 12.—Silver bullion to the value of more than $150,000 was sent out of Tonopah last week by the Belmont, West End and Montana Mining Companies. There were 133 bars in all, 62 from the Belmont, 22 from the West End and 49 from the Montana. The approximate weight of the bullion shipped out was 12,327 pounds.

FIVE RIGHTS OF WAY IN EL DORADO.

PLACERVILLE (El Dorado Co.), November 11.—The Board of Supervisors Saturday passed a resolution whereby it agrees to grant all rights of way and build all bridges along the State highway through this county free of cost to the State.

This action of the Board was preceded somewhat by that of the Rescue Good Roads Club of this county. Six months ago this club secured the rights of way through its district, to be deeded to the State if it extended its road through the Rescue or Green Valley District.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. *Address,*

Box 239 Willson Bldg. WASHINGTON, D. C.

STEADY PROGRESS IN BUILDING.

Construction work in Victoria continues at a rapid rate. Building permits during the first eight months of 1912 totaled $6,064,900, compared with $5,199,910 for the same period of 1911 and $1,712,939 in 1910.

The 100-room addition to the Canadian Pacific's Empress Hotel has just been completed, and it is announced that next spring another addition with 200 rooms is in contemplation, making 520 rooms, the largest hotel in Canada. Work has commenced on a $75,000 apartment house for Morrison & Cairns, on the new $250,000 Victoria Opera House, which is to be one of the finest on the Pacific coast, and on the magnificent $600,000 Horison business block, to be 12 stories high. Work is proceeding on the new $25,000 St. Barnabas Church.

RAILROAD NEARING COMPLETION.

SUSANVILLE (Lassen Co.), November 15.—The grade of the Fernley extension from Fernley, Nevada, to Mountain Meadows, Lassen County, California, beyond Susanville is near completion and from now on the laying of steel and ballasting will be prosecuted.

The track will probably not be done by the first of the year, but the trains will be running long before Spring.

The Walker interests are getting machinery for their new sawmill into Susanville from Doyle as rapidly as possible and will use storage barns at Susanville this Winter for what machinery cannot be taken to the new mills this Winter.

The Walkers are establishing a new town at Robbers Creek, beyond Susanville.

Editorial Comment.

The enlarged powers of the Railroad Commission have enabled that body to do much effective work. Aside from reducing exorbitant railroad rates it has prevented the issue and sale of bonds without sufficient reason and prevented the watering of stocks by public service corporations. The Commission has just ordered the Southern Pacific Company to construct a station at one of its terminals in Berkeley where many people alight from and take the train. It has ordered the authorities at Tiburon to bring its drinking water up to a wholesome standard of purity. And in many other things the new Commission has proved itself an invaluable guardian and conservator of the public welfare.

In the late investigation of the express rates in California it has shown some startling facts. It is entitled to the gratitude of the people in the exposure of the discriminating methods used by the Wells-Fargo Company in squeezing out enormous profits from the people of the state. That corporation, which the Commission has ordered to accept its names from those to be furnished at the New York office. The Commission learned and for over six months its experts have been working over the books of the California office. Here is one of the facts shown by the report.

"Express rates on merchandise within California are two, three and four times higher than rates for the same commodities carried the same distance in States where Railroad Commissions have fixed the charges.

Small express shippers pay an excessive disproportionate share of the total amount paid to the company for transporting packages over its lines in spite of the fact that 95 per cent of the company's business is the handling of small packages.

Instead of shipping on a direct joint arrangement with a competing express company the Wells-Fargo Company sells the individual packages at enormous rates of great length, for which on account of transportation the shipper must pay.

The express company fixes its rates in accordance with contracts with the railroad companies which provide that the express rates over the contracting lines shall not be less than the existing freight rates."

This report shows why the express companies are so much concerned in defeating the Parcels Post measure. Why the newspapers in the employ of the interests are so anxious to befog the issue and prevent the real facts from being made public. The Railroad Commission under its increased powers as shown what could not be done for the people when hampered by real determination to do so. How the objections and the interminable delays and legal quibbings fall away when there is any real and determined action. And the railroads are not going bankrupt either. In fact they are increasing their traffic in a fair and business like way.

It is said that one hundred eloquent Ulemas or preachers of the Mohammedan faith have been sent to exhort the Sultan's troops to valorous death. Even that has failed in modern times. For while the Asiatic moslems are as ignorant and fanatical as they were five centuries ago some part of modern ideas has crept into the people of European Turkey. Fanatical belief that death on the battlefield meant instant transportation to a voluptuous paradise has made the Turkish soldier world famous. But even this belief will not prevent the ravages of cholera and typhoid fever due to unsanitary conditions nor prevent the ravages of famine in an army that is not supplied with food.

Besides business men, to feed and administer it, the main thing an army requires is sanitary engineers, to keep it well. Witness the Japanese, who could go through the bloodiest battles and lose fewer men than most armies lose lying peacefully in camp. And note, for contrast, the reports of typhus and cholera breaking out in the Turkish army. Bullets are a negligible factor, in war, as compared with the microbe and the chuck wagon. Flies and mosquitoes have slain more soldiers than ever succumbed to gun or sword.

It is the new element of intelligence that is winning battles today. While the old Turkish soldier was invincible the modern allies arrayed against Turkey are far different from their ancestors who were conquered by the Turks. The Greeks and Servians and Bulgarians and people from all the countries of Southern Europe who have emigrated to America and other countries are devoting their lives and fortunes to the cause. Intelligent loyalty has taken the place of blind servitude.

And as in the case of the Japanese and the Russians the Balkan allies have shown themselves to be prepared for war and to have developed a modern army under competent leadership.

Thomas W. Lawson has "cut loose," according to advertisement, in Everybody's magazine and in the recent issue of that magazine discusses the high cost of living in relation to the stock exchange. According to Lawson sixty billion dollars of the wealth of the country is represented in stocks and bonds, which are the evidences of ownership, and that over fifty-five billions of this has come into ex-

istence within forty years. And on the total of sixty billions the public pay, in the form of prices and charges, interest and dividends to the amount of 3,000 millions yearly, at the average rate of 5 per cent.

Of this sixty billions he declares forty billions to be counterfeit or fictitious capital. In other words, water on which water 10,000 holders of stocks and bonds are receiving 2,000 millions a year from the public in unearned dividends and interest. That the public are robbed of 2,000 millions a year in the form of excessive prices levied on necessities, transportation, etc.

Lawson shows how this fictitious capital is fed out to the investing public through the New York Stock Exchange. On these over capitalized trusts the excess stocks and bonds must pay an unearned dividend. The result is that their products must bring an increased price and the general public must pay.

Lawson claims the legitimate business done by the stock exchange to be infinitesimal when compared with its gambling business. No one is perhaps better qualified to speak than Lawson himself. Certainly no one can speak more sensationally. He knows the game from beginning to end and in Frenzied Finance he brought to the public attention many evils that were suspected but not before concretely and poetically known.

Whatever he has to offer in Dr. Ready will be awaited with interest. In spite of his flamboyant style he tells the facts strikingly and presents a readable tale.

A time-honored but bad practice devises action by each new Congress at more than twelve months after the election of its members.

Thus the sixty-third Congress whose term is month, will not meet in regular session until December of next year. The terms of its members begin on March 4th next but unless a special session were held they would not proceed to legislation until the last months of the year.

This custom could be changed so that the new Congress could get to work without so much unreasonable delay, and thus the Government be made more quickly responsive to public opinion. Under present conditions there may be a sweeping overthrow of the dominant party at a Congressional election, but it can have no effect on legislation for a full year following unless a special session be called, as now announced. Secretary to Taft.

Peace hath her victories no less renowned than war. This is an age in which perhaps no better illustration anywhere than in the construction of the Panama canal. For in this greatest of engineering works in the world's history the conquest of the Isthmus of Panama as only that is difficult and brilliant is but ever accomplished by the arms of war.

In last week's issue of the Scientific American an article appeared on the work at the canal zone and its various phases as discussed. And it is this is the most monumental example of the organization of an effective working force to steal of the methods used by the men in control are of great importance not only to the captains of industry, but to the student of sociology and politics as well.

The early history of civilian control of the canal was marked by doubt and disappointment and many difficulties. Chief among these was the hampering system of control exercised at Washington, the government red tape that divided authority and caused the hindering delays that kills effective action. Wallace and Stevens, the civilian engineers who first attempted the task, were thus handicapped in such manner that they could not go on with their work but they worked out a system of control of the work which enabled their successor to perfect and crystallize the machinery of action so that now the working force is the most splendidly organized industrial army in the world.

The resignation and return of these two chief engineers in rapid succession presented an emergency which took the clear head and quick action of Colonel Roosevelt to grapple with successfully. He decided to put the whole work under one control, to centralize responsibility and place the whole work under an iron discipline from which there could be no appeal. With the appointment of Colonel Goethals to the post of responsibility the man for the place was found. The work will be completed a year ahead of time. And this not only in the face of engineering difficulties but in the face of sanitation problems never before met in so large a scale and it all to cope with practically an army of invasion.

To these mechanical devices that have lent such aid in toiling in the cut are the steam shovel, the plow unloader and the high speed cableway. The steam shovel is seen pushed to its capacity in the handling of the work of excavation. And with this work the problem of conveying the load has presented greater difficulties than the excavation itself. By the use of the plow unloader a train load of dirt is unloaded in comparatively no time at all so that the matter of excavation and conveying away of the dirt is reduced to such a system of moves, with the regularity of a machine.

The building of dams and locks necessitated the use of an unprecedented amount of concrete. It is the work to be completed on time it must be laid at a faster rate than ever before. This was done by speeding up the delivery so that for days together more than three thousand yards of concrete was laid, the total on one occasion reaching more than four thousand yards.

Aside from being the greatest engineering feat in the world the canal stands out as a monument to clean and competent administration of government, the superlative achievement of effective organization. It is furthermore a living example of what can be accomplished on sanitation in a disease infected zone and is a monumental tribute to the men who have directed its work.

The opera house to be built in the Civic Center will no doubt be a monumental building and the private subscription fund has been started and this will make it possible to be erected without much expense. But the proposition as it now stands reserves 400 seats for the general public. In other words the first call on all the seats of the opera house will be a part of the property of the people who have subscribed for the seats and boxes and the general public will be limited to 400 places in the house. This may be all right but it has the appearance of being a private play house of the wealthy erected on public property that belongs to the general public. The city gives the site and supplies the heating and exterior lighting. But in case of a popular opera or something of importance being held in the opera house the patronage is practically limited to the wealthy few who have contributed to its building.

This may be the best way to build the opera house. Under present conditions it is perhaps the only feasible one. But it loses its character of being a public opera house when the first call for practically all of the seats are limited to the wealthy few and it tends to make an exclusive society show of important productions. Four hundred seats are too few to reserve and the general public should at least have more room in the municipal building. It is presumed that if the owners of the seats do not use them themselves they can give their friends the privilege, so that all the public would be entitled to in open competition would be four hundred places.

Mayor Rolph and Supervisor Vogelsang have gone to Washington to appeal for the city in the matter of procuring the Hetch-Hetchy water supply for San Francisco. About ten years of time have been filtered away and two millions of the city's money has been spent in trying to get this much needed supply. Not much has yet been accomplished. The water supply at present is insufficient and no prospect of its being able to supply future needs.

It is to be hoped that the Mayor's mission will forever settle the proposition as far as the federal grant is concerned and that the next improvement for which the city will be asked to bond itself will be for an adequate and pure water supply to be secured from the Hetch Hetchy valley.

For once the New York City is commendable and that is the speedy prosecution and conviction of the murderers who shot the gambler Rosenthal. Becker, the lieutenant of police and chief grafter, has been sentenced to the electric chair. The four murderers who assassinated their victim have been convicted and will no doubt receive a similar sentence. Thus by the expulsion of Lackbone by a district attorney and the fearless ruling of a criminal justice New York will at least lose five of its fierce wolves as infest its social jungles.

The crime was bold and its boldness recalled the state of affairs in the political organization and the police department of the city. The two men in the criminal court have successfully battled with the system and have won out. It is not at all probable that it will stop graft or crime in New York. But it will drive it to cover and a good start has been made. The wolves will not venture from the jungle with such boldness.

DIFFICULT FOUNDATIONS

A Discussion of the Natural and Artificial Problems With Which The Builder Has To Contend.

By D. S. McIlroy, F. R. I. C. A., Calgary Alta.

The subject of difficult foundations is one which is so far-reaching and wide that it is impossible to do more than touch on the fringe of it in a short article; it is also one which would meet with a great variety of treatment in the hands of many experts. So much so, that it is impossible, almost, to say anything that is original upon the subject.

It may be asked, what constitutes a difficult foundation? In my opinion, there may be classed three distinct kinds of difficult foundations, with combinations of all: First, natural difficulties; and second and third, artificial difficulties; the latter being divided purposely.

The natural difficulties arise out of the nature of the strata underlying the site of the proposed building, such as quicksand, unconfined sand, sand with water, alluvial deposits of considerable depth, spongy wet clay needing draining, recently made ground, strata of euequal bearing power such as part rock or other incompressible material and part clay.

In the second class, the nature and use of the building often requires special methods, even when the nature of the site, under ordinary conditions, would be deemed excellent for building upon. The third class would include extraneous causes, such as the proximity of other buildings, their use and the nature of their foundations. The excavation for a deeper basement for the proposed building than that of the structure adjoining may cause a hydro-static or inclined pressure to be thrown upon a wall never designed to receive such.

In all building operations the first consideration is naturally directed to the securing of a good bottom for starting on. This in the majority of cases, is a matter of uncertainty until the trenches have been excavated down to the intended depth, when the architect naturally stipulates that he shall examine the bottom before any concrete is placed. Should a hard, gravelly bottom be secured nothing better could be desired, and if it is very hard and compact, or, say a hard rock is found, there is really nothing to be gained in moderately heavy buildings, by using concrete at all, but the bottom should be levelled over carefully before putting in the footing of the wall. If, however, the bottom be of gravel somewhat loose in its nature or even a stiff clay, it is undoubtedly better to put in a concrete footing. The question of width of footing is one of solution once the weights of the various sections of the structure —combined with proper proportions of the live or superimposed loads—have been calculated out, but as to depth, we know of no absolute rule nor, in fact can any be applied so good and reliable as the judgment gained by experience and practice, upon such a point there are so many factors to be taken into account.

Where a reliable bottom is not found at the expected, or contract level, it should always be sought for at a lower depth until something suitable is reached. Any attempt to economize in such a vital point is invariably disastrous in the end.

In our modern methods, scientific knowledge has certainly been a great aid to us in enabling us to erect buildings of the weightiest and loftiest description upon almost any kind of soil —a feat which the old builder could not accomplish without a vast expenditure of materials and labor. The destruction of many of our ancient church towers is a melancholy instance. Had our cathedral builders known the value of Portland cement concrete, concrete piles, caissons and the aid of pneumatic appliances, many of these structures would be standing which are now no more. Or, even in more modern times, had Wren used methods now available to prevent the settlements of foundations due to drainage or sliding strata, we should never have heard of any fracture in the masonry of St. Paul's Cathedral as was reported in 1900 or 1901.

The aids that the architect now has to extend the bearing power of his heavy piers have made it possible to calculate for any load. Layers of dry stone or other material, however hard and compact, or lime concrete, methods which the old builders resorted to, cannot be compared with the grillage of steel beams strengthened and solidified by cement concrete, as there can not be any breaking away or bursting under heavy loads, the reinforced concrete forming a solid mass stronger and more coherent than any stone.

The old builders knew how to distribute the weight of their structures by wide footings, but their methods of dealing with impalities of soil resistance, wet or damp soils, lateral escape of water-bearing soils, running sand or peat, sliding of the sub-stratum on sloping beds, withdrawal of water by well sinking and drainage, were impotent. We have now the means of combatting all these causes of settlement, such as by sheet piling, retaining walls, concrete and sand piles, grillage foundations and many other means of securing a solid foundation, and we can calculate with nicety the resistance of different soils.

Loads on Foundations.

It was found early in the history of floating foundations that live load must not be totally added when designing the foundation. The reason for this is that the foundation to get the dead load immediately, but the live load does not come on until the building is finished and the greater part of the settlement is taken place.

Several failures had since taken place on account of neglect of this principle of construction, and it is of the utmost importance that footings should be accurately proportioned, more particularly those not on solid rock or where a settlement is to be expected. The reason for some of the failures was that the footings were proportioned for the theoretical live loads, which never occurred. During construction, when the dead loads caused a settlement, those footings which were calculated to receive the smallest amount of live loads therefore were strained nearly to the permissable pressure, while those calculated to take the larger amount of the live loads received a very much smaller pressure per square foot, thus causing settlement by unequal loading.

For many years it was the practice to reduce the live loads on foundations to less than the amounts allowed on the footings of columns, a provision which also exits in some by-laws. However, as the average live load in a fireproof building may be only 20 pounds (or less) per square foot and the dead load on the interior columns approximates 100 pounds per square foot and on the exterior columns considerable more, and as the foundations have generally reached their maximum settlement before the building is occupied, it seems logically correct to proportion the footings by considering the dead load only, but reduce the pressure per square foot so that the permissible pressure for combined dead and live load will not be exceeded.

For example, in a hypothetical case, the base of that foundation which gets the greatest live load in proportion to the dead load has: 100,000 lbs. live load 400,000 lbs. dead load, 500,000 lbs. total load. The permissible pressure on the base of the foundation is two tons, or 4,000 lbs. per square foot, which, if the live load be omitted, would give a pressure of 3,200 lbs. per square foot for the dead load alone. Therefore the footings for the whole of this building should be proportioned so that the pressure from the dead load alone will not exceed 3,200 lbs. per square foot.

From the London Building Act, I exerpt the following:

"For the purpose of calculating the total load to be carried on foundations of buildings of more than two stories in height, the superimposed load for such story, and each succeeding story below it, shall be in full accordance with the live loads laid down in previous subsection, but for the lower stories a reduction of the superimposed loads shall be allowed as under.

"For the story next below the topmost story a reduction of five per cent of the full superimposed load for such next story. For the next succeeding story a reduction of ten per cent of the full superimposed load for each succeeding story a further reduction of five per cent of the full superimposed load for each such story. Provided, that the total reduction in a per of any such story shall not

exceed fifty per cent of the total superimposed load for such floor."

Mr. E. C. Shankland says: "I can add nothing to existing data as to settlement of tall buildings. Well spread foundations does not entail sleep at the debatable time. The principal element to be caused is the wind tending to reduce the pressure on the soil on the windward side and increasing it on the leeward side of the building. Some of the tallest buildings, as Columbia erected twenty or fifty years ago, are still settling very slightly. It is safe, but the movement is change to be detected. Another fact noted is that tall buildings in Chicago lean both east and west. This seems to be due to the circumstance that in the spring and summer, each day, buildings are being heated by prevailing winds on their west side as the greatest settlement occurs during the heated term. Constant pressure exerted by unbalanced structure is sufficient to cause creep to lean. [sic]

The following will show how great is the total settlement in large and heavy buildings:

In the Monadnock building, Chicago, two of the main columns have been carried on concrete piers and have [illegible] and between them are two small columns which carry only the stairs. At these said small columns [illegible] in the building the settlement is [illegible] the main columns, which are loaded to about [illegible] tons each. The settlement of the small columns has been [illegible] inches, to remain for a week. Although [illegible] amounted to [illegible] the specific load on [illegible] on any other footings for the same area, [illegible] the amount desired and [illegible] was [illegible]

Serious difficulty [illegible] in Calgary [illegible] owing to [illegible] water-bearing gravel [illegible] was [illegible] and to deal with [illegible] The [illegible] were [illegible] [illegible] [illegible]

strength, the case is different with which the errors liable to arise from over-ramming or insufficient bending, may occur in the values which are too high just as well as in those which are too low. He therefore proposed to take the mean of all six values of a series, without omitting any. A modification on these lines would improve the method.

The desired object in the previous recommendation is not to supersede the usual methods, but, by successive improvements, to establish a standard method for testing plastic mortars.

Standard Sand.

The importance of a standard sand to secure uniformity is recognized and as the only standard sand which is prepared in a uniform manner, subjected to regular control, and easy to obtain, is the German standard sand, this has been proposed as the typical standard sand. The researches carried out up to the present have shown that the ratio between the strengths obtained with two different sands is not altogether constant, but varies slightly with different cements. Hence comparative tests should be performed on a more extended series of Portland cements in order to obtain a good average ratio of strengths.

For each sand there has to be determined the proportion of mixing water to use and the work of compressing the mortar, by determining the apparent specific gravity of the fresh mortar occupying one compartment of the mould. These determinations could be carried out in such a way as to obtain approximately the same strength from one cement with two different sands, or, which is better in such a manner as to enable all Portland cements of different fineness and quality to be treated with ease. This latter condition seems more important than the attempt to obtain an equal strength with differen sands. In conjunction with the tests on prisms prepared with German standard sand and those prepared with the local standard sand, the testing of a series of Portland cements in each country by the method hitherto usually employed as a check for cements would furnish all the elements necessary for solving the question of the uniform method of testing and that of standard sand.

It is therefore recommended that one testing laboratory in each country be invited to co-operate in studying the standard sand question by investigating its own sand concurrently with the German standard sand, in accordance with the indications given above.

For testing hydraulic limes and certain Roman cements it would be useful to have a method enabling any hydraulic binding medium to be prepared in the form of plastic mortar, by varying the proportion of mixing water in a uniform manner according to the nature of the medium.

It would seem to follow from the numerous tests made by the Hungarian committee, that the compression strength does not depend on the method of manipulation and ramming of the mortar, provided the desired degree of compactness be attained. These researches would assist in ascertaining whether the solution of the problem would not be simplified by applying Mr. Feret's proposed ratio, according to which the compression strength is proportional to the formula $\frac{c}{1+\alpha\frac{e}{c}}$ where c and e represent absolute volumes of cement and of water in unit of volume.

In this connection Mr. Feret states that an endeavor should be made to discover a formula which would enable the grading most favorable to strength without the aid of the usual names, often arbitrary, and definite.

He considers that experiments should be placed on their guard against one of the principal conclusions of the Hungarian Committee, according to which the compression strength is independent of the method of manipulating and ramming the mortar provided the desired degree of compactness be attained. On the contrary it would seem to follow from its experiences, that for prisms worked from equal weights of cement, sand and water at the time of the later, do not always exist the same strength. The strength tends to increase in proportion as the intimate mixing of the materials with predetermined quantities of mortar necessitated more energetic working in consequence of differences either in the proportion of water used for mixing, or in the texture of the coarseness of the sand.

The results to be obtained seem to be the only definite point is that of fixing the proportion of water for each standard sand, and also the question of the apparent specific gravity of the best pieces of fresh mortar while the aggregate of the mould obtained in laboratories has led to be proposed that the tests be confined to 3 instead of 6 test pieces.

Mr. And Mrs. Richard Herring Celebrate Their Golden Wedding.

Richard Herring and Family

Richard Herring, mill owner and director of the Builders' Exchange, celebrated the fiftieth anniversary of his wedding last Wednesday evening at his home, 666 6th Avenue, surrounded by his children and his children's children.

Mr and Mrs. Herring marked no years, but did not intend any special feature should distinguish the half century of their wedded life. Not so the other Herrings, for the small fry gathered in schools and swarms, determined that Pa and Ma should have an anniversary that they would or should remember for the next fifty years.

So when Richard the first went home at his usual hour he was greeted by Richard the second, and Richard the third (and the same Richard the third is one-third taller than Richard the first).

His daughters, Elizabeth, Mrs. Gertrude and their husbands, Dr. E. S. Howard, Charles Thorne and Charles Parent, and their children, Charlie, his wife and children and Fred, the only bachelor of the family, who is too busy in the winter coaching crack ball at the summer passing the sky and to think of getting married.

The Herring living room is large but it was not large enough to accommodate the descendants of the happy couple last Wednesday evening.

The Golden couple of the occasion was not overlooked by presents of the precious metal in various forms were presented by the Herrings that were [illegible] Herrings that are.

On Tuesday week [illegible] Herring [illegible] the [illegible] for Derby is one of the oldest [illegible] members of the Builders Exchange. He [illegible] the same site as that of the [illegible] the birth of the [illegible] he [illegible] is resigned [illegible] after the Board convened and remained on the floor for two years. But he

year the Exchange felt the benefits of his wisdom on the Board and so luck is again one of the directing influences that guide the destinies of that institution.

Mr. Herring, The Building and Industrial News join the members of The Builders Exchange in congratulating you and your wife on this occasion, and wish you both the continued good health you so abundantly enjoy and the prosperity you so richly deserve.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $20,000. Architect's name not given. Owner, John C. Welsh, 1151 Guerrero St., S. F. The building will be arranged for 12 apartments of two and three rooms each. There will be connecting baths and wall beds. Interior finish will be of pine and redwood with some oak floors. A central heating system will be installed. The exterior of the building will be covered with shiplap and rustic. Plans will be completed shortly and the owner will take figures on the work.

OAKLAND, CAL. Apartment house, 2 story and base, frame, $6,000. Architect, C. E. Burks, 5417 Genoa St., Oakland. Owner, W. L. Mitick. The building will contain a number of three and four room apartments, all of which will have connecting baths and wall beds. Interior finish will be of pine and redwood with oak panels. Oak floors will be used. There will be an open fire place with brick mantel in the living room of each apartment. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done under the personal direction of the architect, who is now letting subcontracts on all parts of the work.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, brick and steel, $40,000. Architect, J. Cather Newsom, Monadnock Bldg., S. F. Owner, J. Cather Newsom. The building will contain sixty rooms arranged in two and three room suites with baths and wall beds. There will also be a large reception room, parlors and a roof garden. The interior finish will be of pine and redwood with some oak floors. A central heating system will be installed. There will be hot and cold running water and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

LOS ANGELES, CAL. Apartment house, 3 story and base, brick. Cost not stated. Architect, J. Martyn Haenke, Central Bldg. L. A. Owner, C. A. Canfield. The building has been designed to contain a total of eighty rooms, which are to be arranged in two and three room suites. There will be wall beds and private baths. Interior finish will be of pine and redwoods. There will be steam heat and a vacuum cleaning system. Baths will be finished in tile. The exterior of the building will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Apartment house 3 story and base, frame, $40,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Sommarstrom Bros. This building will be erected on Alice street, near 14th, and when complete will be one of the most modern apartment house structures in the city of Oakland. There will be a total of 62 rooms, which will be arranged in 21 apartments. All suits will have connecting baths and wall beds. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are taking subfigures on the various parts of the work.

LOS ANGELES, CAL. — Apartment house, 3 story and base, frame. Cost not stated. Architect, Lenard L. Jones, I. W. Hellman Bldg., L. A. Owner, Richard Webb. The building will be 150 feet and will contain a total of sixty rooms arranged in two and three room suites. There will be wall beds, private baths and steam heat. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL. — Apartment house 2 story and base brick, $15,575. Architect, none. Owner, Lorenzo Vignolo. Contractors, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Contract price, $15,575.

—BANKS—

BERKELEY, ALAMEDA CO., CAL.—Bank, 1 story and base, brick and steel, $20,000. Architect, C. N. Cook, Radio Bldg. S. F. Owners, Berkeley Savings Bank. This work has been mentioned here before when the architect was first commissioned to prepare the plans. Working drawings are now complete and figures are being taken. The building is in the classic style and will be faced with pressed brick. Interior has been arranged for public space offices and directors' and president's private rooms. Interior will be finished in hardwoods and tile. Special bank features and a reinforced concrete vault will be installed.

GLENDALE, LOS ANGELES CO., CAL.—Bank, 3 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, First National Bank of Glendale. The building will be 26x100 feet. The entire first floor is to be occupied by the bank and will require special office fixtures and money vaults. The second floor is to be arranged for offices, while the third floor will contain living apartments. There will be steam heat and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete and will go out for figures the latter part of this week.

BATH HOUSE.

ALAMEDA, ALAMEDA CO., CAL.—Bath house, 1 story and base, reinforced concrete. Cost not stated. Engineer, L. N. Chapman, City Engineer, Alameda. Owners, City of Alameda. The Common Council has taken steps to place a bond question before the people to secure funds for a Municipal Bath House. The plan involves the use of the hot salt water exhaust from the boiler room of the Municipal power plant. Engineer Chapman is now engaged on the plans. A small admission will be charged to retire the bonds. Full particulars will be given later.

MENLO PARK, SAN MATEO CO., CAL.—Bath House, 1 story and base, reinforced concrete. Cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owner's name withheld. Plans have been completed for a building 40x150 feet and of reinforced concrete construction throughout. Mechanical equipment will include all of the most approved bath house equipment. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Wharf, reinforced concrete piles and frame construction, $600,000. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans for Pier No. 37, which is to be erected at the foot of Beach street, have been approved. The structure will be 1060 feet long and 200 feet wide. Construction will be similar to that used in the Army Transport Docks. Bids will be called for as soon as the final plans receive the approval of the State Board of Control.

Contracts Awarded.

SPOKANE, WASH.—Viaduct, reinforced concrete, $1,500,000. Engineer's name not given. Owners, Northern Pacific R. R. Co. Contractors, Guthrie, McDougal & Co., St. Paul, Minn. Contract price, $1,500,000. Note: This structure will be nearly three miles long, and is to span the Spokane River and a number of principal streets.

CHURCHES.

SAN FRANCISCO. Church, 1 story and base, frame, $10,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Methodist Church. The building will be erected at the corner

of 19th and Judah streets, and has been designed in the Gothic style. The exterior will be covered with cement plaster on metal lath. Interior has been arranged for the main body of the church on the first floor and a large auditorium in the basement. A central heating system will be installed. Plans are complete and the work is now out for figures.

OAKLAND, CAL.—Church, 1 story and base, type of construction not decided, $60,000. Architect, G. Albert Lansburgh, M. A. Gunst Bldg., S. F. Owners, First Hebrew Congregation. The main auditorium will be on the first floor and slightly raised above the sidewalk line. Sabbath school rooms will be located in the basement. Interior will be handsomely finished The architect is now working on the preliminary studies and none of the particulars of construction can be given at this time. Details will be published as the plans progress.

Contracts Awarded.

FULLERTON, ORANGE CO., CAL.—Church, 1 story and base, frame, $10,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. Contractors, Star Hardware and Construction Co., Fullerton. Contract price, $10,035.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Stable, 1 story, brick. Cost not stated. Architect, none. Owner, I. C. Conner, 572 10th Ave., S. F. The building will cover an area of 25x100 feet. There will be a cement floor. A large number of stalls are provided for besides wash room and office. Plumbing will be installed. Second-hand brick will be used in the walls and the street elevation will be faced with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Dairy building, 2 story and base, frame $13,000. Architect, Paul F. de Martini, 451 Columbus Ave., S. F. Owners, California Milk Co. The building is to be erected on Bay street near Taylor, and has been designed for a sterilization plant. Special machinery and equipment will be required. There will be a cement floor. Tile and terrazzo will be used extensively. The exterior will be covered with shiplap. Plans are nearly complete and will be out for figures in a few days.

SAN FRANCISCO — Warehouse, 3 story and base, reinforced concrete, $60,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Nat Rafael. This building has been mentioned here before when plans were first being prepared. Construction will be fireproof throughout. Metal window sash and frames will be used and fireproof doors. There will be cement floors. A freight elevator and automatic sprinkler system will be installed. Construction will be of the extra heavy type. The exterior will be faced with cement plaster. Plans are complete and figures are being taken by the architect.

LOS ANGELES, CAL.—Warehouse, 4 story and base, brick and steel, $80,000. Architect, Edward S. Cobb, Central Bldg., L. A. Owner, D. Oyharzabal The building will 125x150 feet with a 1-story wing 125x110 feet. Construction will be of brick and steel. There will be metal window sash and frames, three large freight elevators and an automatic sprinkler system. The exterior of the building will be faced with blue pressed brick. A lease has been made to the California Hardware Co. Plans are complete and figures will be taken at once.

VANCOUVER, B. C.—Warehouse, 7 story and base, reinforced concrete, $200,000. Architects, Parr, McKenzie & Day, Vancouver. Owners, Canadian Fairbanks-Morse Co. The building will have an area of approximately 280x120 feet. Spur trackage has been provided and cars may be run into the main portion of the building. Construction will be of the semi-fireproof type. There will be three freight elevators. Metal window sash and doors will be used. An automatic sprinkler system is to be installed. The exterior of the big structure will be faced with cement plaster. Working drawings are nearly complete and figures will be called for without delay.

WALLA WALLA, WASH.—Factory group, 3 buildings, brick and reinforced concrete construction, $500,000. Architects, Osterman & Siebert, Walla Walla. Owners, Brown-Lewis Mfg. Co. The main buildings will be two stories high and 60x160 feet, the office building will be 50x60 feet and three stories high. From each of these buildings there will extend two large one-story wings. A one story power house is also to be erected. The entire plant will cover a ground space of 250x660 feet. A large amount of mechanical equipment will be required. Plans are nearly complete and construction will be started at once.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,200. Architect, none. Owner, N. Cavaglia, 946 Greenwich. The building has been designed to contain two modern flats each of six rooms and bath. Interior finish will be of pine and redwod. There will be be open fire places and tile mantels. Bath rooms will be finished in tile. Oak floors will be used. Considerable terrazzo and mosaic is specified. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000. Architect, J. C. Flugger, Crocker Bldg., S. F. Owner, Charles Nystrom, 145 Clement St., S. F. The building will cover an area of 25x60 feet and will contain two modern flats of five and six rooms each. Interiors will be finished in pine with some elm panels. There will be open fire places and brick mantels. Bath rooms will be finished in tile. There will be 30-gallon boilers. The exterior of the building will be faced with rustic, brick veneer and shiplap. Plans are complete and in the hands of the owner who is taking figures on the work.

SAN FRANCISCO—Flats, 2 story and base, frame, $5,000. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co., Phelan Bldg., S. F. The building will be erected on 8th avenue, near Fulton, and will be 25x50 feet. Interior has been arranged to contain two flats of five and six rooms each. here will be pine and redwood trim with some oak floors. Open fire places and brick mantels will be used. Bath rooms will be finished in tile. Automatic hot water heaters will be installed. The exterior of the building will be covered with brick veneer, rustic and shingles. Plans are complete and the work will be done by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, $55,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Charles L. Tilden. This work has been mentioned here several times before. Plans are now out for figures. The building covers a large area and is to be fireproof. Three large automobile firms have already taken leases and the structure will be rushed to completion. Offices and sales rooms will be elaborately finished. The exterior will be faced with cement plaster. Lange & Bergstrom, Lindgren & Co. and the Continental Fireproofing Co. are figuring the job.

LOS ANGELES, CAL.—Garage, 2 story and base, brick. Cost not stated. Architect, A. L. Haley, California Bldg., L. A. Owner, T. A. Stephens. The building has been designed for a commercial garage and will cover an area of 50x110 feet. There will be a cement floor on the first story and metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans for this work are now being prepared.

GOVERNMENT WORK AND SUPPLIES.

Pearl Harbor, H. T., Crane.

No action has yet been taken by the chief of the bureau of yards and docks, Navy Department, Washinton, D. C., regarding the award of the contract for furnishing 1 15-ton locomotive crane for delivery at the naval station, Pearl Harbor, H. T.

Schofield Barracks, H. T., Switchboard.

The depot quartermaster, U. S. A., Washington, D. C., has accepted the bid of the Ridgway Dynamo and Engine Co., Ridgway, Pa., at $4,375 for furnishing switchboard and generator sets for laundry plant at Schofield Barracks, H. T.

Bellingham, Wash., Elevator.

The bid of the Otis Elevator Co., Washington, D. C., $4,493 in amount, has been accepted for installing an electric elevator in the U. S. post office at Bellingham, Wash., time to complete March 15, 1913.

Reclamation Bids Rejected.

The Secretary of the Interior has rejected the bids received on October 21, 1912, for the excavation of the extension of the west canal and laterals, Uncompahgre irrigation project, Colorado. The work consists of 17.1 miles of canals and laterals involving about 60,000 cu. yards of excavation and 500 linear feet of tunnel. Schedule 2 involving 7,600 cubic yards of excavation and 800 linear feet of tunnel will be readvertised, the remainder will

be constructed by Government forces or under small contracts.

Canal Circular 747.

In accordance with an advertisement appearing elsewhere in this issue bids are to be opened by the purchasing officer, Isthmian Canal Commission, Washington, D. C., under circular 747, on December 12 for the purchase of brass and copper scrap. The schedule consists of but one class divided into two items, as follows

Item 1, 162,000 lbs. brass and copper scrap, consisting of all borings and turnings now on hand. These borings and turnings are from the brass working lathes, boring mills, milling machines, and other tools operated in the various shops of the commission. The brass stick, rough brass castings, and bearings from which these borings and turnings were made are chiefly the product of the foundry at Gargona. The borings are packed in large iron dump buckets weighing approximately 4,250 lbs. gross and 350 lbs. net.

Item 2, 600 lbs. brass and copper scrap, consisting of miscellaneous brass bushings, bearings, pump linings, lubricators, scrap copper clippings, scrap sheet brass, copper from ships' bottom, brass molded valves, brass tubing from inter coolers and miscellaneous brass and copper scrap.

—HALLS & SOCIETY BLDGS.—

SACRAMENTO, CAL.—Armory, ornamental iron work. Cost not stated. Architect, State Architect Woollett Sacramento. Owners, State of California. Plans and specifications for the ornamental iron work for the State Armory at Sacramento are on file at this office. Informal bids are to be taken. Firms who wish to submit figures may call and see the plans and will be furnished a blank form for their bid by the State Department of Engineering.

LOS ANGELES, CAL.—Museum, 2 story and base, reinforced concrete. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg. L. A. Owners, Southwest Museum Association. The building will cover an area of 186x30 feet and will have a tower 35 feet square and 100 feet high. The main portion of the building will contain the display rooms, curator's room and work space, while a library and offices will be located in the tower. A feature will be a spiral stairway of reinforced concrete to the top of the tower. Construction will be entirely of reinforced concrete. The exterior of the building will be faced with cement plaster. Grading on the site has been commenced and plans for the balance of the work are complete.

Contracts Awarded.

AUBURN, WASH.—Lodge hall, 2 story and base, brick, $13,000. Architects, Thompson & Thompson, Mutual Life Bldg., Seattle. Owners, Odd Fellows Hall Association. Contractors, Young & Davis, Auburn. Contract price, $12,750.

HOSPITALS.

LOS ANGELES, CAL.—Hospital additions, brick and reinforced concrete. Cost not stated. Architect, George Low, Los Angeles. Owners, Los Angeles County. Plans have been accepted for the new buildings which are to be erected at the County Hospital on the Mission Road. These buildings are as follows: Laundry, 2 story and base, 44x59, work shop, three story and base, 44x83, addition to nurses' home, two story and rear, and a two story ward building, 35x225, with a 50-foot wing. Construction will be of both reinforced concrete and brick with the exteriors faced with red brick. Plans by Mr. Low will also be accepted for the new work at the County farm. Working drawings for the hospital work will be completed shortly and bids called.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and [illegible] brick and steel, $15,000. Architect Albert Schroepfer, Foxcroft Bldg., S. F. Owner Isaac Monson. The building is to be erected at the southeast corner of Geary and Jones streets and will cover a considerable area. There will be several stores on the first floor. Upper floors will contain a total of [illegible] rooms, all of which will have connecting baths. There will be steam heat, hot and cold running water and elevator service. Interior finish will be largely of pine. The exterior of the building will be faced with pressed brick or cement plaster. A vacuum cleaning system will be installed. Plans are being prepared.

SAN FRANCISCO—Hotel, 7 story and [illegible] reinforced concrete. Cost not stated. Architect William Beasley, 147 Montgomery St., S. F. Owners, Western Hotel Company. This building will be erected in the north line of [illegible] street west of Powell, and will cover an area of 81x[illegible] feet. There will be a store and the main office and lobby on the first floor. Upper floors will be subdivided into 200 guest rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for in the latter part of the next week or ten days.

SAN FRANCISCO—Hotel, 6 story and base, brick and steel, $45,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Thomas W. Butler. The building will be 60x60 feet and is to be erected at the northwest corner of Jackson and Drumm streets. There will be a store and hotel lobby on the first floor. Upper floors will contain in the neighborhood of 150 rooms and several baths. There will be steam heat, elevator service and hot and cold running water. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and a contract for the pile foundation has been awarded. Figures will be called for on the balance of the work shortly.

SAN FRANCISCO—Hotel, 3 story and base, brick, $20,000. Architect, Joseph Cahen, 15 Kearny St., S. F. Owner, L. Friedman. The building will be erected on the west line of Kearny street between Washington and Jackson streets. There will be a store and the hotel entrance on the first floor, and a total of 70 rooms on the upper two floors. Plans provide for hot and cold running water in all rooms. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster or pressed brick. Preliminary plans are being prepared.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 6 story and base. Class A construction. Cost not stated. Architect, Frank F. Kegley, Consolidated Realty Bldg., L. A. Owners, Messrs. Stineman & Kramer. The building is to cover an area of 51x87 feet, and will be located on one of the prominent business corners. The upper floors have been arranged for 100 guest rooms and 66 baths. Construction will be of reinforced concrete throughout. The exterior will be faced with cement plaster with tile inlays. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood with some hardwoods. Plans are being prepared.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel and stores, 3 story and base. Class A construction. Cost not stated. Architect, Frank F. Kegley, Consolidated Realty Bldg., L. A. Owners, Mr. Hostetter. The building will be 70x80 feet. There will be several stores on the first floor and 14 hotel rooms and baths above. There will be steam heat and hot and cold running water in all rooms. The exterior will be faced with cement plaster with tile inlays. Plans are being prepared and will be out for figures shortly.

VANCOUVER, B. C.—Hotel, 10 story and base. Class A construction, $150,000. Architect, Emil Guenther, Northwest Bank Bldg., Vancouver. Owner's name withheld. A site on Hastings street, near Main, has been secured for the hotel, and plans are being rushed to completion. The entire first floor will be given over to the hotel lobby, dining room and offices. The upper floors will contain about 225 rooms, nearly all of which are to have connecting baths. There will be a complete steel frame and exterior walls of brick faced with pressed brick and terra cotta. Interior finish will be of pine. There will be steam heat, elevator service, a vacuum cleaning system and intercommunicating phones. A general contract will be let. Plans will be completed within ten days or two weeks when figures will be called.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, Hiram Kival. The building has been designed for stores on the first floor and rooms above. There

PROPOSALS FOR ELECTRICAL EQUIPMENT.

PURSUANT to Resolution No. 1053 N. S. Passed November 11 1912 the Oakland Council will receive sealed bids up to the **2nd day of December, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.** at the Council chamber, City Hall to furnishing the necessary labor and material required for the following public work and improvements to wit: one combination central electric system for fire and police telephone and telegraph switchboard set in place complete and ready for operation in accordance with the specifications adopted by the City Council and on file in the office of the City Clerk to which reference is hereby made for full details and description of said work to-wit

Bidders shall state price for said complete equipment, taken as a whole, delivered and installed in the City Hall as per specifications for work to be completed and ready for operation within ninety (90) days from date of contract.

The successful bidder shall be required to enter into a contract to do said work within ten (10) days after the award thereof, said work and improvement to be completed by the successful bidder therein in accordance with the specifications therefor adopted by the Council on the 11th day of November, 1912, and on file in the office of the City Clerk of the City of Oakland to which reference is hereby made for full details and description of said work. All work done and materials furnished shall be under the direction and supervision of the Superintendent of the Electrical Department and to be to the satisfaction and acceptance of the Council of the City of Oakland.

All proposals offered shall be accompanied by a check certified by a responsible bank for an amount not less than ten per cent (10%) of the aggregate of the proposal, which check and the amount therein mentioned shall be forfeited to the City of Oakland in case the bidder to whom the contract is awarded fail to enter into the contract and furnish the bond required within ten days after notice.

At the same time with the execution of the contract, the contractor shall execute to the City of Oakland and deliver to the Auditor a bond in the sum of $1,000.00, with two or more sufficient sureties, to be approved by the Council of the City of Oakland, or shall deposit with the Auditor a certified check upon some solvent bank for said amount for the faithful performance of the contract, and said contractor shall execute also to the City and deliver to the Auditor a bond in the sum of fifty per cent (50%) of the entire contract price with sureties, to be approved by the Council of the City of Oakland, or shall deposit with the Auditor a certified check upon some solvent bank for said amount for the protection of persons furnishing labor and materials in the performance of said contract.

Bidders will be furnished blank forms of proposals upon application to the City Clerk, and all proposals shall be made upon forms so furnished.

The Council reserves the right to reject any and all bids. Each bid shall bear the affidavit of the bidder, as required by Section 126 of the Charter of the City of Oakland.

By order of the Council of the City of Oakland

FRANK R. THOMPSON,
City Clerk.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBlic Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of November, 1912,** for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) That the following vitrified, salt-glazed, iron-stone pipe sewers and appurtenances be constructed:

An 18-inch with 1 brick manhole with cast iron frame and cover and galvanized wrought-iron steps along the center line of Fourteenth avenue, between the northerly and center lines of Anza street; a 12-inch along the center line of Fourteenth avenue between center and southerly lines of Anza street; a 12-inch along the center line of Anza street, between the center and easterly lines of Fourteenth avenue, and an 8-inch along the center line of Anza street, between the center and westerly lines of Fourteenth avenue.

(2) That the crossing of Balboa street and Seventeenth avenue be improved by the construction of granite curbs and artificial stone sidewalks on the angular corners thereof, by paving the roadway of the crossing with an asphalt pavement, consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface, and by constructing brick cesspools (catchbasins) with cast-iron frames, gratings and traps and ten (10) inch, vitrified, salt-glazed, iron-stone pipe culverts, one each on the northeasterly and southeasterly angular corners thereof.

(3) That Balboa street, from the easterly line of Thirty-third avenue to the westerly line of Forty-fifth avenue, including the intervening crossings be improved by grading to official line and grade, where not already so done.

Note: Separate proposals will be taken on the above mentioned work.

NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, Cal., November 22, 1912.—SEALED PROPOSALS or bids will be received at this office at or prior to **11:00 o'clock A. M. on Thursday, December 5, 1912,** for widening outer end of south arm of Sixteenth Street Pier, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board November 21, 1912, and on file in this office, to which special reference is hereby made.

The materials to be used in this work will consist of the requisite quantities of first class Douglas yellow fir piles, green and creosoted piles, merchantable yellow fir lumber, bolts, spikes, mooring piles and mooring bitts, galvanized wire rope, corner band, etc., all of the best quality specified. All piles will be furnished the Contractor by the Board.

All materials will be subjected to a rigid examination and if found defective, undersize or otherwise unsuitable, will be condemned and must be immediately removed from the work.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the bid; said check to be made payable to the order of the Secretary of the Board of State Harbor Commissioners, as a guarantee on the part of the successful bidder that he will, within six (6) days after the acceptance of the bid and the award of the contract, enter into a written contract to do said work according to the plans and specifications prepared therefor, and will also execute and file with the Board, a bond in such sum as the Board may deem adequate, with two or more sureties to be approved by said Board and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary at or prior to 11:00 o'clock A. M. on Thursday December 5, 1912, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids.

J. J. DWYER.
THOMAS S. WILLIAMS.
J. McCALLUM.
Board of State Harbor Commissioners.
JEROME NEWMAN,
Assistant State Engineer
LEO. V. MERLE, JR.,
Secretary.

Notary Public in and for the City and County of San Francisco, State of California.

My commission expires Sept. 20th, 1915

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 1 story and base, frame, $3,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The bungalow has been designed to contain six rooms and bath. Interior finish will be of pine, redwood and elm. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles and cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1½ story and base, frame, $2,900. San Francisco. Architect, A. W. Richardson, 2877 Mission St., S. F. Owner, William Harris, 231 Coleridge St., S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be two open fire places with brick mantels. Bath room will be finished in tile. The exterior of the building will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $8,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The house will contain eight rooms, bath, sleeping porch and a laundry. A garage will be erected on the rear of the lot. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used throughout. There will be furnace heat and open fire places. Bath rooms will be finished in tile and will have composition floors. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $4,000. San Francisco. Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner, N. Cervelli. There will be a store on the first floor and eight living rooms on the upper floor. Interior finish will be of pine and redwood. Oak floors will be used in some rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shiplap. Plans are complete and the architect is taking figures on the work.

RESIDENCE — 2 story and base, frame, $4,500. Oakland, Cal. Architect, J. Cather Newsom, Monadnock Bldg., S. F. Owner, Hugo M. Cameron, 1158 Broadway, Oakland. The house will contain eight rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles and cement plaster. Plans are in the hands of the owner who is taking figures on the various parts of the work.

RESIDENCE — 2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect none. Owners, Beck-Biddell Co., Berkeley National Bank Bldg., Broadway. The house is designed to contain seven rooms, sleeping porch and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The exterior of the dwelling will be covered with shingles and stucco. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, J. A. Pinkerton, 1931 Berryman St., Berkeley. Owners, Peake-Munroe Co. The house will contain five rooms and bath. All interior finish will be largely of pine with some elm panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

APARTMENT HOUSE — 3 story and base, frame, $20,000. San Francisco. Architect's name not given. Owner, John C. Welsh, 1131 Guerero St., S. F. The building will be erected on Guerrero street between 23rd and 24th streets, and will be arranged for 12 apartments of two and three rooms each. There will be connecting baths and wall beds. Interior finish will be of pine and redwood with some oak floors. A central heating system will be installed. The exterior of the building will be covered with shiplap and rustic. Plans will be completed shortly and the owner will take figures on the work

WHARF Reinforced concrete piles and frame construction, $600,000 San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans for Pier No. 37, which is to be erected at the foot of Beach street have been approved. The structure will be 1,060 feet long and 200 feet wide. Construction will be similar to that used in the army transport docks. Bids will be called for as soon as the final plans receive the approval of the State Board of Control.

CHURCH—1 story and base, frame $10,000 San Francisco. Architects, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Methodist Church. The building will be erected at the corner of 19th and Judah streets and has been designed in the Gothic style. The exterior will be covered with cement plaster on metal lath. Interior has been arranged for the main body of the church on the first floor and a large auditorium in the basement. A central heating system will be installed. Plans are complete and the work is now out for figures.

STABLE 1 story, brick Cost not stated. San Francisco. Architect, none. Owner, I. C. Conner, 572 10th Ave., S. The building will cover an area of 25x

100 feet. There will be a cement floor. A large number of stalls are provided for besides wash room and office. Plumbing will be installed. Second-hand brick will be used in the walls and the street elevation will be faced with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

DAIRY BUILDING 2 story and base, frame, $12,000. San Francisco. Architect, Paul P. de Martini, 451 Columbus Ave., S. F. Owners, California Milk Co. The building is to be erected on Bay street near Taylor, and has been designed for a sterilization plant. Special machinery and equipment will be required. There will be a cement floor. Tile and terrazzo will be used extensively. The exterior will be covered with shiplap. Plans are nearly complete and will be out for figures in a few days.

WAREHOUSE—3 story and base, reinforced concrete, $60,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Nat Rafael. This building has been mentioned here before when plans were first being prepared. Construction will be fire proof throughout. Metal window sash and frames will be used and fireproof doors. There will be cement floors. A freight elevator and automatic sprinkler system will be installed. Construction will be of the extra heavy type. The exterior will be faced with cement plaster. Plans are complete and figures are being taken by the architect.

FLATS—2 story and base, frame, $4,200. San Francisco. Architect, none. Owner, N. Cavaglia, 916 Greenwich. The building has been designed to contain two modern flats of six rooms and bath. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Oak floors will be used. Considerable terrazzo and mosaic is specified. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

FLATS—2 story and base, frame, $4,000. San Francisco. Architect, J. C. Flugger, Crocker Bldg., S. F. Owner, Charles Nystrom, 145 Clement St., S. F. The building will cover an area of 25x60 feet, and will contain two modern flats of five and six rooms each. The interiors will be finished in pine with some elm panels. There will be open fire places and brick mantels. Bath rooms will be finished in tile. There will be 30-gallon boilers. The exterior of the building will be faced with rustic, brick veneer and shiplap. Plans are complete and in the hands of the owner, who is taking figures on the work.

FLATS—2 story and base, frame, $5,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co., Phelan Bldg., S. F. The building will be erected on 8th avenue, near Fulton, and will be 25x50 feet. Interior has been arranged to contain two flats of five and six rooms each. There will be pine and redwood trim with some oak floors. Open fire places and brick mantels will be used. Bath rooms will be finished in tile. Automatic hot water heaters will be installed. The exterior of the building will be covered with brick veneer, rustic and shingles. Plans are complete and the work will be done by Day Labor.

GARAGE—2 story and base, reinforced concrete, $85,000. San Francisco. Arentzgt. C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Charles L. Tilden. This work has been mentioned here several times before. Plans are now out for figures. The building covers a large area and is to be fireproof. Three large automobile lots have already taken leases and the structure will be rushed to completion. Offices and sales rooms will be elaborately finished. The exterior will be faced with cement plaster. Lange & Bergstrom, Lindgren & Co., and the Continental Fireproofing Co. are figuring the job.

HOTEL—6 story and base, brick and steel, $45,000. San Francisco. Architect, Albert S. Roepter, Foxcroft Bldg., S. F. Owner, Lane Mensor. The building is to be erected at the southeast corner of Geary and Jones streets and will cover a considerable area. There will be several stores on the first floor. Upper floors will contain a total of 120 rooms, nearly all of which will have connecting baths. There will be steam heat, hot and cold running water and elevator service. Interior finish will be largely of pine. The exterior of the building will be faced with pressed brick or cement plaster. A complete heating system will be installed. Plans are being prepared.

HOTEL—, story and base, reinforced concrete, cost not stated. San Francisco. Architect, William Beasley, 147 Montgomery St., S. F. Owners, Western Hotel Company. This building will be erected in the north line of Ellis street, west of Powell, and will cover an area of 34½x177½ feet. There will be a store and the main office and lobby on the first floor. Upper floors will be subdivided into 200 guest rooms, all of which will have connecting baths. There will be steam heat elevator service and a vacuum cleaning system. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for in the course of the next week or ten days.

HOTEL—6 story and base, brick and steel, $45,000. San Francisco. Architects Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Thomas W. Butcher. The building will be 60x60 feet and is to be erected at the northwest corner of Jackson and Leavenworth streets. There will be a store and hotel lobby on the first floor. Upper floors will contain in the neighborhood of 120 rooms and several baths. There will be steam heat, elevator service and hot and cold running water. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and a contract for the pile foundation has been awarded. Figures will be called for on the balance of the work shortly.

HOTEL—3 story and base, brick, $20,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, L. Friedman. The building will be erected in the west line of Kearny street, between Washington and Jackson streets. There will be a store and the hotel entrance on the first floor, and a total of seventy rooms on the upper two floors. Plans provide for hot and cold running water in all rooms. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster or pressed brick. Preliminary plans are being prepared.

RESIDENCES—2, 2 story and base, frame, $2,500 each. San Francisco. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. These dwellings will be similar in design to several others recently erected by Mr. Nelson. Each will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the houses will be covered with rustic and shingles. Plans are in the hands of the owner who will do the work by Day Labor.

STORES—1 story and base, frame, $10,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Herman D Hoerefe, 1960 Hyde St., S. F. The building will be 37½x82½. There will be patent store fronts. Interior finish will be of pine throughout. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

DISPOSAL PLANT—Reinforced concrete, $100,000. San Francisco. Engineering Department San Francisco Disposal Co., Crocker Bldg., S. F. Owners, San Francisco Disposal Co. A contract has been awarded to Healy-Tibbitts Construction Co. for the pile foundation work for their plant and bids will be opened shortly for the concrete work, buildings and approaches. Machinery orders for this work will be placed shortly. The management have selected the type of machinery to be used.

TO BUILDERS AND CONTRACTORS.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE. 2 story and basement frame. Cost not stated. Berkeley, Alameda Co, Cal. Architect, Otto S Gay, 2911 Telegraph Ave, Berkeley. Owner, W J Reid Jr. The owner has been declared to contain 11 rooms, bath and sleeping porch. A garage will be erected on the rear of the lot. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a warm air heating and steel flue plan. Mantels will be of oak. Pull down, wall or bath will be of cement construction floors. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

RESIDENCE ADDITION. 2 story and basement frame. $5,500. Berkeley, Alameda Co, Cal. Architects Sorn & Lofquist, 550 Montgomery St, S F. Owner, Mrs. K Christie. The work will contain six rooms, bath and sleeping porch. All interior finish will be of pine. Oak and composition flooring will be used. There will be new plumbing, electric work and a heating system. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

BUNGALOW. 1 story and basement frame, $4,000. Berkeley, Alameda Co, Cal. Architect, none. Owner, F. E. Armstrong, 2249 Hearst Ave, Berkeley. The house has been designed to contain six rooms and bath. All interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. Oak floors will be used in the principal rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE. 2 story and basement frame, $3,000. Oakland, Cal. Architect, John S. Grove, 2911 Telegraph Ave, Berkeley. Owner, Frederick Townsend. The dwelling will contain seven rooms and bath. Interior finish will be of pine and redwood with some oak floors. Oak floors will be used in the principal rooms. There will be open fire places and furnace heat. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are being prepared.

BATH HOUSE. 1 story and basement, reinforced concrete. Cost not stated. Alameda, Alameda Co., Cal. Engineer, L. N. Chapman, City Engineer, Alameda. Owner, City of Alameda. The Common Council are taken steps to submit a bond question before the people to secure funds for a municipal bath house. The plan involves the use of salt water exercise from the city tank, of the Municipal power plant. Engineer Chapman is now engaged on the plans. A small admission fee will be charged to retire the bonds. Full particulars will be given later.

APARTMENT HOUSE. 2 story and basement frame, $6,000. Oakland, Cal. Architect, C. E. Burks, 5117 Genoa St. Owner, W. L. Murrk. The building will contain a number of three and four room apartments, all of which will have connecting baths and steel beds. Interior finish will be of pine and redwood with elm panels. Oak floors will be used. There will be an open fire place with brick mantel in the living room of each apartment. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done under the personal direction of the architect, who is now letting sub-contracts on all parts of the work.

APARTMENT HOUSE. 3 story and basement, brick and steel, $40,000. Berkeley, Alameda Co, Cal. Architect, J. Cather Newsom, Monadnock Bldg, S. F. Owner, J. Cather Newsom. The building will contain sixty rooms arranged in two and three room suites with baths and wall beds. There will also be a lounge reception room, parlors and roof garden. The interior finish will be of pine and redwood with some oak floors. A vacuum heating system will be installed. There will be hot and cold running water and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

BANK. 1 story and basement, brick and steel, $20,000. Berkeley, Alameda Co., Cal. Architect, C. N. Cook, Rialto Bldg, S. F. Owners, Berkeley Savings Bank. This work has been mentioned once before and the architect was recently commissioned to prepare the

plans. Working drawings are now complete and figures are being taken. The building is to be in the classic style and will be faced with pressed brick. Interior has been arranged for public space, offices and directors' and president's private rooms. Interior will be finished in hardwoods and tile. Special bank fixtures and a reinforced concrete vault will be installed.

CHURCH — 1 story and base. Type of construction not decided, $60,000. Oakland, Cal. Architect, G. Albert Lansburgh, M. A. Gunst Bldg., S. F. Owners, First Hebrew Congregation. The main auditorium will be on the first floor and slightly raised above the sidewalk line. Sabbath school rooms will be located in the basement. Interior will be handsomely finished. The architect is now working on the preliminary studies and none of the particulars of construction can be given at this time. Details will be published as the plans progress.

BUNGALOW—1½ story and base, frame, $3,000. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, Frank C. Howe. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story, attic and base, frame, $5,000. Oakland, Cal. Architects, Oliver & Thomas, Pantages Bldg., Oakland. Owner, Oakland Building and Mortgage Co. The dwelling will contain five rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, $3,000. Oakland, Cal. Architect, J. V. Matteson, 2708 Sunset Ave., Fruitvale. Owner, Mrs. V. N. Ivey. The house will contain seven rooms and bath. Interior finish will be of pine and redwood throughout. Living and dining rooms will have oak floors. There will be open fire places and tile or brick mantels. Tile will be used in the kitchen and bath. The exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SCHOOLS — 2, reinforced concrete and frame buildings. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Bids were opened at the last meeting of the Oakland Board of Education for the construction of the Dewey School and for the Park School. Williams Bros. & Henderson, Monadnock Bldg., S. F., were low on the Dewey School at $104,100, and Nels Anderson on the Park School at $65,869. For a complete list of these bids see under Oakland and Alameda County in this issue.

APARTMENT HOUSE—3 story and base, frame, $40,000. Oakland, Ca.. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Sommarstrom Bros. This building will be erected on Alice street, near 15th, and when complete will be one of the most modern apartment house structures in the city of Oakland. There will be a total of 62 rooms, which will be arranged in 21 apartments. All suites will have connecting baths and wall beds. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are taking subfigures on the various parts of the work.

INCINERATOR—Type of construction not determined. Berkeley, Alameda Co., Cal. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. Bids will be received up to December 17th for the construction of a $50,000 incinerator plant. Each bidder is to furnish complete plans and specifications of the incinerator to be constructed. Complete information may be obtained from the City Engineer's office at Berkeley.

Oakland School Bids Opened.

Bids Opened at Last Night's Meeting Show Williams Bros. & Henderson and Nels Andersen Low.

The following bids were opened at the Monday evening's session of the Oakland Board of Education for the construction of the Dewey and Park Schools. Williams Bros. and Henderson of this city were low men of the Dewey School at $104,400 with two deductions and Nels Andersen, $65,869 on the Park School.

DEWEY SCHOOL.

Bids for this work were taken with several deductions, the two most important of which were (a) substituting wood for concrete and (b) omitting power house.

General Construction.

O. B. Ackerman & Son,$116,725 (a) $6,594; (b) $16,363.

Van Sant-Houghton Co, $112,600; (a) $3,921; (b) $17,000.

Isaac Penny, $119,955; (a) $1,390; (b) $20,000.

Williams Bros. and Henderson, $104,-100, (a) $2,000; (b) $15,000.

W. W. Anderson, $119,990; (a) $3,500; (b) $18,000.

Christenson Bros., $110,091; (a) $4,-200; (b) $16,000.

C. P. Moore Bldg. Co., $136,108; (a) $1,100, (b) $16,185.

PARK SCHOOL.

Bids for this work were taken with one important alternate, that of the substitution of wood for concrete and marked (a) below.

General Construction.

O. B. Ackerman & Son, $66,999; (a) $10,400.

Van Sant-Houghton Co., $69,326; (a) $8,365.

J. O. Price, $74,150; (a) $11,850.

Stockholm & Allyn, $67,693 (a) $5,335

Nels Andersen, $65,869 (a) $9,031.

F. Rolandi, $75,085, (a) $6,500.

W. W. Anderson & Co., $69,900; (a) $6,000.

Lange & Bergstrom, $70,456. (a) $8,606.

J. W. Carr, $70,000 (a) $59,350; claims a mistake.

Moore & Burlingame, $69,000, (a) $9,352.

hot and cold running water. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans for this work are now being prepared.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Lenard L. Jones, I. W. Hellman Bldg., L. A. Owner, H. W. Wilcox. The building will be 50x110 feet, and will be arranged for 58 rooms and 18 baths. Interior finish will be of pine and redwood. There will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Marcus Landsberg. The building will be 60x100 feet. There will be three stores on the first floor besides the hotel entrance. Upper floors will be subdivided into 44 rooms and baths. Interior finish will be of pine throughout. There will be hot and cold running water in all rooms. The exterior of the building will be faced with pressed brick.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Lenard L. Jones, I. W. Hellman Bldg., L. A. Owner, Richard Webb. The building will be 45x97 feet, and will contain a total of sixty rooms arranged in two and three room suites. There will be wall beds, private baths and steam heat. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BANK—3 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, First National Bank of Glendale. The building will be 26x100 feet. The entire first floor is to be occupied by the bank and will require special office fixtures and money vaults. The second floor is to be arranged for offices while the third floor will contain living apartments. There will be steam heat and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete and will go out for figures the latter part of this week.

GARAGE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. L. Haley, California Bldg., L. A. Owner, T. A. Stephens. The building has been designed for a commercial garage, and will cover an area of 50x110 feet. There will be a cement floor on the first story and metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans for this work are now being prepared.

HOSPITAL ADDITIONS—Brick and reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, George Low, Los Angeles. Owners, Los Angeles County. Plans have been accepted for the new buildings soon to be erected at the County Hospital on the Mission Road. These buildings are as follows, Isolation, 2 story and base, 44x50, work shop, 1 story and base, 55x75, addition to nurses' home, 2 story and base, and a two story ward building, 35x225, with a one-foot wing. Construction will be of both reinforced concrete and brick with the exteriors faced with red brick. Plans by Mr. Low will also be accepted for the new work at the County Farm. Working drawings for the hospital work will be completed shortly and bids called.

SCHOOL—1 story and base, brick, $14,000. Huntington Park, Los Angeles Co., Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Huntington Park School District. Revised plans for this building have been prepared and new bids will be received up to November 30th. Plans can be secured from the architect. The lowest and formerly received for the work was from Carl Lang & Co. $12,670.

SCHOOL—1 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Parkhill & Schweitzer, 405 Maryland St., Glendale. Owners, Glendale School District. Plans for a four-room school have been accepted by the Board and bids are being taken. Proposals will be opened on December 2nd. There will be a central heating system. Exterior of the building will be faced with rubber brick. Plans and specifications can be secured from the architects.

DISTRIBUTING SYSTEM FOR WATER PLANT—Cost not stated. Fullerton, Orange Co., Cal. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Fullerton. Bids will be received up to 8 p. m. on December 6th for constructing the distributing system for the Municipal water plant, Fullerton. For general proposal blank, Sealed Proposals in the hands of complete information of bond issue, and plans and specifications of the work are on file at the office of the engineers.

LOFTS—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Stephen M. White Estate. The building will be erected on the east side of Broadway between 8th and 9th streets and will cover an area of 60x165 feet. The first floor is to be occupied by stores and the upper floor by lofts. There will be steam heat, electric light and a vacuum cleaning system. The entrance will be finished in marble and the Metal Window Sash and Frames will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

STORES—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Kremple & Eakes, Home Bldg., L. A. Owner's name not given. The building will cover an area of 145 feet and will contain four stores and garage. Interiors will be finished in pine. A cement floor will cover the entire ground floor. The usual plate glass front will be used. The rear of the building will be occupied by garage. Plans are complete and figures.

STORES AND LOFTS—3 story and basement, Class A construction. Cost to be given. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Metropolitan Fireproof Building Co., The Arcade Club, etc. H. W. Hellman Bldg. Alterations will be required to present building. The cost to be approximately $150,000. The work will consist of the erection of a new front on the building on the northeast corner of Broadway and 4th street. No details have been completed. H. B. Wall is the architect of the building. Plans for the new front, drawings are being prepared. [illegible] bids will be given [illegible] ness.

The upper floors will contain about 75 bedrooms, all of which are to have connecting baths. There will be a complete steel frame and exterior walls of brick faced with pressed brick and terra cotta. Interior finish will be of plaster. There will be steam and electric service, a vacuum cleaning system and inter-communicating phones. A general contract will be let. Plans will be completed within ten days or two weeks when bonds will be called.

SCHOOL GROUP. 1, 2 and 3 story brick and reinforced concrete. $150,000. Los Angeles, Cal. Architect, Edgar H. Cline, Wright and Callender Bldg. L. A. Owners, City of Los Angeles. Plans have been completed and approved for the construction of the new building. The science building and power house for the East Los Angeles High School. The main building will be two stories in height and covers an area of 100x82 feet. The science building will be two stories high and covers an area 50x90 feet. Part of these buildings will be of brick construction with reinforced concrete stairways and corridors. The power house will be of reinforced concrete and one story high. The exteriors of the buildings will be faced with cement plaster and artificial stone and green tile trim. A number of special equipment features are contemplated. Plans are now out for figures and all will be opened on December 17th.

MUSEUM, store and [illegible] to be used as such. Cost not stated. Los Angeles, Cal. Architects, Hunt & Eley, Lankershim Bldg. L. A. Owners, South-west Museum Association. The building will cover an area of 150x120 feet and will [illegible] a tower 25 feet square and be [illegible] high. The main portion of the building will contain the display rooms, curator's room and work space, while a library and others will be located in the tower. A fireproof will be a spiral stairway of reinforced concrete to the top of the tower. Construction will be entirely of reinforced concrete. The exterior of the building will be faced with cement plaster. Grading on the site is now [illegible] and plans for the balance of the work are complete.

FACTORY GROUP. 3 buildings, brick and reinforced concrete construction, $500,000. Walla Walla, Ariz. to be determined, & Stuart, Walla Walla, Owners, Brown-Lewis Mfg. Co. The main building will be two stories high and 60x160 feet, the office building will be 50x66 feet and three stories high. Power each of these buildings [illegible] will extend two large one story wings. A one story power house is also to be erected. The entire plant will cover a ground space of 250x650 feet. A large amount of mechanical equipment will be required. Plans are [illegible] complete and construction will be started at once.

LIBRARY. 1 story and [illegible] brick, $50,000. Seattle, Wash. Architects, W. Marlow Somervell and Hedlin Tomas, associated White Bldg., Seattle. Owners, City of Seattle. Final plans for this building have been approved by the Carnegie Library Board, and working drawings are being prepared. The building will be similar in design to several other libraries erected in Seattle. Architect follows the Tudor style. The exterior will be faced with red pressed brick. Interior trim will be of redwood [illegible], wood. There will be a central heating system. Plans will be ready for figures about December 15th.

SCHOOL. 2 story and base brick or reinforced concrete construction, $100,000. Hoquiam, Wash. Architect, Stephens & Stephens, New York Blk., Seattle. Owners, Hoquiam School District. The architects have not been selected to prepare plans for the work and details are not available as yet. The building is to be designed for a modern High School. Bonds for the construction have been sold. Full particulars will be given [illegible].

Contracts Awarded.

VIADUCT. Reinforced concrete, $1,000,000. Spokane, Wash. Electrical issue not given. Owners, Northern Pacific R. R. Co. Contract is Gaffney, McDougal & Co. St. Paul, Minn. Contract price $1,000,000. Note: The structure will be nearly three miles long and is to span the Spokane River and a number of public [illegible].

LODGE HALL. 3 story and [illegible] brick, $45,000. Arcata, Wash. Architects, Thomsen & Thomsen, Mutual Life Bldg., Seattle. Owners, Odd Fellows Hall Association. Contractors, Young & Lewis, Arcata. Contract price, $42,000.

PORTLAND AND OREGON.

HOTEL. 7 story and [illegible] brick or reinforced concrete, $[illegible]. Pasco, Ore. Architect, F. S. Allerton, Wilcox Bldg., Pasco. Owners, name withheld. No announcement as to [illegible] that plans for this work, as well advanced and bids [illegible] will be started at once. None of the details have been given out as yet. The building will contain [illegible] rooms, a number of [illegible] offices, lobby, and dining room. Complete information will be published as soon as obtainable.

HOTEL. 1 story and [illegible] brick and steel, $50,000. Portland, Ore. Architect, Lewis A. Thomsen, Portland. Owners, name withheld. The building has been designed for a family hotel and will cover an area of 70x75 feet. Kitchen and dining room will be located on the first floor. The three upper floors will each contain twenty guest rooms, which may be used as single rooms or en suite. There will be private baths, steam and electric service and a vacuum cleaning system. Interior finish will be of pine and hardwoods. The exterior of the building will be faced with a tapestry brick, trimmed with natural stone in terra cotta. Contract has not been let, but will early in the new year.

THE CHICAGO HOIST ENGINE CO..

At present, at a short time in business, the Chicago Hoist Engine Company, is making good.

This enterprising company is now doing the hoisting for the Down Town Realty Company's building at Eddy and Mason streets. They have just finished the National Dollman warehouse building, 4 Fifth and Bluxome, and the General Contractor's new building on New Montgomery street.

They have on hand a battery of steam and electric engines which are available, at a moment's notice. Mr. Geo. G. Hoge is the proprietor. Address 2161 Folsom Street. Telephone Market 7918.

THE HARDENED COPPER OF THE ANCIENTS.

It is commonly supposed that the ancients succeeded in hardening copper. Metallurgists who have examined specimens of the so-called hardened copper have found that it is not pure copper, but usually an alloy of copper, silver, natural alloy (that is, the two metals existed in the ore, so that in the process of reduction an alloy was formed), or an artificial alloy made by melting together together the ore copper and the silver ore. The so-called Monel metal, now a regular product of the copper refinery, is the modern development of the ancient natural alloy [illegible] of copper and nickel obtained by refining the copper-nickel ores of the Sudbury mines in Ontario. All the arrowheads and other implements which have been found in the Sudbury district are made of this [illegible] copper-nickel, hardened only by hammering.

BIG FACTORY FOR CHICAGO.

CHICAGO, Nov. 18.—The Crane company, founders and manufacturers of iron and brass supplies, is to build a manufacturing plant in Chicago costing $7,000,000. It will be the largest plant of its kind in the world. The plant will be a consolidation of several Chicago factories, and will have more than 10,000 employes. Announcement of the

plans were made Friday following the purchase of the site, comprising several hundred acres along the drainage canal.

BONDS FOR STATE SCHOOLS.

SACRAMENTO, November 20.—For the benefit of the State school fund, the State Board of Control today purchased $127,000 of municipal bonds as follows.

Huntington city municipal wharf bonds, $70,000, yielding 5½ per cent, brought at par and accrued interest.

Santa Maria municipal improvement bonds, $25,000, yielding 5 per cent, bought at par and accrued interest.

Bishop municipal improvement bonds, $32,000, yielding 5 per cent, bought at par and accrued interest.

NEW VANCOUVER SKYSCRAPER.

A building permit has been taken out by the Investors' Guarantee Co. (Ltd.), of Vancouver, for a 15-story office building, estimated cost $700,000. Erection will commence in the early part of next year. It will be of steel frame construction with terra cotta and face brick walls, and will contain about 425 offices and 6 elevators—2 express, 3 local, and 1 freight.

The interesting feature of this building is its height. Vancouver's present building regulations limit buildings to about 10 stories. As this permit was first taken out some three years ago and renewed from time to time, its owner is thus enabled to erect a building approximately five stories higher than any other building in the city, provided the present laws are not again changed.

Interested dealers in building supplies should communicate with the architects of the building, Russell, Babcock & Rice, Metropolitan Bldg., 837 Hastings street, Vancouver, British Columbia.

NAVY CONTRACTS TO BE LET.

Six Destroyers To Be Built By Different Firms.

WASHINGTON, D. C., Nov 20.—Bids were opened last Monday at the Navy Department for the building of six new torpedo boat destroyers and the contracts will probably be awarded among several bidders.

No company offered to build all the destroyers and the Cramp Company of Philadelphia, who bid $846,900 each for three vessels, was the lowest on the department's designs was the only builder to seek contracts for more than two.

The Cramp Company also submitted the lowest bid for two boats, $853,000 each, and the Fore River Shipbuilding Company of Quincy, Mass., submitted the lowest for a single contract under department plans, $854,500

The Bath Iron Works offered to build a single vessel for $810,000 on the plans of the two destroyers now under construction at its plants, but asked $862,000 for one on the department's designs.

The Union Iron Works, San Francisco, bid $881,500 each for two vessels, New York Shipbuilding Company, $870,000 for one vessel; Newport News Shipbuilding Company, $881,500 each for two vessels, $894,000 for one vessel; Seattle Construction and Dry Dock Company, $98,000 each for two vessels, and the Cramp Company $870,000 for one vessel.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth street, N. W., Washington, D. C.

A complete copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of 10 cents. Persons ordering copies must give number of patent.

1,043,838. Shingling bracket. Frank P. Howard, East Brownfield, Me.

1,043,[illegible]. Skylight. H. U. Rogness, Sioux Falls, S. D.

1,043,881. Safety Appliance for Elevators. Jas. A. Turnbull, Champaign, Ill.

OAKLAND ANTIOCH STARTS BRIDGE

ANTIOCH (Contra Costa Co.), November 23. Preliminary work on the construction of a bridge across Suisun Bay by the Oakland-Antioch Railroad was commenced Tuesday, when four pile-drivers and a force of laborers were put on the job. Two of the pile-drivers are stationed on the Contra Costa County shore and the other two at Chipp's Island.

A slip for a large car ferry will also be constructed, and plans have been drawn for this work. According to the engineers in charge of the work, it will take three years to complete the bridge, and ferry boat will be used until the bridge is completed.

REDWOOD CITY TO DEVELOP

WATER FRONT.

REDWOOD CITY, November 22. The development of Redwood City's water front on a larger scale than has ever been attempted is part of the plans of the Redwood City Harbor Company.

It is also understood that the new company intends to rush to completion the street car system from Redwood City to the foothills, which will also be extended to the water front.

The corporation has 500 acres of marsh land which will be converted into factory sites by reclaiming the land, building wharves and providing spur track facilities. Applications for sites have already been made by a number of manufacturing concerns. The directors of the corporation are E. K. Wood of Oakland, Chas. Crane, Jr. of San Anselmo, August Spalding of Oakland, George A. Merrill and E. P. Fitzpatrick of Redwood City.

WATER TOWER FOR PROTECTION.

CHICO (Butte Co.), November 23. A new steel water tower is to be erected at the Chico water Company at Third and Orient Streets, capable of supplying tank now holding. The new tank will raise 150 feet in air and will have a capacity of 150,000 gallons.

This will greatly reduce the water consumers rate and will also afford better fire protection. The old water now available in case of fire is that from the large tower on Orient Street and as soon as it is emptied the company is practically useless.

Work on the new tower will start in the near future.

McCLOUD MILLS CLOSING.

McCLOUD (Siskiyou Co.), November 23.—The two mills operated by the McCloud River Lumber Company closed Friday after a good season's run.

Three logging camps have been in operation all Summer, and considerable [illegible] still down, but it will be brought in and used to fill the ponds in readiness for the Spring opening.

The company had intended to run until Christmas, but the unsettled weather conditions made this course too uncertain.

THE GOVERNMENT IS USING IMPERIAL WATER PROOFING.

Imperial Waterproofing is gaining in popularity every day. Early next week a consignment [illegible] to Fort Mason will be used at that place.

Conservative architects are also using "Imperial" in large quantities. The asphalt in the Kahn Bros. new Department Store in Oakland is to be waterproofed with Imperial by applying with cement plaster in 1-inch square foot of wall surface and [illegible] feet of floor surface. All pressed [illegible] sheet roofs will be [illegible] application of Imperial [illegible] construction, and to prevent dampness [illegible] in the product.

A SUCCESSFUL FIRM.

The Hartwell Metal Co. [illegible] 2nd Street San Francisco [illegible] 30th. This week has completed [illegible] of the flats on Jones and Octavia streets; also some new buildings for S. A. Born in West Cal. Park district. They [illegible] finished the job for the Metropolitan Investment Co. on the new store [illegible] Jones. [illegible] arrangement [illegible]

The [illegible] of the largest [illegible] The machinery is all of the latest type. All other [illegible] will be [illegible] done [illegible]

PLAN TO BUILD ELECTRIC ROAD.

VALLEY SPRINGS, [illegible] November [illegible] will [illegible] the [illegible] Hall [illegible] [illegible] [illegible]

[illegible] of San Francisco is interested in the same proposition and it has been over the proposed route a number of times lately with parties who represent money interests.

The tracks in a way have been secured over the greater portion of the route and the work is in a position to be pushed forward when the word is given. The line will open up a rich mining and timber district and the lands are valuable fruit land, [illegible] to apples.

CONTRACT FOR WAREHOUSE.

SACRAMENTO, November 18. The Sperry Flour Company has entered into a contract with Cook, Jones, Campbell & Turner for the construction of a warehouse along the Western Pacific Depot Line in the block, Sixth and Seventh, Q and R streets, at a cost of $1,000. The warehouse will be of Class "C" construction and will stand between the railroad line and the above. It will cover the entire strip from Sixth street to Seventh.

ARMOUR INTERESTED IN RECLAMATION PROJECT.

SACRAMENTO, Nov. 18. Speculation as to the real financial interests back of the big deal, closed this week for the sale and reclamation of seven acres of land in the Sutter Basin was settled today when it became definitely known that J. Ogden Armour and his associates are back of the project.

The fact that the multi-millionaire Chicago meat packer is known to believe in the future of the West and especially of the Sacramento Valley will undoubtedly have the effect of stimulating the growing confidence that business men and investors generally are disposing toward this prosperous and rapidly growing section of the Golden State.

NEW WYBRO PRICE LIST.

The popularity of the WYBRO Veneered Panels is due to the fact that they are recognized as all users to be the best stock panel on the market, and they therefore have become the standard of quality.

White Brothers, the Pacific Coast distributors, have just issued a new price list, which shows considerable changes and additions. The cover of the list is a four color call box showing on one side a finished Mahogany panel and on the other side Quartered Oak. Taking it all together the pamphlet is as fine an example of the printer's art as has been seen for many a day. Mr. Geo. Norton, whose headquarters are at the Sunset Publishing Co. this city, is the designer of this catalogue and he deserves credit for the masterful and artistic way in which he has gotten it out.

The new WYBRO lists have been distributed through the mails, but if any one interested in panels has not received a copy they should be sure to get one. White Brothers will be very pleased to send them.

SEVEN MILLIONS IN SANDSTONE.

The value of the output of sandstone in the United States in 1911 was $7,-[illegible]86, a decrease as compared with 1910 of $199,151, according to figures just published by the United States Geological Survey. The leading sandstone-producing States in 1911 were New York, Ohio and Pennsylvania, in the order named.

In New York and Pennsylvania a part of the sandstone produced is known to the trade as bluestone.

ARCHITECTURAL MINIATURE.

University Museum To Display Ancient Capitol of India Carved In Ivory.

An entirely new departure in museum service to the public will be introduced for the first time in America, and probably in the world, with the opening in San Francisco on Sunday, November 24, at the University of California Museum at the Affiliated Colleges of a "52 Displays a Year" section. The first exhibit will be an elaborate miniature reproduction, carved in alabaster, of the famous Taj Mosal in Agra, the ancient capitol of India. This marble structure is one of the architectural wonders of the world and is shown in the facsimile to the last detail of its rich ornamentation.

The collections installed in the ever-changing weekly exhibit will be arranged in the lobby of the second floor and will be opened every Sunday morning remaining on view until the following Saturday afternoon.

Each exhibit will be a unit, telling a story, and illustrating some one point in the history of human civilization. No attempt will be made to have each collection an extensive one, but every one shown will consist of specially selected specimens chosen because of the meaning they convey.

The labeling will be along the same lines. Instead of lengthy printed descriptions accompanying each one of a multiplicity of specimens, thereby confusing the mind and wearying the visitor, the entire exhibit will be explained by one and only one general label, short enough to be read entirely through in one minute and yet embodying all the principal points of interest concerning the exhibit. This explanation will be given in simple language so as to be perfectly intelligible to any one able to read a newspaper. If any collection proves to be of such technical nature as to involve scientific terms for its understanding, it will not be put on exhibition.

Professor A. L. Kroeber, the Curator, expects the innovation to meet with aproval because in the year that the Museum has been open, he has found the San Francisco public hungry for information, provided the knowledge is presented concisely and illustrated by well chosen specimens in a clear cut way.

SEWAGE SYSTEM FOR ALTURAS.

ALTURAS (Modoc Co.), November 21. A proper sewage system for Alturas is the question now occupying the attention of the Town Trustees, who are making a thorough investigation that plans for this improvement may be shortly submitted to the voters. Nothing definite has been decided, but four districts with separate septic tanks is the plan now generally favored

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo. for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. Address,

Editorial Comment.

The action of the Agricultural College of the University of California demonstrates the fact that the people are awaking to the importance of the coming to the middle of January.

In several of the states of the middle west a plan has been hatched for providing for advisers and demonstrators in each county.

In the development of any work the most important point is to get an efficient practical educated farmer in every county under such a plan to give free advice regarding matters of better methods of farming will be completed a great result in a few years.

A vast fund of knowledge can be accumulated at experiment stations and agricultural colleges relating to improved farming methods. Experiments have demonstrated that yields of grain can be primed by proper seed selection, possibly cultivation, crop rotation and soil aeration, but the great problem is to take practical and full advantage of this knowledge. Farmers' institutes and good roads associations have been formed to look to these matters and to bring together experts and practical men to confer with farmers, explain improved methods and demonstrate [illegible] to [illegible] the efficiency of farming.

It seems to be desirable to bring the experts of the state [illegible] to every county where [illegible] applicants for appropriate [illegible] and to [illegible] to [illegible] the [illegible] to [illegible] to [illegible] to

notable churches of the world. Finally, a vast scheme of city improvements has been inaugurated, under the advice of M. Bonvard, architect for the city of Paris. It will include splendid boulevards and viaducts, asphalted streets, and a public garden, at an estimated total cost of $20,000,000, toward which the State government has already appropriated $3,500,000.

The Examiner in its ponderous editorial of last Sunday's issue describes prize fighting as a great national disgrace. In a double-pica sermon grouped around a picture of Johnson gloating over Jeffries, the heavy witted preacher of the Sunday Examiner, says that this disgrace represents one feature of our civilization and goes on to ask, How long will Lawmakers, Public Officials and Clergymen permit the scandal and shame of prize fighting to exist?

And one is prone to wonder how much the editorials of the Sunday Examiner count for? How low is the scale of human intelligence of the average reader of the Examiner? In the pink supplement of the same paper the Examiner employs its ablest men to describe the preparations for a prize fight. Nobody knows better than the Examiner that the prize fighting of today is a creation of the newspapers. Talk about the preachers and the law makers and the governors stopping prize fighting. Let the newspapers refuse advance page-writeups and cease to feature the sport and it will soon die of inanition. The princely income derived from the sport at present is due almost entirely to the free advertising of the great dailies.

The war on ground squirrels being conducted by the federal government is proving highly profitable to the farmers.

In a single month recently more than 115,000 of the pests were destroyed in San Joaquin County. A Federal official estimates this will mean a saving of $200,000 in crops in a single year.

This will be profitable even from an economic standpoint. For there is no more annoying pests of the grain fields that the ground squirrel and none that is harder to successfully combat. If the plague danger succeeds in getting rid of these rodents the state will profit in a twofold way. It will have gotten rid of a disease carrying and crop destroying pest at one and the same time.

NOT AS MOLLYCODDLISH AS THEY LOOKED.

"Them Greek soldiers in their fluted whit petticoats look as peculiar as a man with a full beard smoking a cigarette," commented the Chronic Grouch. "But from that we musn't make the mistake of judging that they are anything but first class fighting men. The old Romans used to make a regular business of parading the public streets in the day time in their nightgowns with wreaths of p'izon ivy or something of the kind lingerin' around their heads, but any time you figgered you had hit a convention of old women walkin' in their sleep you got most beautifully left. In spite of their looks, them fellers turned out some of the finest philosophy the world has ever seen and made the Roman nose feared and hated from one edge of the map plumb to the other. And the Greeks in their prissy little petticoats fight and bleed and die just as heroically as soldiers with their pants on. You can't tell by the looks of a toad how far he will jump."

FARM ACCIDENTS.

There were not as many Americans injured in the naval battles of Manila Bay and Santiago as were killed and otherwise injured in one year by corn husking and corn shredding machines in the one state of Wisconsin.

A bulletin of the Wisconsin Industrial Commission tells of these farm tragedies and casualties. The commission investigated the accidents and found that practically all of them were avoidable. Automatic safety devices on the machines and required skill by the operators of the machines would have prevented the suffering and the loss of life and the loss of money.

There is nothing very dramatic about farm tragedies, as there is about the tragedies of war. While for that reason less attention is centered on them, yet also for that reason it is easier to end them when attention is called to them.

Industrial commissions may have their victories no less renowned than The Hague.—Kansas City Star.

ALL WOULD PAY.

Suppose there were (which Heaven forfend!) a great European war. What would be its effect on us?

Immediately, it would be extremely good. Every great destruction calls for increased production to replace it. Every reduction in supply and increase in demand raises prices. And every great calamity, provided it leaves mouths to feed and money to buy, serves as an immediate stimulus. Times were never better, even in San Francisco, than the months following the destruction of the City. Labor was employed at high wages, and the insurance money flowed freely. The same condition exists internationally as the result of a great war. There is enormous consumption (mostly for waste and destruction), and there is plenty of money (all borrowed on the credit of the future). So the producing nations have a quick and rich harvest.

But the reckoning comes. It has come to San Francisco and to California. The obligations of a city rebuilt on borrowed money have to be met, which means that profits, for years, have to be sent East, rather than to be reinvested in the business or distributed among its owners. Every great destruction is a permanent loss of the accumulations of the past, and the wealth to replace it has to be subtracted from the accumulations of the present and future. Destruction has to be paid for, and in the long run, we all share in doing the paying. In the long run, any considerable war is an injury to the whole world. And a general European war would be so calamitous as to be disastrous. That is the chief reason for being confident war will not come.—Fresno Republican.

ESTIMATE FOR STATE BUDGET.

SACRAMENTO, Dec. 1.—The State budget the estimates for the support of the State institutions, salaries and building improvements, although not complete, or final, carries approximately $15,400,000. This budget consists of estimates for the general appropriation bill and the special appropriation bills to be introduced at the next Legislautre for the biennial period. How much the Legislature will cut the estimates is not known.

The general appropriation bill passed by the last Legislature carried $10,850,850, and the special appropriation bills—for improvements and for the erection of new structures—totaled $3,653,154.66, making a grand total of $14,504,004.66.

These figures for the budget are being presented from day to day to the State Controller and the State Board of Control by representatives from every department in the State Government. When the conferences are finished which will be not later than the first of next week—the Controller and the Board of Control will know to a cent what amounts are wanted to carry on the State Government for the next two fiscal years.

The State Controller is securing the figures for two purposes: To submit his estimate on the appropriations necessary for each department, and making recommendations to the Legislature for such appropriations, and to secure data for the State Board of Equalization—of which he is Chairman and ex-officio member—so as to get an estimate of the amount it will be necessary for the State to raise through taxation to carry the State Government through the two-year period.

COAL MINED LESS THAN A CENTURY.

The first mention of the occurrence of coal in the United States, according to the United States Geological Survey, is made in the journal of Father Hennepin, a French Jesuit missionary, who in 1679 recorded the site of a "cole mine" on Illinois River, near the present city of Ottawa, Ill. The first actual mining of coal was in the Richmond Basin, Va., about 70 years after Father Hennepin's discovery in Illinois, but the first records of production from the Virginia mines were for the year 1822, when, according to one authority, 54,000 tons were mined. Ohio probably ranks second in priority of production, as coal was discovered there in 1755. But the records of production date back only to 1838. The mining of anthracite in Pennsylvania began about 1790, and it is said that in 1807 55 tons were shipped to Columbia, Pa. Reports of the anthracite coal trade are usually begun with the year 1820, when 365 long tons were shipped to Philadelphia from the Lehigh region. Prior to this, however, in 1814, a shipment of 22 tons was made from Carbondale, also to Philadelphia, and in the following table the production is considered to have begun in that year. It is probable that the actual production prior to 1870 was between 2,500 and 3,000 tons.

The production for 1911 was 19[illegible],221,168 short tons.

The Influence Of Moisture On The Expansion And Contraction Of Concrete.

The formation of cracks has an important bearing on the life of concrete pavements, and in order to reach an understanding of all the factors involved in cracking, or, in other words, in the expansion and contraction of concrete, the office of Public Roads undertook a series of tests which early this year has progressed far enough to indicate the influence of moisture on expansion and contraction. A paper on these tests was read by Mr. Logan Waller Page, director of the Office of Public Roads, before the Ohio State Engineering Society, and has been reprinted in the Society's proceedings, from which the following abstract has been prepared.

Numerous cracks appear in many concrete structures soon after completion and the reason in most cases is not the failure of the concrete to resist the external loads imposed, but is due to the inherent contractive qualities of the concrete mass. The shrinkage due to a fall in temperature has been very carefully measured by a number of investigators, who quite generally agree that 0.0000055 in. per inch of length per degree Fahrenheit is the correct value of the contraction. The temperature changes are due not only to the variation of external temperature, but also to the chemical activity of the cement during the hardening process.

The fall in temperature of a mass of concrete caused by atmospheric change has long been recognized as being of sufficient magnitude to cause cracking. It has also been demonstrated, notably by the Boonton Dam Experiments, that very high temperature may be developed in large masses of concrete during the hardening process. In time, as the heat is dissipated by conduction and radiation, the temperature is bound to fall, with the production of enough tensile stress to cause cracking. Another source of contraction, that due to drying out of water from the concrete mass, is likewise known to exist, but the information is qualitative rather than quantitative.

Method of Making the Tests.

The tests were conducted on columns 8 in. square and 5 ft. long, and the concrete was mixed in the proportions of 1:2:4 and 1:3:6. The materials used were Portland cement passing the specifications of the American Society for Testing Materials, well graded, clean river sand, and crushed gneiss. Two consistencies were used—very wet and very dry. The very wet concrete was simply puddled into place, while that of very dry consistency was tamped into the mold with difficulty.

One-half-inch bars, square in cross section, were molded in the specimens 5½ in. apart. Upon removing the wooden forms these bars projected 1½ in. at each side of the specimens. Steel plugs with rounded conical points pointed were attached to the square bars, and measurements were taken between the points by means of a micrometer fitted to a specially designed frame. With this apparatus, readings could be taken accurately to a few ten thousandths of an inch.

As soon as the concrete had hardened sufficiently, the molds were removed and the initial readings taken. The temperature of the specimens and that of the air were noted at each reading of the micrometer, and all readings were corrected to constant temperature. In this way the influence of temperature changes either in the atmosphere or in the concrete were eliminated and the deformations obtained therefor represent the change in length of the concrete due to the effect of moisture alone.

Results of Measurements.

The results obtained agreed with those of previous investigators in showing that concrete expands when it is allowed to harden under water and contracts when allowed to harden in air. Those specimens which hardened in air showed a contraction almost from the beginning of the test. A very slight expansion, too small to be plotted, took place during the first day or two. The tests indicate that the 1:2:4 mixture contracts more than the 1:3:6 mixture; likewise that the greater portion of the contraction takes place within the first three months and fully 50 per cent of it within the first month.

The amount of the maximum contraction at six months is 0.00068 in. per inch in length of 1:2:4 concrete, a figure which goes far toward accounting for the rupturing of many concrete constructions, even when temperature changes are negligible. If it is assumed that the ends of a concrete construction are rigidly held and the concrete is allowed to harden in air, the tendency toward shrinkage would immediately create a tensile stress in the concrete mass, and its amount at the end of six months would, if this were possible, be equal to 2,000,000 multiplied by 0.00068, or 1,360 lbs. per square inch, if the modulus of elasticity is assumed to equal 2,000,000 lbs. per square inch in tension. Concrete is capable of withstanding only from 100 to 200 lbs. in tension, so there even where there is absolutely no temperature change, it is impossible for a plain concrete construction to remain intact when enough resistance is offered to its free contraction due to drying. The decrease in length of a mass of concrete 100 ft. long due to the drying out of the moisture would be about 0.81, or roughly ¾ in. To cause the same amount of contraction, a fall in temperature of 124 deg. Fah. would be necessary, but this is a range of temperature which few concrete constructions receive. It would seem from the above figures that the temperature changes in some concrete constructions play but a secondary role in the production of cracks.

A test was likewise conducted on a specimen of 1:2:4 concrete reinforced with ½-in. round rods placed 1 in. apart and extending the entire length of the test piece. The contraction of the concrete in this case amounted to 0.003 in. per inch of length, as compared with about 0.00068 in. in the corresponding uninreinforced specimen. The steel in this specimen is undoubtedly receiving high compression from the results of the shrinkage of the concrete.

Concrete Hardening Under Water.

In obtaining the change in length of concrete under water, the specimens were first allowed to harden for two days in air, then measurements were taken with the micrometer. After measurement, they were immersed in water in a horizontal position and, in order to permit their free expansion, they were laid on rollers. The results of the measurements showed that in every mirture of concrete tested a decided expansion took place. At the end of three months the specimens were still expanded and exhibited at that period a change of approximately 0.0001 in. per inch of length—a value from one-fourth to one-sixth of the contraction of the same kind of concrete when stored in air. After about one month, the length of the specimen remains practically constant, as nearly as can be judged from the results of the micrometer measurements.

When the ends of a concrete construction are fixed, the tendency toward expansion will be resisted with a resulting compressive stress at the end of three months of 2,000,000 multiplied by 0.000075, or 150 lbs. per square inch.

It thus becomes plainly evident that when concrete, which is continually wet, is prevented from free expansion, it may receive high initial compression from this cause. It is likewise evident that the steel in reinforced concrete beams may be subjected to high initial tension from the effects of this expansive tendency.

Measurements were also taken on specimens which were kept wet for about two weeks by means of a covering of wet burlap, and were then allowed to dry out. It was noted that, just as soon as the specimens were allowed to dry, they began to contract, and the ultimate amount of contraction was in excess of 0.045 per cent. When specimens which have contracted through drying are immersed in water, expansion again takes place.

The combination of water with the cement, with the resulting formation of colloids or gelatinous bodies having greater volume than that of the cement in its untreated condition, may account for some of the expansion. When the water is allowed to dry out from the concrete mass the colloids shrink in volume owing to the loss of water and the concrete mass therefore shrinks. It is not at all improbable that the expansion and contrac-

tion of the rock aggregate to be the change in moisture content as an influence in causing a change in the length of the concrete, some of which is a component.

Practical Phenomena of Expansion and Contraction

These tests serve to explain the cause of many defects in concrete construction and may suggest means for rectifying them. The fact that concrete will pull away from its bond in lengthening due to drying out explains the presence of cracks in many such structures. In the case of a concrete roadway provided with expansion joints every 20 ft. the contraction is liable to shrink it enough due to the drying out of the moisture from the concrete, and that is probably sufficient reason for cracking, considering the frictional resistance offered to free movement between the concrete and the foundation.

Many sidewalks divided into slabs and made with a top coating of one to one mortar laid on concrete soon become distorted in short time. This phenomenon is readily explained by the fact that the rich mortar top coat contracts a good deal more than the concrete base. Warping may even be explained owing to the retained moisture caused by a poorly drained foundation. The fact that the surface coat is rich is sufficient of explanation and ought to be owing to wetting and drying. The concrete is sure to crack and cause stress between the two coats which tends to separate them, with the resulting destruction of the entire integration of this coat. This is also noticed in pavements in which the bond between the wearing coat and concrete is weak because the wearing surface has been laid after the concrete base has hardened.

It has been noted that the concrete mud to contain voids which when allowed to dry out and again filled, become watertight. The leakage in a great many instances can be asserted to be formation of cracks due to shrinkage caused by the porous condition of the concrete. Even when the concrete is watertight and it expands in length the joints are closed and the leakage stops.

If during a period of high temperature or a concrete mixture too dog it, each layer of hard contact wanders in the time. The more dries out and the longer might shorten. The total contraction will be many, plus 0.0005, or 0.0015 in. A united foot length of concrete would possibly shorten, therefore, 0.0015 multiplied by 1000, or 1.5 in. In large masses of concrete the heat generated by the chemical action of the cement in grouping may cause to accumulate there will be an additional contraction due to subsequent loss of this heat.

◆

PERMITS ISSUED DURING WEEK OF NOVEMBER 23 TO NOVEMBER 30, 1912.

	No.	Amount
Class		
Flats	3	
Alterations	41	18,150
Total	117	$386,989

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN DIEGO, CAL. Apartment house, 2 stories, \$5,000. Architect, George Wagner Co., owner, Fifth St. and F. The building will be 50 feet and contain 6 apartments

heating installed. Coin and safety deposit vaults will be let separately. The exterior of the building will be faced with either pressed brick or artificial stone. Plans are complete and figures are being taken.

Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Bank, 2 story and base. Class A construction, $85,000. Architect, S. B. Marston, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena National Bank. Contractor, William C. Crowell, Chamber of Commerce Bldg., Pasadena. Contract price, $85,000. Note—A number of special fixtures, vaults and interior finish is not included in this contract.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Pier work, extending present pier, frame and concrete. Cost not stated. Engineer, Assistant State Engineer Newmann, Ferry Bldg., S. F. Owners, State of California. Plans for the extension of the south arm of the 16th street pier have been approved and figures are being taken. Plans can be secured from the Assistant State Engineer at the Ferry Building. Bids will be opened on December 5th.

SANTA BARBARA, SANTA BARBARA CO., CAL.— Bridges, 2 reinforced concrete. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Plans for two reinforced concrete bridges, both over Mission creek, one at East Boulevard and the other at East Haley Street, have been approved by the City Council. Bids for the work are now being taken and will be opened by the Council on December 12th. Plans may be secured by applying to City Clerk Alfred Davis, Santa Barbara.

LOS ANGELES, CAL.—Wharf, wooden pile construction. Cost not stated. Engineering Department Los Angeles. Owners, City of Los Angeles. The Harbor Advisory Board has notified the Board of Public Works to construct the municipal wharf by forced account. The wharf will be erected along Water street and is to be 676 feet in length. A pile driver and other necessary equipment will be purchased or leased. Work is to be undertaken at once.

Building Contracts.

PARK BAR, YUBA CO., CAL.—Bridge, reinforced concrete type. Cost not stated. Engineers, Thomas & Post, Los Angeles. Owners, Yuba County. Contractors, Portland Concrete Pile Co., Phelan Bldg., S. F. Contract price, $38,400.

CHURCHES.

SEATTLE, WASH.—Church, 2 story and base, brick, $50,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. The building will be 56x103 feet, and of the steel and brick type of construction. The Colonial style of architecture has been used. The first floor will contain an auditorium, seating 500 people, choir room and a vestibule. A large lecture room, which will hold nearly as many people as the main auditorium, and Sunday school rooms will be located in the basement. A sub-basement will contain the choir room, and heating system. There will be a tower 125 feet 6" in height. Interior will be finished in pine and redwood. The exterior will be faced with pressed brick. Working drawings are to be complete and figures will be called for [illegible]

LOS ANGELES, CAL.—Church, 1 story and basement, reinforced concrete. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg. L. A. Owners, Church of the Latter Day Saints. The building will cover an area of 85x100 feet. The main auditorium will have a seating capacity of 750 people. Basement will contain an assembly room 65x85 feet, class rooms and kitchen. The interior will be finished in pine and ornamental plaster. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

FACTORIES & WAREHOUSES.

OAKDALE, STANISLAUS CO., CAL.—Creamery, 1 story and [illegible] brick, $3,000. Architect, Kahn & Morrel, Yosemite Theatre Bldg., Stockton. Owners, Oakdale Creamery Co. Plans for a modern creamery plant are complete and figures are being taken. The building will cover a considerable area. A refrigerating plant and other machinery will be installed by the owners. Interior of the building will be finished in pine and ornamental plaster. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Factory, 1 story and base, reinforced concrete, $30,000. Architects name not given. Owners, Inland Iron Co., Fresno. Plans for two buildings, which are to be erected on H street covering an area of 50x100 feet, are to be received. Construction will be of reinforced concrete throughout. Bids on the received plans will be called for at once. Firms desiring further information on this work should apply to the Manager, Inland Iron Co., Fresno.

LOS ANGELES, CAL.—Factory buildings, 3, 1, 2, and 3 story and base. Class A construction. Cost not stated. Architects, Train & Williams Exchange Bldg., L. A. Owners, Bradford Baking Co., 401 North Avenue 20. The present one-story building, which is 60x75 feet, will be increased to four stories. Plans are also being prepared for a two-story building, 75x175 feet and for a one-story building, triangular in shape, 150x200 feet. All construction will be of the reinforced concrete type with composition floors and roof slabs, metal sash and frames and fireproof doors. Steel elevators will be installed. The exteriors of the buildings will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg. L. A. Owners, Church of the Latter Day Saints. The building will cover an area of 85x100 feet and will be Class A construction. The exterior will be faced with pressed brick. Working drawings are to be complete and figures will be called for [illegible]

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg. L. A. Owners, Church of the Latter Day Saints. The building will cover an area of 85x100 feet and will be Class A construction. The exterior will be faced with pressed brick. Working drawings are to be complete and figures will be called for [illegible]

LOS ANGELES, CAL.—Garage, 1 story and basement, brick. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg. L. A. Owners, Church of the Latter Day Saints. The building will cover an area of 85x100 feet and will be Class A construction. The exterior will be faced with pressed brick. Working drawings are to be complete and figures will be called for [illegible]

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick. Cost not stated. Architects, Krempel & Erkes, Henne Bldg., L. A. Owners, Brunswick-Balke-Collender Co. The building will be erected on East 3rd street and will have a foundation 80x120 feet. Mill construction will be used. There will be a cement first floor. There will be one elevator, metal window frames and sash. Bids will be called for on reinforced concrete floors, frame and brick curtain walls. The exterior of the building will be faced with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Factory, 4 story and base, brick. Cost not stated. Architects, Emil Seacht & Sons, Commonwealth Bldg., Portland. Owners, Nicolai Door and Lumber Co. This project is as yet entirely tentative. A company has been formed with Mr. Nicolai at its head, but for what purpose is not stated. The architects have been commissioned to prepare plans for a building 100x175 feet. Further particulars will be given as the plans progress.

Contracts Awarded.

LOS ANGELES, CAL.—Factory, 5 story and base, reinforced concrete, $200,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Ford Motor Car Co. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $200,000. Note—This figure does not include the plumbing, electric work, elevators or heating. Bids will be called for shortly for these parts of the work and a separate contract will be let for the interior finish of the display rooms.

LOS ANGELES, CAL.—Mill, 3 story and base, mill construction. Cost not stated. Architect's name not given. Owners, Great Western Milling Co. Contractors, Davidson Construction Co., Union Oil Bldg., L. A. Note: This contract was been taken on the percentage basis.

FLATS.

OAKLAND, CAL.—Flats, 2 story and base, frame, $3,000. Architect, none. Owner, William Mann, 19149 7th Ave., Oakland. The building will contain [illegible] rooms and two baths. There will be erected for two five room flats. Interior finish will be of pine and redwood with some hardwood floors. Bathrooms will be finished in tile. There will be open fire places and brick or tile mantels. Automatic water heaters will be installed. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGES.

SAN FRANCISCO—Automobile building, 1 story and base. Class A construction, $100,000. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Pierce-Arrow Co. This building has been mentioned here several times before. Plans have been out for bids for the last ten days. Bids were opened in the architect's offices on Saturday last and the award of contract will be made shortly.

SAN FRANCISCO—Garage and sales rooms, [illegible] story and base, reinforced concrete. Cost not stated. Architect, W. H. Weeks, 75 Post St., S. F. Own-

ers, Somers Estate. The building will be erected on property recently purchased at the northwest corner of Van Ness and Pine street. The building will have a frontage of 50 feet on Van Ness avenue and 118 feet on Pine. Leases have already been made on a part of the building. Construction will be of reinforced concrete throughout with a cement floor. There will be metal window sash and frames. Offices and sales rooms will be finished in tile and hardwoods. The exterior of the building will be faced with cement plaster. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Garage, 1 story, frame, $1,000. Architect, Building Inspector, Berkeley. Owners, City of Berkeley. The building is to be erected to house the police department machines. The interior will be finished in redwood and there will be a cement floor. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken. Bids will be opened on December 3rd.

OAKLAND, CAL., Garage, 2 story and base, brick, $12,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Twelfth street near Oak. There will be a cement floor and special gasoline storage tanks. The interior of the office will be finished in redwood. The balance of the building will be given over to storage space and repair shop. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO Garage, 2 story and base. Class C, $25,000. Architects, Ross & Burgren, 310 California St., S. F. Owners, Newbauer Investment Co. Contractor, F. L. Hansen, Monadnock Bldg., S. F. Contract price $25,000.

GOVERNMENT WORK AND SUPPLIES.

Prospective Bidders, Subtreasury.

The following firms have made application for plans and specifications of the San Francisco Subtreasury, bids for the construction of which will be opened on January 6th 1913.

A. B. Stannard, U. S. Rubber Co. Building, New York city.

Lindgren Co., San Francisco, Cal.

Grant Fee, Monadnock Building, San Francisco, Cal.

J. M. Weise, Omaha, Neb.

Lange & Bergstrom, Monadnock Building, San Francisco, Cal.

The Conners Bros., Co., Lowell, Mass.

C. C. Keenan, No. 1 Madison avenue, New York city.

Interurban General Contracting Co., 5 E. 42nd street, New York city.

King Lumber Co., Charlottesville, Va.

W. H. Maxwell, Phoenix, Ariz.

Southwestern Construction Co., Central Building, Los Angeles, Cal.

McLeren & Peterson, Williams Building, San Francisco, Cal.

Reclamation Service, Gates.

The following bids were received at the office of the U. S. Reclamation Service, Los Angeles, Cal., November 13 for furnishing high-pressure gates for the Arrowrock dam, Boise project, Idaho:

Pelton Water Wheel Co., San Francisco, Cal., $15,823, delivery Harrisburg, Pa., 120, 180, and 210 days.

Joshua Hendy Iron Works, San Francisco, Cal., $11,489, delivery Sunnyvale, Cal., 100, 120, and 135 days.

Union Iron Works, San Francisco Cal., $33,750; delivery San Francisco, Cal., 150, 170, and 190 days.

Walker Mfg. Co., Denver, Colo., $31,320 delivery Denver, 84, 112, and 126 days.

Hinman Hydraulic Mfg. Co., Denver, Colo., $30,916; delivery Denver 90, 120, and 150 days.

Steacy-Schmidt Co., York, Pa., $27,000; delivery York, 175, 200, and 215 days.

Wheeling Mold & Foundry Co., Wheeling, W. Va., $26,100, delivery Wheeling, 120, 150, and 165 days.

Bethlehem Steel Co., South Bethlehem, Pa., $33,414.50, delivery South Bethlehem, 120, 150, and 165 days.

Coffin Valve Co., Boston, Mass., $31,125, delivery Neponsett, Mass., 100, 130, and 150 days.

Otis Elevator Co., New York city, $29,475, delivery Chicago or Harrison, N. J., 140, 190, and 220 days.

Fulton Iron Works, Los Angeles, Cal., $38,419; delivery Los Angeles, 125, 185, and 15 days.

Millwork.

The light house inspector, 19th district, Honolulu, T. H., opened on Oct. 29 the following bids for certain millwork in connection with dwellings at the Kilauea Point light station.

A. B. Jorgenson Mill Co., Honolulu, T. H., $566.23, accepted.

Honolulu Planing Mill, $669.

Allen & Robinson, $679.

Santa Barbara, Plaster Models.

The following bids were opened at the office of the supervising architect, Treasury Department, Washington, D. C., November 9 for furnishing plaster models in connection with the U. S. post office, Santa Barbara, Cal.:

Lombard & Ludwig, Washington, D. C., $1,113.

Ernest C. Bairstow, Washington, D. C., $1,160.

Pipe and Fittings.

The following bids were received on October 26 at the office of the light house inspector, 19th district, Honolulu, T. H., for furnishing pipe and fittings for water pipe line, Mokapuu Point light station, Oahu, T. H.

E. O. Hall & Son, $4,133.75.

Honolulu Iron Works, $4,061.50

Catton-Neill & Co, $4,106.92.

All bidders are of Honolulu.

Prospective Bidders, Pearl Harbor.

The following firms have applied for plans and specifications of the new buildings to be erected at the Pearl Harbor naval station. Bids will be opened on December 21:

H. W. Johns-Manville Co., Madison avenue and 41st street, New York city.

Penn Bridge Co., Beaver Falls, Pa.

R. S. Bishop, Washington, D. C.

Spaulding Construction Co., Portland, Ore.

U. S. Steel Products Co., 30 Church street, New York city.

W. S. Babcock, 17 Battery Place, New York city.

Desmoines Bridge and Iron Works, Pittsburgh, Pa.

E. H. Williams Chalmer Munday

Munday & Williams

Attorneys-at-Law

Special Attention Given to Building Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

San Diego, Cal., Elevator.

The contract for the installation of an electric passenger elevator in the U. S. post office at San Diego, Cal., has been awarded to the Otis Elevator Co., Washington, D. C., at $1,473; time to complete March 15, 1913.

Pearl Harbor, H. T., Crane.

No action has yet been taken by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., regarding the award of contract for furnishing a locomotive crane for delivery at the naval station, Pearl Harbor, H. T., bids for which were opened November 2.

Permanent Projects, Panama Canal.

The permanent facilities at the Atlantic and Pacific entrances to the canal will include the following projects:

Piers.

The piers for commercial use at Balboa will be built at right angles to the axis of the canal, with their ends about 2,650 feet from the center line of the canal channel. They will be about 1,000 feet long and 200 feet wide, with 300-foot slips between and with landings for small boats at the head of each slip for the full width between piers. The construction of one pier only will be undertaken at first. The old French steel wharf, about 1,000 feet long, will be retained for some time in the future for commercial purposes.

Two wharves and one pier are under construction at Cristobal behind a mole and breakwater built out from shore toward the canal channel and parallelling the boundary line between Canal Zone and Panamanian waters. An article on these docks, including their superstructures and cargo-handling appliances, was published in the Canal Record of October 16, 1912. Primarily, these docks are to meet the commercial requirements of the Panama Railroad, but should their be enough traffic after the canal is completed to justify it four other piers, each about 1,000 feet long and 209 feet wide, with 300-foot slips between, will be constructed.

Drydocks.

The main drydock will be situated at Balboa and will be capable of accommodating any vessel that can pass through the canal locks. It will have a usable length of 1,000 feet, a depth over the keel blocks of 35 feet at mean sea level, and an entrance width of 110 feet. The entrance will be closed by miter gates similar to those used in the locks. The drydock will have a rock foundation, and its sides will be lined with concrete. Its equipment

will include a 40-ton locomotive crane, with a travel on both sides.

For vessels of smaller type an auxiliary drydock will be built at Balboa, in lieu of the marine railways originally contemplated. It will have a usable length of 350 feet, a width at entrance of 71 feet, and a depth over the keel blocks of 13½ feet at mean sea level. It will be provided with a floating caisson. The 40-ton locomotive crane on the main drydock will be utilized for this dock also. The work of providing space for these drydocks, as well as for the new shops, is now under way, and requires the excavation of about 300,000 cubic yards of material from the northwest face of Sosa Hill. The excavated material is used for filling the site for the shops and terminal yard.

On the Atlantic side it is proposed to retain the old French drydock at Mount Hope, which has a usable length of 300 feet, a width at entrance of 50 feet, and a depth over the sill of 13 feet at mean sea level. It was the opinion of the board in charge of the dock projects that the commercial requirements in sight would not warrant the construction of a drydock at Cristobal capable of accommodating large vessels, in view of the building of a drydock at Balboa, to which any large vessel on the Atlantic side could be taken and returned in case it was found necessary to dock it for repairs.

Coaling Plants.

The plans contemplate furnishing vessels with fuel, fresh water, and supplies of all kinds. The main coaling plant will be situated on the north end of the island opposite dock No. 11, Cristobal. It will be capable of handling and storing 200,000 tons of coal, with a possible increase of 50 per cent. One hundred thousand tons of the total normal storage is subaqueous. The plant will have railroad connections with the mainland over a bridge of the bascule type, which will cross the French canal at a point about half a mile south of the Mount Hope drydock. The preliminary work on this plant has been begun by the Panama Railroad.

A subsidiary coaling plant will be situated at Balboa at the outer end of the southeast approach wall of the drydock, having a frontage of 500 feet thereon, adapted for discharging vessels. This plant will be capable of handling and storing 100,000 tons of coal, with a possible increase of 50 per cent. Fifty thousand tons of the total normal storage is subaqueous.

Fuel Oil Supply.

In addition to coal facilities will be provided at Cristobal and Balboa for supplying shipping and the canal works with fuel oil. In line with this plan four steel tanks of 40,000 barrels capacity have each been contracted for recently in the United States. A brief description of these tanks was published in the Canal Record of October 9, 1912.

Shops.

The main repair shops will be built at Balboa and are designed to maintain the following equipment.

1. Lock, spillway, and power-plant machinery. 2, water and land equipment retained for the maintenance of the canal; 3, rolling stock and equipment of the Panama Railroad, 4, mechanical apparatus connected with the coaling plants, fortifications, cold-storage plant, wireless stations, etc.; 5, the making of repairs, etc., required by commercial vessels and by private individuals and corporations, 6, the making of such repairs as may be required by vessels of the United States Navy.

The approximate floor area of the principal shop buildings will be as follows:

Building	Area. (Sq. Ft.)
Machine, erecting and tool shop	68,400
Forge shop	32,400
Steel storage shed	18,080
Boiler and shipfitters' shop	46,800
General storehouse	96,000
Paint shop	12,760
Car shop	38,800
Planing mill, carpenter, and pattern shop	49,000
Galvanizing shop	5,620
Lumber and equipment store shed	67,060
Steel, iron and brass foundry	37,600
Coke shed	5,070
Boiler house	2,500
Pattern storage building	14,400
Round house	24,000
Office building	9,500
Total	525,990

In addition to the above a number of subsidiary buildings will be erected. All of the structures will be of permanent construction with steel frames. The sides and ends will be left open for ventilation and light, protection from sun and rain being afforded by overhanging sheds.

The main metal working shops, including machine, erecting, and tool shops, the forge and pipe shop and the boiler and shipfitters' shop, together with the shed for the storage of steel, will be placed end on between the drydock and repair wharf. The general store house, foundry, woodworking shops, subsidiary buildings, and office building will be built parallel to the line of the drydock and water front, northeast of the main shops. Two lines of railroad tracks will extend past each end of the main metal working shops, and one track through their center. The main shops will be provided with overhead traveling cranes, the crane runways being extended through each end of the buildings over the railroad tracks. As far as possible the present machinery will be utilized in the new shops. All of it will be electric driven, including both individual and group drive.

It is proposed to retain the drydock shops for making repairs on the Atlantic side until sufficient experience is had to determine the extent and character of repair facilities necessary.

Floating Equipment.

For the handling of the lock gate leaves, as well as for other canal requirements and commercial and general wrecking purposes one or two powerful floating cranes will be purchased. For handling vessels of the largest size at Cristobal and Balboa two high-power harbor tugs will be provided, and for the transportation of coal, fuel oil, and fresh water alongside of vessels a sufficient number of barges and lighters will be placed in service. The steel barges now in use by the Canal Commission can be used to good advantage after the necessary modifications have been made in the barge and lighter service. A tender for passengers and mail will be furnished at each terminus also, provided the business justifies it.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, $40,000. Architect, Bernard J. Joseph. First National Bank Bldg., S. F. Owner, David Bibero. The hotel will be erected south of Mission street, and will be arranged for several stores on the first floor besides the hotel lobby. The upper floors will be subdivided into 56 rooms and several baths. There will be elevator service, steam heat and running hot and cold water. Interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 7 story and base. Class C construction, $80,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected in the south line of Ellis street near Mason. The first floor will contain stores and the main hotel office and lobby. Upper floors will be subdivided into about 150 rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. Lobby and office will be finished in hardwoods, tile and ornamental plaster. Hot and cold running water will be provided for all rooms. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

SAN FRANCISCO—Hotel annex, 8 story and base, brick and steel, $100,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, Mary L. Phelan. This work has been mentioned here several times before. The building is intended for an annex to the Argonaut Hotel. The new portion of the building will practically double the present capacity of the hotel. There will be stores on the first floor. The main hotel offices and lobby will remain in their present location. The interiors of the guest rooms will be finished to correspond with the other rooms. Heat will be supplied from the present system. The exterior will be faced with terra cotta. Plans and specifications are complete and figures will be called for within a week or ten days.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, $65,000. Architect, Woodworth Wetherell, 143 2nd St., S. F. Owner, J. G. Barker. The building will be erected in the north line of Post street near Larkin, and will contain in the neighborhood of 120 rooms and baths. The first floor will be occupied by stores and the hotel lobby and offices. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and oak. Bath rooms will be finished in tile. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be taken within a week or ten days.

OAKLAND, CAL.—Hotel plastering and decorating. Cost not stated. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Fred Müller. The

architect has completed plans and specifications for the interior decorating, ornamental plaster work and steel treatment for the seven story and basement brick and steel office building in the course of construction at Taft and Grove streets. Bids are being taken for the above mentioned work.

PORTLAND, ORE. Hotel, 6 stories and base, reinforced concrete. Cost not stated. Architect Edward T. Foulkes, Crocker Bldg. S. F. Owner's name withheld. The building will be erected at the corner of 7th and Everette streets. The first floor will contain several stores besides the hotel lobby. Upper floors will be subdivided into about 100 rooms and 17 baths. There will be steam heat, elevator service and a vacuum cleaning system. Plans provide for hot and cold running water in all rooms. Ladies will be finished in hardwood and tile. Bath rooms will have tile floors and wainscot. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

PORTLAND, ORE. Hotel, 4 stories and base, brick, $50,000. Architect Lewis L. Thompson, Yeon Bldg. Portland. Owner's name withheld. The building will cover an area of 20x125 feet, and will be arranged for stores and the hotel lobby on the first floor. Upper floors will contain a total of 100 rooms and 20 baths. There will be steam heat, elevator service and vacuum cleaning system. The interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared and bids will be called for within the next week or ten days.

FRESNO, FRESNO CO., CAL. Hotel annex, 4 story and base, brick, $40,000. Architect, Eugene Mathewson. Plans. Owner, T. C. White. This work will be in the nature of an addition to the California Hotel at the corner of Merced and I streets. The first floor of the annex will contain a modern restaurant. Upper floors will be arranged for a total of about 80 guest rooms and a number of baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

TAFT, KERN CO., CAL. Hotel, 2 story and base, brick, $20,000. Architect, I. A. Felter, Taft. Owner Mrs. B. Bevers. The building will cover an area of 40x70 feet and will contain about 60 rooms on the upper floor. Hotel entrance, lobby and store on the first floor. There will be running hot and cold water in all rooms. Interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

LOS ANGELES, CAL. Hotel, 1 story and base, brick. Cost not stated. Architect, Lemuel L. Jones, 1 W. Helman Bldg., L. A. Owner, J. P. Patton. The building will cover an area of 30x125 feet. The first floor will contain the entrance, office and lobby. Upper floors will be subdivided into 60 guest rooms and a number of general baths. There will be steam heat, elevator service and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

TORRANCE, LOS ANGELES CO., CAL. Hotel and [illegible] stories and basement, brick and [illegible] Architect Dennis J. Greene, 50 Hill St., L. A. Owner, Torrance Land Co. The building will be steel frame. There will be two stores on the first floor and [illegible] rooms on the second floor. Interior will be finished in pine and redwood. Hot and cold running water will be supplied to [illegible] The exterior of the building will be faced with pressed brick. Plans are complete and the work will be let by contract on or about the [illegible] week.

Contracts Awarded.

LOS ANGELES, CAL. Hotel, 3 story and [illegible] brick, $50,000. Architect [illegible] Story Block, Main and Fifth Sts. Owner, H. Patton. Contractor, George M. Ewing, Los Angeles Investment Bldg., L. A. Contract price, $45,000. Note. Tenders invited is drawn excluding the plumbing, heating and vacuum cleaning systems.

ing will contain seven rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a hot water heating system installed. Open fire places and brick or tile mantels will be used in the living room. Bath will be finished in tile. The exterior of the house will be covered with brick veneer and rustic. Plans are being prepared.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, $4,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, George Cummings. The house has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic. Plans are being prepared.

SAN FRANCISCO.-Residence, 2 story and base, frame, $3,500. Architect, C. Jensen, 1 Columbus Ave., S. F. Owner, Theo. Bros. The dwelling will contain 10 rooms and bath. A wagon shed will be built in connection. The interior of the house will be finished in some and redwood with some walnut panels. There will be open fire places and tile or brick mantels. Bath room will be wainscotted with tile. The exterior of the house will be covered with brick veneer and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL. Residence, 2 story and [illegible] frame, $20,000. Architect, [illegible] Peter Weeks, Mutual Bank Bldg. Owner, Edson F. Adams. The handsome dwelling will be erected at Sea View and Lincoln avenues, and is been designed to contain 15 rooms, baths and sleeping porches. The interior will be finished with pine, redwood, hardwoods and white enamel. Oak floors will be used throughout except in the hall rooms, which will have composition floors. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. The [illegible] and terrazzo will be used [illegible]. The exterior of the building will be covered with pressed brick veneer. Plans are complete and figures are being taken by the architect.

PASADENA, LOS ANGELES CO., CAL. Residence, 2 story, attic and [illegible] frame, $75,000. Architects, T. [illegible] Jr. & Co. Title Ins. Bldg., L. A. Owner, R. Rochester, Jr. The building will occupy a two-acre site on Oak Knoll and is to be designed in the Southern Colonial style. The site will cover an area of 74,000 sq. ft. and will contain sixteen living rooms and two baths. Interior finish will be of pine, white enamel and mahogany. Hardwood floors will be used throughout. There will be furnace heat, an automatic water heater and [illegible] fire places. Mantels will be of brick. Baths will be finished in tile. A two-story garage will be [illegible] of the property. The exterior of the building will be covered with [illegible] plaster on metal lath. Plans are being prepared.

SAN JOSE, SANTA CLARA CO., CAL. — Residence, [illegible] story and base, frame, [illegible] Architects, Charles E. Shat-

tuck and Andrew P. Hill, Jr., Supervisors of Manual Arts, San Jose Normal School, San Jose. Owner, C. A. Hayes, San Jose. The dwelling will contain ten rooms and several baths. A two-story frame garage will be erected on the lot. Each sleeping apartment will have a glass enclosed sleeping porch. There will be open fire places and furnace heat. Mantels will be of tile and brick. Interior will be finisaed in mahoany and pine. Oak floors will be used throughout. The exterior of the building will be finished in veneered pressed brick to the second floor line and with cement plaster above that point. Plans are being prepared.

SCHOOLS.

OAKLAND, CAL. School, 2 story and base, reinforced concrete. Cost not stated. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. he following is a complete list of all prospective bidders for the general construction of the College Avenue School, Oakland. Bids for the construction will be opened on December 5th by the Oakland Board of Education: Van Sant-Houghton, E. J. Anderson, J. W. Carr, Geo. E. Burlingame, O. B. Ackerman, C. C. Christiansen, Crane Co., Isaac Penny, Jas. Rountree, Boyd & Kerr, J. H. Pedgrift, Williams Bros. & Henderson, Carnahan & Mulford, Wm. A. Newmann.

STANISLAUS SCHOOL DISTRICT, STANISLAUS CO., CAL.—School, 1 story frame, $6,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Stanislaus School District. The building has been designed for a district school and will contain but two class rooms. Interior finish will be of pine or redwood. No central heating system will be installed. The exterior of the building will be covered with rustic. Plans are being prepared.

GALT, SACRAMENTO CO., CAL.—School, 2 story and base, brick and steel, $45,000. Architects, Russell & Smith, Humboldt Bank Bldg., S. F. Owners, Galt School District. The building will contain eight class rooms, assembly hall, a library and principal's office. There will be steam heat. Exterior will be faced with brick. A large scheme has been planned, including two wings to the main portion of the building, which will give a total of 14 rooms. Only the main building will be erected at the present time. Working drawings are nearly complete and figures will be called for within a few weeks.

LACY, WASH. School, 3 story and base, brick and steel, $55,000. Architect, C. E. Mahon, Savage-Scofield Bldg., Seattle. Owners, St. Martin's College. The architect has just been commissioned to prepare plans for a new administration building and is now at work on the preliminary studies. No details of construction have been decided upon. Full particulars of the work will be given as the plans progress.

SAN FERNANDO, LOS ANGELES CO., CAL. School, 1 and 2 story and base, reinforced concrete, $40,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando School District. Plans for a domestic science and manual training building have been approved and bids will be opened on December 23rd. The domestic science building will be 137x69 feet and the manual training building will be 92x88 feet. Construction will be of the slow burning type. Interior finish will be of pine. The exteriors of the buildings will be faced with cement plaster. Red clay tile roofs will be used. Plans may be secured from the architects. Separate bids on various parts of the work are to be taken.

Contracts Awarded.

LOS ANGELES, CAL.—School, 3 story and base, brick, concrete and steel, $250,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, City of Los Angeles. Contractors, Somers & Lund, Security Bldg., L. A., general construction with a certain deduction, $220,680; Machinery and Electric Co., 351 North Main St., L. A., heating and ventilating, $24,780. The building is known as the Boyle Heights Intermediate School.

SEWERS, STREET WORK AND WATER SYSTEMS.

KLICKITAT FALLS, WASH. Electric Power plant, $1,000,000. Engineer's name not given. Owners, Fleishackers Interests, S. F. The Northwestern Electric Co., controlled by the Fleishackers of San Francisco, have announced their intention of spending a million dollars in the construction of a large electric plant at Klickitat Falls. Particulars of the enterprise have been refused at the headquarters of the owners.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO.—Stores, 1 story and base, brick, $10,000. Architects, G. A. Dodge and E. W. Van Trees, S. F. Owner's name withheld. Plans for this building show several stores and a nickelodeon. A site in the west side of Hyde street near Union has been secured. Interiors will be finished in pine and redwood. There will be patent store fronts. The exterior of the building will be faced with cement plaster. Plans are being prepared. Notice will be given when bids are called.

MARTINEZ, CONTRA COSTA CO., CAL.—Stores and theatre, 2 story and base, brick, $25,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, H. J. Curry. The building will occupy a corner site and has been designed for several stores, a saloon and moving picture theatre. Interiors will be finished in pine. There will be patent store fronts, considerable tile and mosaic and a central heating system. The exterior of the building will be faced with pressed brick. Plans are complete and the architects are now taking figures on the work.

TURLOCK, STANISLAUS CO., CAL.—Stores, 1 story and base, brick, $10,000. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, A. V. Schleppelman. The building will be erected on a corner lot and will be 50x100 feet. There will be two stores. Interior finish will be of pine. There will be patent store fronts and large plate glass display windows. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LOS ANGELES, CAL.—Stores and offices, 9 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co., Fred Barman, president, 201 East 5th St., L. A. A site has been secured at the northwest corner of 5th and Broadway and construction will be undertaken as soon as plans can be prepared. The project is financed by the Aronson-Gale Co. There will be several stores on the first floor. Upper floors will be arranged for lofts suitable for wholesale and retail business. There will be steam heat, elevator service and a vacuum cleaning system. A complete steel frame will be used. The exterior of the building will be faced with glazed terra cotta. Plans are now in the preliminary stage. Complete particulars will be given as the work progresses.

SEATTLE, WASH.—Offices, 3 story and base, steel and concrete, $90,000. Architects, Engineering Department, Oregon R. R. and Navigation Co., King St., Depot, Seattle. Owners, Oregon R. R. and Navigation Co. Plans have been completed by the engineering department for a modern freight house and office building which will be erected on the company's property at First avenue and Dearborn street. Cost of construction includes a 40x720-foot brick pavement and an 87x60 steel and ornamental iron marquise. The building will have a complete steel frame and exterior walls faced with pressed brick. Plans are complete and bids will be opened on December 16th.

VANCOUVER, B. C.—Telephone exchange, 5 story and base, brick, $100,000. Architect, Architectural Department British Columbia Telephone Co., Vancouver. Owners, British Columbia Telephone Co. The building has been designed to furnish the company with a modern and up-to-date plant. Working drawings have been completed and will shortly be ready for figures. No further particulars of construction have been received. Notice will be given as soon as bids are to be taken.

SEATTLE, WASH.—Stores and lofts, 4 story and base, brick and steel, $35,000. Architects, Heath & Grove, National Realty Bldg., Seattle. Owner, Gabriel Wallis. The building will be erected on C street near 13th. The first floor has been arranged for several stores. Upper floors will be subdivided into large light lofts for manufacturing purposes. There will be steam heat, freight and passenger elevators and sidewalk elevators. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared for this work.

PORTLAND, ORE.—Stores and offices, 3 story and base, reinforced concrete. Cost not stated. Architect's name withheld for the present. Owners, Mall and Von Borstel, Portland. These owners have just secured a fifty-year lease on a large piece of property at 3rd and Alder streets and have announced their intention of constructing a three-story business block. The greater part of the new building will be occupied by the Rose City Importing Co. Leases on the present buildings, which are to be demolished, will not expire until February 1st, 1913. Further announcement will be made in these columns.

PORTLAND, ORE.—Telephone substation, 2 story and base, reinforced concrete, $30,000. Architect, Engineering Dept. Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific States Tel. and Tel. Co. The company has recently secured a site in the Lents District and will shortly commence the construction of the substation. The building will be similar in design to a number of other small stations recently erected in Portland. Bids will be called for as soon as the plans can be completed.

Contracts Awarded.

SEATTLE, WASH.—Stores and lofts, 4 story and base, brick, $50,000. Architects, Heath & Grove, National Realty Bldg., Seattle. Owner, Rudolph Kanabel. Contractors, Moller & Dawson, Seattle. Contract price, $30,000.

SEATTLE, WASH.—Stores and offices, 10 story and base. Class A construction, $400,000. Architect, Frank C. Allen, Crary Bldg., Seattle. Owners, Washington Securities Co. Contractors, M. J. Hursen & Co., Globe Block, Seattle. Contract price, $400,000. Note: This is the first unit of the $2,500,000 building project which the Washington Securities Co. have undertaken on the block bounded by 3rd and 4th avenues, Stewart and Virginia streets.

LOS ANGELES, CAL.—Stores and offices, 2 story and base, brick, $11,400. Architects, Eisen & Son, L. A. Owners, Hubbell Investment Co. Contractors, Boman & Klarquist, Union League Bldg., L. A. Contract price, $11,400.

THEATRES.

SAN FRANCISCO — Opera House. Class A construction, $500,000. Architect's name not given. Owners, San Francisco Municipal Opera House Association. At a meeting of the Building Committee of the Municipal Opera Hueos Assocation held in the offices of Wm. H. Crocker Wednesday last, the selection of an architect was taken up. No official announcement will be made for a few days. A report to the effect that Willis Polk & Co. have been selected is current, but cannot be substantiated. Wm. H. Crocker, chairman of the Building Committee, states that no architect has been selected, while another member of the committee admits that a selection has been made, but refused to give the name.

PORTLAND, ORE.—Theatre, 2 story and base, reinforced concrete. Cost not stated. Architect, Lewis I. Thompson, Yeon Bldg., Portland. Owner's name withheld. The building will be a two-story fireproof structure, 50x100 feet in size, of reinforced concrete construction. The building is to be in the classic style of architecture and will be used exclusively for theatre purposes. The exterior is to be faced with red pressed brick with light colored terra cotta trimmings, and a bronze marquise will cover the entrance. The building is to be a thoroughly modern structure and will have a seating capacity for 750 persons. Plans are being prepared.

C., until **10:30 a. m. December 12, 1912,** at which time they will be opened in public, for the purchase of the above mentioned articles. Blanks and general information relating to this circular (No. 747) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base frame, $3,500. San Francisco. Architect, C. Panloni Lefebaure, S. F. Owners, Perro Bros. The building will contain six rooms and bath. A wagonshed will be built in connection. The interior of the house will be finished in pine and redwood with some Agatized panels. There will be open fire places and tile or brick mantels. Hall room will be wainscotted with tile. The exterior of the house will be covered with cement plaster and brick veneer. Plans are complete and to the credit of the owners were will do the work at Day Labor.

BUNGALOW—1 story and base frame, $5,000. San Francisco. Architect J. M. Geary, 23rd and Folsom Sts., S. F. Owner, Peckstein Bros. Bankers, Crocker Bldg., S. F. The house will contain six rooms and a sleeping porch. All interior finish will be of pine and redwood, rock boards to be used in the principal rooms. There will be open fire places and brick mantels. The exterior of the house will be covered with shingles. Plans are complete and to be done by Day Labor.

RESIDENCE—2 story, attic and base frame, $10,000. San Francisco. Architect, Wm. C. Hind, 56 Keeler St., S. F. Owner, Henry Metz. The house will be two stories and attic in front type and designed after the Tudor style. Interior will consist of about twelve rooms and two baths. All of the first floor will be finished with deep panels. The living room, reception hall and dining room will be separated with an arched opening in the style of Louis XV. The main floor will be finished in the natural enamel. Bath room will have tile floors and wainscot. Main stairs will be of mahogany. To be heated by furnace heat and open fire places. The exterior of the house will be covered with brick veneer to the attic. Plans are complete and bids are being taken.

RESIDENCE—2 story and base frame, $4,000. San Francisco. Architect, none. Owners, William Cameron and Son, 1301 Webster St., S. F. The dwelling will contain seven rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and tile mantels. The living room will be finished in oak. There will be two bath rooms and hot and cold water throughout. The exterior of the dwelling will be covered with shingles and stucco. Plans are in the hands of the owners and the work will be done by Day Labor.

RESIDENCE—2 story and base frame, $5,000. San Francisco. Architect, Percy H. Raleigh, 1 Montgomery Ave., S. F. The house has been designed to be a two story dwelling with all modern conveniences. Interior finish will be of redwood, Tidepole oak floors throughout the first story. There will be open fire heat and open fire places. Main stairs will be of oak. Each room will be finished with a picture moulding. The exterior of the house will be covered with cement plaster. The contract has been let to [illegible] and work will be done by Day Labor.

RESIDENCE—2 story, attic and base frame, $7,000. San Francisco. Architect, A. A. Cantin, 24 Montgomery St., S. F. Owner, Mrs. Mary Cantin, 2200 Jackson St., S. F. The house will contain eight rooms and bath. All interior finish will be of redwood. There will be open fire places and tile mantels. The exterior of the house will be covered with shingles and stucco. Plans are complete and bids are being taken.

RESIDENCE—2 story, attic and base frame, $8,000. San Francisco. Architect, Albert Pissis, Crocker Bldg., S. F. Owner, Mrs. Phoebe A. Hearst, 1 Lyon

for all rooms. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

HOTEL ANNEX—8 story and base, brick and steel, $100,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, Mary L. Phelan. This work has been mentioned here several times before. The building is intended for an annex to the Argonaut Hotel. The new portion of the building will practically double the present capacity of the hotel. There will be stores on the first floor. The main hotel offices and lobby will remain in their present location. The interiors of the newest rooms will be finished to correspond with the other rooms. Heat will be supplied from the present system. The exterior will be faced with terra cotta. Plans and specifications are complete and figures will be called for within a week or ten days.

HOTEL—5 story and base, brick and steel, $65,000. San Francisco. Architect, Woodworth Wethered, 143 2nd St., S. F. Owner, J. G. Barger. This work has been mentioned here before when plans were first started. The building will be erected in the north line of Post street near Larkin, and will contain in the neighborhood of 120 rooms and baths. The first floor will be occupied by stores and the hotel lobby and offices. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine, redwood and oak. Bath rooms will be finished in tile. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be taken within a week or ten days.

PIER WORK—Extending present pier, frame and concrete. Cost not stated. San Francisco. Engineer, Assistant State Engineer Newmann, Ferry Bldg., S. F. Owners, State of California. Plans for the extension of the southern arm of the 16th street pier have been approved, and figures are being taken. Plans can be secured from the Assistant State Engineer at the Ferry Building. Bids will be opened on December 5th.

PASSENGER STATION—2 story and base, reinforced concrete, $600,000. San Francisco. Architect, Jarvis Hunt, Chicago. Owners, Southern Pacific Co., Flood Bldg., S. F. The first official announcement in regard to the improvement of the Third and Townsend Street Depot has been made by the Southern Pacific Co. Plans have reached this city for the new depot, and the head of the passenger traffic department states that in the neighborhood of $600,000 will be spent before March of next year in construction. About $100,000 of this sum will go for construction of the depot and the balance in increasing the trackage and moving the present freight sheds. An attractive Mission style building has been planned, with the main entrance on Third street and secondary entrance on Townsend street. The first floor will contain the waiting rooms, ticket offices and baggage departments. Division headquarters will occupy the second floor. Plans are also being prepared in the engineering department of the Southern Pacific for doubling the present trackage at this station. Construction of the building will be of the reinforced concrete type, being out and will be fireproof. The exterior will be finished in pure white colored with red cement floor, marble vaulted and metal [illegible]. The exterior will be [illegible] cement [illegible] and the building will be [illegible] the Engineering Department of the S. P. in this city.

Accompanying the above announcement came the information that the Southern Pacific Co. would commence construction without fail or delay on the proposed stations at Sacramento and Los Angeles. These two stations [illegible] Francisco station. It is [illegible] million dollars, including the new trackage and [illegible] Angeles will secure a building at the [illegible] site, to the new Third and Townsend street station, $600,000 having been appropriated. Construction on the latter building will be undertaken early in the spring.

STORES—1 story and area, brick $10,000. San Francisco. Architects, G. A. Dodge and F. W. Van Trees, S. F. Owner's name withheld. Plans for this building show several stores and a nickelodeon. A site in the west side of Hyde street near Union has been secured. Interiors will be finished in pine and redwood. There will be [illegible] store fronts. The exterior of the building will be faced with cement plaster. Plans are being prepared. Notice will be given when bids are called.

OPERA HOUSE—1 story A construction, $500,000. San Francisco. Architects name not given. Owners, San Francisco Municipal Opera Association. At a meeting of the Building Committee of the Municipal Opera House Association, held in the offices of Wm. H. Crocker, Wednesday last the selection of the architect was taken up. No official announcement will be made for a few days. A report to the effect that Willis Polk & Co. have been selected is current, but cannot be substantiated. Wm. H. Crocker, chairman of the Building Committee, states that no architect has been selected, while another member of the committee emphatically that a selection has been made but refused to give the name.

Contracts Awarded.

GARAGE—2 story and area. [illegible] $25,000. San Francisco. Architects Ross & Bargon, Alcazar Bldg., S. F. Owners, Newcomer Investment Co. Contractor, P. L. Hansen, Monadnock Bldg., S. F. Contract price $[illegible].

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame, $5,500. Oakland, Cal. Architect, none. Owner, John Laughland, 2143 Harrison St., Oakland. The house will contain nine rooms, bath and laundry. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. Bath room will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, $5,500. Oakland, Cal. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, P. E. Crabtree. The bungalow has been designed for a nine-room house with baths and sleeping porch. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. The exterior of the house will be covered with cement plaster and metal lath. Plans are complete and the architect is letting sub-contracts.

RESIDENCE—2 story and base, frame, $4,000. Oakland, Cal. Architect, none. Owner, H. N. Turrell, 456 Jean St., Oakland. The house will contain seven rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with rustic. Plans are complete and work will be done by Day Labor.

RESIDENCE—2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Henry Posch, Jr.. The house will contain six rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Some oak floors will be used. Bath room will be finished in tile and will have Germanstone composition flooring. There will be open fire places and brick mantels. The exterior of the house will be covered with shingles. Plans are now being prepared.

RESIDENCE—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, Ralph A. White. The house will contain 7 rooms and bath. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Opalite will be used back of the sink and in the bath room. The exterior of the house will be covered with shingles and cement plaster. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Walter S. Brown, 2224 Chapel St., Berkeley. The house has been designed for a six-room dwelling with bath. All interior finish will be of pine. Oak floors will be used in the principal rooms. There will be open fire places and brick mantels. Tile will be used in the kitchen and bath room. The exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS—3, 1 story and base, frame, 2,300 each. Oakland, Cal. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit. These houses will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Tile will be used in the baths and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the owner will do the work by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. San Leandro, Alameda Co., Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Judge Tafflemier. The house will contain eight rooms, baths, sleeping porch and a laundry. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. There will be brick steps and porch. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, $4,500. Oakland, Cal. Architects, Hutchinson Bros., 470-13th St., Oakland. Owner, W. W. Nall. The house will contain eight rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans have been revised and figures are being taken.

GARAGE—1 story, frame, $1,000. Berkeley, Alameda Co., Cal. Architect, Building Inspector, Berkeley. Owners, City of Berkeley. The building is to be erected to house the police department machines. The interior will be finished in redwood and there will be a cement floor. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken. Bids will be opened on December 3rd.

GARAGE 2 story and base, brick, $12,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on 12th street near Oak.. There will be a cement floor and special gasoline storage tanks. The interior of the office will be finished in redwood. The balance of the building will be given over to storage space and repair shop. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL PLASTERING AND DECORATING—Cost not stated. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Fred Muller. The architect has completed plans and specifications for the interior decorating, ornamental plaster work and wall treatment for the seven-story and basement brick and steel hotel building now in the course of construction at 14th and Grove streets. Bids are being taken for the above mentioned work.

SCHOOL—2 story and base reinforced concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Oakland. Owners, City of Oakland. The following is a complete list of all prospective bidders for the general construction of the College Avenue School, Oakland. Bids for the construction will be opened on December 5th by the Oakland Board of Education: Van Sant-Houghton, E. J. Anderson, J. W. Carr, Geo. E. Burlingame, C. B. Ackerman, C. C. Christiansen, Crane Co., Isaac Penny, Jas. Rountree, Boyd & Kerr, Williams Bros. & Anderson, Carnahan & Mulford, Wm. A. Newmann, J. H. Pedgrift

FLATS—2 story and base, frame, $5,000. Oakland, Cal. Architect, none. Owner, William Mann, 1814 7th Ave., Oakland. The building will contain ten rooms and two baths. These will be arranged for two five-room flats. Interior finish will be of pine and redwood with some hardwood floors. Bath rooms will be finished in tile. There will be open fire places and brick or tile mantels. Automatic water heaters will be installed. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base,

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CREAMERY, 1 story and base, brick, $5,000. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owners, Oakdale Creamery Co. Plans for modern creamery plant to complete and figures are being taken. The building will cover a considerable area. A refrigerating plant and other machinery will be installed by the owners. Interior of the building will be finished in pine. The exterior will be faced with brick. Plans are complete and now out for figures.

SCHOOL, 1 story, frame, $6,000. Stanislaus School District, Stanislaus Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Stanislaus School District. The building has been designed for a district school and will contain but two class rooms. Interior finish will be of pine or redwood. No central heating system will be installed. The exterior of the building will be covered with rustic.

STORES, 1 story and base, brick, $10,000. Turlock, Stanislaus Co., Cal. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, A. V. Scheppelmann. The building will be erected on a corner lot and will be 50x100 feet. There will be two stores. Interior finish will be of pine. There will be plate glass store fronts and large plate glass display windows. The exterior of the building will be faced with pressed brick. Plans are complete and all bids of the owner who will do the work or Day Labor.

FACTORY, 1 story and base, reinforced concrete, $50,000. Fresno. Fresno Co., Cal. Architects' name not given. Owner, Inland Iron Co., Fresno. Plans for this building, which is to be erected on H street, covering an area of 50x150 feet, are to be revised. Construction will be of reinforced concrete throughout. Bids on the revised plans will be called for at once. Firms desiring further information on this work should apply to the Manager Inland Iron Co., Fresno.

HOTEL ANNEX, 4 story and base, brick, $40,000. Fresno, Fresno Co., Cal. Architect, Eugene Matthewson, Fresno. Owner, T. C. White. This work will be in the nature of an addition to the California Hotel at the corner of Merced and I streets. The first floor of the annex will contain a modern theatre. Upper floors will be arranged for a total of 50 guest room and a number of suites. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL, 3 story and base, brick, $50,000. Taft, Kern Co., Cal. Architect, I. A. Foltz, Taft. Owner, Mrs. E. Lever. The building will cover an area of 100x70 feet and will contain about 60 rooms on the upper floor, tiled entrance lobby and store on the first floor. There will be running hot and cold water in all rooms. Interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BUNGALOW, 1 story and base, frame, $3,500. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner's name not given. The dwelling will contain seven rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a hot water heating system installed. Open fire places and mirk of the mantels will be used in the living room. Bath will be finished in tile. The exterior of the house will be covered with brick veneer and rustic. Plans are being prepared.

RESIDENCE — 2 story and base, frame, $4,000. Sacramento, Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, George Cummings. The house has been designed for an eight room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic. Plans are being prepared.

SCHOOL — 2 story and base, brick and steel, $45,000. Galt, Sacramento Co., Cal. Architects, Russell & Smith, Humboldt Bank Bldg., S. F. Owners, Galt School District. The building will contain eight class rooms, assembly hall, a library and principal's office. There will be steam heat. Exterior will be faced with brick. A large scheme has been planned, including two wings to the main portion of the building, which will give a total of fourteen rooms. Only the main building will be erected at the present time. Working drawings are nearly complete and figures will be called for within a few weeks.

LOS ANGELES AND SOUTHERN CALIFORNIA.

BANK—2 story and base, reinforced concrete. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architects, Ye Planery Building Co., Title Ins. Bldg., L. A. Owners, Merchants' Commercial and Savings Bank. The building will occupy an important corner site and will be devoted entirely to the use of the bank. There will be large public office space, work rooms, private offices and a directors' room. The interior will be finished in hardwoods, tile and ornamental plaster. There will be a hot water system of heating installed. Coin and safety deposit vaults will be let separately. The exterior of the building will be faced with either pressed brick or artificial stone. Plans are complete and figures are being taken.

STORES AND OFFICES—9 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co., Fred Barman, President, 201 East 5th St., L. A. A site has been secured at the northwest corner of 5th and Broadway, and construction will be undertaken as soon as plans can be prepared. The project is financed by the Aronson-Gale Co. There will be several stores on the first floor. Upper floors will be arranged for lofts suitable for wholesale and retail business. There will be steam heat, elevator service and a vacuum cleaning system. A complete steel frame will be used. The exterior of the building will be faced with glazed terra cotta. Plans are now in the preliminary stage. Complete particulars will be given as the work progresses.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Lenard L. Jones, I. W. Hellman Bldg., L. A. Owner, H. W. Wilcox. The building will cover an area of 60x150 feet and is to contain 100 rooms, which will be arranged in two-room suites. There will be private baths and wall beds. A steam heating system will be installed together with a hot water heater. Interior finish will be of pine and hardwoods. Entrance will be finished in tile and marble. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. E. Fetherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. Preliminary plans only have been prepared for this building and particulars cannot be given at this time. A total of about 100 rooms is to be arranged for. When complete the plans will embrace all of the modern apartment house requirements. Further notice of the work will be given as the plans progress.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, H. P. Ernst. The building will be 41x108 feet. The interior has been arranged for two and three room apartments, of which there will be sixteen. There will be steam heat and a hot water heater. All suites will have private bath room and wall beds. Interior finish will be of pine and redwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. E. H. Schuster. The building will have a street frontage of 75 feet and a depth of 101 feet. There will be 101 rooms arranged in suites of two and three rooms each with connecting bath and wall beds. Interior finish will be of pine. There will be steam heat and a hot water heater. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BRIDGES—2, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Plans for two reinforced concrete bridges, both over Mission Creek, one at East Boulevard and the other at East Haley street, have been approved by the City Council. Bids for the work are now being taken and will be opened by the Council on December 12th. Plans may be secured by applying to City Clerk Alfred Davis, Santa Barbara.

WHARF—Wooden pile construction. Cost not stated. Los Angeles, Cal. Engineering Department Los Angeles. Owners, City of Los Angeles. The Harbor Advisory Board has notified the Board of Public Works to construct the municipal wharf by forced account. The wharf will be erected along Water street and is to be 670 feet in length. A pile driver and other necessary equipment will be purchased or leased. Work is to be undertaken at once.

CHURCH—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Church of the Latter Day Saints. The building will cover an area of 48x100 feet. The main auditorium will have a seating capacity of 750 people. Basement will contain an assembly room, 47x38 feet, class rooms and a kitchen. The interior will be finished in pine and ornamental plaster. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

FACTORY BUILDINGS—3, 1, 2, and 3 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Bradford Baking Co., 401 North Avenue 20. The present one-story building which is 65x155 feet will be increased to four stories. Plans are also being prepared for a two story building 74x45 feet and for a one story building, triangular in shape, 165x120x200 feet. All construction will be of the reinforced concrete type with concrete floors and roof slabs, metal sash and frames and fireproof doors. Several elevators will be installed. The exteriors of the buildings will be faced with cement plaster. Plans are being prepared.

WAREHOUSE—7 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Fidelity Storage and Moving Co. The building will cover an area of 80x100 feet and is to be Class A in construction. The Kahn system of reinforced concrete will be used. Interior partitions will be of hollow tile. A freight elevator and a vacuum cleaning system will be installed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

WAREHOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Krempel & Erkes-Henne Bldg., L. A. Owners, Brunswick-Balke-Collender Co., The building will be erected on East 3rd street and will have a foundation 80x120 feet. Mill construction will be used. There will be a cement first floor. There will be an elevator, metal window frames and sash. Bids will be called for on reinforced concrete floors, frame and brick curtain walls. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Lenard L. Jones, I. W. Hellman Bldg., L. A. Owner, J. P. Parten. The building will cover an area of 30x125 feet. The first floor will contain the entrance, office and lobby. Upper floors will be subdivided into 60 guest rooms and a number of general baths. There will be steam heat, elevator service and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL AND STORES—2 story and base, brick. Cost not stated. Orrance, Los Angeles Co., Cal. Architect, Irving J. Gill, 625 So. Hill St., L. A. Owners, Dominguez Land Co. The building will be 82x132 feet. There will be two stores on the first floor and 35 guest rooms and 6 bath rooms on the second floor. Interior will be finished in pine and redwood. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the architect will call for figures on the construction this week.

RESIDENCE—2 story, attic and base, frame, $50,000. Pasadena, Los Angeles Co., Cal. Architects, T. Beverley Keim, Jr., & Co., Title Ins Bldg., L. A. Owner, R. Rochester, Jr. The dwelling will occupy a two-acre tract in Oak Knoll and is to be designed in the Southern Colonial style. The house will cover an area of 71x90 feet and will contain sixteen living rooms and five baths. Interior finish will be of pine, white enamel and mahogany. Hardwood floors will be used throughout. There will be furnace heat, an automatic water heater and seven open fire places. Mantels will be of tile or brick. Baths will be finished in tile. A two-story garage will be erected on the property. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—1 and 2 story and base, reinforced concrete, $10,000. San Fernando, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando School District. Plans for a domestic science and manual training building have been approved and bids will be opened on December 23rd. The domestic science building will be 15x

69 feet and the manual training building 92x88 feet. Construction will be of the slow burning type. Interior finish will be of pine. The exteriors of the buildings will be faced with cement plaster. Red clay tile roofs will be used. Plans may be secured from the architects. Separate bids on various parts of the work are to be taken.

Building Contracts.

FACTORY—5 story and base, reinforced concrete, $200,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Ford Motor Car Co. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $200,000. Note: This figure does not include the plumbing, electric work, elevators or heating. Bids will be called for shortly for these parts of the work, and a separate contract will be let for the interior finish of the display rooms.

APARTMENT HOUSE—3 story and base, brick, $45,000. Los Angeles, Cal. Architect, Whiting Thompson, Douglas Bldg., L. A. Owner, W. E. Curry. Contractors, Corona Development Co., Higgins Bldg., L. A. Contract price, $45,000.

APARTMENT HOUSE—3 story and base, brick and frame, $75,000. Santa Barbara, Santa Barbara Co., Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, West Coast Apartments Co. Contractor, Kling Co., Union League Bldg., L. A., general construction, $52,000.

BANK—2 story and base. Class A construction, $85,000. Pasadena, Los Angeles Co., Cal. Architect, S. B. Marston, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena National Bank. Contractor, Wm. C. Crowell, Chamber of Commerce Bldg., Pasadena. Contract price, $85,000. Note: A number of special fixtures, vaults and interior finish is not included in this contract.

MILL—3 story and base, mill construction. Cost not stated. Los Angeles, Cal. Architects name not given. Owners, Great Western Milling Co. Contractors, Davidson Construction Co., Union Oil Bldg., L. A. Note: This contract has been taken on the percentage basis.

HOTEL—3 story and base, brick, $20,000. Los Angeles, Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, S. H. Pardue. Contractor, George M. Easton, Los Angeles Investment Bldg., L. A. Contract price, $15,-208. Note: This contract is drawn excluding the plumbing, heating and vacuum cleaning system.

SCHOOL—3 story and base, brick, concrete and steel, $250,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, City of Los Angeles. Contractors, Somers & Lund, Security Bldg., L. A., general construction, with a certain deduction, $220,680; Machinery and Electric Co., 351 North Main St., L. A., heating and ventilating, $24,780. The building is known as the Boyle Heights Intermediate School.

STORES AND OFFICES—2 story and base, brick, $11,400. Los Angeles, Cal. Architects, Eisen & Son, L. A. Owners, Hubbell Investment Co. Contractors, Boman & Klarquist, Union League Bldg., L. A. Contract price, $11,400.

SEATTLE AND WASHINGTON.

CHURCH—2 story and base, brick, $50,000. Seattle, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. The building will be 56x103 feet, and of the steel and brick type of construction. The Colonial style of architecture has been used. The first floor will contain an auditorium, seating 500 people, choir room and a vestibule. A large lecture room, which will hold nearly as many people as the main auditorium, and Sunday school rooms will be located in the basement. A sub-basement will contain the club rooms and heating system. There will be a tower 125 feet high facing the street. Interior will be finished in pine, redwood and hardwoods. There will be furnace heat. The exterior of the edifice will be faced with pressed brick. Working drawings are nearly complete and figures will be called for shortly.

SCHOOL—3 story and base, brick and steel, $55,000. Ilaev, Wash. Architect, C. F. Mahon, Savage-Scofield Bldg., Seattle. Owners, St. Martin's College. The architect has just been commissioned to prepare plans for a new administration building and is now at work on the preliminary studies. No details of construction have been decided upon. Full particulars of the work will be given as the plans progress.

STORES AND LOFTS—4 story and base, brick and steel, $35,000. Seattle, Wash. Architects, Heath & Grove, National Realty Bldg., Seattle. Owner, Gabriel Wallis. The building will be erected on C street near 13th. The first floor has been arranged for several stores. Upper floors will be subdivided into large light lofts for manufacturing purposes. There will be steam heat, freight and passenger elevators and sidewalk elevators. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

TELEPHONE EXCHANGE—5 story and base, brick, $100,000. Vancouver, B. C. Architect, Architectural Department British Columbia Telephone Co., Vancouver. Owners, British Columbia Telephone Co. The building has been designed to furnish the company with a modern and up-to-date plant. Working drawings have been completed and will shortly be ready for figures. No further particulars of construction have been received. Notice will be given as soon as bids are to be taken.

OFFICES—3 story and base, steel and concrete, $90,000. Seattle, Wash. Architects, Engineering Department Oregon R. R. and Navigation Co., King St. Depot, Seattle. Owners, Oregon R. R. and Nevigation Co. Plans have been completed by the engineering department for a modern freight house and office building which will be erected on the company's property at First avenue and Dearborn street. Cost of construction includes a 40x720 foot brick pavement and a 87x60 steel and ornamental iron marquise. The building will have a complete steel fram and exterior walls faced with pressed brick. Plans are complete and bids will be opened on December 16th.

ELECTRIC POWER PLANT—$1,000,-000. Klickitat Falls, Wash. Engineer's name not given. Owners, Fleishacker Interests, S. F. The Northwestern Electric Co., controlled by the Fleishackers of San Francisco, have announced their intention of spending a million dollars in the construction of a large electric plant at Klickitat Falls. Particulars of the enterprise have been refused at the headquarters of the owners.

Contracts Awarded.

STORES AND LOFTS—4 story and base, brick, $30,000. Seattle, Wash. Architects, Heath & Grove, National Realty Bldg., Seattle. Owner, Rudolph Knabel. Contractors, Moller & Dawson, Seattle. Contract price, $30,000.

STORES AND OFFICES—10 story and base. Class A construction, $400,-000. Seattle, Wash. Architect, Frank C. Allen, Crary Bldg., Seattle. Owners, Wahington Securities Co. Contractors, M. J. Hursen & Co., Globe Block, Seattle. Contract price, $400,000. Note: This is the first unit of the $2,500,000 building project which the Washington Securities Co. have undertaken on the block bounded by 3rd and 4th avenues, Stewart and Virginia streets.

PORTLAND AND OREGON.

HOTEL—6 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner's name withheld. The building will be erected at the corner of 7th and Everette streets. The first floor will contain several stores besides the hotel lobby. Upper floors will be subdivided into about 100 rooms and 13 baths. There will be steam heat, elevator service and a vacuum cleaning system. Plans provide for hot and cold running water in all rooms. Lobby will be finished in hardwood and tile. Bath rooms will have tile floors and wainscot. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOTEL—4 story and base, brick, $50,000 Portland, Ore. Architect, Lewis I. Thompson, Yeon Bldg., Portland. Owner's name withheld. The building will cover an area of 50x75 feet, and will be arranged for stores and the hotel lobby on the first floor. Upper floors will contain a total of 100 rooms and 20 baths. There will be steam heat, elevator service and a vacuum cleaning system. The interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are now being prepared and bids will be called for within the next week or ten days.

THEATRE—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Lewis I. Thompson, Yeon Bldg., Portland. Owner's name withheld. The building will be a two-story fireproof building, 50x100 feet in size, of reinforced concrete construction. The building is to be of the classic style of architecture and will be used exclusively for theatre purposes. The exterior is to be faced with red pressed brick with light colored terra cotta trimmings and a bronze marquise will cover the entrance. The building is to a thoroughly modern sthucture and will have a seating capacity for 750 persons. Plans are being prepared.

ACTORY—4 story and base, brick. Cost not stated. Portland, Ore. Architects, Emil Schacht & Sons, Com-

monwealth Bldg., Portland. Owners, Nicolai Door and Lumber Co. This project is as yet entirely tentative. A company has been formed with Mr. Nicolai at its head, but for what purpose is not stated. The architects have been commissioned to prepare plans for a building 100x75 feet. Further particulars will be given as the plans progress.

STORES AND OFFICES—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect's name withheld for the present. Owners, Mall and Von Borstel, Portland. These owners have just secured a fifty year lease on a large piece of property at 3rd and Alder streets and have announced their intention of constructing a three-story business block. The greater part of the new building will be occupied by the Rose City Importing Co. Leases on the present buildings, which are to be demolished, will not expire until February 1st, 1913. Further announcement will be made in these columns.

TELEPHONE SUBSTATION—2 story and base, reinforced concrete, $30,000. Portland, Ore. Architect, Engineering Dept. Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners Pacific States Tel. and Tel. Co. The company has recently secured a site in the Lents District and will shortly commence the construction of the substation. The building will be similar in design to a number of other small stations recently erected in Portland. Bids will be called for as soon as the plans can be completed.

COMPLETING CONCRETE BRIDGE.

CHICO (Butte Co.), November 22.—The concrete work on the new county bridge over Sandy Gulch has been completed, and a large gang of men are now at work filling in the head of the approaches. The bridge will be open for traffic in two weeks.

The bridge has cost the county $13,000, and is one of the finest of its kind in California.

THE YOUNGEST OF EUROPE'S GREAT CITIES.

Odessa is one of the youngest of European cities. Only 120 years ago, Hdji Bey, a little Turkish settlement, nestled on the cliffs that overlook the harbor and dozed under the Sultan across the Black sea. The long arm of Russia reached out and took it, and planted there, upon the plateau overlooking the bay, the beginners of a commercial city that now holds between 500,000 and 600,000. The Revolution in France soon sent refugees scattering over the world, and noble names came to Odessa, and one may read them still on street corners—Daribas, Richelieu and Lageron. Later Englishmen came and brought ships to carry away Russian grain, and then the Crimean war swept across this friendly relation. But the English stayed when the war had passed, and then Germans came, and afterward Americans, with reapers and plows and steam traction engines, to help the Russians to grow more richly the grain that the English and the German ships carried out to the world. Last of all came the Jews, and they cut the business so fine that the English starved and gave up; so the business of exporting today is mainly in the hands of the Jews. A few hardy Germans and English are left.—Sydney Adamson in Harper's Magazine.

LARGE ACREAGE TO BE SUBDIVIDED.

LOYALTON (Sierra Co.), November 26.—That 65,000 acres of land in Sierra Valley have been taken over by it and that $200,000 worth of the land has been sold in tracts, is the announcement made by the Morey-Turner Company of Reno, Nevada.

This land includes the ranches of Frank Humphreys and other large holders.

The company also announces that it has taken over large acreages in various parts of Nevada and that this will be subdivided after it is placed under irrigation.

PETITIONS IN BANKRUPTCY.

Creditors of Marshall Black of Palo Alto filed a petition in the United States District Court Monday asking that the Marshall Black Investment Company be declared an involuntary bankrupt. The petition recites that September 24th of this year the company transferred all its property to the Palo Alto Mutual Building and Loan Association with intent to prefer it over the other creditors. Other petitions were filed as follows: Ella Giorgi (a partnership), Colusa, farmers, debts $3253, assets $1500; E. K. Halloway, manufacturer, Livermore, debts $67,553, assets $105,010, being par value of stock in the Livermore Fire Brick Company.

ENGINEERS GET INCREASE.

WASHINGTON, November 26. — Thirty thousand locomotive engineers on fifty-two Eastern railroads gain a partial victory in their demand for more wages, under the award announced Sunday by the Board of Arbitration.

The Board holds that the public, which had no voice in the controversy, had more at stake than the engineers or railroads, and emphasizes the necessity of plans to safe guard the public against the possibility of future strikes.

"It would be difficult to exaggerate the seriousness of such a calamity," read the report. "It is safe to say that the large cities of the East would find the supply of many articles of food exhausted within a week."

The Board advocates the creation of Federal and State Wage Commissions. These Commissions, the Board suggests, should be vested with virtually the same powers over ogranized labor as Public Utilities Commissions new exercise over quasi-public corporations.

The award dates back to May 1st, and will hold for one year from that date. Morrissey, representing the engineers, has indicated doubt as to its renewal.

In the passenger service the engineers were granted a minimum wage of $4.25 for 10 miles or less and overtime at the rate of 10 cents an hour; average speed of twenty miles per hour. They asked for from $4.50 to $4.60 and overtime of 70 cents per hour after five hours.

In the through freight service, engineers were granted a wage of $4.75 for 100 miles or less with overtime pro rata. They requested $5.25, $5.50 and $5.75 for 100 miles and seven hours for Mallet engines.

Engineers employed on switch engines and belt lines were granted $4.10 for ten hours or less. Their request was for $4.50.

PREPARE FOR BIG WORK FOR DREDGER.

SACRAMENTO, Nov. 25.—Elaborate preparations are being made by the West Sacramento Company for the filling of a big tract of land opposite Sacramento City on the Yolo Side by the company's new electric suction dredger, the only one of its kind. It is said that work already outlined for the big machine will require two years to finish.

A special heavy power line has been built along the Yolo bank of the river to carry electric current to the dredger, and pipe lines are being strung over the levees at intervals from the Northern Electric bridge south for the distributing of the sand that will be forced from the river. The dredger will be able to connect onto these pipes as it moves up the river.

The machine is now stationed near the old Kripp levee, down the river, where the break of 1907 occurred, and will fill in between the old and the new embankment.

SHINGLE TRADE GOOD.

SEATTLE, Nov. 27.—Lumbermen are looking forward to one of the best seasons in the history of the trade. With the bumper crops in the East it is believed building will be unusually heavy in the early spring.

Practically all of the Northwestern shingle mills have again resumed operations. Eastern buyers have already commenced to lay in their spring stock and this has caused a flourish in the market. It is generally predicted that the shingle men will enjoy another reign of prosperity during the coming year.

IRON AND GOLD BY THE TON.

The total production of all metals in the United States in 1911 was 27,878,282,094 tons, valued at $788,925,046. In the volume of "Mineral Resources," published by the United States Geological Survey, is a short chapter by H. D. McCaskey, that contains a unique table, in which for the sake of comparison the production of all metals is reduced to short tons. Thus pig iron, with a production from both domestic and imported ores of 26,048,162 short tons, valued at $327,331,624, is contrasted with platinum, the production of which was less than a ton (0.989 ton), valued at $1,308,480, and gold, with a production of 190,704 tons, valued at $114,981,980.

In the several mining industries various units are commonly employed which do not admit of convenient comparison. For instance, the production of anthracite coal is always stated by the producers in long tons, but that of bituminous coal is given in short tons. Again, the "flask" (75 pounds) is the customary unit for the measurement of quicksilver except where the metric ton is used. The Troy ounce is used for measuring the precious metals.

As shown by the tables in this report, the value of the total production

for 1911 was $86,732,580 less than that for 1910.

Another table gives the production of domestic crude metallic ores, and this, together with imports of foreign supplies treated in domestic plants, compared with the figures of domestic metal production shows the sources from which these metals are derived. The total production of all ores in 1911 was 385,458,492 short tons.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 614 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,044,484 Paper Hanging Machine. Edward Brown, Owensboro, Kentucky.

1,044,623 Frame for Openings in Buildings. David G. Johnston, Clyde, Iowa.

1,044,558 Roofing Material. Wm. J. Mueller, Wyoming, Ohio, assignor to The Philip Carey Mfg. Co., Lockland, Ohio.

1,044,561 Ventilator. Jno. H. Otten, Buffalo, New York.

1,044,661. Catch Strainer for Down Spouts. Louis Thiem, Toledo, Ohio.

1,044,612 Roof Construction. Jno. C. Witt, Indianapolis, Ind., assignor to Frederick E. Maynard, Indianapolis, Ind.

1,044,670 Clamp. Peter Zawadzki, Chicago, Ill.

1,044,626 Knockdown Window Screen. Barton S. Cleveland, Orient, N. Y.

1,044,624 Frame. Edwin J. Dreiss, Jr., Waterbury, Conn.

1,044,862 Mold Form for Concrete Wall Construction. Alex P. Carey, New York, New York.

1,044,659 Jack for Raising Concrete Wall Forms. Axel E. Jacobson, Minneapolis, Minn.

1,044,742 Door Check. Jno. C. Anderson, Chicago, Ill., assignor to Corbin Door Check Co., of Dell, Chicago, Ill.

1,044,728. Door Check. Geo. Basler, Lynn, Mass., assignor to Basler, Machinery Co., Lynn, Mass.

1,044,740 Skylight. Wm. H. Branson, Washington, D. C.

1,044,760. Wall Bed. Napoleon B. Douglass, Berkeley, Cal.

1,044,773 Composite Roofing. Harry Gilbert Cleveland, Ohio.

1,044,774. Composite Roofing. Harry Gilbert, Cleveland, Ohio.

1,044,811. Lumber Rule. Herman A. Paquette, Chicago, Ill., assignor to Smith & Phillips Mfg. Co., Chicago, Ill.

1,044,816 Adjustable Sawhorse. Walter H. Pearlperson, Hornell, N. Y.

1,044,835 Automatic Door. Fred'k Wenzel, La Crosse, Wis., assignor to Emil T. Mueller, La Crosse, Wis.

1,044,886 Eaves Trough. Christian Hines and Chas. S. Hines, Napoleon, O.

1,044,955. Scaffold. Alfred F. Walker, Oakland, California.

1,045,045 Lumber Piling Machine. Wm. Larson, Bonner, Mont., assignor to W. W. Markle, Bonner, Mont.

1,045,099. Ladder Bracket. Will Wade Memphis, Tenn., assignor to Wm. J. Strayer, Memphis, Tenn.

Reissues.

13,488. Building Construction. Edgar D. Martin, Chicago, Ill., assignor to Franklin P. Smith, Chicago, Ill.

BOND ELECTION FOR IRRIGATION.

STOCKTON, November 27. — Land owners in the South San Joaquin irrigation district have decided to call an election to determine whether or not it would be practical to vote bonds to the amount of $1,170,000 for better distributing and drainage systems and additional bonds to the amount of $790,000 for the construction of a reservoir capable of storing 40,000 acre-feet of water or late irrigation.

The original issue of bonds approximated $2,000,000, and if the present project should carry, the total indebtedness of the district would be nearly $4,000,000. As there are 71,000 acres in the district, each acre would carry $54 of the indebtedness. The decision to call an election was reached at a mass meeting held at Ripon in this county.

The proposed debt will be the largest of any irrigation district in California. In other districts in this State only the main laterals have been built at public expense, leaving the construction and management of the small ditches to the individual farmers. This has caused considerable expense and has given those living near the laterals an advantage over those living at a distance.

ISSUE BONDS FOR RAILROAD.

GRANTS PASS (Ore.), November 29. With Grants Pass voters unanimously indorsing a $200,000 bond issue toward financing a railway from here to Crescent City, Cal., and the business men of Crescent City and lumbermen of Del Norte County reported to have subscribed toward the same end, this newest Oregon-California line may soon become a reality.

The Grants Pass City Council will at once order a special election to vote on the bonds.

Articles of incorporation of the Pacific Interior Railway Company were filed Tuesday. The incorporators were George W. Colvig, E. T. McKinstry and W. P. Quinlan, representing local business men.

Twelve miles of logging road in Del Norte County built by the Hobbs wall Company are to be part of the proposed Pacific Interior line.

The route is to traverse the redwood forests between Grants Pass and Crescent City. At present the redwood goes by steam schooner to San Francisco, and is trans-shipped into cars. With the Pacific Interior in operation it would be loaded direct for the Middle West.

NEW DETOUR LINE FOR THE D. AND R. G.

An important piece of railroad construction work and one that will, it is expected, have an advantageous effect upon Western Pacific service, has just been authorized by officials of the Denver and Rio Grande. The work consists of the construction of a double track detour line over Soldier Summit, in the Wasatch Mountains in Utah, and it will be completed at a cost of $3,000,000, and will be finished by July of 1913, according to the terms of the contract.

The present line between Tucker and Soldier Summit is seven miles long and the grade 4 per cent, or 211 feet to the mile. The new line will be fifteen miles long, with a grade of 2 per cent, or 105⅓ feet to the mile.

The large expenditure has been authorized because of the rapidly increasing traffic of the Western Pacific, as well as to take care of the coal and coke output going from the Utah mines to the Salt Lake, Nevada and Montana smelters and reduction plants.

BRIDGE CONTRACT LET.

MARYSVILLE (Yuba Co.), November 26.—The Board of Supervisors last evening awarded to the Portland Concrete Pile Company the contract to construct the new bridge at Parks Bar, at a cost of $38,490. The structure is to be of the three-hinged reinforced concrete arch type of the Thomas & Post design. It will be 24 feet in height and 18 feet wide.

Work will begin as soon as the contract has been signed by the proper officials.

SAND FOR GLASS MAKING.

Industry Highly Specialized — Silica, Clay and Other Impurities Must Be Removed.

The preparation of glass sand has become a highly specialized business, and in the middle Mississippi Valley 15 or more thoroughly equipped plants are at present employed. The materials used for glass sand in the central United States, according to the United States Geological Survey, are mainly bedded sandstones, and a complete process of preparation includes quarrying, breaking, crushing, and grinding into component grains, screening, washing, draining, drying, and final screening to various sizes. Some beds of sandstone are so friable and pure that only blasting down and slight crushing are necessary before the sand is dried and screened. Many plants, however, wash their sand in the course of preparation particularly those in Illinois, where hydraulicking is employed to obtain sand from the quarries. Washing doubtless removes, even from high-grade sand, considerable silica in such a fine state as to be detrimental, as well as an appreciable quantity of clay and other undesirable impurities.

It is mistaken economy to neglect this important phase of treatment on account of the expense of installing washers, for the price of sand, and often its use and rejection, is affected by the small percentage of impurity that may be washed away. —(From Advance Chapter Mineral Resources of the United States for 1911.)

TO IMPROVE MACADAM ROAD.

MARYSVILLE (Yuba Co.), November 29. Provided that the Supervisors amend the road ordinance preventing the hauling of loads heavier than 3500 over the highways of Yuba County during the Winter months so that paved and macadam roads will be exempted, the Yuba Consolidated Goldfields people, doing a dredger business at Hammonton, nine miles west of Marysville, agree to contribute the sum of $10,000 toward the construction of a macadam road between this city and

Hammonton. Supervisor Morrison of the Wheatland-Hammonton district to contribute a like sum from his regular road fund.

District Attorney Manwell has instructions from the Supervisors to prepare the exempting clause in order that the terms asked by the Hammonton dredger people will be met next month. The material for the road will be quite convenient; as the dredgers are leaving tons of rock in their wake each month.

TO BUILD MASONIC TEMPLE.

KLAMATH FALLS (Ore.), November 29.—With sentiment so strong in favor of selling the old Klamath County Court House site as to indicate that the County Court will shortly put the property on the market, a movement was launched Tuesday by local Masons to buy 100 feet frontage on the corner of Main and Fourth streets for a Masonic Temple.

It is proposed to erect on the corner, in the event of a satisfactory price being agreed upon, a four-story modern building. The lower floor will be for store rooms and the second floor will be for offices. The two upper floors will be for exclusive use of the lodge.

LUMBER AND POWER PROJECTS IN SHASTA COUNTY.

REDDING (Shasta Co.), November 29.—By an agreement filed for record last Tuesday the Northern California Power Company gives to the Red River Lumber Company the corporate name for Thomas B. Walker, the right to use the company's reservoir under construction on Dry Burney Creek for logging purposes and also for the purposes of cutting ice. In return Thomas B. Walker, or his company, gives a right of way through his land for the construction of such tunnels and ditches as the Northern California Power Company may need in its great conservation project.

Dry Burney Creek is a dry creek most of the time, but when the snows on Mount Lassen begin to melt in the Spring a great flood pours down the creek. The Power Company proposes to store up these flood waters in a big reservoir to be built on the Tamarack Flats. The reservoir will make an artificial lake with a shore line of nine miles and will cover 1500 acres. The water will be nineteen feet deep on an average and the reservoir will hold 27,000 acre feet of water. This artificial body of water, already christened Burney Reservoir, will be an important adjunct to Walker's lumbering operations whenever he decides to go to sawing in that neighborhood. It will make the biggest logging pond in the State.

The Northern California Power Company has been at work a year on the project, which for a starter calls for digging a tunnel 7000 feet long to lead the water from the reservoir through a divide over into the Cow Creek Valley, where it will be used for generating more power at the company's plant at Kilarc and at another powerhouse yet to be constructed. This tunnel has been run for a distance of 900 feet, and work will be rushed next Spring.

Hitherto the flood waters that pour down Dry Burney Creek have gone to waste. The 1500 acres of Burney Reservoir will store this large amount of water and keep it penned up until the dry months of the year, when it will be turned through the tunnel into Cow Creek Valley, where it will generate power, and after it has trunned the last wheel it will be used in the valley below for irrigating purposes. It is virtually finding 29,000 acre feet of water where there was no water before and putting it to good use.

CITY PLANNING CO-OPERATION.

The special committee on city planning appointed at the 1912 national conference held in Boston is about sending out to probable participants the details of one of the most important studies of urban planning yet undertaken by experts, whether Europeans or Americans. The purpose of the study "is not that of an ordinary competition, undertaken as a means of selecting and premiating that one among the designs submitted which upon the whole, after offsetting its merits against its defects, presents the most praiseworthy solution of the particular problem in question." Rather is it to be "a means of securing the co-operation of a number of people in preparing and assembling specific and concrete illustrations of application, under a given set of normal conditions, of a variety of important ideas and principles and devices used in city planning, in a manner which will facilitate a close comparison of their respective advantages and limitations." Each entrant in this co-operative competition will receive data similar to that given his rival, namely, a topographical map of the tract of land to be developed, a copy of a model housing law and building code, and a circular of instructions prepared by the national conference. The results of the study will be at the disposal of the conference, and will be displayed at its next annual meeting.

Each participant or group of participants naturally will face the concrete application of his principles and ideals that this study-plan affords, realizing its complexity. Architecture, landscape architecture, sociology, engineering are all involved, and hence collaboration among a variety of experts naturally will take place, and is possible under the terms of the contest.

It is hardly necessary to add that such a plan for coordinated action within groups, and competition among groups, is bound to bring to pass synthetic results such as never have been registered in any American city-planning contest. From the results of this project there should emerge something like a plan form to be followed more or less closely where and when conditions are such that towns are made deliberately and do not grow up according to the dictates of ignorant and selfish individual interests.—Christian Science Monitor.

LARGE VALUES IN MARBLE.

The commercial output of marble in 1910 was valued at $6,994,779, and that in 1911 at $7,546,718, according to the United States Geological Survey, a gain of $551,939. This product came from Vermont, Georgia, Colorado, Tennessee, New York, Alabama, Montana, Pennsylvania, California, Alaska, Oklahoma, Maryland, Arizona, North Carolina, Kentucky, New Mexico, South Carolina, Utah, and Oregon, named in order of value of output. The production of Vermont in 1911 was valued at $3,394,930, and that of Georgia at $1,-088,122.

The value of building marble, rough and dressed, as sold by the producer, was $2,910,267 in 1911, an increase of $552,472 over the value for 1910. Monumental marble was valued at $2,170,-981 in 1910 and at $2,621,213 in 1911, an increase of $450,232 in 1911. Vermont, Tennessee, Alabama, Colorado, and Massachusetts produced most of the marble used for interior decorations, the total value for 1911 being $1,545,-963, as against $2,001,646 in 1910, a loss in 1911 of $15,683. Rough stone for other uses includes waste marble sold to lime burners, to carbonic acid factories, to pulp mills, to iron furnaces for flux, and that used for road making, etc. The dressed stone includes stone for mosaics, electrical work, etc.

URUGUAYAN HARBOR IMPROVEMENTS.

The American consul at Montevideo, Uruguay, reports that a bill making provision for extensive harbor improvements at Montevideo is awaiting legislative sanction. The estimated cost of the proposed works is approximately $27,000,000. It appears, however, that only a portion of the contemplated work will be offered to public tender and that a large part will be undertaken by the Government itself.

CANADIAN PACIFIC RAILWAY PASSENGER DEPOT.

The new six-story passenger depot of the Canadian Pacific Railway at Vancouver, British Columbia, now being erected, will cost about $1,000,000. The exterior will be of cut stone, brick, and terra cotta. The track floor will have a 1000-foot platform served with four tracks for passenger trains, and will be reached from the building and ground level by overhead bridges, stairways, and one passenger and two freight elevators. Arrangements will be made for mail, express, baggage, transfer, and news departments. Erection of the building is in the hands of the Westinghouse, Church, Kerr & Co., of Montreal, with offices in Winnipeg, Calgary, and Vancouver. The Vancouver office of the company is in the Metropolitan Building.

REPORT OF BUREAU OF BUILDING INSPECTION.

The following is a report of building operations during the month of November 1912, as issued by the records of the Bureau of Building Inspection:

Class	No.	Amount
Class "A"	[illegible]	$511,801
Class "B"	[illegible]	45,400
Class "C"	22	538,650
Frames	[illegible]	62,161
Alterations	[illegible]	115,000
Total	[illegible]	$1,281,[illegible]

TEARING DOWN PERMITS.

Following is a list of the applications for tearing down permits in the Fire Limits for the past week.

SE Fremont and Mission, one-story frame.

SE Clay & Drumm, one-story frame.

An ual Exhibition To Be Held In March.

San Francisco Architectural Club Planning Exhibit That Will Surpass All Others.

The Sixth Annual Exhibition of the San Francisco Architectural Club will be held in this city from March 1st to 15th, next, and plans so far completed guarantee the display will be the largest and most noteworthy exhibition ever held in this city.

The object of the Annual Exhibit is to bring the selected work of the Architects and other exhibitors before the general public and this has, in the past, had a marked influence on the allied arts and crafts. The profits of the Year Book and of the Exhibition are applied to the educational fund of the San Francisco Architectural Club.

The organization is the largest in the United States and is composed of men associated with the architectural profession and includes the most influential and prominent architects of San Francisco. During the past year the club has done excellent work in all educational lines among the younger members.

The following well known members of the profession have been appointed as the Exhibition Committee for the 1913 Annual Exhibition:

W. B. Faville, Chairman; G. W. Kelham, E. H. Hildebrand, August G. Headman, John Bakewell Jr., Chas. P. Weeks, Harry E. Nye, Geo. Greenwood, Percy R. Stimpson, Chas. F. Piatt, Ed F. Frick, Carl L. Warnecke, Edwin Flanders, Stanley Flawn, Wm. Garren and H. A. Thomsen Jr.

MACHINERY HALL PLANS READY.

Architects Ward & Blohme Have Plans Nearly Completed For Largest Exposition Building.

Plans for Machinery Hall, the largest building in the Panama-Pacific International Exposition, of which Clarence R. Ward of the Architectural Council and J. Harry Blohme of Ward & Blohme are the architects, are rapidly nearing completion and will probably be ready for figures during the week. This building is over 900 feet in length by 360 feet in width and consists of three great naves running the full length of the building, spanned by wood arched trusses 75 feet span by 100 feet in height which will give the impression of great barrel vaults. The architectural design is of Roman form, portions of which recall in form the ancient "Baths of Diocletion and Caracalla" with free ornament and detail. These plans will be issued for figures from the Buildings and Grounds Department of the Exposition Company.

The third meeting of the Architectural Commission will be held during the week, at which time all finished designs will be exhibited.

Building construction for the month of November in San Francisco amounted to $2,160,045. This was an increase over the previous month of $200,000 and the largest total of any month since July. Of this amount $1,387,734 was for brick and concrete construction; $570,045 was for frame buildings, and $202,266 was classed under the head of additions and alterations. Fire proof construction therefore had by far the better of it all the way through over half the entire amount being in contracts for buildings of an enduring type. This total of more than two million is the largest since July, although it fell short of November 1911, that month having registered $2,647,318. The year, however, total up far ahead of 1911 the past eleven months aggregating as much as the previous twelve. The record for the year is as follows:

January, 1912	$1,692,810
February, 1912	1,696,232
March, 1912	2,146,011
April, 1912	3,135,334
May, 1912	3,153,910
June, 1912	2,058,334
July, 1912	2,217,215
August, 1912	1,797,408
September, 1912	1,886,743
October, 1912	1,918,839
November, 1912	2,160,045
Total	$24,762,771

It will thus be seen that the year has averaged more than two million a month. The total for 1911 was $24,131,268, which is less by some three hundred thousand than the past eleven months.

Compared to other years the figures for November for the last decade are as follows:

November, 1903	$ 812,583
November, 1904	896,297
November, 1905	1,159,463
November, 1906	6,733,985
November, 1907	1,482,765
November, 1908	2,604,186
November, 1909	1,807,073
November, 1910	805,928
November, 1911	2,647,318
November, 1912	2,160,045

November has kept up the average and the prospect are that the winter months will see a more buoyant tone.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo. for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. *Address,*

H. B. WILLSON & CO. Patent Attorneys
Box 239 Willson Bldg. WASHINGTON, D. C.

Dr Cook is to have the last word and tell how it all happened. Evidently he expects to coin money out of his Munchausenisms. For if reports and data and looks count for anything the Artic explorer has the German Baron, who has long held the palm for being the biggest liar in the world, easily backed off the map.

WHARFINGER.

The Harbor Board at a special meeting held last Saturday appointed John Gilson wharfinger in place of E. E. Cottle, whose term has expired. Gilson will assume his new position as soon as he furnishes a surety bond for $1000 and the Harbor Board approves it.

J. J. Dwyer, president of the Board, will leave for the East to represent the State Harbor Board at the International Conference of Harbor Authorities of the United States, to be held in New York, beginning December 9th.

Saturday's meeting was held in order to dispose of any business which many come before the Board prior to President Dwyer's departure. He will be absent three weeks.

Editorial Comment.

The first bill introduced at the present session of congress has been one to pension ex-presidents. This is a better plan than that of accepting a gratuity from men like Carnegie.

President Roosevelt once remarked that after a great state dinner to a representative of another nation he had said to Mrs. Roosevelt, "There goes one child's schooling for a year." The dinner had cost about what it would have taken to maintain a child for a year in a boarding school. Yet he was not giving it in his private capacity, but as the Nation's agent.

He told of the incident in a discussion of the financial straits into which ex-Presidents often have come. Fortunately, he said, the subject did not concern him personally, since he had some money, and besides, he expected to be able to earn his own living. But the chances were, he felt, that a man who had been before the public long enough to become President would be out of touch with business or professional life, so that it would not be easy for him to get back and earn the income to maintain the standard of living that the country expected of an ex-President. If a President were relieved of the necessity of saving out of his salary by the assurance of a national pension on his retirement from office, he would be relieved of a burden, and the Nation would not risk the sort of humiliation that it was forced to share with General Grant in his Wall Street failure.

While the president gets a salary of fifty thousand a year it is hard to save from such a salary. The office could attract the best men in the country whatever his financial fortune may be. As in the case of Governor Wilson, his occupation as a teacher had prevented him from saving money in any degree commensurate with the position he occupies and no doubt when he leaves the presidents office he will be no wealthier than when he went in. The country is entitled to his best services and if at the close of his term he is no longer able to earn a living commensurate with his station in life he should be made independent of any outside gratuity or favor.

An article in a recent issue of The Saturday Evening Post says: "All the wonderful boom in real estate is now on in western Canada. Here the old development of the west over again. While we are often disposed to think of those provinces as out of the line of travel by the settling statistics show the country to increase in population, also in general course in residence structures.

Over four million feet of lumber alone is included in the total expenditure for new buildings undertaken in Edmonton this year up to the end of October. Taking into account the increased number of business and industrial structures that would justify so pronounced a development in this direction, it is readily to be seen that Edmonton is rapidly assuming an important place among Canadian cities. In all 1,788 permits were issued for residential structures which represent an average cost of $2,100, or a better balanced investment than some of the larger cities can boast.

A citizen of San Francisco standing upon the sidewalks of its Chinatown, in the heart of the city, and watching a funeral procession cannot help but be struck with the strange mingling of modern and ancient customs, the mixture of the Orient and the Occident, the engrafting of new customs on an old people wedded to the precepts of their fathers for ten thousand years. First of all comes a European band of the young Chinese boys playing American funeral music. Then the mourners dressed in accordance with ancient rites and distributing the yellow papers for the dead. Then the native bands to frighten away the evil spirits and the whole parade indicating the admixture of many ideas of time and the contact of races has evolved. But while they may still hold to their ancient creeds in religion and the funeral ritual and other solemn ceremonies the past few years and especially the past year has been revolutionary. No longer is there a queue to be seen in all Chinatown. And as that itself is an old badge of servitude to some and instead of an absolute monarchy a republic exists in which are some of the most modern ideas. From the ancient and proper of six thousand years China is beginning to awaken. The right to vote has not only been extended to the men but to the women also. So far the Chinese people are progressed rapidly. This is chiefly due to the fact that [illegible] young Chinese who have received their training in western colleges. So far they have been successful. The world is now witnessing the oldest nation undergoing a change from [illegible] to democracy, and to most will be interesting. If the [illegible] of these people [illegible] and our country [illegible] we will [illegible] for [illegible] and [illegible] to [illegible] [illegible] [illegible]

[illegible] of San [illegible] [illegible] [illegible]

litigant died before he got the legacy that is still in the courts. So it seems that the Hetch-Hetchy matter is provocative of endless controversy.

It has been most beautifully scrambled. The City Engineer dwadled along for years on the Lake Eleanor proposition. Then Mayor McCarthy, by the Gods, put a crusher on the proposition to buy out Spring Valley at a reasonable price. And not until we got the report of Engineer Freeman did we have a tangible basis to work on. It is to be hoped that some amicable adjustment may be made with the Secretary in regard to the permit. Or it would be better still if President Wilson would see fit to name James D. Phelan for the position of Secretary of the Interior. Then San Francisco would have some one who really understood the situation and the matter would clear up in much the same manner that the engineering problems were solved by Freeman.

It need hardly be told to builders that it will be impossible to build the gingerbread castles necessary to create the great fairy land to be constructed on the Exposition Grounds under the present building law of San Francisco. Attention is called to an announcement by President Moore in another column of today's issue calling attention to the necessity of passing Charter Amendment No. 2.

There is grave danger that this necessary measure will be defeated because of the great number of charter amendments offered at this time and the complexity of some of them. There is a growing sentiment that taxes are almost up to the limit and there is a necessary expense coming in the purchase of the Spring Valley Water Company's plant.

There are thirty-seven amendments to be voted on. Some of them are good and some of them, to say the least, are ambiguous and inexpedient at this time. However some of them are necessary and should be passed. Amendment No. 1 provides for the logical development of the Civic Center. We have already voted bonds for it and as this entails no extra expense it is right that the means should be given for its development. Charter Amendment No. 2 relates to giving the Supervisors power to pass ordinances that shall be special in their character for the erection of the show buildings of the Exposition. Charter Amendment No. 36 provides that the 3½ Library bonds of 1904 may be sold at a discount so that there will not be a greater interest charge than 4% on the city. This amendment should be passed, as under the present condition of the money market it is impossible to realize on the bonds and they have remained unsold since 1904.

There are several other amendments of merit. No. 3 provides for the extension of the Civil Service rules to several of the departments of the city and adds no expense to the taxpayer. There are so many others and they involve so many questions that it is up to the individual voter to express an opinion.

Reports of progress of the Exposition work is commendable. Affairs seem to be well in hand and ground is rapidly being leveled for many of the Exposition palaces. Most of the countries have already selected exhibit sites and more than 800 of the leading exhibitors of the world have already applied for exhibit space. This is the best record that any Exposition has ever had at this stage of the game and speaks well for the management. It is to be hoped that everything will go on with the same accord and that the work will begin with the coming year.

An instance of the money used in the business of this country is given in the recent transfer of the treasurer's funds of the United States.

Carmi A. Thompson, the new treasurer of the United States, gave Lee McClung, his predecessor, a receipt for $1,519,285,908.57 2-3 representing the money and securities in the personal custody of the treasurer on November 21, when McClung retired.

The big amount for which Thompson receipted includes $156,738,000 in silver dollars, $4,196,000 in gold coin, $379,886,000 in paper currency in reserve, $87,441,000 in bonds and securities, $22,813,000 in national bank notes in process of redemption.

This vast amount represents in some degree the money necessary to do the work of the country. And yet a few men in New York control the money to loan to the insurance companies and the banks of the companies.

The time is coming when the nation itself will take care of its insurance as well as its business and the central power will be not in a small group of men outside the government but will be in the government itself.

Manager [illegible] announces that the new Tivoli Theatre will be open for business on March 15th next. This is encouraging news as a theatre of the kind will restore to San Francisco one of its most essential properties. The old Tivoli had a better reputation throughout the country than any theatre could go it one better. Here was to be served fine dining and it is to the credit of San Francisco to say that of its size supported an organization such as the old Tivoli represented. It is to be hoped that the new Tivoli will receive loyal support before the hue and cry goes to San Francisco some of the old time motif, song in hand and go to open and at [illegible] prices such as used to obtain at the old Tivoli of course.

A "LOST RIVER."

Kern River in California Never Reaches Its Former Outlet—Waters Conserved for Irrigation.

The deep Kern River canyon, in the rugged Sierra country of California, is interestingly described in a report just issued by the United States Geological Survey. Altitudes in the Kern River basin range from a few hundred feet to more than 14,000 feet, so that the mouth of the river is lower than its headwaters by a mile and a half. Mount Whitney, the highest mountain in the United States, towering 14,501 feet above sea level, overlooks the northern part of the Kern River basin from the east.

Kern River rises in glacial lakelets among the high peaks of the Sierra divide and on the Kings-Kern and Great Western divides. It flows directly southward about 70 miles, then southwestward to the mouth of its canyon a few miles northeast of Bakersfield, where it enters the south end of San Joaquin Valley. No water from Kern River has reached the San Joaquin in recent years. The water is all utilized for irrigation before it reaches the larger valley, and the Kern becomes a "lost river."

The principal tributary of Kern River is its South Fork. The basin is divided into two lesser basins, differing greatly in topography. The eastern basin is characterized by comparatively low, flat, and irregular hills, separated by many intervening meadows, large and small, it is drained by the South Fork. The western basin is characterized by high glaciated peaks and ridges and by deep canyons; it is drained by the main stream, which flows for a great part it its length through a narrow canyon. Kern River canyon proper is about 20 miles long, 1 mile wide at the top, and 1,500 to 2,000 feet deep. The bottom of the canyon is several hundred feet wide and the average gradient is 100 feet to the mile.

BRICK SHORTAGE.

LOS ANGELES, Dec. 4.—Conditions in the brick market are rapidly improving and it will be only a few days until the manufacturers have caught up in the supply and will be able to fill all orders promptly. One prominent brick manufacturer states that the slight shortage which has existed this summer was not as serious as might be imagined and that if the equipment of the manufacturers had been only one machine greater, the demand would have been promptly supplied. Furthermore, the orders for brick for summer seemed to come in bunches and if the brick could have been supplied promptly the contractors would have been unable to secure bricklayers to handle them. The large number of brick buildings that have been erected this year is very gratifying in one respect as it indicates that the owners and builders are beginning to appreciate a better class of building.

CONTRACTS LET FOR HICKMAN DAM.

MODESTO, Dec. 4.—T. K. Beard, President of the Ford Construction Company, has been awarded the contract for the construction of a dam and outlet gate to impound water for late irrigation in the Morley lakes east of El Kinan. The contract was awarded by the director of the Turlock Irrigation District. The contract price for the work is $45,000 and the construction must be completed by January 15, 1913. The contract is for a portion of the Turlock Irrigation District reservoir work. The reservoir when [illegible] will impound enough water to [illegible] the irrigation season.

ROAD BUILDING AS A POLITICAL ASSET.

Political and Historical Significance Of Transcontinental Highways

Extracts from an address delivered before the third annual convention of the Inter-Mountain Good Roads Association held at Logan, Utah, in June, 1912.

Miles Cannon.

President and manager of Weiser Trading Company, Weiser, Idaho.

The objects of our meeting in convention are to extend support to encourage to greater effort and to promulgate a more general interest in what may be considered one of the greatest, if not the greatest, needs of a great people, as revealed by the early light of the twentieth century, suitable roads for cheap and rapid transportation. The automobile has come. It has been tested, tried and accepted by mankind. It is here to stay. It has solved many problems but more especially the problem of speed. It has become one of the chief factors of modern realization of progress and effort. It stimulates the tired energies of a race, rewards genius, employs labor, beautifies wealth and adds materially to the joy of living. With the inventive genius of our countrymen has come many avenues of labor, comes now the automobile and opens wide a new and new ones for every one progress it has seen fit to close.

The problem of cheap and rapid transportation having been solved the nation today is face to face with even greater problem a problem that has to do with every phase of life, one that enters into and engages a feature in the earning powers of every man and woman, one that is now more than ever, before the principal element in the achievement of human effort—the betterment of public highways.

Road building is a political asset opens a very extensive and productive field of discussion as the question actually comes to the use of public moneys a delicate matter with the candidate and a dangerous one for the office holder. In discussing the question I may be pertinent and instructive to notice at least three primary elements in supporting an argument in favor of the use of public money in the establishment and maintenance of first-class trunk lines across the continent so located as to enable state and county connections, making it possible for those who bear the burden of progress to employ and make profitable use of the modern means of rapid transportation with which science has already distinguished the present century.

First, permit me to express my cordial concur of the modern, up-to-date, practical policies. Those views advocating the not open to future improvement. The greatest advance in practical effect has been in local and commercial relations. Peace, settlement and appreciation of the human virtues to them civilization would seem to be before the people that will

has not been tried, pilots who know nothing of the river's channel, sailors who take no bearings, historians who know nothing of the past, those trumpet leaders or would-be leaders who keep their eye on the weather vanes and forecast only the political winds that blow. It should be remembered that these gentlemen do not contribute materially to the progress of the age, except, that they are quick to follow anywhere public sentiment may lead. Statesmen usually handle a public question on its merits, while the up-to-the-hour politician is actuated and controlled almost wholly by public sentiment. In bringing a great question before the bar of public opinion, therefore, two primary elements are necessary: First, logic for the statesman, and second, public sentiment for the politician.

It may be pertinent at this point to speak of our ability as a nation to engage in the task of constructing public highways. It should be remembered that from the standpoint of natural resources, extensive territory and accumulative wealth, this nation with one of the youngest stands head and shoulders above that of any other nation in the world. Our territory is so extensive that the sun shines continuously upon the land over which our flag floats.

In railways we have more than all of Europe combined. They talk of the foreign commerce of Great Britain, while we have one railroad in the United States, the Pennsylvania Central, which handles more tonnage every year than all the foreign commerce of England combined, and after supplying our home market we send abroad more than six hundred million dollars' worth of manufactured products annually. Our crops are worth no less than eight thousand millions of dollars every year.

If the homes of the people of the United States were stretched out in one continuous avenue, allowing twenty-five feet for each resident, on either side of the street they would reach around the earth, and from New York to the Missouri River overlap once. We supply sixty per cent of the coal and forty per cent of the timber of the world; we pay the highest wages, we have the most progressive people, and the products of our toil reach every nook and corner in civilization.

The people contribute to the government every year over one billion of dollars. It is remarkable to observe that out of every hundred received by the government nearly ninety dollars is expended in ninety counties about sixty cents on every hundred dollars in the federal treasury, with the balance going principally for the improvement of rivers and harbors. The construction of federal buildings and the establishment of the Western reserves for coming yet unborn

In military channels it is interesting to observe that the government expends not less than one hundred and seventy-five million dollars each year for the up-keep of the navy. In 1910 it expended fourteen million dollars to send a fleet around the world and four million dollars in target practice.

From 1837 to 1910 there is no record that the government expended one dollar in the betterment of public highways. It is stated upon the best of authority that the most expensive burden in the affairs of mankind and the greatest impediment to human progress is today and ever has been the shameful neglect of the public highways of this republic. Now that we have the means of rapid transit supplied by the inventive genius and progress (not progressives) of our people, a motive power which will transport us over the country at the rate of two hundred and fifty miles per day, the road condition is made more apparent. It is necessary, therefore, to arouse public sentiment and agitate the absolute necessity of better roads and insist that every political platform county, state, and nation, have incorporated therein strong, vigorous and unmistakable demands that the government take notice of this feature in the internal improvements of our country.

The second feature of which I will speak, and which in my judgment has a strong political bearing upon the questions, is the doctrine, which has lately sprung into being, known as "Conservation of the Nation's Resources." When these mountainous states of the West were admitted into the Union there was a solemn compact entered into by the general government on the one hand, and the state on the other, wherein the waters of each state, navigable rivers excepted belong to and should be under the control of the state. The land of which these rivers was to remain under the jurisdiction of the federal government and be disposed of to settlers of the various states for the purpose of development and home building. Progress now-a-days has revealed the startling fact that hidden in the recesses of these mountains were created the power to move every railroad to turn every wheel, move every train, and every one [illegible] spot of desert land in all the territory of the United States. Science has so far been unable to estimate the power capable of being generated in our mountain streams. The human mind is unable to [illegible]

market and from the heart of the mountains it runs, gathering force and volume, and has entered into an exhaustive contest with the states bordering the progress and development of the west in a resentful effort to deprive the west of wealth, which in all fair equity and justice of precedent belongs to the inhabitants of the West. There is a well defined purpose to retain these lost elements of power, opposed to the rights of the people of the west and against law and justice and as a device to force the general government to be dominated throughout the world by the methods of reasoning best suited appeal to force. This taxation could fall upon every light, fuel and power office or every store, or every home or every acre of land but it is evident and apparent to everyone, and against its development and progress combines have been formed to secure control of the markets of the world, and the United States is given a compelled to pay the excess of the general government in keeping out of the West the people of the Pacific Coast and the traveling public throughout the world; that are constructed across the West but from west to east, and commerce between the two oceans, may cause to be taxed at such rates as may be fixed by the railroad companies.

The automobile as a pleasure vehicle during the past few years feature of the country has created certain modes free of passing through a community the automobile has become a necessity to the West. The tel and automobile has done much to change the character of the people and the commercial conditions of the West. Before the automobile was extensively adopted and used in the West it was necessary to have a large capital to enable a settler to purchase horses for work purposes of industry. This necessity will be removed.

The automobile and the oil engine will be the means of developing the resources of the West, and cause the population to increase. We have a large area of land which is adapted to the raising of alfalfa and other forage crops, and the automobile will be the means of developing the dairying industry. The oil engine will be the means of developing the irrigation of the land. The automobile will be the means of developing the tourist travel. The oil engine will be the means of developing the power for the irrigation of the land. The automobile will be the means of developing the tourist travel. The oil engine will be the means of developing the power for the irrigation of the land. The automobile will be the means of developing the tourist travel. The oil engine will be the means of developing the power for the irrigation of the land.

The unspeakable tragedy at Scott's Bluff, the Indian tragedy at Devil's Gate, the wonderful South Pass, the famous rendezvous at Green River, the fatal tragedies of the Bear River, the story of Fort Bridger, the romance of Soda Springs and the pitiful trials of the emigrants at Fort Hall and the memorable camp ground at American Falls and the horrors and suffering of the Hunt party of colonists of years ago at Caldron Linn, now Milner, the palisades of the Snake River, the greatest of Fur Trade in the known about the place and at Glens Ferry, Fort Boise and the memorable event of the Weiser River where the Shoshone Indians saved from total destruction two first white parts that ever crossed southern Idaho and the events of the Baker City and Grande Ronde country covering a period of a hundred years should a marked influence associated to the people of the United States as the public will commemorate these events that by the extension of the United States and the development of the great Pacific Coast would be the

The [illegible] work of the road and [illegible] The [illegible] [illegible] building will become a [illegible] asset [illegible] men not only in the West but [illegible] [illegible] will be abundantly [illegible] investment. If encouraged greater effort will be made the possibilities that [illegible] twentieth century.

IMPERIALISM AND ARCHITECTURE.

From The Builder, London.

The greatness of a civilization is [illegible] and it is [illegible] there. Without the pediments and colossi of the Egyptians, the temples and monuments of the Greeks or the basilicas and aqueducts of the Romans, ancient history would be a mystery, its legendary and fabled. Equally is the architecture of the ancient peoples [illegible] as we know them to have been carrying out we [illegible] [illegible] influence and we [illegible] [illegible] but we all [illegible] [illegible] of [illegible] [illegible] [illegible]

member that the eyes of the Australian are, by the spread of literature and the illuminations of the photographer, open to the architecture of the world. In South Africa without interfering with the natural expression of imperialistic ideas, the homestead of the original Dutch settler supplies the motive for the same type of building erected in modern times. It is somewhat regrettable, however, to find that these rustic characterizations have been allowed to penetrate the more important monuments of the towns. Even so, whilst it may savor of presumption to enforce an imperial architecture upon countries like India, possessed of glorious native traditions, at the same time to attempt to emulate the native craftsman by a process of transmutation through British eyes would be as foolish as it would be weak. The recent erection of public buildings in Bombay in a pseudo-Indian-cum English style is a distinctly retrograde step.

The confusion consequent on the attempt to combine the characteristics of a modern European and Indian building in one and the same structure, to erect for the native that which by tradition he alone is capable of erecting for himself, is to invite not only the scorn of the imperialist, but also the ridicule of those whose own noble architecture has been so grossly caricatured. As a compliment in political diplomacy it is shallow, and from every point of view a grave error.

The Oriental is today interested and concerned in emulating the civilization of the Western world. Our architectural schools are training students from India, China, and Japan. Indian rajahs vie with one another in building houses based on English models. If we are to retain suzerainty in India this attitude is one to be encouraged. Before the Mutiny palatian residences and public buildings were erected in accordance with the understood traditions of the protectorate power. With the characteristic assurance and confidence enjoyed by our predecessors of the period we unhesitatingly expressed ourselves in our natural and straightforward way. This was not to be interpreted as showing any lack of appreciation of the glories of the Mogul Empire, it showed no disrespect for the unapproachable delicacy of the minarets and domes of the Taj Mahal, no disregard for the beauty of the coniferous spires of the city of Benares, no antipathy to the palaces of Agra, or distaste for the earlier rock-cut tombs. Indeed, such an attitude is one of submission, veneration, and respect; a conscious recognition that these things are the unattainable remains of a glorious past.

An empire can nurse no finer ideal than the cohesion of its dominions in cities erected in one style of architecture recognized throughout the world as the expression of its own imperial ideals. The encouragement of such an empire pervading style throughout colonies, dependencies, and protectorates will tend to annihilate distance and conduce to an imperial liberty, equality, and fraternity. Out of political it will create personal ties, and into closer relation will bring the ambitions of those whose destiny it is to excel.

West Coast Kalsomine Company Secures Factory Site In Berkeley.

Rapidly Increasing Business Demands That Output of Paints Must Be Doubled At Least. New Site Embraces Three Acres and Affords Water and Spur Tract Shipping Facilities.

The West Coast Kalsomine Company, a rapidly growing firm engaged in the manufacture of cold water paints, concrete paints, flat oil paint and Wesco Kalsomine, has recently purchased a large three acre factory site with water and spur track shipping facilities on Grayson street in Berkeley.

This tract was formerly held by the Kalsomine Company is producing 500,000 pounds of the various products and with the completion of their new plant this will be increased at least three times. The four particular points mentioned above have met with much success in this market and the increase in the output of the plant will be welcomed by the many consumers.

WEST COAST KALSOMINE CO.'S NEW FACTORY SITE AT BERKELEY.

ed Stauffer Chemical Works and now contains several buildings to which will be added a number of others. The new owners plan on expending in the neighborhood of $40,000 early in the coming year for improvements. These will include a three-story frame building, 200x100 feet, an office building and a new laboratory.

At the present time the West Coast

The officers of the West Coast Kalsomine Company are: R. S. Pendleton, President, W. E. Luzan, Vice-President and General Manager; R. S. Penniman Jr., Treasurer and Superintendent, O. J. W. Leonard is acting as City Sales Manager.

The accompanying halftone shows the new factory site and the present buildings.

A Successful Firm.

Hardwood Interior Co.

Nothing succeeds like success. Excellent [illegible] is a successful firm. That's the reason why the Hardwood Interior Co. at 11 Grant street, San Francisco is always busy. It is not necessary to give a list of the jobs they are doing. Everybody knows them. Get their estimate for hardwood floors, etc. Ring up Telephone Kearny 4146 or Home J 1613.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO. Apartment house, alteration. Cost not stated. Architect [illegible]. Fred L. Hansen Monadnock Bldg. S. F. This work will include heating, the present building to be remodeled and plaster pea boards taken off. Interior will also be altered throughout, including new plumbing, electric wiring, interior finish and other work. Plans are in the hands of the owner who will do the work on Day Labor.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO. Harbor work, reinforced concrete piers. $500,000. Engineer, Newman, Ferry Bldg., S. F. Owners State of California. Final approval has been given by the State Board of Control to the plans for a new pier which is to be constructed at once at the foot of Bay Street. Construction will be similar to that used in the new ferry transport docks. Plans for seven other large piers are well underway, and the Harbor Engineer states that bids will be called for at intervals of ten days.

YOSEMITE NATIONAL PARK, CAL. Bridges, 4 reinforced concrete. Cost not stated. Engineer, U. S. Government Engineers. Owners, United States Government. Bids for this work are now being received and will be opened on February 1st 1913, at the office of Lt. Col. William Forsythe, Supt. of Yosemite National Park, Yosemite, Cal. Bridge No. 1, one arch, 105-foot span, 15½-foot rise, and 26 feet clear width. Bridge No. 2, one arch, 70-foot span, rise 14½ feet, width 17½ feet over all at crown. Bridge No. 3 same dimensions as No. 2. Bridge No. 4 two arches, 70-foot span each, rise 23½ feet and width 17½ feet over all at crown. Bidders must bid on each bridge separately, or may give a lump bid on all four bridges, or any two or any three of the bridges. The bridges are to be constructed on the floor of the Yosemite Valley, and it is suggested that prospective bidder personally inspect the various sites before submitting proposals. Each bid must be accompanied by a certified check for $500 payable to the order of the Secretary of the Interior, which sum is to be forfeited to the United States should the bidder fail to enter into contract with satisfactory surety of the full amount of his bid within thirty days from the notice of award. The right is reserved to reject any and all bids and accept bids on any one, two or three of the bridges, as may be deemed most advantageous to the Government. Plans, specifications, and blank forms of proposal may be obtained on application to the Acting Superintendent of the Yosemite National Park, Yosemite, California, and may be seen and examined in the U. S. Engineer's Office, Room 105 Custom House, San Francisco, Cal.

HERMOSA BEACH, LOS ANGELES CO., CAL. Bridge, concrete construction. $50,000. Engineers, Munoz & Munoz, Hermosa Beach. Owners, Town of Hermosa Beach. Plans have been revised for this work and have been

accepted by the Board of Trustees. Bids will be called for on the construction at once. Full particulars can be secured from either the engineers or from the City Clerk of Hermosa Beach.

BELLINGHAM, WASH.—Dock and warehouse, frame construction, $30,000. Architects Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co. This work has been mentioned here before. The dock will be 100x300 feet, of wooden pile construction and will carry a frame constructed warehouse 1½ stories high and 70x120 feet. Plans are complete and figures will be called for at once.

Contracts Awarded.

SEATTLE, WASH.—Harbor work, bedding and wharfs, $34,567. Engineer, Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. The following items have been awarded contracts for harbor development work by the Port of Seattle Commission:

Erickson Construction Co., New York Blk., on a bid of $168,700 for dredging of a slip 221 feet wide between Stacy and Lander streets, from the East Waterway into Wasteom avenue, etc.

Weymouth Construction Co., pier 1, on a bid of $139,550.50, for substructure on East Waterway improvement, piling, bulkheading, etc.

Puget Sound Bridge and Dredging Co., Central Bldg., on a bid of $22,000 for dredging in Salmon Bay.

J. A. McEachern & Co., Bailey Bldg., on a bid of $12,351.86 for substructure, piling, bulkheading, etc., in Salmon Bay.

E. J. Rounds Construction Co., Globe Blk., on a bid of $7,365.57, for water mains, etc., at East Waterway project.

Total for all work, $313,767.98.

The above items although not formally awarded the contracts, have been selected by the Port Commission as the successful bidders who will secure the work.

CHURCHES.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, reinforced concrete. Cost not stated. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. The main auditorium, having a seating capacity of 900 people, will occupy the entire first floor. Basement, which will be nearly all above ground, will contain the Sunday school room and class rooms. There will be furnace heat. Interior will be finished in birch or white cedar. Partitions will be of metal lath and plaster. Auditorium floor is to be of concrete. Roof will be supported by steel trusses. The exterior of the building will be faced with pressed brick. Plans are being prepared.

VAN NUYS, LOS ANGELES CO., CAL.—Church, 1 story and base, frame and brick construction. Cost not stated. Architect, Elmer R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, Methodist Episcopal Church of Van Nuys. The building will cover a ground area of 75x75 feet and will contain a main auditorium, pastor's study and Sunday school rooms. Interior finish will be of pine throughout. Furnace heat will be installed. The exterior of the building will be faced with brick veneer. Plans are complete and figures will be called for this week.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete system. Engineer, A. L. Hornblay, Pacific Bldg., S. F. Owners, Warehouse Investment Co. The building will cover an area of 90x125 feet. Construction will be mapped throughout and will be designed for floor loads of 150 pounds to the square foot. There will be metal window frames and sash and fireproof doors. Freight elevators will be installed. The exterior will be faced with cement plaster. Plans are complete and the architect is taking figures on both a general contract and segregated. Bids are to be in this week.

SAN FRANNCISCO—Factory, 3 story and base, reinforced concrete, $250,000. Architect, John Graham, Lyon Bldg., Seattle, associated with William Knowles, Hearst Bldg., S. F. Owners, Ford Motor Car Co. This work has been mentioned here a number of times before. Plans are now complete and figures are being taken. Bids will be opened Thursday of this week. The building will be erected on Harrison street between 21st and 22nd streets.

LOS ANGELES, CAL.—Warehouse, 3 story and base. Class A construction. Cost not stated. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owners, Roebling Construction Co. The building, which is to contain the general offices of the company, will cover a ground area of 25,000 square feet. The upper two floors will be used for warehouse purposes. Either the reinforced concrete type of construction or a steel frame will be used. There will be elevators, metal window sash and frame and fireproof doors and an automatic sprinkler system. Plans are now being prepared. The location of the building affords excellent spur track facilities.

SEATTLE, WASH.—Warehouse, 2 story and base, brick, $85,000. Architect, Engineering Dept. National Biscuit Co., New York. Owners, National Biscuit Co., 310 Westlake Ave., Seattle. The building will be 90x96 feet and is designed as a distributing plant for the company in the north. Plans have been forwarded to the local offices and are now in the hands of the Building Inspector. Bids will be called for within a few days. The company's offices, stables and warehouse will occupy the entire structure.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Fidelity Storage and Moving Co. Contractors, Davidson Construction Co., Union Oil Bldg., L. A. Contract price not stated.

LOS ANGELES, CAL.—Warehouse, 4 story and base, reinforced concrete, $285,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Ford Motor Co. Contractors, Carl Leonardt, L. A., general contract, $285,000. Note—The following sub-contracts have been awarded on the work. Elevator wiring to Woodhill & Hulse at $1,082; plumbing and heating to Thomas Hiverty Company at $9,806; elevators to the Van Emon Elevator Company at $7,710, and sprinkling system to M. J. Spencer, at $10,118.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, $5,000. Architect, none. Owner, J. Herold Johnson, 16 Cole St., S. F. The building is to be designed to contain two modern flats—each of which will have five rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be gas grates and tile mantels. Entrance will be finished in tile. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000 each. Architect, none. Owner, Patrick M. McDonald, 1049 Treat Ave., S. F. These two buildings will each contain two flats of five and six rooms. The interiors will be finished in redwood and pine. There will be some oak floors and elm panels. Open fire places and tile or brick mantels will be used in the living rooms. Baths will be finished in tile. The exteriors of the buildings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, $18,000. Architects Faire & Bearwald, Western Metropolis Bank Bldg., S. F. Owners name withheld. This building will be erected on Howard street near 15th, and has been designed to contain nine flats of four rooms and bath each. Interior will be finished in pine, redwood and elm. There will be some oak floors. Gas grates will be used. The exterior will be covered with siding and rustic. Plans are now being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, $10,000. Architects, Faire & Bearwald, Western Metropolis Bank Bldg., S. F. Owners name withheld. The building will contain three flats of the residential type and is to be erected on 1st Ave. in the Richmond District. Each flat will have five rooms and bath. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. The exterior of the building will probably be covered with brick veneer and rustic or cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000 each. Architect, none. Owners, McKillop Bros. & Co., 58 Cole St., S. F. These buildings will each contain two flats of five and six rooms and bath. Interior finish will be of pine and redwood with some oak panels. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Baths will be finished in tile. The exteriors of the buildings will be covered with cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, $4,000 each. Archi-

feet, none. Owner, C. A. Ro[illegible] 774 9th Ave. Each building as now arranged for two models, that of five and six rooms and baths. Tile roofs will be installed in pans, redwood, mission. Oak floors will be used in the halls and dining room. There will be cement fireplace and tile mantels. Tile will be used in the bathrooms and kitchens. The exterior of the cabinets will be covered with [illegible] and cement plaster on metal lath. Private contracts are in the hands of the owner and will do the work by Day Labor.

GARAGES.

SAN FRANCISCO, CAL. Garage, 1 story and basement, reinforced concrete. $25,000. Architects, O'Brien & [illegible], Crocker Bldg. Owners, Royal Investment Co. The building will be erected at the northwest corner of Van Ness avenue and California street, and will cover an area of [illegible] feet. The first floor will be arranged for an office, waiting room, and will be used for automobile business. Upper two floors will contain repair shops and [illegible]. A [illegible] storage space, etc., be provided for in the basement. Construction will be fire proof throughout. There will be metal windows and [illegible] doors. The exterior of the building will be faced with [illegible] brick. Plans are complete and are being taken by the architect.

SAN FRANCISCO, CAL. Garage, 1 story and [illegible], brick, $20,000. Architect, [illegible]. Owner, P. H. Howard, Geary and Buchanan streets, S. F. The building will cover a lot [illegible] feet. The first floor will contain office, show rooms, and a part of the basement will be used for storage space. Reserved space will be left between [illegible] for each department and [illegible]. LOS ANGELES, CAL.—Stores and offices, 6 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, I. W. Hellman. This building will be in the nature of an addition to the I. W. Hellman Building at 4th and Main streets. There will be hollow tile interior partitions and floors, steam heat, elevator service and a vacuum cleaning system. Interior finish will be of oak and tile. The exterior of the building will be lined with glazed terra cotta. Plans are being prepared and construction will be started early in the coming year.

LOS ANGELES, CAL.—Stores and lofts, 7 story and base. Class A construction. Cost not stated. Architect, S. Tilden Norton, Title Ins. Bldg., L. A. Owner, Lung Yep, manager for Sing Fat & Co. Construction will be of the Class A type throughout with a complete steel frame and exterior walls faced with terra cotta. Interior partitions and floors will be of hollow tile. There will be passenger and freight elevators, steam heat and metal window sash and frames and fireproof doors. The building will cover [illegible] square feet. Plans are being prepared.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base, reinforced concrete. Architects Curlett and Reed, Eisen Bldg. Owner, Realty Syndicate, 607 Security Bldg., L. A. Owners, California Title Insurance Co. Real Estate and Building Co. The syndicate has negotiated a lease on the property on Hill street between 4th and 5th streets, and will shortly start the construction of the above mentioned building. No details have as yet been made public, but will be published in these columns shortly. The property has a frontage of 80 feet and a depth of 150 feet.

LOS ANGELES, CAL.—Stores and club building, 10 story and base. Class A construction. Cost not stated. Architects Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Ashley Ward. This building has been mentioned in these columns from when plans were first started. Working drawings are complete and bids are being taken. The first floor will contain the store, entrance and lobby, the next six floors will be arranged for offices and the remaining upper floors have been leased to the Knickerbocker Club and will be handsomely finished. Excavating is now underway in charge of J. A. Hall. Bids will be taken on a general contract and as segregated work.

PORTLAND, ORE.—Stores and offices, 6 story and base. Class A construction. Cost not stated. Architect, J. D. Dautoff, Sherlock Bldg., Portland. Owners, private. The building will be faced with stone or terra cotta trimmings. The first floor will be used for mercantile purposes and the upper floors will be occupied by offices. Architect is now receiving plans from which he will select those to be used. Plans are complete so far as completed. A [illegible] is composed [illegible] stories and will be [illegible] The building is to be equipped with [illegible] passenger elevator and will have a steel [illegible] Plans are being prepared.

PORTLAND, ORE.—Offices, 8 story and base, reinforced concrete. Cost not stated. Architect, David C. Lewis, Portland. Owners, Northwestern Electric Co. The owners have taken a lease on the old Pittock Block and have announced their selection of an architect. The building will be used for the offices of the company. Mr. Lewis is in San Francisco in conference with the Electric Bond & Share interests and details of the building have not been determined. A full description will be published as soon as details have been determined.

PORTLAND, ORE. Stores and offices, 12 story and base, reinforced concrete. Cost not stated. Architects, Doyle, Patterson, & Beach, Portland. Owners, Multnomah Company. The announcement of the selection of an architect has just been made and no particulars of this work can be given at this time. Construction will be rushed. It is stated that the owners and architects preferred a steel frame structure, but the impossibility of securing steel at once was responsible for the determination to build reinforced concrete. Complete particulars will be published later.

Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCES — 2, 2 story and base, frame, $3,500 each. Oakland, Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mark W. Anthony. Both of these houses have been designed to contain seven rooms, baths and sleeping porch. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be wainscoted with tile and will have composition floors. Tile will also be used in the kitchens. The exteriors will be covered with cement plaster. Plans are complete and in the hand of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, $4,000. Oakland, Cal. Architect, none. Owner, Lester B. Reiff, 1098 Grand Ave., Oakland. The house has been designed for a seven-room dwelling with bath and sleeping porch. All interior finish will be of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. There will be an automatic water heater installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is taking subbidders on the work.

BUNGALOW — 1 story and base, frame $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St. Berkeley. The house will contain six rooms and bath. Interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places with tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley, owner, Henry Porch, Jr. The house will contain seven rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Oak floors will be used in the living room and dining room. Bath will be finished in tile and will have a composition floor.

BUNGALOWS — 2, 1 story and base, frame, $2,000 each. Oakland, Cal. Architect, none. Owners, Becker & Ehel, 1762 Broadway, Oakland. These houses will each contain five rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the living and dining rooms. There will be open fire places and brick mantels. Baths and kitchens will have tile wainscoting. The exteriors will be covered with cement plaster and shakes. Plans are complete and the owners are taking ligures for the materials.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, L. H. Lalook, 2311 McGee Ave., Berkeley. The bungalow is designed for a five-room house with bath. The interior will be finished in pine and redwood. Hardwood floors will be used in the two principal rooms. There will be open fire places and brick mantels. The bath room will be finished in tile. Exterior of the bungalow will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $3,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, Becker & Ehel 1762 Broadway, Oakland. Plans for the building are complete and the owners are now taking figures for the various materials and labor. The dwelling will contain seven rooms and bath. Interior will be finished in pine throughout with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. The exterior of the house will be covered with cement plaster.

GARAGE — 2 story and base, brick, $12,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, Mrs. Ench. The building will contai noffices, storage space and a repair and machine shop. First floor will be of cement. There will be metal window sash and frames. The exterior will be faced with pressed brick. Plans are complete and figures are being taken by the architect.

BUNGALOWS—2, 1 story and base, frame, $2,500 each. Piedmont, Alameda Co., Cal. Architect, C. N. Cook, Rialto Bldg., S. F. Owner, Joe Hinch. Each of these houses has been designed for seven-room dwellings with bath. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. Baths will be finished in tile. The exteriors will be covered with cement plaster and shakes. Plans are being prepared and when complete the work will be done by Day Labor.

BUNGALOWS — 5, 1 story and base, frame $1,500 to $1,600. Alameda, Alameda Co., Cal. Architect, C. N. Cook, Rialto Bldg., S. F. Owners, Alameda Land Co. These houses will contain five rooms and bath each. All interior finish will be of redwood or pine. There will be some oak floors. Mantels will be of tile. Open fire places will be used in the living rooms. The exteriors will be covered with cement plaster, rustic and shingle. Plans are being prepared and when complete the work will be done by Day Labor.

apartments which will consist of four, five and six room suites. All apartments will have connecting baths and wall beds. Some structural steel will be used. Interior will be finished in pine, redwood, hardwoods and white enamel. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with paving brick and terra cotta. Plans are complete and figures will be called for at once.

DOCK AND WAREHOUSE—Frame construction, $30,000. Bellingham, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co. This work has been mentioned here before. The dock will be 100x300 feet of wooden pile construction and will carry a frame constructed warehouse 1½ stories high and 70x120 feet. Plans are complete and bquires will be called for at once.

WAREHOUSE—2 story and base, brick, $35,000. Seattle, Wash. Architect, Engineering Dept. National Biscuit Co., New York. Owners, National Biscuit Co., 310 Westlake Ave., Seattle. The building will be 90X96 feet and is designed as a distributing plant for the company in the north. Plans have been forwarded to the local offices and are now in the hands of the Building Inspector. Bids will be called for within a few days. The company's offices, stables and warehouse will occupy the entire structure.

Contracts Awarded.

HARBOR WORK—Dredging and wharfs, $343,767. Seattle, Wash. Engineers, Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. The following firms have been awarded contracts for harbor development work by the Port of Seattle Commission:

Erickson Construction Co., New York Blk., on a bid of $168,700 for dredging of a slip 221 feet wide between Stacey and Lander streets, from the East Waterway into Whatcom avenue, etc.

Weymouth Construction Co., pier 1, on a bid of $139,350.50, for sub-structure on East Waterway improvement, piling, bulkheading, etc.

Puget Sound Bridge and Dredging Co., Central Bldg., on a bid of $22,000 for dredging in Salmon Bay.

J. A. McEachern & Co., Bailey Bldg., on a bid of $12,351.86 for sub-structure, piling, bulkheading etc., in Salmon Bay.

E. J. Rounds Construction Co., Globe Blk., on a bid of $1,365.57 for water mains, etc., at East Waterway project.

Total for all work, $343,767.98.

The above items although not formally awarded the contracts, have been selected by the Port Commission as the successful bidders who will secure the work.

SCHOOL, 2 story and base, brick, $51,498. Raymond, Wash. Architect, C. E. Philbridge, Raymond. Owners, Raymond School District. Contractors, Sylliaasen & Sando, Arcade Bldg., Seattle. Contract price, $51,498.

SCHOOL, 1 story and base, brick $22,987. Pe Ell, Wash. Architect's name not given. Owners, Pe Ell School District. Contractors, Advance Construction Co., Henry Bldg., Portland, Ore. Contract price, $22,887.

STORES AND OFFICES, 3 story and base. Class A construction, $100,000. Seattle, Wash. Architect, Frank C. Allen, Crary Bldg., Seattle. Owners, Washington Securities Co. Contractors, M. and J. Hursen & Co., Globe Bldg., Seattle. Contract price, $100,000.

PORTLAND AND OREGON.

GARAGE, 2 story and base, brick $15,000. Salem, Ore. Owners, Vick Bros. The building will cover an area of 50x165 feet. The front portion of the building will contain two stories and the rear a commercial garage. Upper floor will be fitted up for living rooms. Interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PIPE, HYDRANTS, PIG LEAD AND SPECIALS—$300,000. Portland. Engineer, City Engineer Clarke, Portland. Owners, City of Portland. The City Water Board has directed City Auditor Barbur to call for bids for furnishing the city with 6,000 tons of cast iron pipe, 300 tons of specials, 775 valves, 590 fire hydrants and 200 tons of pig lead. This is but one-half the amount estimated as required by the City Engineer and another similar order will be placed later.

STORES AND OFFICES—6 story and base. Class A construction. Cost not stated. Portland, Ore. Architect, J. D. Dautoff, Sherlock Bldg., Portland. Owners, Cohn Bros. The building will be faced with sea granite, pressed brick with stone or terra cotta trimmings. The first floor will be used for mercantile purposes and the upper floors will be arranged for offices. According to the architect's plans there will be sixteen large offices to the floor, arranged so they can be used singly or en suite. All the offices will be equipped with recessed lavatories and will be finished in mahogany. The building is to be equipped with a high-speed passenger elevator and will have a steam heating system. Plans are being prepared.

OFFICES—8 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, David C. Lewis, Portland. Owners, Northwestern Electric Co. The owners have taken a lease on the old Pittock Block and have announced their selection of an architect. The building will be used as the offices of the company. Mr. Lewis is in San Francisco in conference with the Fleischhaacker interests and details of the building have not been determined. A full description will be published as soon as all facts have been determined.

STORES AND OFFICES—12 story and base, reinforced concrete. Cost not stated. Architects, Doyle, Patterson & Beach, Portland. Owners, Marquam Company. The announcement of the selection of an architect was just been made and no particulars of this work can be given at this time. Construction will be fireproof. It is stated that the owners and architects prefer a steel frame structure, but the supposition of using steel at once was responsible for the determination to build reinforced concrete. Complete particulars will be published later.

RAILROAD COMMISSION FILES REPORT.

The California Railroad Commission has filed its report to the Governor, the first report to be filed by the Board, as it is now constituted, of the business transacted and the activities of the Commission from January 1, 1911 to June 30, 1912, eighteen months. The report is a voluminous document, covering more than 630 pages of type-written copy. It is shown that the Commission handled 170 complaints, 126 formal applications, 451 informal complaints, 184 reparation cases, and 333 long and short haul applications, making a total of 1264 cases in the year and one-half.

What Commission Supervises.

The Commission, as a State Board of Utilities, has jurisdiction over 812 utilities, as follows:

Steam railroads	46
Electric railroads	22
Electric light, gas and power utilities	117
Telephone and telegraph utilities	95
Water companies	307
Warehousemen	205
Wharfingers	20

"This tabulation includes only such utilities as come positively within the jurisdiction of the Commission and are at present actively operating," says the report.

"The forty-six steam railroads in the State, upon the basis of arbitrary apportionment between State and interstate revenue, show for the year ending June 30, 1911, gross earnings for their operations within the State of California in the sum of $87,365,526.54, and total operating expenses of $51,627,517.75, leaving a net revenue of $35,738,008.79.

Construction and Equipment Costs.

"The total cost of construction and equipment to June 30, 1911, is furnished by the carriers in the sum of $1,456,069,985.32, an increase during the year of $167,638,735.38. The average freight revenue per mile of road is given as $4,493.19; the average passenger revenue per mile $3,216.64.

"Passengers to the number of 43,002,909 were carried an average distance of 31.8 miles at an average rate of $.0211 per mile.

"Twenty-two electric railways submitted reports of capitalization to the total of $194,163,158.32.

"The total assets were shown by the water companies in their reports as $201,137,928.10.

"The electric light, gas and power companies which reported to the Commission showed in their statements total assets of $294,858,587.22.

"The total assets as reported by the steam railroads, the water companies, the electric light, gas and power companies and the telephone and telegraph companies under the jurisdiction of this Commission amount to $2,550,073,422.11. This does not include the assets of the electric railways nor many of the street railways, nor many utilities which have not yet filed their reports. It serves merely as an indication of the enormous amount of capital invested in the public utilities in the State of California. When the tabulation is completed, the sum will greatly exceed the figures here given."

Work Performed by Board.

The report sets forth in detail the Board's work in readjusting rates of the various utilities under its jurisdiction, the investigation of accidents, the physical valuation of railroads, the authorization of stock and bond issues

approximating $20,000,000, and the installation of a uniform system of accounting for public utilities.

In submitting the report to the Governor, the Commission, which is composed of Joel A. Ellis, chairman, H. D. Loveland, Alex Gordon, Max Thelen and Edwin O. Edgerton, made the following comment:

"In our judgment the securities of utilities are over-issued and it is hard to see how any strenuous regulation would help them appreciably. In States Northwestern having strong regulatory commissions, we have found that the securities of power companies do not sell at par, and in many cases are selling at a discount, even when the earnings are ample to pay a reasonable return on the investment. The only thing that can come from regulation is the knowledge that the investment is safe, and this only does not help to create it where the conditions upon which the investment was to be made are such as to make it speculative."

BIG POWER MERGER.

SALT LAKE CITY, Dec. 7.—Practically all of the largest water power electric plants in Utah, Idaho and Colorado have been merged in a $10,000,000 organization which will supply railroads, mines, mills and smelters with power. Announcement has been made that the deeds conveying the assets were signed this Tuesday in New York by the Electric Bond and Share Company.

At the same time the articles of incorporation of Utah, Idaho Power and Light Companies were amended to increase the capital stock to $10,000,000, and D. C. Jackling, president and operating manager of the new company, said the properties will be maintained in Salt Lake City.

The largest of the companies included in the merger are the Telluride Power company, Ames and Provo Electric plants in San Miguel county, Colorado, Durango Gas and Electric company Colorado Gas Grace plant, Bannock county, Idaho, and the Kanab Consolidated Power company, Utah.

ORANGES GROW IN NORTH.

SACRAMENTO, Dec. 7.—Sacramento County ranks first among the counties raising oranges in California, according to the report of the County Horticultural Commissioner P. R. M. Bioletti to the United States Department of Agriculture. Bioletti's report to the Federal authorities shows that there are 1,500 acres in this county, which produce oranges at the rate of $140 to the grower, means that $210,000 will be realized from the market this season.

Sacramento County oranges find a ready market in all parts of the world. This is proven by a shipment of 500 boxes made recently to Aukland, New Zealand, from the orange grove of Dr. F. H. Metcalf at Orangevale.

PROSPECTORS OPPOSE SYSTEM.

BISHOP (Inyo Co.), November 30.—The Prospectors' Alliance of America passed the following resolutions:

Resolved, first, That prospectors and miners, brothers of our Prospectors' Alliance of America, and all others, decline to give to Federal bureau officials, either orally or in response to printed requests, any information whatever relating to their mining claims and to the extent physically possible exclude all Federal officers from entry into shafts and tunnels on their claims.

Resolved, second, That the Board of Directors are hereby authorized and directed to use all lawful means to defeat the enactment of the proposed land and tenant system and the unauthorized and illegal encroachments upon the right of prospectors and miners by bureaucratic officers.

Resolved, third, That any prospector or miner, whether a member of the alliance or not, he and he is hereby, to report to the secretary of the alliance any encroachment on or deprivation of his legal rights by any Federal department or bureau officer, and we hereby pledge to him the moral and financial support of the organization in defense of his rights.

A memorial addressed to the Governors of eleven Western States, asking their assistance in combating government interference with mining operations, was adopted. The alliance has a membership of more than 500 prospectors and mining men. Its father is millionaire discoverer C. Tellopic, is its President.

MORE IRRIGATION WORK.

ORANGEVALE (Sacramento Co.), Dec. 1.—Contracts have been made today for 42,000 feet of water pipe, some of it locked seams, to be used for the irrigation of 1,215 acres of land in Citrus Heights, several miles from Roseville.

The pipe and laying will cost approximately $30,000. The Trainor-Bennett Company of Sacramento announced the irrigation system will cover the lands purchased from Guy P. DeKay, R. Luppe, W. Berry, George Coleman, A. Alston, Daniel Donahue, H. Dewey, P. M. Slater and Adolph Van Maren.

Part of the land will be planted to orchards.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo. for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. Address,

H. B. WILLSON & CO. Patent Attorneys
Box 239 Willson Bldg. WASHINGTON, D. C.

WYBRO IN THE YAGER APARTMENTS.

The well known San Francisco contractor, Mr. W. W. Yager, is putting up some fine apartments on Clay street near Larkin. Mr. Yager is the owner as well as the builder of these apartments and they are modern in every appointment. No pains were spared to obtain the best plumbing and hardware, in fact, everything connected with the building is strictly high class. In looking over the question of Panelling, Mr. Yager, after going into the subject very thoroughly, decided to use the WYBRO Panels as he found those to be the best Panels on the market. He therefore sent in his order to White Brothers for their Elm WYBRO and as a result the walls of his apartments are finished in the best of taste.

SUISUN VOTES WATER BONDS.

SUISUN(Solano Co.), November 29.—The special election held here last Tuesday to vote upon the proposition to issue bonds in the sum of $20,000 for the improvement of the municipal water system resulted in the proposition being carried by a vote of 167 to 61, being fifteen more than the necessary two-thirds.

The proposed improvements to the pipe line a distance of nearly three miles and the cementing of the dam at the storage reservoir. The old pipe has become decayed from long usage having been laid nearly twenty year.s

Editorial Comment.

Reports from some fifty different cities representing building centers throughout the country made to the American Contractor, Chicago, show an average gain for the month. This notwithstanding the fact that New York and Philadelphia both lost in comparison with last year and Chicago registered only a slight increase. The large gains were made entirely in the smaller cities, the following scoring an increase of over 100 per cent: Atlanta, 199 per cent; Duluth, 251; Indianapolis, 183; Kansas City, 153; Nashville, 309; St. Joseph, 105; Worcester, 194. Particulars are to be found in the following table:

	November 1912 Cost.	November 1911 Cost.
Akron	$ 397,980	$ 209,635
Atlanta	1,238,181	416,508
Baltimore	668,871	654,383
Buffalo	836,060	606,000
Cedar Rapids	178,000	208,000
Chicago	7,625,000	7,174 000
Cincinnati	526,145	554,990

Worcester	739,901	250,792
Total	$51,804,115	$48,623,913

In the current issue of the World's Work, Mr. B. F. Yoakum in an article of a series on the High Cost of Living, which he entitles the "High Cost of Selling," arrives at some amazing estimates of the enormous expense of the modern system of distribution. One incident that he cites is that of a farmer loading watermelons on a car at a Rock Island station in Oklahoma. They were to be shipped to St. Paul. A man who happened to see him had recently been in St. Paul and knew that melons were retailing there at from sixty to seventy-five cents apiece. The farmer told him he was getting only five cents apiece, and that it took him all day with two teams to haul the melons to the railroad. With the melon buyer, who came along just then to check up the load, they made a computation of the expense of getting the carload of 1,050 melons to the St. Paul consumer. This was their table:

	Amount	Per cent
To the farmer	$ 52.50	8.33
To the buyer	240.00	38.09
To the railroad	75.00	11.91
Other expenses and profits	262.50	41.67
Paid by consumer	$630.00	100.00

An interesting table, isn't it? The farmer supplied the land, did the work, picked the melons and hauled them to the railroad. For doing this he received $52.50. The middlemen and the railroad earned $577.50, or eleven times as much. But the railroad's share was relatively insignificant. The big end of the expense was the cost of the service performed by the middlemen—by the buyer in Oklahoma and the commission man and retailer in St. Paul.

In an other instance he cites the result of an investigation by a New York state commission which found that the cost of the food supply of New York City at the terminals was 350 million dollars. But the cost to the consumer is put at 500 millions. The expense is believed to be chiefly in the cost of handling. The profits are small.

This article illustrates many facts that have been testified to by different people in the series. Another incident cited was that of a high class dairy in Missouri that sold milk in Kansas City proved unsuccessful. Its manager explained that if he could have obtained a compact delivery route, so that he could have delivered from door to door, he would have been able to sell milk produced under the best sanitary conditions at ten cents a quart for a profit. But with his customers scattered, he figured that a cost of sixteen cents would have been required.

In Rochester, N. Y., it was found that twenty-eight milk peddlers traveled up and down one street to serve seventy-nine homes. On another route fifty-seven milkmen traveled thirty miles to serve 363 homes. One man could have served them all by traveling two miles.

Investigations in the Department of Agriculture have developed the same facts about the wastefulness of distribution. In seventy-eight cities the milk producer got only half of the price paid by the consumer. The railroads got 7 per cent of the final price, and the distributors 43 per cent. The consumer's price for beef proved to be nearly 6 per cent higher than the wholesale price. Duplication of effort, scope and an excessive system of delivery was responsible for the extravagance.

There can be no question but our system of distribution is extremely wasteful. The New York commission remarks, in its report, that if the handling of food product was in the hands of a single agency the present wholesale plant would, in two generations, be known in the scrap heap.

The vote on the Chapter Amendments seem to have been unfortunate. A large considering that they were so many to be voted on, and they were so involved. Those amendments that involved a new expense on the city were generally voted down, which shows that the citizen, the already bearing as great a burden of taxation as they can bear.

The Turkish war is developing some strange problems in Southern Europe.

The party of absolutism in Turkey has taken advantage of the present crisis to suspend the constitution. For the time being the old despotic form of government is restored. There seems to be no doubt but the Young Turks failed to live up to their opportunities. The revolution was accepted with general rejoicing throughout the empire. Liberty of the press was granted. Equality of all religious sects was established together with the new freedom.

But it soon became evident that the reforming was premature. It takes time to build up a freedom that really counts. The old ways of the old officials in war against the Party of Union and Progress as the innovators called themselves. The leaders of various minded, discontent officials was not hanged by an upheaval in the capital.

Besides the Young Turkish party proved to be of little more than a fighting motive. Their enthusiasm did not extend far beyond the getting of offices. The masses of peasants they did not organize. They evidently was united, military efficient. To appease the Turkish people it is necessary to Albanian mountaineers, the Turkish element in Europe is fighting against the Christian element in the hope of securing a helping hand from the Moslem brethren in Asia. The Young Turkish party is now in power, but it is a question as to how long it will remain there.

The parcels post system is to be established on January 1, 1913. It is somewhat in a formative stage as yet and to debate information as to its rate and practical operation. It is a great task to install the system and the Postmaster General has no small reason as yet. The present law providing for the establishment of the parcels post provides for a zone system. Congress is to be local areas extending to fifty miles in the first zone to the limits of the United States as the third. This zone phase of the law is experimental, a concession to the express companies in regard to rates.

There has been no appropriation made to the bureau of expense from adding the new parcel post to the employes. It is evidently expected that the system will be selected to have been start. The establishment of the system at all is only due to the agitation of the kind of working order we will have done well and the postother department will be entitled to great credit.

The report of the Railroad Commission, made as a result of the low [illegible] a vast amount of work to [illegible] the books of the corporations. The result of such a law and the vast amount of good that has been done is made evident by the report.

Particularly is such a commission needed in California, a state which has enterprises are financed and where so many of the great trusts operate to keep control of the building resources of the state. Among these are the electric power plants which are securing the vast properties of the state. Also it is generally well understood that certain interests in the City of New York virtually dominate the Southern field. With them connected with the banks and trust companies that underwrite and sell the bonds and stocks of these companies they actually control the situation. And these interests control the market, the supply of electricity and gas and in the same manner that oil interests do in the East.

Governor West, of Oregon, came home from condemned to the last Election by the use of peculiar sale for the sale of [illegible] pet measure, abolishing capital punishment at the polls of the people on November 5th.

At the [illegible] of the [illegible] the [illegible] in San Francisco held a twenty-four hours talkfest on [illegible] ward on a zigzag road and not on a straight line.

"Force and right rule the world," said Roosevelt, said, "force till right is ready." In Turkey right was not yet ready. The empire is still living in the Middle Ages. But it cannot escape the social forces that are at work in the rest of the world. Its best feeble attempt at constitutional government resulted in [illegible]. Eventually a really progressive party will come into power and the rule of the people will be made [illegible].

The parcels post system is to be established on January 1, 1913. It is somewhat in a formative stage as yet and to debate information as to its rate and practical operation. It is a great task to install the system and the Postmaster General has no small reason as yet. The present law providing for the establishment of the parcels post provides for a zone system. Congress is to be local areas extending to fifty miles in the first zone to the limits of the United States as the third. This zone phase of the law is experimental, a concession to the express companies in regard to rates.

Particularly is such a commission needed in California, a state which has enterprises are financed and where so many of the great trusts operate to keep control of the building resources of the state. Among these are the electric power plants which are securing the vast properties of the state. Also it is generally well understood that certain interests in the City of New York virtually dominate the Southern field. With them connected with the banks and trust companies that underwrite and sell the bonds and stocks of these companies they actually control the situation. And these interests control the market, the supply of electricity and gas and in the same manner that oil interests do in the East.

Governor West, of Oregon, came home from condemned to the last Election by the use of peculiar sale for the sale of [illegible] pet measure, abolishing capital punishment at the polls of the people on November 5th.

At the [illegible] of the [illegible] the [illegible] in San Francisco held a twenty-four hours talkfest on the street to arouse public attention and put forth their views on the subject.

In the first place Governor West is a very poor advocate of the cause he espouses. Professing to advocate an advanced humanitarian view he shows a childish attitude of mind when the people disagreed with him. He is reported to have remarked that he would give them all the hanging they want and refused to grant any reprieve or listen to any plea for continuance in time and had the four condemned men executed in one day.

So with the San Francisco Bulletin. It has gone mad on Prison reform. It sees no wrong in any man convicted of any crime, he is only persecuted by society. Whether all this creed is being propagated by Fremont Older in order to create a sentiment in favor of Abraham Ruef it is hard to tell. Certain it is that some of the stuff that is printed in the Bulletin is as wild eyed and irrational as anything published in "The Appeal to Reason."

Society has the right to protect itself. And the question is how best this can be done. The idea of the State taking the life of a human being in punishment for crime may be barbarous. So far as the moral code may be concerned there may be argument on the other side. But if by this punishment others are deterred from committing the same kind of crimes then the punishment is justifiable and serves its purpose. The idea that the average person is going to act from a high standard of moral right and wrong is a long way in the future. Religion even holds up a system of rewards and punishments. And among the criminal classes it is the fear of punishment more than any hope of reward that keeps them from the commission of crimes. It is not yet time to abolish hanging. There are some crimes that need extreme penalties and the fear of these penalties is the only thing that deters crime.

The proposition of the United Railroads to issue $3,000,000 worth of bonds has enabled the Railroad Commission to gain access to the books of the corporation. That was something that had not been done before. When the criminal court wanted them they shipped them out of the State. Now they can ship them out if they want to. But they will have to ship them back before they will be granted permission to issue any more bonds. They will have to show the commission by their own books that they have a right to issue the bonds or else they will have to pay off their indebtedness themselves or go into bankruptcy.

When the proposition to enlarge the powers of the Railroad Commission came up it was said it would retard development and prevent the sale of bonds. The contrary has been the result. The control that the commission exercises has enabled the bonds to be sold more readily. And it has made the corporations as the United Railroads deal more honestly with the people. When the commission gets through with the books of the company they will know just about how much is real capital and how much is watered stock and the company is paying interest on.

CONTRACTING ON A PERCENTAGE BASIS.

Many Sides Of An Important Question---This Plan More Frequent In The West.

The percentage plan of handling contracts has been adopted recently by a number of prominent contracting firms in Western Canada. This plan is one that in many ways suits separate departments of the business better than does the older lump sum method. It is recognized by most one of the greatest difficulties lies in the difficulty of finding a satisfactory basis of remuneration between the contractor and the owner. Under the ordinary method of contracting the interests of the two parties, it will be readily seen are often diametrically opposed.

Once the contractor has secured a contract, it is decidedly to his interests to rush the work to completion as quickly and as cheaply as possible. Quickness is quite essential as it tends to an early completion, an early settlement, the opportunity to use his gear and equipment in connection with other work and the losses up and getting from off his hands the necessity of supervision of the work. Cheapness is still more essential from its dependence on the actual cost of the work. It is for that the interests of the contractor and the owner are opposed. By the latter the least possible spends comes directly out of his own pocket. The temptation is always present to curtail expenditures with the probability that the owner's interests will suffer if this is done. Philanthropists in the contracting business are very few apart. The principle that the better the class of work and the materials used the lower the contractor's profits is not a principle that can be said to be conducive to the best results and the highest quality of work.

It is conditions such as these that have helped many well to make it possible for the wider adoption of a different system of handling contracts of a general nature. These conditions are responsible for the use of the percentage system which is a system that seeks many of the drawbacks of the fixed method of handling contracts.

The Usual Percentage Method.

When the subject of contracting on percentage basis is alluded to it is usually associated with some such rate as 10 per cent. This rate might be said, however to be less than the average; many large and important jobs are being carried out in the West at present time at rates ranging from 5 per cent to 10 per cent, the latter rate being the most paid and the average rate being 7½ per cent. The rate of course depends entirely of course on the conditions under which the work is carried out. It is in the case that the one company as above, is competing for a contract in which the lowest tender would amount to the first cost of doing the work. It is to the advantage of the contractor as well as the owner to secure the work at the lowest possible rate consistent with a fair return for the time, energy and ability expended in the work.

The rate is figured on the total cost an estimate of which is prepared by the architect. If the total cost exceeds this estimate, the contractor is allowed his percentage at the same rate specified in the original agreement. In case he is able to complete the job at a less figure than that specified by the architect, he is entitled to a certain percentage on the amount saved. The rate of the allowance on the amount thus saved ranges from 25 to 50 per cent. The greater the rate provided to cover such a saving, the greater the incentive to the contractor to save all he can while doing so he is saving for himself and the owner.

It is this principle of dividing the savings which is one of the most attractive features to the man who uses the true principles of business in mind. It will readily be seen that there is every incentive for the owner and the contractor to work together, for the contractor, while working for himself is helping the interests of the owner and how both benefit by his efforts. The better the building and the better the class of workmanship the greater the returns to the contractor. Both parties gain by the extra expenditure a more equitable arrangement has made the older and more well known system by which the owner gains by getting the less the profit of the contractor.

Advantages on Both Sides.

The percentage system is the one for the contractor from the very beginning to the end. There is little or none of the risk of making a mistake and taking a loss of no low a figure. He has none of the responsibility for the total cost of the work which under the ordinary plan is the greatest element of risk in connection with the business. His entire risk consists in the profit that he may figure is fair for his work. That is a small one in comparison with the danger of other plans of taking over. Should he expect to make his mistake is less likely to be serious a matter for the extra responsibility were his.

The percentage plan is one of many advantages to the owner. He has a greater knowledge of operations and is much more direct control of the work. He is able to specify any change or extra either without the necessity of making with the contractor. He can in effect a considerable saving of time desires in paying the bills if such a method that he will save his time. He has a greater knowledge of cost the quality and costs of the materials used. At the same time he has the advantage of having the work carried out and supervised by a contractor of experience whose interest is knowledge and ability is worth to him connection to future operations knowing that the better the quality of his work the greater will be his financial return.

Compared With Other Plans.

Many comparisons have been made the matter discussion, has taken place regarding the success of the best form of contract. The solving of this problem is a difficult one. Each plan has its merits and vigorous ones. To the owner who does not in executive ability as such that we will specialize in that he must have some one upon whom to rely on it the qualities of the greatest importance. It is about the case that will be particularly in Western Canada, and equipment in order to the work to be carried out and at the lowest possible cost and to that they will be in a position to [illegible] a fair return for the [illegible] is the [illegible] against the possibilities of [illegible] the [illegible] of the [illegible] Further [illegible] to [illegible] and to [illegible] will almost [illegible] For [illegible] commend it to the [illegible] of alterations [illegible]

building business in this country would be much greater if the unfounded ideas with regard to dampness in basements were overcome. The percentage of basements which will give trouble is very small. There is no reason why a basement should not be as dry as any other room in the house. The cost per square foot of basement floor space is very little more than the cost of the first floor. The cost of excavation is the same, and the cost of the walls is only slightly more. The cost of the floor is practically the same. The cost of the roof is the same. The cost of the windows is the same. The cost of the doors is the same. The cost of the plumbing is the same. The cost of the heating is the same. The cost of the lighting is the same. The cost of the painting is the same. The cost of the papering is the same. The cost of the carpeting is the same. The cost of the furniture is the same. The cost of the pictures is the same. The cost of the books is the same. The cost of the clothing is the same. The cost of the food is the same. The cost of the fuel is the same. The cost of the water is the same. The cost of the gas is the same. The cost of the electricity is the same. The cost of the telephone is the same. The cost of the telegraph is the same. The cost of the mail is the same. The cost of the express is the same. The cost of the freight is the same. The cost of the passage is the same. The cost of the hotel is the same. The cost of the restaurant is the same. The cost of the theater is the same. The cost of the concert is the same. The cost of the opera is the same. The cost of the ball is the same. The cost of the party is the same. The cost of the ever ought to have been is the same.

Not Suitable for Small Jobs.

The principal reason why this method of waterproofing concrete has not become more popular is because it is not adapted to small jobs. There is no reason why it should not be used on small jobs, but the personal interest of the owner of the small building is not sufficient to bring the matter to the attention of the contractor in such a way that he would prove the merits of the method. In addition to this, the contractor knows that small jobs are usually let to the lowest bidder, and that he cannot afford to spend much time on them. Therefore, unless the owner of the small building takes the matter up with the contractor, the latter will not do so. From the Western Contractor.

DAMPNESS IN BASEMENTS.

Many architects and builders of California have come to the conclusion that the best method of preventing dampness in basements is to build the walls of concrete. This method is not only cheaper than the old method of building with brick, but it is also more durable. The concrete walls are not affected by the moisture in the soil, and they do not crack or settle as the brick walls do. The concrete walls are also more attractive in appearance than the brick walls. The concrete walls are also more economical in the long run than the brick walls. The concrete walls are also more sanitary than the brick walls. The concrete walls are also more fireproof than the brick walls. The concrete walls are also more earthquake proof than the brick walls. The concrete walls are also more weather proof than the brick walls. The concrete walls are also more vermin proof than the brick walls. The concrete walls are also more rat proof than the brick walls. The concrete walls are also more termite proof than the brick walls. The concrete walls are also more ant proof than the brick walls. The concrete walls are also more insect proof than the brick walls. The concrete walls are also more bug proof than the brick walls. The concrete walls are also more flea proof than the brick walls. The concrete walls are also more louse proof than the brick walls. The concrete walls are also more tick proof than the brick walls. The concrete walls are also more mite proof than the brick walls. The concrete walls are also more spider proof than the brick walls. The concrete walls are also more scorpion proof than the brick walls. The concrete walls are also more centipede proof than the brick walls. The concrete walls are also more millipede proof than the brick walls. The concrete walls are also more worm proof than the brick walls. The concrete walls are also more snail proof than the brick walls. The concrete walls are also more slug proof than the brick walls. The concrete walls are also more leech proof than the brick walls. The concrete walls are also more jellyfish proof than the brick walls. The concrete walls are also more starfish proof than the brick walls. The concrete walls are also more sea urchin proof than the brick walls. The concrete walls are also more coral proof than the brick walls. The concrete walls are also more sponge proof than the brick walls. The concrete walls are also more seaweed proof than the brick walls. The concrete walls are also more kelp proof than the brick walls. The concrete walls are also more algae proof than the brick walls. The concrete walls are also more fungus proof than the brick walls. The concrete walls are also more mold proof than the brick walls. The concrete walls are also more mildew proof than the brick walls. The concrete walls are also more rot proof than the brick walls. The concrete walls are also more decay proof than the brick walls. The concrete walls are also more corrosion proof than the brick walls. The concrete walls are also more erosion proof than the brick walls. The concrete walls are also more weathering proof than the brick walls. The concrete walls are also more aging proof than the brick walls. The concrete walls are also more time proof than the brick walls. The concrete walls are also more eternity proof than the brick walls. The concrete walls are also more forever proof than the brick walls. The concrete walls are also more amen proof than the brick walls.

THE STONE AGE OF THE 20TH CENTURY.

Over 80,000,000 persons in the United States are housed in people living in wooden dwellings.

The annual fire loss in the United States, according to the latest records, is placed at $500 per capita as compared with 50 cents in England, the densely populated country.

Since 1900, the Underwriters' Laboratories, Inc., of Chicago, have made fire protection against the cost of $1,000,000.

Due to the high cost of the evolution of the stone house in the home, in order to relieve the pressure of the housing problem and to save wood for dwellings, is only constructed in exceptional cases of plaster exterior and of concrete or other of poured brick.

Lumber was for years the only building material available, but the demand could not depend on the supply. Imitating nature's formula and process of manufacture has resulted in the production of a product known as the Sacramento Sandstone Brick, manufactured on the banks of the Sacramento River, four miles south of Sacramento. This product is made of pure, clean sand mixed with lime, thus forming two indestructible elements.

The brick under date of August 10, 1909, was tested at the Department of Standards and Labor, Bureau of Standards, Pittsburg, Pa., and the report shows that the Sacramento Sandstone brick passed every test required by the New York City specifications, and was given a rating of "Extra" and "A" grade.

So the Sacramento brick has been passed on by the United States Bureau of Standards, the California State Department of Engineering, and other boards of engineers and architects. The long-felt want for a brick that will stand up under the severe test of the NW corner of Fifth and Broadway, Oakland, Brandon & Lawson, brick contractors, will have the same brick, recommended by the architect Mr. Marsh and his associate Mr. Higbie, the former having specified a similar brick for many buildings in Los Angeles. Mr. Marsh has seen many buildings in Germany of 50 to 60 years standing in splendid condition, made from brick constructed on the same formula and method as the California product.

Jos. P. Byrne is the local representative for San Francisco and the South, and if you have not seen the Sacramento Sandstone Brick ring up Sutter 2192, or call at 235 First street.

BIG ELECTRIC PLANTS.

Two of the greatest electric power projects in the world are now being developed in Superior California, to add to her already great electric development. The Great Western Power Company is transforming Big Meadows, Plumas County, into a vast lake that will have an extent of forty square miles. The water from this will drive ten generators in four great power plants and will afterward be used to irrigate 200,000 acres in the Sacramento Valley. The great concrete dam is now being built.

In Placer County, near Colfax, the Pacific Gas and Electric Company is building a dam that will create a reservoir 700 acres in extent. The water will drive eight water wheels in a plant near Towle, and each wheel will drive a generator of 9,000-horsepower capacity.

The Oro Electric Company in Butte County is also building a great plant in Plumas County, and will compete with the Great Western and the Pacific Gas and Electric in the Sacramento and the San Joaquin Valleys.

In El Dorado County, near Placerville, still another large plant is under construction to supply additional power to San Francisco Bay cities. In Tehama and Shasta Counties several new plants have lately been built and another immense one is projected for Shasta.

Many millions of dollars have been expended during the past year on these projects and the work will continue next year.

TURKEY TROTTERS FOR THE FAIR.

Clark Brown of Houston, Texas, has planned for Exposition that he has about a large band of full-blooded Texas turkeys, and being a horse and horse trainer, has succeeded, after six months' hard work and study, in training the turkeys to do numerous stunts. He says:

I will drive one hundred head of these birds with one or more lines of each, timed to a beautiful band carrying twelve musicians, twelve pieces of classy music, the best I can select.

Then I propose to bring another string, consisting of upwards of fifty ponies dressed as Turks soldiers, carrying their guns and paraphernalia.

I will also have classy trotting turkeys in trotting horse racing harness and rubber, and will trot turkey races in ten-mile heats before your grand stand every afternoon, prizes selected.

I will also have flocks of comic types. I will have another hundred

largest and finest specimens will be selected. Beautiful fowls, weighing as

IMPROVEMENTS FOR NATIONAL PARKS.

WASHINGTON, Dec. The estimates of the Interior Department propose to spend $288,[illegible] in the national parks of California during the fiscal year ending June 30, 1914, if the amount requested by Secretary of the Interior Fisher is appropriated by Congress. This is an increase of $[illegible] over the amount [illegible] year. The principal items [illegible] are:

Yosemite National park from $[illegible] to $228,703; Sequoia National park from $[illegible] to $20,000; General Grant National park from $2,000 to $4,800. The principal items [illegible] are as follows:

Yosemite National park: Improvement of big Oak Flat road from Gen[illegible] to make it safe for automobiles; improving and widening road from Camp Ahwanee to Yosemite village; concrete bridge over Merced river near Camp Ahwanee; extension of pipe sprinkling system, Yosemite village to Happy Isles and Camp Lost Arrow; improvement of trails to Yosemite falls, Pohono peak, Glacier point, Nevada falls, Tuolumne meadows, Vernal falls, Half Dome, Hetch Hetchy trail to Poopenaut, and Devil's Postpile; sprinkling El Portal-Yosemite road; and general improvement and maintenance of roads, trails and bridges.

Sequoia Park Needs

Sequoia National park—Wilsonia-Grand Forest road; experimental oiling of [illegible] miles of road; extension of telephone lines [illegible] to Moro rock; general repairs and administration.

General Grant National park: Construction of a mile and [illegible] to give separate route to [illegible] water supply system; for control [illegible] and grounds.

For the development of the national parks Secretary Fisher has asked Congress to appropriate $733,014, an increase of $[illegible] over the amount [illegible] for the current fiscal year. The national park [illegible] system [illegible] amounts to thousands of [illegible] but [illegible] is seriously hampered by the lack of adequate roads and trails, and until sufficient money is appropriated for a comprehensive plan of development the parks will [illegible] of entering the [illegible] are attended.

More Tourists is Plan

It is the intention of the [illegible] to make the parks more accessible, to reduce [illegible] to [illegible] sprinkling the roads throughout the [illegible] partment feels [illegible]

NEW INVENTIONS.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 7 story and base, reinforced concrete. Cost not stated. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District, the exact location being withheld for a few days. There will be a total of 120 rooms which will be arranged in suites of two and three rooms each. Each apartment will be equipped with wall beds and connecting baths. Interior finish will be of pine, redwood and hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Apartment house alterations, frame construction. $15,000. Architect, none. Owner, F. L. Hansen, Monadnock Bldg., S. F. This work will include extensive alterations to the entrance and the addition of several suites to the present building. There will be new plumbing, plastering, electric work and interior finish. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $30,000. Architect, S. F. Owner, Mrs. Anna L. Brownlee. The building is to be erected in the east line of Jones street south of Washington. There will be twenty-four apartments of the two and three room type with wall beds and connecting baths. Interior finish will be of pine, redwood and hardwood. There will be a central heating system and running hot and cold water in all rooms. The exterior of the building will be faced with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 7 story and base. Class A construction. $350,000. Architects Ross & Bergren, 310 California St., S. F. Owner's name withheld for the present. This building will be erected on Nob Hill and will probably occupy an entire city block. Construction is to be Class A throughout. There will be a complete steel frame with exterior walls of brick or cement faced with pressed brick and terra cotta. Suites will be large, many containing more than one bath room. Details of the building have not been fully completed and a description cannot be given in this issue. Preliminary estimates are being taken.

SAN FRANCISCO—Apartment house, 6 story and base, reinforced concrete. $30,000. Architect, David Salmeli Clunie Bldg., S. F. Owner, Frank J. Klymn. The building will have a frontage of 46 feet and a depth of 48 feet. The first floor has been arranged for stores and an attractive entrance. Upper floors will be divided into two and three room suites. There will be wall beds and connecting bath rooms. Steam heat and elevator service will be installed. Interior finish will be of pine and redwood. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, $30,000. Architect, C. W. McCall, Central Bank Bldg. Oakland. Owner, Dr. F. R. Jordan. This building has been mentioned here before. Plans are now complete and the owner is taking figures on the various parts of the construction. The building will contain 45 rooms which will be arranged in two and three room suites with baths and wall beds. There will be furnace heat and a vacuum cleaning system. The exterior will be covered with cement plaster on metal lath.

OAKLAND, CAL.—Apartment house, 1 or 5 story and base, reinforced concrete, $125,000. Architect, E. W. Hartman, 211 21st St., Oakland. Owner, John W. Mitchell. The building will be erected on 22nd street near Broadway. Besides the usual rooms there will be a ball room 50x60 feet and a four-table billiard room. Suites will be of two, three and four rooms each with private baths and wall beds. Interior will be handsomely finished in pine redwood and hardwoods. Ornamental plaster will be used in the lobby, ball room and entrance. There will be steam heat and elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be started by the first of the year. Mr. Hartman has the contract on the percentage basis.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, A. W. Rieke, California Bank Bldg., L. A. Owner, W. R. Neelands. The building will cover an area of 50x48 feet. Suites will be arranged in two and three room apartments with private baths and wall beds. Interior trim will be of birch with oak floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 5 story and base, brick. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, H. W. Wilcox. The building will cover an area of 60x150 feet and will contain 100 guest rooms, which are to be arranged in suites of two and three rooms each with bath and wall beds. There will be steam heat and elevator service. Interior finish will be of pine. A water heater will be installed. The exterior will be faced with pressed brick. Plans are complete and segregated bids are being taken.

LOS ANGELES, CAL. — Apartment house, 5 story and base, reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The building will occupy a corner lot and will contain 228 guest rooms which are to be arranged in two and three room suites with private baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. There will be cement floors and hollow tile interior partitions. Entrance will be finished in marble and tile. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Lewis I. Thompson, Yeon Bldg., Portland. Owner's name withheld. The building will cover an area of 65x100 feet. The building is to have a pressed brick front with terra cotta trimmings. The interior is to be of mill construction. The building is to be a thoroughly modern structure equipped with an automatic electric passenger elevator, a vacuum cleaning system, automatic dumb waiters. There will be hardwood floors and tile baths. A steam heating system will be installed. The interior is to be arranged for three and four room suites with private bath rooms for each suite. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 7 story and base, brick. Cost not stated. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, C. A. Canfield. The building will contain 80 rooms, which will be arranged in two and three room suites with private baths and wall beds. There will be steam heat elevator service and a vacuum cleaning system. Interior finish will be of pine and redwood. Bath rooms will have cement floors. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be taken at once.

Contracts Awarded.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $37,000. Architect, none. Owner, J. W. Braunton. Contractors, Western Architectural and Building Co., Coulter Bldg., L. A. Contract price, $37,000.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, $40,000. Architects, Reodes & Marisch, 3372 16th St., S. F. Owner, Mrs. Julia Cronan. Contractors, Burch & Hoffman, 480 Ellis St., S. F. Contract price, $40,000.

SAN DIEGO, CAL.—Bank, 10 story and base. Class A construction, $185,000. Architects, Bristow & Lyman, Timken Bldg., San Diego. Engineer, George W. Harding, Citizens' National Bank Bldg., L. A. Owner, Nathan Watts. Contractors, F. O. Engstrum

Co., Fifth and Seaton Sts., L. A. Contract price, $185,000. Note: This cost is for the general construction of the building, and does not include bank fixtures or finish. The total cost of the building will be in the neighborhood of $300,000.

BRIDGES, DAMS AND HARBOR WORK.

SEATTLE, WASH. — Viaduct, reinforced concrete, $40,000 Engineers, City Dept. of Engineering, Seattle Owners, City of Seattle. Plans are complete for the reinforced concrete viaduct which is to be erected over the Northern Pacific tracks in South Tacoma street. Specifications are being typewritten and bids will be called for by the Commissioners of Public Works this week.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base, brick and steel, $60,000. Architect, B. D. Brouchoud, 46 Kearny St., Engineer, Maurice Couchot, French Bank Bldg., S. F. Owner, Roman Catholic Church. The new church is to be erected in the north line of Bush street west of Gotham Place. The edifice will be a replica of one of the famous churches of France. There will be a steel frame and exterior walls of brick faced with pressed brick and terra cotta. Contracts for the excavation, foundation work and steel work have been awarded. Plans for the balance of the work are complete and figures will be called for shortly.

SEATTLE, WASH.—Church, 1 story and base, brick, $40,000. Architect B. Marcus Pretica, Empire Bldg., Seattle. Owners, Chevra Bekur Cholum. The building is to be designed in the Byzantine style, and will cover and area of 75x128 feet. Foundations have been completed at a cost of some $20,000. The main auditorium will seat 1,200 people, and will be 75x75 feet. Interior of the church will be handsomely finished in hardwoods and ornamental plaster. There will be a central heating system. The exterior will be faced with pressed brick and terra cotta. Plans for the superstructure will be complete within a week and figures will be called.

Contracts Awarded.

ALHAMBRA, LOS ANGELES CO., CAL.—Church, 1 story and base, brick and frame. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Alhambra M. E. Church. Contractor, Henry Fishbeck, Alhambra. Contract price not stated.

HANFORD, KINGS CO., CAL.—Church, 1 story and base, brick and concrete, $16,500. Architect's name not given. Owners, First Presbyterian Church of Hanford. Contractor, Henry Gede, Hanford. Contract price, $16,500.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Store house, 1 story and base, reinforced concrete. Cost not stated. Architect, Engineering Dept Pacific Gas and Elec. Co. 145 Sutter St., S. F. Owners, Pacific Gas and Electric Co. The building will be erected at the foot of Market street and has been designed for storage purposes. Construction will be fire proof. There will be metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans are complete, inquiries are out for bids, etc. not closed.

OAKLAND, CAL.—Factory, 1 story and concrete, $40,000. Engineer, Charles Wagner, Oakland. Owner, California Ice Co., 470 2nd St., Oakland. Details can be had at the office will close the office of the company. There will be steel sliding doors construction will be extensive. The exterior will be faced with brick. Plans are complete and at the office of the owners who will receive all bids. Work will be started soon.

OAKLAND, CAL.—Warehouse, 2 story and basement, brick, $50,000. Architect, A. W. Smith, 1440 Broadway, Oakland. Owners, Kratz & Nagel. For a complete list of all figures submitted see under San Francisco in this issue.

SAN FRANCISCO—Hospital hardware. Cost not stated. Architects, City Architectural Dept., Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on December 30th for furnishing the finisa hardware for the San Francisco Hospital buildings. Complete information may be obtained from the Board of Public Works.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, frame, $20,000. Architect, Max Geist, Lick Bldg., S. F. Owners name withheld. The building will be erected at the southeast corner of Greenwich and Pierce streets. The building has been designed for a hotel and will have a frontage of 30 feet on Green street and 87½ feet on Pierce. First floor will contain a large dining room, hotel bar, billiard room and kitchen. The basement has been arranged for a number of bowling alleys, store rooms and toilets. The two upper floors will contain a total of thirty guest rooms, all of which will have private baths and toilets. The interior will be handsomely finished. Running water will be provided for all guest rooms. The exterior of the building will be covered with cement plaster on metal lath. There will be galvanized iron cornice. The vestibule will be finished in marble and will have a tile floor. An ornamental iron marquise will be erected on the corner. The architect places an estimated cost of $20,000 on the work. Figures are being taken and the work will be started as soon as possible.

SAN FRANCISCO—Hotel, 6 story and base. Class C construction, $30,000. Architect, William Mooser, Nevada Bank Bldg., S. F. Owner, Henry Wolff. The building will be erected in the south line of O'Farrell street west of Jones. There will be in the neighborhood of sixty rooms besides the hotel office and lobby. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for without delay.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel and stores, 5 or 6 story and base, reinforced concrete, $60,000. Architect's name not given. Owners, Nicol Estate. The building is as yet in the preliminary stage. The owners have not fully decided on whether to make use of the upper floors for hotel or office purposes. Construction will be of the reinforced concrete type. Preliminary plans are complete, but several changes are to be made in the working drawings. Further notice will be given in these columns.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotels, 2 4 story and base, reinforced concrete, $200,000. Architects, MacGibbon-Frary Co., Los Angeles Investment Bldg., L. A. Owner, G. M. Jones. These buildings are to be erected on Ocean Front between Pier and Kinney avenues. Construction will be fire proof throughout. The first floors of both will contain a number of stores besides the hotel lobby. Upper floors will be arranged for single rooms, all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The exteriors will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, Mrs. Hoffman. The building will cover a ground area of 50x150 feet. There will stores on the first floor and about eighty rooms on the upper floors. Steam heat elevators and a vacuum cleaning system will be installed. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 5 story and base. Class A construction, $100,000. Architects, MacGibbon-Frary Co., Los Angeles Investment Bldg., L. A. Owner, G. M. Jones. The building will be 80x180 feet. There will be six stores besides the main hotel lobby in the first floor and 100 guest rooms and 32 baths on the upper floors. Construction will be of the reinforced concrete type with foundations and walls heavy enough to carry a seven-story structure. Interior finish will be of birch. A tile floor will be used in the lobby. There will be two passenger and one freight elevator. Steam heat and a vacuum cleaning system will be installed. The excavation and foundation work has been completed by Day Labor, and figures will be called for shortly for the superstructure.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to **2 o'clock p. m. of December 30, 1912,** for the construction of a water tank at the Los Angeles County Farm, in accordance with plans and specifications on file in the office of the Board of Supervisors and open to the inspection of bidders. Copies of said plans and specifications may be obtained at the office of the said Board of Supervisors.

Each bid must be accompanied by a certified or cashier's check in the sum of ten per cent (10%) of the amount of said check to be made payable to the Chairman of the Board of Supervisors, as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board and in addition thereto the successful bidder will be required to file good and sufficient bonds for the faithful performance of said contract and payment of laborers and materialmen.

The Board reserves the right to reject any or all bids not deemed advantageous to the county.

By order of the Board of Supervisors of the County of Los Angeles, State of California, made on November 29, 1912.

H. J. LELANDE,
County Clerk.

SCHOOL BUILDING.

FRAME DAY SCHOOL BUILDING ... Interior Office at ... Mexico, Washington, D. C., No...

vember 6, 1912. Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Bridge Day School Building, Bridge Day School District, Fresno County, California," addressed to the Commissioner of Public Works, Washington, D. C., will be received at the Public Works Office until **2 o'clock p. m. January 4, 1913**, at which time they will be opened in the presence of those who may be present. Blank forms of proposal, specifications, and other information may be obtained upon application to the Commissioner of Public Works, Washington, D. C., or to the Clerk of the Board of Supervisors, Fresno, California. Each proposal must be accompanied by a certified check for five per cent of the amount of the bid, made payable to the Treasurer of the United States, which will be forfeited to the United States in case the successful bidder fails to enter into contract and give bond with sureties approved by the Secretary of the Interior, within ten days after notice of award of contract. The right is reserved to reject any or all bids. Specifications may be examined at the office of the Commissioner of Public Works, Washington, D. C., or at the office of the Superintendent of Bridge Construction, Fresno, California. Blank forms of proposal may be obtained upon application to the Bridge and Contract Engineer, Los Angeles, Cal., U. S. Engineer Office, Chicago, Ill., St. Louis, Mo., Omaha, Nebr., and San Francisco, Cal., and at the Fort Bidwell office. For further information apply to the undersigned. Cost of the Fort Bidwell Bridge, Lassen County, Cal., \$3,000. Cost of the Fort Jones Bridge, Siskiyou County, Cal., \$3,000. By direction of the Secretary of the Interior. WILLIAM F. McCOMBS, Commissioner.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at the office of the Board of Public Works, in the City Hall, San Francisco, California, until **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 18th day of December, 1912**, for doing the following work, viz:

Retaining, cribbing and filling at the Twin Peaks Reservoir.

Plans, specifications and form of contract may be examined at the office of the Board of Public Works, Room 363, City Hall, San Francisco, California, where proposals will be received and opened as above stated. Bidders will be required to comply with the provisions of Section 1770 of the Political Code of the State of California. Each bid must be accompanied by a certified check upon some solvent bank in the City and County of San Francisco, made payable to the Board of Public Works, for a sum not less than ten per cent of the amount of the bid, which check shall be forfeited to the City and County of San Francisco in case the bidder to whom the contract is awarded shall fail to enter into the contract and give the bond required within ten days after the date of the award. The Board of Public Works reserves the right to reject any or all bids. By order of the Board of Public Works. P. J. HEALY, Secretary.

PROPOSALS FOR FINISHING HARDWARE.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at the office of the Board of Public Works, in the City Hall, San Francisco, California, until **10 o'clock a. m. and 11 o'clock a. m. on Monday, the 30th day of December, 1912**, for furnishing and delivering all the finishing hardware required for the Hospital and Pest Houses, San Francisco Detention Hospital, Twin Peaks Reservoir, Fort Winfield Scott, Presidio Reservation, and Fort Miley Military Reservation, in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made. Bidders will be required to comply with the provisions of Section 1770 of the Political Code of the State of California. Each bid must be accompanied by a certified check upon some solvent bank in the City and County of San Francisco, made payable to the Board of Public Works, for a sum not less than ten per cent of the amount of the bid, which check shall be forfeited to the City and County of San Francisco in case the bidder to whom the contract is awarded shall fail to enter into the contract and give the bond required within ten days after the date of the award. The Board of Public Works reserves the right to reject any or all bids. By order of the Board of Public Works. P. J. HEALY, Secretary.

These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

BUILDING SUPERINTENDENT. Glacken, Edwd. E., General building superintendent, or Electrical and structural supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 568 Golden Gate Ave. Phone Franklin 7619.

RESIDENCE — 2 story and base. frame, $4,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Tomaso Scoto, 363 14th St., S. F. The dwelling has been designed for an eight-room house with bath and laundry. All interior finish will be either of pine or redwood, oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath room will be wainscoted with tile and have composition floor. The exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE ALTERATIONS—Frame construction, $15,000. San Francisco. Architect, none. Owner, F. L. Hinton, Monadnock Bldg., S. F. The work will include extensive alterations to the entrance and the addition of several suites to the present building. There will be new plumbing, plastering, electric work and interior finish. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $2,400. San Francisco. Architect, none. Owner, J. N. Peters, 1916 Balboa St., S. F. The house has been designed to contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be an open fireplace in the living room with a brick mantel. The exterior of the dwelling will be covered with brick veneer and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $4,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 14th St., S. F. The house will be erected on 11th avenue near California street, and will contain eight rooms and bath. Interior finish will be of pine, redwood and elm. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantles will be of tile and brick. Tile will be used in the bath room, and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work

tion on December 18th, for furniture, machine shop equipment for the San Francisco Polytechnic High School. Plans are on file at the office of the Secretary of the Board of Education.

FURNISHING FIRE HYDRANTS—Cost not stated. San Francisco Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened by the Fire Commissioners on December 20th for furnishing the city with 50 hydrants of the five-inch type. Full particulars can be secured from the Commissioners' office in the Temporary City Hall.

REMAKING EXPANSION JOINTS IN RESERVOIR—Cost not stated. San Francisco. Engineer, City Dept. of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications for remaking the expansion joints in the Twin Peaks Reservoir are complete. Bids will be opened by the Board of Public Works on December 18th. Plans and full particulars can be secured from the Department of Engineering.

STORES—1 story and base, brick. Cost not stated. San Francisco. Architect Charles Peter Weeks, Yuban Bank Bldg., S. F. Owner, Mr. Proctor. The building will have a street frontage of 57½ feet and a depth of 81 feet. There will be four modern stores with large display windows, plate glass and pedestal store fronts. The entire area under the stores will be excavated for a basement. The exterior of the building will be faced with pressed brick. Interior finish will be of selected red wood and hardwoods. Plans are complete and figures are being taken.

STORES AND LOFTS—2 story and base, brick, $30,000. San Francisco. Architect, none. Owner, Joseph P. Duggan, 32 Montgomery St., S. F. The owner has a number of leases pending on this building, and if all are signed up a number of additional stories will be provided for in the plans. There will be stores on the first floor and lofts above. Elevators will be installed. The exterior will be faced with pressed brick. Further notes will be given in these columns. Now the plans are out for figures.

THEATRE—1 story and base, brick and steel, $35,000. San Francisco. Architect, Ralph Warner Hunt, Foxcroft Bldg., S. F. Owner, N. Hoffe. The building is to be erected on the north line of Broadway between Stockton and Grant avenue. The interior will be finished in pine and ornamental plaster. The theatre will have a seating capacity of about 500 people. Considerable structural steel will be used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken by the architect.

Contracts Awarded.

"TRIANGLE MESH"

The Universal Fabric

The man who specifies "TRIANGLE MESH" has no doubt of the exact construction of the structure and its safety under any loading. The man who uses "TRIANGLE MESH" will save labor and anxiety by its use. The man who owns the structure reinforced with "TRIANGLE MESH" has supreme confidence in the designer, the builder and the structure.

TWICE AS MUCH
"TRIANGLE MESH"
IS SOLD IN THE U. S. AS ALL
OTHER FABRICS PUT
TOGETHER.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

CITY HALL—2 story and base, brick and steel. Cost not stated. Santa Rosa, Sonoma Co., Cal. Architect, L. M. Turton, Napa. Owners, Town of Santa Rosa. Plans of Architect Turton have recently been accepted for the new city hall building. The design is a pleasing piece of classic work. When complete the structure will contain the city offices. There will be two large steel lined coin vaults. Interior will be finished in pine and redwood. The exterior will be faced with cement plaster. Plans will be ready for figures by the first of the year.

HOTEL AND STORES—3 or 6 story and base, reinforced concrete, $60,000. Rincon-nd, Contra Costa County, Cal. Architect's name not given. Owners, Nicol Estate. The building is as yet in the preliminary stage. The owners have not fully decided on whether to make use of the upper floors for hotel or office purposes. Construction will be of the reinforced concrete type. Preliminary plans are complete but several changes are to be made in the working drawings. Further notice notice will be given in these columns.

SCHOOL, 2 story and cast frame. Cost not stated. Likely Modoc Co, Cal. Superintendent Dept of Indian Affairs, Washington, D C, Owners. United States Government. Plans and specifications are on file at the office of Capt Collier, 68 Market street for same. Bids will be opened in Washington, D C on January 8th. Full information can be secured from Capt Collier.

BUNGALOW, 1 story and base frame, $ — Sacramento, Cal. Architect A M de Bretteville, Broadway and Garfield. Owner E A Janssen. The house will contain six rooms and attic. Interior trim will be of pine and hallways will have doors to the different rooms. Each will be open fire places and brick mantels. Bath will be provided for. The exterior of the dwelling will be covered with cement plaster and shingles. Plans are complete and the work will be done at this date.

STORES AND OFFICES, 2 to 5 story and base reinforced concrete. Cost not stated. San Francisco, Cal. Architect, Charles S Kaelin, Mechanics' Institute Bldg, S F. Owner George W Pettee and associates. The building is to be erected at the corner of 4th and J streets and will be designed to meet the requirements of the fruit industry. A large number of these concerns have taken space in the proposed building and will fit up elaborate offices. Construction will be fire proof throughout. Preliminary plans only have been prepared and bids of the construction cannot be received at present. The site is 100x160 feet.

The building is to be thoroughly modern structure, equipped with an automatic electric passenger elevator, a vacuum cleaning system, automatic hand water heater, hardwood floors and tile baths and is to be heated by steam. The interior is to be arranged for three and four room suites with private bath rooms for each suite. Plans are being prepared.

COLFAX GROWING RAPIDLY.

COLFAX (Placer Co.), December 11. Dr. R. V. Peers has almost finished the construction of his sanitarium. L. A. Russell's new building on the site of the old Mountain View Hotel will be completed within the next five weeks. Construction work on the twenty-four room addition to the Marvin Hotel will commence shortly after the holidays, and W. H. Russell is entertaining plans for the construction of a steel iron building to take the place of the one which is now occupied by the Colfax Garage.

Colfax is the busiest place in Placer County and promises to remain so. There is not at present, nor has there been during the past year, a sufficient supply of cottage to satisfy the demand. Buildings are springing up as rapidly as is possible, but as each one is finished it is taken by tenants who have spoken in advance.

Bonds have been issued for the construction of a sewer system.

KLAMATH IRRIGATION PROJECT.

KLAMATH FALLS, (Oregon), Dec. 14. The Klamath Irrigation Project of the United States Reclamation Service, partly in Oregon and partly in California by which thousands of acres will be reclaimed and irrigated, is now 33 per cent completed, according to official reports of the Reclamation Service.

Extensive development of the project is underway ahead and this season's returns give an idea of what the importance of the project will be when completed.

The Lost River diversion canal has been put into operation. This canal by the aid of the gigantic Lost River dam has successfully diverted the water of Lost River into the Klamath River, across country, twelve miles and in so doing as reclaimed 6,000 acres around the shores of Tule Lake by evaporation. It is estimated that this canal will reclaim the entire Tule Lake within six years as the lake has no other source of supply other than Lost River.

ARCHITECT MEAD WINS GOLD MEDAL.

NEW YORK, Dec. 13. The National Institute of Arts and Letters announced at its annual dinner recently the award of the gold medal of honor to William Rutherford Mead, architect. A similar medal is awarded annually by the institute to some American for distinguished services in the creation of original work in arts and letters. It is awarded in a different branch of work each year, former recipients having been St. Gaudens, for sculpture, James Ford Rhodes, for history, James Whitcomb Riley, for poetry. Brander Matthews was elected president of the institute, Henry Dwight Hedgwick, secretary and Samuel Isham, treasurer.

GORILLA HEAD FOUND IN RIVER.

AUBURN (Placer Co.), December 10. Assemblyman E. C. Gaylord Sunday exhibited to his friends here a petrified gorilla head, which had been scooped out of the American River, near the Rattlesnake Bar, by the company's gold dredger. The stone stores all the outline and features of a great gorilla head and is quite a curiosity. The head has been given to Dr. J. C. Harvey of this city who is an authority on the geology of Sugar or California. Gaylord points out that the finding of the gorilla head tends to prove that it

section of the State was a million years ago the tropics of the globe.

IRRIGATION PROJECT BEGUN.

SACRAMENTO, Dec. 14.—The Natomas Consolidated of California has entered into a contract with the Oro Electric Corporation for perpetual water right of 10,000 inches of water for the irrigation of the former company's reclamation project of 60,000 acres, lying north of Sacramento, between the American and Bear Rivers.

The water will be supplied from the reservoir of the power company's project in Bamboo Valley, Plumas County, and will be taken from the Feather River at some point at the edge of the valley.

HYDRAULIC LABORATORY TO BE BUILT AT STANFORD.

STANFORD UNIVERSITY, December 12.—When members of the Stanford engineering school return to college next September they will find the university equipped with a first class up-to-date hydraulic laboratory, which will be the equal of anything of its kind in America.

The department of civil engineering, which has in charge the erection of the buildings and equipment, has between $30,000 and $40,000 to put into the project. Since a large part of the cost of a building will be eliminated by the fact that the old power house can be utilized, expenditure will be made only on the remodeling of the present structure and the purchase and installation of apparatus.

The equipment of the laboratory will include modern types of turbines, standard nozzles, weirs and all manner of contrivances by which the engineers may get a practical grasp of a subject which now is treated only theoretically. Provisions has also been made by which the present laboratory for the testing of construction materials may be included in the building. The new laboratory will also be equipped with lecture-rooms for the junior

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

COUNTRY HOME TRACT TO BE OPENED NEAR BELMONT.

REDWWOD CITY, December 12.—A new residence tract, designed for country homes requiring sites several acres in extent, soon will be opened in the foothills behind Belmont. The property, which is 120 acres in extent, was purchased from the Sharon Estate Company by the Foothill Development Company. The reported price is $100,000.

The company will subdivide and improve the land before placing it on the market. It already is thickly wooded and it has a commanding view of the surrounding country. The men who are behind this enterprise are John E. Hillman, S. B. Folger, J. R. MacKay, Wilson Bishop and Robert Ingram.

MILL VALLEY ASKS THAT HIGHWAY WORK BEGIN.

The Board of Trustees of Mill Valley has passed a resolution advocating the organization of a movement in Marin county to assist Sausalito and all of the other cities and towns along the route of the proposed State highway in that county in getting the work of construction started. The resolution requests the holding of a general meeting of the county at Sausalito at the earliest possible moment to effect an organization.

The preamble of the resolution sets forth the fact that all of the cities and counties of California are making preparations and improvements to receive some of the benefits that will come with the holding of the exposition in San Francisco, and that the best step Marin can take in this direction is in completing the State highway through the county.

GREAT COPPER RESERVE.

The copper industry in the United States has shown a notable growth, according to the United States Geological Survey. In 1845, when important production of copper in this country practically began, the output was but 224,000 pounds, but it increased 100 per cent the following year, and gained by rapid strides until 1850, when the production was 1,456,000 pounds. In 1870 it was 28,224,000 pounds, in 1890 it was 259,763,092 pounds; in 1900 it had increased to 606,117,166 pounds; in 1909 it passed the billion mark, with 1,092,951,-624 pounds, and in 1911 it exceeded all previous records with a production of 1,097,232,749 pounds. The world's production in 1911 was 1,958,201,285 pounds, of which 56 per cent was the output of the United States.

It is noteworthy that, unlike areas producing most other metals, not one of the leading copper districts of the United States, several of which have been active producers for a period of thirty years or more, has been worked out or showed a marked decrease in its ability to produce copper. Twelve districts situated in eight states have each contributed over 100,000,000 pounds to the copper output of the country, or a total of 94 per cent of the whole output of the United States since 1845. Four of these districts are in Arizona, two in California, and one each in Montana, Michigan, Nevada, New Mexico, Tennessee and Utah. Two districts stand out prominently, the Butte district, Montana, which has contributed over one-third of the output of the country, and the Lake Superior district, Michigan, with a production of a little less than one-fourth of the total output.

SAN LEANDRO BIDS FOR A NAVY YARD.

WASHINGTON, December 12.—San Leandro has come to the front with a plan to have the great government dry dock and navy yards, that the Navy Department hopes to establish on San Francisco bay, located on its water front.

Commercial organizations of San Leandro have communicated to members of the California delegation in Congress plans to have a survey of the water front facilities of the Alameda shore made by the army board of engineers, with a view of determining the possibility of the site for Pacific coast government purposes.

It has been no secret that the navy department [illegible] sites about for a long time [illegible] location at or near San Francisco, that it has several sites in view. Hunter's Point is said to be one of the most desirable because [illegible] dock, but it is doubtful [illegible] price that is [illegible]. Hunter's Point [illegible] figure [illegible] the development in view of its value [illegible]

some other location when the navy officials move in the matter.

With the completion of the Lyon-Hoad dry dock at Pearl Harbor and with the Puget Sound dock, Bremerton, the two on the Pacific Coast that will take care of any ship that can pass through the Panama canal.

The necessity for a dock and yards on San Francisco bay, where supplies and men will be near at hand, has been urged repeatedly by the Navy Department, and San Leandro's plan has been built in the preliminary survey results in a favorable report and it is demonstrated that in the case of the eastern shore of the bay a dock can be developed at sufficient depth of water by dredging or otherwise.

DRAFTING BILLS FOR BIG BASIN.

SAN JOSE, December 10.—Andrew P. Hill Sr., president of the Supervisors' Club of California, and Dr. J. E. Bullis, a good road enthusiast, left for Monterey for Sacramento, where they will place drafts of their bills before the State Board of Control. The bills relate to the proposed improvements by building roads in the State Redwood Park in the Big Basin, and will call for $130,000 in appropriations, that sum being $10,000 more than previously planned and announced.

It was been figured that it will cost $100,000 instead of $60,000 to build a 100-foot roadway from Saratoga summit to the Big Basin Park, and the $10,000 is for the construction of trails and roads within the park.

Hill said that the Supervisors' Club believes the passing of the measure to be a positive necessity if the State is to get its best attraction ready for the Panama-Pacific Exposition in 1915. The club wants the road built early in 1913, and agrees to present property owners along the proposed road to donate the rights of way to the State.

WOODLAND POPULATION INCREASES.

WOODLAND (Yolo Co.), December 10.—The actual result of the canvass by volunteer census takers to determine whether or Woodland is entitled to an Elks Lodge will not be known before this evening.

The returns already made aggregate 5,023, and this may be increased to 5,250. About 400 of this increase from 3,187 in 1910 is accounted for by the annexation recently of a strip of territory on the south.

The main part of the increase, however, is due to the construction of the electric railroad and recent development work.

VALLEY ELECTRIC READY TO BUILD.

WILLOWS (Glenn Co.), December 9.—The final contracts for the construction of the Sacramento Valley Electric Railroad will be let in three or four months, according to Charles L. Deal, vice president of the road. It is expected that the road will be completed within fourteen months of the time work is begun.

The road will be 100 miles long and will run the west side of the Sacramento Valley. It will touch Dixon, Davis, Woodland, Dunnigan, Arbuckle, Williams, Maxwell, Colusa, Willows, Orland, Corning, Tehama and Red Bluff.

Seven miles southeast of Dixon the road will connect with the Oakland and Antioch line and come into San Francisco Bay on the Key Route.

President Deal says that 90 per cent of the right of way will be given the company. So far eighty miles have been located and forty-five miles secured to be transferred.

The road is meeting with success in securing its stock among the residents of the valley. So far they have subscribed for $200,000 of the $5,000,000. As soon as $500,000 is subscribed application will be made to the Railroad Commission for authorization to issue bonds for $2,000,000 for the completion of the road.

MUST REDUCE ESTIMATE FOR BUDGET.

The State Board of Control and the State Controller are busy preparing the State budget for the next biennial session of the Legislature to the Governor. The first and routine recommendations for appropriations will be considered, and the grand total will not be known the private work will be completed by the State board. It has been determined to a very considerable extent, that the total appropriations of the next Legislature should not go above $76,000,000 as that is the figure the budget will contain.

The estimates which the Board is now receiving for many works now total more than $72,000,000. Thus a cut of more than $6,000,000 must be made before the budget goes to the Governor.

PATENTS

promptly obtained OR NO FEE. Trade Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 of our subjects of importance to inventors. Address,

$60,000 FOR TEHAMA PUBLIC BUILDING.

WASHINGTON (D. C.), December 11.—Congressman John E. Raker says that the Omnibus Building Bill will carry $60,000 for a Red Bluff public building and site.

TO BUILD CONCRETE TENEMENTS.

LOS ANGELES, December 9.—Based upon the theory of "business philanthropy" a corporation, capitalized at $500,000 and managed by leading bankers and charity workers, was announced here Friday to build concrete cottages for the poor and to remove the "shacks and "courts" that now thickly dot the slums.

According to the plan adopted by the corporation, land available in the so-called slum districts of the city will be used and the shacks which now harbor numerous poor families will be replaced by sunny four-room houses of concrete, constructed according to plans suggested by Thomas A. Edison. The houses will have all modern conveniences, including baths, the promoters of the plan being convinced that the tubs will be used for bathing instead of containing coal or the family potato supply or cradling the babies while the mothers go out to work.

These houses will be rented or sold on terms to suit the means of the families that will occupy them.

The corporation is managed by 33 trustees among whom are Rev. Dana W. Bartlett, head of Bethlehem Institute, and officers of the women's clubs which have been promoting the movement for a number of years.

Editorial Comment.

From the neighborhood of Twenty-first and Harrison streets comes a decided opposition to the granting of a permit for spur track privileges to the Ford Motor Car Company, who have filed an application with the Board of Supervisors asking to be granted that concession. Opposition is based mainly on the grounds that a spur track would be a detriment to an attractive residence section. So again we see progress and development locked in a struggle with traditions. May the outcome favor progress and development.

The neighborhood of Twenty-first and Harrison streets may once have been a highly desirable residence section, but whatever were its claims to such a distinction, it is safe to say that property values in that district before the Southern Pacific, Ocean Shore and Santa Fe tracks came were small in comparision to present day values.

A very large and important section of San Francisco which lays south of Mission street and west of First or Second streets is rapidly changing. From Misssion south to Townsend and from First to Ninth or Tenth street this change has already been thoroughly accepted. Out beyond Tenth or Fourteenth street as far as Thirtieth, a district traversed by the tracks of two railroads, the change is now in progress. Old residents in the neighborhood bitterly resent the steadily encroaching commercial interests.

Opposition to the establishment of the Ford plant, however, appears poorly advised for a number of reasons. Such a plant would furnish employment to several hundred men, possibly four or five hundred, many of which would be skilled mechanics and highly paid. The building proposed is a five-story Class "A" structure, pleasing in its architecture and designed for an assembly and distributing plant. None of the usual objections found in manufacturing places such as noise, smoke or odor would accompany its operation. Spur track facilities are absolutely indispensable, however, and unless this privilege is granted San Francisco will lose a large and highly profitable industry.

In considering the application for a spur track it is to be hoped that the Board of Supervisors will bear in mind the inevitable future of the district and act favorably on the request, which means so much to San Francisco.

The proposed erection of an assembling plant for the Ford Motor Car Company at Twenty-first and Harrison streets should be encouraged. Some time ago there was an attempt to secure a site for a manufacturing plant by the company. Every effort should be made to secure suitable manufactories for the city, business that employs men and gives work to skilled labor. For these are the life of the city and the foundation of prosperity.

The opposition comes from some of the residents in the vicinity of Twenty-first and Harrison streets objecting to a spur track being run to the plant from the Southern Pacific track. This opposition is based on the proposition that it ruins a residence district. It is a patent fact that most of the district is now devoted to commercial interests and the property is now worth more for that purpose than it is for residence purposes or is even likely to be.

The Ford Motor Car Company proposes to erect a building Class "A" in every respect, the house for an assembling plant that will employ upwards of 400 men. The Supervisors should grant them spur track privileges as so far as it can be seen no material damage will be done to anyone and by so doing an important industry and a splendid building will be added to San Francisco.

Appropriations asked for the coming year for the Presidio and army posts of San Francisco amount to $6,114,800. Of this about 2½ millions are for the Presidio and it is proposed to make it a brigade reservation, the largest army post in the United States. One million dollars is asked for a building for the Exposition. This building is to be of permanent construction, the Administration building, and after the Fair to be devoted to the uses of the Federal government.

San Francisco is at last coming to its own. The completion of the canal will make it by far the most important Pacific Coast port and the Federal Government is recognizing this fact in providing for its military posts. The fortifications of the Golden Gate and the splendid military reservation will impress the visitors from foreign lands of the importance of the great natural port of San Francisco and the dignity of the Federal Government.

President Taft has fixed the rates for the Panama Canal as follows: Merchant vessels carrying passengers or cargo, $1.20 per net vessel ton. Vessels in ballast without passengers or cargo 40 per cent less than the rate of toll for vessels with passengers or cargo. For naval vessels other than transports, colliers, hospital ships and supply ships the rate will be 50 cents per displacement ton. American coastwise shipping is exempted from payment of tolls.

This is practically the same rate that is to go into effect next year at the Suez canal.

The British government has filed its protest as to American coastwise shipping but what it has to say in the mat-

fer is hard to see. About all the interest it has in the matter is to aid the railroads and it possible further its own shipping interests. In that it has the championship of Senator Elihu Root of New York and others of his kind.

The coming aviation meet emphasizes the fact that in spite of the heavy death toll in the business of flying there is still public interest in this mode of navigation which has interested man since time began. It is highly probable that a great many accidents are due to the recklessness of the aviators themselves. Such as in the case of Kearny and Lawrence where they started out to San Francisco from Los Angeles in the face of a storm and at a time of year when the ocean was sure to be rough. Information could have been obtained from the weather bureau that the weather was uncertain and that a storm was brewing.

It is reported that there are airships in Germany that make comparatively regular trips. There is a proposition on foot in San Francisco to build aeroplanes and make flights for the purpose of carrying passengers and for carrying advertising matter.

The airman is no longer a novelty, but the time has not come that the navigation of the air is not an extremely hazardous enterprise.

Bridge building, one of the oldest attempts at engineering, is acquiring new possibilities under modern conditions.

Work on the foundations of what, when completed, will be by far the greatest steel bridge in existence is being actively prosecuted at Hell Gate, in the East River. The bridge, which has been designed by Gustav Lindenthal, will contain a four-track, steel, arch span of one thousand feet. It will be capable of carrying, with a wide margin of safety, four of the heaviest of our modern freight trains abreast at the same time. Including its approaches the structure will be some three miles in length. It will serve to connect the New Haven and Pennsylvania systems by way of Long Island, the Pennsylvania East River tunnel and the Pensylvania freight ferry across the upper bay.

Modern steel construction has replaced spans in truss construction possibly not more than a few years ago.

President-elect Wilson is reported to have said that in case a panic was started by the set of Wall Street financiers that he one would started it would be held up to public condemnation which leads the Chronicle to remark that big financiers would be the one to suffer by the panic. A panic is a peculiar thing and usually occurs without any sufficient cause. Undoubtedly the panic of 1907 was deliberately caused by the Wall street interests and as such motive as was described by Tom Lawson in Frenzied Finance.

Aside from the fact that the Wall street interests control the banks and the life insurance companies it is easy for to periodically bring on a panic to depress the price of securities which can then be bought up at a low figure. When business is wounded level has gradually lost out the securities to the investing public to again repeat the operation. This is what President Wilson referred to and his attitude toward those who would do such a thing is certainly the correct one.

The investigation being conducted into the methods of the money trust certainly warrant the statement that a few men are able to bring on a panic. Had such not been the case the government would not have been helpless in 1907 and forced to call on J. Pierpont Morgan to assist in the financial crisis.

As long as the banks control the credit money of the country and Morgan and his associates control the banks and the insurance companies just so long will there be a power behind the throne that is more powerful than the government itself. President Wilson is right in his statement. And if the buccaneers of big business go out for another killing they are likely to get bagged in their own net, because public sentiment has changed to such an extent that the people are no longer hoodwinked into believing that the financial wisdom of the world has all been delegated by God to a little bunch of Wall street financiers who have the morality of ordinary chicken thieves.

The report of the State Mineralogist gives some interesting facts as to the mineral wealth of California and its productions in metals, oil and stone for the past year. No less interesting are the facts concerning horticulture and agriculture which as much as anything else have earned for California the title of The Golden State.

A few statistics will show that horticulture and agriculture can bid for sharing the honor to maintenance of the "golden" title.

During 1912, 13,340¾ carloads of deciduous fruits were shipped from district north of Tehachapi; the State's cured fruit output is 239,000 tons, the prune yield is 194,000,000 pounds; the raisin pack totaled 170,000,000 pounds, the almond crop 3,000 tons, the walnut crop 9,250 tons; citrus fruit shipments, 10,290 cars.

Besides these products the State had a record in 1911 of 4,182,650 cases of canned fruit and 2,516,655 cases of canned vegetables. The 1911 wine production totaled 50,167,000 gallons, and the honey extracted amounted this year to 4,710,000 pounds.

VALUE OF TRADE PRESS ADVERTISING.

It will not be very long before the trade magazine will be offering the only real "snap" to the advertiser. The shrewdest business managers are rubbing their eyes open to this fact every day. The fields are already ripening, and the richest opportunities of golden harvest now held out are those found in the advertising pages of trade and technical magazines.

For the trade press of today is not the trade press of a few years ago. New and finer brains are giving it their best attention. The trade press field has been and is being revolutionized. Trade publications which a few years since were maintained upon a sort of charitable, for-the-good-of-the-trade basis, are today healthy, prosperous, business-like sheets, asking odds from none and embodying a genuine opportunity at the door of almost every advertiser.

If there is one appeal which the trade press makes to the advertiser more than any other, it is the appeal of **minimum waste circulation.** For almost every conceivable line of business, the circulation of the ordinary paper or magazine contains an enormous proportion of waste; but in the case of the trade press, almost every reader is a possible purchaser, and economy in circulation is at its maximum. While it will probably never be possible to attain an efficiency of 100 per cent in directness of special appeal, yet the trade press of today comes as near to it as present conditions make possible. Because of the character of its editorial contents, its readers are sifted out so that they have the most basic and important concerns in common; and this is what insures the best of service to the careful advertiser. In the selection of mediums appealing to audiences of prospective buyers, the advertiser is using greater and greater caution. The "skin game" has been played too long, and the old-fashioned razor needs honing. The trade press is the up-to-date safety device.—Cement World.

The Examiner printed in Saturday's issue a quarter page drawing of the Exposition grounds and the Fair site at Harbor View as it will appear when the buildings already planned are erected. This presents a splendid scene. From an elevation looking toward the Golden Gate from the vicinity of Van Ness avenue the visitor will behold a splendid panorama. The harbor and the bay and the splendid setting of the Marin hills suggest at once the maritime nature of the enterprise which it is designed to commemorate. And when the buildings are actually built and the color scheme is developed there will be an individuality to the Exposition that has not been present at other affairs of a similar kind.

The citizens have seen fit to reject all the park propositions of San Francisco. This is no doubt due to the fact that property owners feel that taxes are high enough and are only willing to spend money for necessities. Particularly in view of the fact that we have to get a water supply and purchase the Spring Valley plant. The bond questions were good propositions, but the people evidently felt that they were not able to bear the burden.

WILL URGE NATIVE STATE TO PASS EXPOSITION BILL.

In an attempt to get the Legislature of Maine to pass a bill early in its spring session making an appropriation for a building at the Panama-Pacific International Exposition, the State of Maine Association of California appointed a special committee which met in the association's rooms in the Odd Fellows' Hall, Seventh and Market streets, Wednesday night.

The committee will communicate immediately with the Governor of Maine, urging the passage of a bill early in January, so that a commission can be appointed to choose a site at an early date.

The committee, which was appointed by a unanimous vote of the 400 members of the association to take whatever action is believed necessary, is as follows: Chairman, A. N. Grant; M. W. McIntosh, W. H. Wharf, Dr. Ira B. Dalziel, H. L. Corson, F. W. Durgin, C. A. Brown and Mrs. Richard Sarle.

REINFORCED CONCRETE AS A BUILDING MATERIAL.

By H. D. Shutt, C. E.*

Mr. Shutt is a prominent Alberta [illegible] Engineer and delivered this address in Calgary before the annual Convention of the Institute of Western Canada Civil Building Superintendents.

Historically, one of the first references to the use of reinforced concrete in buildings was in France in 1850. Coming across to this side of the Atlantic, a form of reinforced concrete was used in 1872, in a house at Port Chester, N. Y. In 1885 Ransome invented a twisted steel bar for use as reinforcement, and demonstrated the principles involved in the successful incorporation of steel in concrete. From 1885 to 1890 Ransome used a system of reinforcement in many buildings in San Francisco and vicinity, and it is interesting to note that notwithstanding the crudeness of the design [illegible] buildings came through the recent earthquake at San Francisco practically unscathed, while neighboring buildings of brick and stone were entirely demolished.

The use of reinforced concrete as a building material received a great impetus in 1897-1898 when builders and engineers were faced with a great shortage of structural steel, and were obliged to turn to reinforced concrete to fulfil their designs. The result was that men began to study the reinforcing of concrete from a scientific standpoint, and by 1900 reinforced concrete was generally recognized as a building material.

Since then, its use in buildings has increased in about the same proportion as the production of Portland cement. In 1900 there were approximately [illegible] barrels of Portland cement manufactured in 1905 about [illegible] barrels and for the past year nearly [illegible] barrels of the Atlantic.

Concrete alone is capable of supporting great weights in direct compression, but it is weak in tension being able to support only about one-tenth as much in tension as in compression. Therefore, if it is desired to use concrete in a beam or slab, it is necessary that the portion of such beam or slab which is in tension be reinforced, and that the reinforcement be placed in such a manner that the steel will be in the same position in which it will have most work. The steel should be placed as closely as possible to the bottom of a layer of concrete of at least one inch over all metal being allowed for fire protection. But if a beam contains a column or passes over one or more supports, it ceases to be a simple beam and becomes what is known as continuous beam. That is, it is in tension in the top fibres of concrete, where it passes over a support, and in compression in the lower portion of the beam. Here, too, reinforcement must be provided for the tension. There is the question of web stress or internal shear. This is provided for by stirrups of mild strap steel or heavy steel wire bent into form either of a U or a rectangle. Which theoretically should be inclined at an angle of 45 degrees toward the support. In practice they are usually placed vertically for convenience except in the case of patented systems, although a slight excess of steel is thereby made necessary. The spacing of these stirrups is usually a function of the depth of the beam. It is also common practice to bend a part of the reinforcing bars up at either the one-third or one-fourth points of the span at an angle of from 30 to 45 degrees, and bring the bar back along the top of the beam, thus aiding in the top reinforcement against negative bending moment, as well as taking care of a part of the internal shear of the beam.

The strength of concrete varies with the quality of materials, the quantity of cement per cubic yard of concrete, and the density of the mixture. Therefore, the strongest as well as the most economical mixture consists of an aggregate containing a large variety of sizes graded so as to fit into each other and leave the smallest possible amount of voids, with enough cement to slightly more than fill the voids in the aggregate.

The steel used should be preferably a mild steel, having an ultimate strength of from 550,000 pounds to 65,000 pounds per square inch. A high carbon steel is sometimes more economical on account of its higher ultimate strength, which is from 90,000 pounds to 115,000 pounds per square inch, but on account of its brittleness it must be placed with great care, and should not be used by an inexperienced designer or contractor.

As to mixtures, no leaner mixture than 1:2:4 should be used for reinforced concrete, unless great care has been taken in the selection and testing of materials and testing of the cement.

The usual working values of stresses in concrete are as follows:

In compression from 500 pounds to [illegible] pounds per square inch, depending upon the richness of the mixture.

In tension from one-tenth to one-[illegible] as much as in compression.

In shear about one-fourth as much as in tension.

These values give factors of safety of from 3 to 6.

Too much care cannot be taken in the selection of materials for reinforced concrete. Of course the cement must be satisfactorily tested. The fact that the manufacturer "guarantees" his particular brand of cement should not suffice, but independent tests should be made as to fineness, time of initial and final set, density and tensile strength attained in 1 day and 7 days. It is not usually possible to make a 28 day test, valuable as it is on small [illegible] but where the work is to be extended over a period of time, a 28 day test should always be required. Samples for testing should be taken from at least every tenth barrel. Each car load should be piled separately to permit of taking samples, and the samples from each car should be tested separately. Cement should be stored in waterproof building, with the floor raised from 6 inches to 8 inches off the ground to permit a free circulation of air underneath.

The stone for the aggregate should be examined, and a soft or porous stone or one showing many cleavage planes or a stone of shaley formation should be rejected. The crushed rock must be piled on plans or platforms to keep it from the earth. Otherwise a wheelbarrow load of the scrapings of stone and earth might be thrown into a batch that was to be placed at just the point in your beam or column that will be subjected to the greatest stress.

The sand should be sharp and gritty, and practically free from loam or vegetable matter.

The general adaptability of reinforced concrete is beyond question. A reinforced concrete building is practically a monolith. There is less vibration in a concrete structure because the weight of the material and the monolithic nature of the structure tend to deaden and absorb vibration. This makes reinforced concrete especially suitable for buildings which are to contain heavy or high speed machinery. The ability of reinforced concrete to withstand severe vibration was satisfactorily shown in the recent San Francisco earthquake.

If the reinforcing steel is properly protected, a reinforced concrete building is absolutely fireproof. Not an instance has been reported of the failure by fire of a reinforced concrete structure in which the steel was properly protected, although there were many such structures in both Baltimore's and San Francisco's fire-swept districts. One inch is the greatest depth to which the concrete was found to be damaged, although in some instances water from a two and a half inch nozzle was turned on when the outside of the concrete was at almost red heat. The only damage seen in such cases was a spalling or chipping off from one-half inch to one inch in thickness.

The matter of initial cost varies with the locality. Take the example of two recently erected buildings in Calgary: One an office block with a steel frame, a stone front and laminated wooden floors; and the other a reinforced concrete apartment house of practically fireproof construction. The steel frame building cost about 17 cents per cubic foot of entire volume, and the concrete building cost approximately 22 cents per cubic foot of its total volume, showing a difference of about 29 per cent in favor of the reinforced concrete structure. The cost of the steel

structure would have been considerably increased if tile or fireproof floors had been used and if the columns had been properly protected by concrete.

The General Electric Company, which is the largest electrical manufacturing company in the world, is erecting reinforced concrete structures wherever they are in need of new buildings. Two hundreds of thousands of dollars yearly in constructing these buildings. A modification of the "Unit System" is the design usually used.

In the matter of finish, a little care in the mixing of and erecting forms and the desired decoration can be cast with the wall or column if so desired. Sanding in cement plaster or stucco can be applied and any desired color effect obtained by coloring the mortar. Cement plaster will adhere more firmly to concrete than to brickwork, for the rate of expansion is more nearly the same and there is less danger of cracking.

After the reinforcement of the building has been designed by a competent engineer and the material properly selected comes the question of competent supervision and honest erection of the building. If the placing of the steel is left to unskilled laborers or is not properly supervised it is more than probable that it will not be placed in its proper position in the floor or slab. Even though there is an excess of reinforcement in the beam, if this reinforcement is not in its proper position, the beam is likely to partially or entirely fail.

If the workmen are left to themselves or are not properly directed they are apt to remove the forms before the concrete has become sufficient hard. They do not stop to consider whether the weather conditions have been favorable or not for the setting up of the concrete or have endured it. If the forms are removed too soon and material piled on the beam a partial or total failure is the result. Concrete must be protected in hot weather as well as in cold. Excessive heat causes too rapid evaporation of the moisture in the concrete and there is not sufficient moisture left for the chemical changes that are taking place in the mass.—From The American Builder and Engineer.

THE TESTING OF VITRIFIED PAVING BRICK.

W. P. Bloecher, '14.

The great variation in the physical properties of vitrified paving brick of different manufactures, even when made substantially the same ingredients and of materials of a satisfactory composition compared with the need for absolute uniformity and accuracy requires the necessity for a series of tests of brick specimens at regular intervals. Although the manufacture of brick is indeed of ancient origin, its use as pavements is recent, extending and still more recent than 1885, and only after years of use in city pavements has it been ascertainable to ascertain approximately by test that a given brick possesses those physical properties so requisite of a good paving brick.

The object of using vitrified brick for pavements is to provide a durable wearing plate which will have the little traction resistance and (2) the greatest amount of wear resistance, and (3) afford a sanitary condition." As the first element, that of little traction resistance, is a function of the shape of the brick and its manner of laying rather than of its inherent physical properties, and element (3) looking to a sanitary condition, is of secondary importance, it follows that the paramount requisites that a brick must fulfill in order to be suitable for pavement purposes are that it be sufficiently tough and strong to furnish the greatest amount of wear resistance.

The wear of a paving brick can be divided into two general classes:

First: That due to impact, as caused, for example, by the striking of horses' hoofs, which tends to chip pieces from the brick, and

Second: That due to abrasion, as caused for example, by the grinding action of the wheels of vehicles, which ends to the steady wear of the brick. And to establish the ability of a brick to withstand such wear is the gist of all tests.

The tests so far devised, and used with varying success, are as follows:

1. Specific gravity
2. Absorption test.
3. Crushing strength
4. Transverse strength.
5. Rattler or impact and abrasion test.

In addition, of course, the general appearance of the brick and its structure and color are always gone into, for they give valuable clues as to its value when confined to one line of brick but the seemingly inconsistent variation of these qualities in different brands makes it no absolute criterion.

A review of these tests, taken up **ad seriatim, shows:**

I. Specific Gravity.

The determination of the specific gravity of the brick can be made knowing the weight of the dry brick in air, its weight submerged in water and its weight saturated, in air. By itself this information shows nothing at all definite, although it indicates in a general way the value of the brick for the more dense a brick, the harder and stronger it usually is. As, in addition, results vary with the character of the clay used, irrespective of the true value of the brick, it is generally conceded that this test is of little or no value, and it has, accordingly, been abandoned.

II. Absorption Test.

The absorption test seeks a determination of the amount of water any given brick will absorb. It consists of the complete immersion of the brick samples in water for varying lengths of time, the increase in the weight of the brick, or the amount of water absorbed, after such periods of immersion, representing fairly the porosity of the voids, is figured in per cent of the dry weight of the brick. While it is considered true that "the porosity of burnt clay wares is the best index to the degree of chemical combination or vitrification" of the ingredients, it is by no means a direct index to the value of the brick for pavement purposes for the reason that practice discloses the fact that good paving brick will vary widely in the magnitude and rapidity of absorption. Hence we are forced to conclude that the porosity or degree of vitrification alone has little bearing on the value of the brick for paving purposes, although it usually serves to confirm the results of the other tests. For these reasons, this test is now seldom used.

The main consideration which in the past made the porosity test seem such an important one was the question as to the ability of the brick to withstand the internal effects of frost. Generally speaking, the magnitude of the frost action should vary about as the porosity; hence a brick of high porosity will have to withstand greater forces due to frost. At the present time, however, the process of manufacturing bricks has reached such a state of perfection that any well-made brick is able to resist the forces due to frost regardless of its porosity; accordingly, the importance of the test no longer exists.

III. Crushing Strength.

The determination of the crushing strength was formerly gone into in considerable detail, although, as there was no standard method in use, the results differed widely. The test is not in itself at all conclusive, for, while crushing strengths as high as 10,000 lbs. per square inch were developed whereas an ordinary load gives but 2,000 lbs., the strains developed in the test are considerably different from those to which the brick is actually subjected. As the test reveals very little information not shown by the other tests, particularly that of the rattler, it has now been generally discarded.

IV. Transverse Strength.

The test for the transverse strength of the brick is performed by resting the brick horizontally on two knife edges a given distance apart, and applying a load through a knife edge on the upper side midway between the supports. The results, expressed in the terms of the modulus of rupture, ordinarily vary from 2,000 to 3,000 lbs. per square inch. The test is valuable as a means of comparing the toughness of different brands of paving brick, as a confirmation of the other tests, and as a detection of the uniformity of the structural soundness of one brand, yet by itself, as with the crushing test, it furnishes no conclusive information.

V. Rattler Test.

The impact and abrasion test, commonly known from the process involved as the "rattler test," is the most important and most widely used test to which paving brick are subjected, inasmuch as it attempts, by experimental means, to subject given specimens as nearly as possible to the abuses which they receive in actual pavement use. In its most approved form the test is made by fastening the brick specimens to slats having a channel section, which with steel heads form a cylinder; in this are inserted loosely a number of cast iron spheres, the cylinder being then revolved at a specified speed for a given number of revolutions. The apparatus is of steel, the cylinder being about 28 inches in diameter and 20 inches long, its cross-section being a polygon of 14 sides, it is set on trunnions and driven by power. The blocks are of two sizes, 3½ inches and 1⅞ inches in diameter weighing 7.5 and .95 lbs. respectively; the tumbling action of the larger testing principally for impact and the rolling action of the smaller testing principally for abrasion. About 10

brick constitute a charge, while a complete test consists of 1,800 revolutions at the rate of 30 revolutions per minute. The brick specimens are first weighed, and the loss from chipping and wear is required to fall within a given per cent of the initial weight of the brick, usually up to 15 or 20 per cent.

This form supersedes one in which the brick alone were loosely thrown into the cylinder, their inter-action from tumbling constituting the testing forces; many of such machines are still in use.

Much experimental work has been performed on the question of testing paving brick, by able men; in most cases the rattler test is looked upon as the best criterion. The results of the experiments in this test are somewhat remarkable, for they indicate that even the slightest variations in the details of the apparatus or the method of conducting the test (such as varying the diameter of the cylinder or the speed at which it is revolved) cause corresponding variations in the results; so that the directions are given with great minuteness. In addition to those general conditions above mentioned, they provide for further details as to design and construction of the machine; the driving mechanism; the weight, shape, and composition of the abrasive charge, and their limits of wear, the condition of the brick charge with respect to moisture, etc.; the method in detail of conducting the test and keeping the record.

In conclusion, then, it can be stated that of all the tests devised the rattler furnishes by itself the best, most uniform and dependable results; that all other tests fall short of this in some way or other, and their value lies chiefly further to confirm the results of the rattler test.—From the Wisconsin Engineer.

PROPERTY OWNERS MUST PAY FOR IMPROVEMENTS.

In regard to the proposition now before the Supervisors of widening the roadway of Montgomery street from Post and Market to Columbus avenue by setting back the sidewalk curb line three feet on each side, the City Attorney has advised the Supervisors that the cost of making the change, including the resetting of the curbs and the paving of the additional strips of roadway, must be paid for by the property owners and not by the city, although the city accepted these blocks of Montgomery street many years ago.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $12,000. Architect, Adfred I. Coffey, Humboldt Bank Bldg., S. F. Owner, G. Burns. The building will be erected on Dolores street and will cover a ground area of 37x89 feet. The interior has been arranged for twelve apartments in suites of two and three rooms each. Wall beds and private bath rooms will be a feature of each apartment. Interior finish will be of pine and redwood. Entrance will be finished in marble and tile. Gas radiators will be used. There will be an automatic water heater. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $40,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner's name withheld. The building will occupy a splendid site on Russian Hill, and has been designed in the Mission style. The building will contain in the neighborhood of 100 rooms, which will be arranged in two and three room suites. All apartments will have wall beds and connecting baths. There will be steam heat and a vacuum cleaning system. Interior finish will be of pine and redwood with some hardwood floors and veneer. Bath rooms will have cement floors and tile wainscoting. A hot water heater will be installed. The exterior of the house will be covered with cement plaster. Plans are being prepared.

SAN FRANCISCO—Apartment house, 9 story and base. Class A construction, $350,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Court Apartments Co. Architect Sawyer states that the specifications are being written for the nine story Class A apartment house, which is to be erected at the northwest corner of Sacramento and Mason streets for the Burlingame Court Apartments Co. The scheme is one in which the mapority of the tenants will be householders. Apartments will consist of four rooms up. Many special features are being specified to meet the ideas of the various owners who have already taken stock. The building will cost $500,000. Specifications will be complete in about three weeks.

SAN FRANCISCO—Apartment house, 3 story and base, frame, $26,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, George Haas. The building will be erected on Fulton street near Franklin, and will contain 18 modern two-room apartments with connecting baths and wall beds. There will be steam heat and an automatic elevator. Interior finish will be of pine, redwood and elm. Some hardwood floors will be used. There will be a vacuum cleaning system. Bath rooms will have tile floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owner will take figures on the work.

OAKLAND, CAL. Apartment house, 3 story and base, frame, $16,000. Architect, O. E. Bergs, 366 Mission St., S. F. Owners, Sacramento Realty Co. The building will be built in the neighborhood of Telegraph ave. and 42nd street. There will be 12 flats of three and four rooms each. There will be wall beds and connecting baths. Interior finish will be of pine and redwood with some hardwood floors. There will be steam heat and a vacuum cleaning system. Bay windows will be built in the entrance will be of marble and tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL. Apartment house, alterations, frame, estimated cost, $1,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. This work will include the alteration of a two-story frame building now arranged for flats, into a modern apartment house, containing twelve two-room suites with baths and wall beds. There will be new interior trim, electric wiring, plumbing and plastering as well as considerable exterior alteration. Steam heating will be installed. Plans are complete and figures are being taken.

LOS ANGELES, CAL. Apartment house, 3 story and base, brick, cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, S. L. Weintraub. The building will cover an area of 50x90 feet, and will contain an amusement room, locker and 54 guest rooms. Suites will be arranged in two and three room apartments, all with beds and connecting baths. There will be steam heat and a vacuum cleaning system. Bath rooms will have tile floors. Entrance will be finished in marble and tile. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken on the work.

LOS ANGELES, CAL. Apartment house, 4 story and [illegible]. Class A construction. Cost not stated. Architect, Thornton Fitzgerald, Pacific Electric Bldg., L. A. Owner, Mrs. Ida Hoss. The apartment house is to be on the southwest corner of Bonnie Brae and Orange streets, and was recently described in these columns before. Construction will be fire proof, that of the reinforced concrete type. Plans were recently called for, and the two lowest figures being presented by Kling & Co. $18,000 and the Los Angeles Planing Mill Co. $19,232. Certain changes to be made in the plans and specifications and those two plans and figures asked for new figures.

LOS ANGELES, CAL. Apartment house, 2 story and [illegible] brick, cost not stated. Architect, George M. Ellerton, Los Angeles Investment Bldg., L. A. Owners, O. Wilkinson. The building will have a frontage of [illegible] feet, and will be [illegible] deep, or 108 feet. The first floor is to be arranged for five stores. The upper two floors will be divided into [illegible] which will be arranged [illegible] ments. There will be steam heat and

beds, pine and hardwood trim and a hot water heater. Floors in the stores will be of cement. There will be patent store fronts. The exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who is taking figures on the work.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, A. W. Rieve, California Bldg., L. A. Owner, Virgil V. Robertson. The building will be 45x125 feet and will contain 66 rooms which will be arranged in suites of two and three rooms each. There will be connecting baths and wall beds. Entrance will be finished in marble and tile. Interior trim will be of pine. Bath rooms will have cement floors. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $28,000. Architect, Robert H. Walker, Coulter Bldg., L. A. Owner, J. B. Hunter. Contractors, Western Architectural and Building Co., Coulter Bldg., L. A. Note: This contract has been taken on the percentage basis.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $31,000. Architect, Leonard Jones, I. W. Hellman Bldg., L. A. Owner, O. E. Brookins. Contractor, William Stradley, 738 So. Grand Ave., L. A. Contract price, $31,000.

LOS ANGELES, CAL. — Apartment house, 2 story and base, brick, $45,575. Architect, none. Owner, Isabel A. Vignolo. Contractor, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Contract price, $45,575.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick, $35,000. Architect, none. Owner, Izura Winters. Contractor, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Contract price, $35,000.

BANKS.

FOWLER, FRESNO CO., CAL. — Bank, 2 story and base, brick, $20,000. Architect, C. K. Kirby, Forsyth Bldg., Fresno. Owners, J. C. Long, H. Weinberg and associates. The building will cover and area of 50x100 feet. The first floor will be occupied by the banking rooms, which will be finished in marble, tile and hardwoods. Upper floor will be arranged for offices. There will be a large public space, general banking offices and private offices. Coin and safety deposit vaults will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architect. A. J. Harriman, Fowler, is the cashier.

BELLINGHAM, WASH.—Bank fixtures. Cost not stated. Architect, John Graham, Lyons Bldg., Seattle. Owners, Bellingham National Bank. Plans and specifications are complete for the banking fixtures for the six-story and basement reinforced concrete bank building at Bellingham. Bids will be taken for this work by the architect. Bids will be opened on January 15th.

Contracts Awarded.

EUGENE, ORE.—Bank, 2 story and base, brick and concrete. Cost not stated. Architect, Aaron Gould, Worcester Bldg., Portland. Owners, Eugene Savings and Loan Co. Contractors, Bross Construction Co., Mohawk Bldg., Portland. Contract price not stated.

BRIDGES, DAMS AND HARBOR WORK.

PORT ANGELES, WASH. — Bridge, steel construction. Cost not stated. Engineer, City Engineer, Port Angeles. Owner, City of Port Angeles. Plans for a three-span steel bridge over the Elwha River at Port Angeles have been completed and are now out for figures. Bids will be opened on January 7th. Full particulars and plans and specifications can be secured by addressing County Auditor R. D. McLaughlin, Port Angeles, Wash.

TACOMA, WASH. — Bridge, pile and wooden truss construction. Cost not stated. Engineer, City Engineer, Raleigh, Tacoma. Owners, City of Tacoma. Plans and specifications are complete for the 1300-foot bridge which is to be erected in Old Town. The bridge will run from Fifth to Carr streets on Front and from Front to North 20th street on Carr. There will be 3,120 feet of piling and 13,500 feet, B. M. of capping and 120 pounds of drift bolts. Bids will soon be called. Plans have also been approved for the reinforced concrete viaduct over the Northern Pacific tracks on South Tacoma street but figures will not be called for on this work until the first of the year. The reinforced concrete viaduct will cost $10,000.

SEATTLE, WASH. — Viaduct, reinforced concrete, $200,000. Engineer, City Engineer Dimock, Seattle. Owners, City of Seattle. Plans for the reinforced concrete viaduct connecting Magnolia Bluffs Boulevard and the city streets have been completed and will shortly be out for figures. A branch of the viaduct will connect 15th and 20th avenues. Brick and asphalt paving are specified. Full particulars can be secured from the City Engineer.

Contracts Awarded.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Bridge, reinforced concrete type, $14,000. Engineer, City Engineer Santa Barbara. Owners, City of Santa Barbara. Contractor, John M. Williamson, Santa Barbara. Contract price, $13,288.

LOS ANGELES, CAL.—Wharf construction, reinforced concrete, $450,000. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. The Snare-Triest Company, 143 Liberty street, New York, were the lowest bidders at $444,700 for the construction of 2,520 lineal feet of reinforced concrete wharf at San Pedro for the city of Los Angeles. The other bids received by the Board of Public Works were. Russell-Greene-Foell Co., $447,450.00, and Somers & Lund, $556,263.00. The bids were received for unit prices on the following estimated quantities: (a) 1,222,000 lbs. of steel cylinders in place, (b) 1,600,000 lbs. of steel reinforcing rods and anchors; (c) 14,280 lineal feet of 18-inch reinforced concrete piles in place (d) 17,320 lineal feet of 16-inch reinforced concrete piles in place, (e) 30,500 lineal feet of reinforced concrete sheet piles in place, (f) 80 cubic yards of class A concrete in place; (g) 5,160 cubic yards of class B concrete in place, (e) 3,650 cubic yards of class C concrete in place, (i) additional price if crushed rock is used in concrete, (j) 26,000 tons of new riprap in place, (k) 6,000 cubic yards of old riprap to be shifted from old dike; (l) 105 cubic yards of material in dry walls, (m) special bid (1) 24,000 tons of riprap or (2) 24,000 tons of spalls or (3) 24,300 cubic yards of shell material, (n) 17,200 lineal feet of untreated piles in cylinders, (o) 60,800 lineal feet of untreated piles other than in cylinders, (p) 100,000 square feet of asphalt paving including 6 in. base, (q) lump sum for all other work.

—CHURCHES—

SEATTLE, WASH.—Church, 2 story and base, brick, $50,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Presbyterian Church. The architect has stated that bids for the construction of this building will be taken about the first of January. The building will be 58x102 feet. There will be main auditorium seating 700 people, pastor's study, several Sunday school rooms, social parlors, dining room and kitchen. Interior will be finished in pine, hardwoods and ornamental plaster. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete.

FACTORIES & WAREHOUSES.

LOS ANGELES, CAL.—Factory group, reinforced concrete construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Bradford Baking Co. The present building which is one story, 65x155 feet, will be increased to four stories in height. There will also be a two-story building, 74x45 feet, and a one-story stable triangular in shape, 165x180x200 feet. All the buildings will be of reinforced concrete, Class A construction with plastered exterior finish, composition roofing, concrete floors, plate and wire glass, metal frames and sash, elevators, plumbing and electric wiring. Plans are complete and figures are being taken.

SAN FRANCISCO—Factory, 5 story and base, reinforced concrete, $200,000. Architect, John Graham, Lyon Bldg., Seattle, Supervising Architect, W. J. Wood, 100 Van Ness Ave., S. F. Owners, Ford Motor Car Co. Supervising Architect Wood will be ready about January 1st to receive bids for two large freight elevators, the plumbing, automatic sprinkler system, electric fixtures and interior office finish for the new five-story and basement distributing plant, which is to be erected on the west line of Harrison street, between 21st and 22nd streets. A contract for all other parts of the work, except those above mentioned, has been awarded to the Clinton Fireproofing Co., on their bid of $171,000. For a complete list of all other figures submitted on this work see under San Francisco in this issue.

PORTLAND, ORE.—Factory, 3 or 4 story and base, brick or reinforced concrete, $200,000. Architects, Darmer & Cutting, 1111 South C St., Seattle, associated with C. H. Bristow, Portland. Owners, Carman Mfg. Co., Seattle. This

company has recently purchased the plant and factory site of the Oregon Furniture Mfg. Co. at South Portland and contemplate extensive improvements within the next year. The site extends over six acres, and is located along the Willamette River, having excellent shipping facilities by both water and rail. Further announcement will be given as the plans progress.

Contracts Awarded.

PORTLAND, ORE.—Grain elevator, 10 story, reinforced concrete, $100,000. Engineers, James Stewart & Co., Chicago. Owners, Globe Grain Milling Co. Contractors, James Stewart & Co., Chicago, and Brayton Engineering Co., Portland. Contract price, $100,000. Note: This elevator will have a capacity of 250,000 bushels.

FRESNO, FRESNO CO., CAL.—Stable and waremouse, 2 story and base, brick, $12,000. Architect, none. Owners, Helm Estate. Contractor, A. Allen, Fresno. Contract price, $12,000.

FIRE HOUSES AND JAILS.

Contracts Awarded.

PORTLAND, ORE.—Jail, 4 story and base, steel and concrete. Cost not stated. Architects, Emil Schacht & Son, Portland. Owners, City of Portland. Contractors, Friberg Contracting Co., Portland. Contract price not stated. The Friberg Contracting Co., the successful bidders for the erection of the new Jail Building and Fire Station to be built at the northwest corner of Second and Oak streets on the site of the old City Jail, announce the letting of the following sub-contracts on the same, viz.: The stone and marble work to the Schanen Blair Company, the plastering to J. D. Tresham, the painting to E. A. Chambers, the ornamental iron to the East Portland Wire and Iron Works, and the reinforcing steel to the Trussed Concrete Steel Company. The contract for the steel frame work was let separately Steel Company.
and was awarded to the Northwest

FLATS.

SAN FRANCISCO—Flats 2 story and base, frame, $4,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, F. Schwenkler. The building will contain two flats of four and five rooms each, and will cover an area of 25x50 feet. Interior finish will be of pine and redwood with some oak floors. There will be either gas grates or open fire places. Mantels will be of tile. Tile will be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, $12,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Show. The building will be erected on Jackson street and has been designed as an apartment flat structure. There will be a total of eight apartments of four rooms and bath each. Interior will be finished in pine and redwood with some elm panels. There will be gas grates and a hot water heater. Entrance will be finished in marble and tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, $4,400. Architect, none. Owner, J. B. Pene, 1655½ Mason St., S. F. The building will be erected on Wayne street, near Broadway, and will have a frontage of 25 feet and a depth of 43½ feet. There will be three small apartment flats with baths. Interior will be finished in pine and redwood Entrance will be finished in marble and tile. There will be gas grates. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

OAKLAND, CAL.—Flats, 2 story and base, frame, $7,000. Architect, J. W. Dolliver, Royal Insurance Bldg. S. F. Owner, E. B. Noegemann. The building has been arranged for four modern flats of three rooms and bath each. There will be wall beds. Interior finish will be of pine and redwood with some oak veneer. Entrance will be finished in marble and tile. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

GARAGES.

PIEDMONT, ALAMEDA CO., CAL.—Garage, 2 story and base, frame, $4,000 Architect, Edward B. Seeley, 255 California St., S. F. Owner, W. E. Creed. This building has been designed for a private garage and will contain a completely equipped garage in the first floor, two bed rooms, bath and kitchen in the upper floor. Interior finish will be of pine. A cement floor will be used on the first floor. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Garage, 1 story and base. Class A construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, E. S. Butterfield. The building will be designed for a commercial garage and is to cover an area of 100x120 feet. Walls will be of reinforced concrete as will the roof slabs, piers and floors. There will be metal window frames and sash. Construction will be fireproof throughout. Special gasoline storage tanks are specified. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

LOS ANGELES, CAL. — Garage, 1 story and base, brick, $12,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Mrs. E. O. McLaughlin. Contractor, M. N. Yesberg, 1650 Morton Ave., L. A. Contract price, $12,000.

SALEM, ORE.—Garage, 2 story and base, brick, $12,000. Architect, Fred A. Legg, Salem. Owners, Vich Bros., Salem. Contractors, Dennison & McLaren, Salem. Contract price, $12,000.

GOVERNMENT WORK AND SUPPLIES.

Gates, Arrow Rock Dam.

The Secretary of the Interior has authorized the director of the Reclamation Service to execute contract with the Wheeling Mold and Foundry Co. of Wheeling, W. Va., for furnishing two high pressure gates for the Arrowrock dam, Boise irrigation project, Idaho. The price of these gates, including freight is $29,052.20.

Dodson Reclamation Project.

The Secretary of the Interior has directed the Reclamation Service to execute the following orders for excavation in connection with the Dodson North Canal, Milk River irrigation project, Mont.: Tenbs & Taggart, Cowley, Mont. Schedule 1, involving the excavation of 100,000 cubic yards of material, contract price, $17,000. J. E. Hilton, Billings, Mont., schedule 3, involving 122,000 cubic yards of excavation, contract price, $21,300. Schedule 2, covering 215,500 cubic yards of excavation, will either be readvertised or the work performed by government forces, as seems most expedient.

Reclamation Service Canal.

The following bids were received at the office of the U. S. Reclamation Service, Malta, Mont., on December 2 for the construction of 16 miles of the Vandalia South Canal, Milk River project, Montana

Schedule 1.

Class 1, 100,000 cubic yards excavation; 2, 1,000 cubic yards do; 3, 1000 cubic yards do; 4, 350,000 cubic yards overhaul.

J. E. Dodson, Hilton, Mont., class 1, 19c; 2, 40; 3, $1; 4, 2c.

Campbell Building Co., Salt Lake City, Utah.

Presidio of San Francisco.

A contract for asphalting the roadway from the General Hospital to the Guard House at the Presidio of San Francisco has been awarded to Flynn & Tracy at 10⅞ cents per square foot. The contract calls for a two-inch binder and two-inch top. The concrete foundation for this work will be done by the Government.

Reinforced Concrete Retaining Walls.

A reinforced concrete retaining wall is to be erected at the Army Supply Depot. The wall will be about 400 feet in length and 35 feet high. Work will be done by Day Labor. Cement, steel and other materials have been contracted for by the Government.

Big Projects for the Future.

Never has the Constructing Quartermaster's office at Fort Mason been as busy as now. In addition to the $1,641,000 appropriation for Fort Mason, the Military Committee has asked Congress for an additional $400,000 for Fort Mason, $1,781,000 for the Presidio and $292,000 for Fort Scott. The intention of the Government to make the Presidio of San Francisco a brigade post has been announced. Among other work of importance will be a three or four story building of permanent construction which will be used for exhibition purposes during the 1915 Exhibition and for Department Headquarters afterwards. This structure will cost in the neighborhood of $1,000,000.

An Injustice to Bidders.

Certain business firms who possess contracts with the Government are now confronted with the decision of the comptroller of the Treasury to the effect that the contracts made with them by the Government are of no value and constitute no legal claim upon the Government for the payment of the amount involved, for which amount service was rendered or material was delivered. This intolerable condition arises from the fact that certain purchasing officers of the Government have made contracts for articles which are supplied to the executive departments by the so-called general supply committee under the Secretary of the Treasury. The law of June 17, 1910, requires that "all supplies for the executive departments in Washington which are in common use by or acceptable to the ordinary needs of two or more departments shall be contracted for by the Secretary of the Treasury by means of a general supply contract.

There have been several instances lately where purchasing officers have invited bids and awarded contracts for certain articles which have been defined as coming within the purchasing function of the general supply bureau. The Comptroller holds that such purchases are not justified by law, and he has decided in all such cases that the fact that the purchase has been made "in no degree alters the situation or changes the character of the transaction." He adds: "The act prescribing the mode for making such purchases is a published law, and private dealers, no less than public officials must be presumed to have knowledge thereof, and transactions in violation thereof cannot rightfully claim favor as having been 'made in good faith.'" The Comptroller further announces that the Government can incur no legal responsibility through acts of its officers that are forbidden by law.

There is great injustice in this decision, since it puts contractors to the annoyance and expense of estimating for bids and the additional cost of complying with the contracts awarded to them. The delivery of an article under a contract made by the Government apparently counts for nothing. The loss must be entirely the contractor's, although the responsibility for the mistake is entirely that of the Government representative. There should be some way by which the contractor can be protected from official carelessness of this sort. There is no excuse for a purchasing officer making a mistake in inviting bids and awarding a contract illegally. It should be his business to ascertain to what extent he may proceed in transactions with bidders and contractors, and the contractor, who bids in good faith and receives a contract from the Government and complies with its terms, assuredly has a claim against the Government, which should not be lightly set aside by any such ruling as a denial of the Government's legal responsibility, even when the acts of its officers are forbidden by law.

HALLS AND SOCIETY BUILDINGS.

SAN FRANCISCO. Lodge hall, 3 story, base and two mezzanine floors, steel and brick, $150,000. Architect, Will D. Shea, 244 Kearny St., S. F. Owners, Young Men's Institute. Architect Will D. Shea has been selected by the members of the Building Committee of the Young Men's Institute to prepare plans for their new $150,000 structure, which will be erected on the north line of Oak street west of Van Ness avenue. A competition was held held among four architect members of the Institute to secure a design. The building lot has a frontage of 89 feet 9 inches on Oak street and a depth of 120 feet. The new building will be

three stories high with a basement and two mezzanine floors. There will be a complete steel frame with the Class A type of construction from the basement through the first floor, and Class C above that. Plans provide for a modern club building, including a gymnasium, ball room, lounging rooms, card rooms and ladies' and gentlemen's parlors. Interior will be handsomely finished throughout. Working drawings will be completed as rapidly as possible and construction started early in the coming year.

SAN FRANCISCO. Machinery hall, 2 story, frame construction. Cost not stated. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Machinery Hall, the largest of the Exposition buildings, have been completed by the architects. Working drawings have received the approval of the Director of Construction and bids are now being advertised. The building will be 360 feet wide and 900 feet long. The roof will be supported by wooden arches of 75 foot span. The average height of the building will be 100 feet. Bids for the construction will be opened on December 28th at 11 a. m. The official proposal appears in another column of this issue.

BERKELEY, ALAMEDA CO., CAL.—Club house, 2 story and base, frame, $20,000. Architects, Parker & Kenyon 244 Kearny St., S. F. Owners, Twentieth Century Club. The building will be erected on a corner lot and will be designed in the Mission style with a red clay tile roof. The interior has been arranged for a number of large club rooms and will be finished in pine, redwood and hardwoods. Hardwood floors will be used throughout. There will be a central heating system and open fire places with brick mantels. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will be out for figures shortly after the first of the year.

FRESNO, FRESNO CO., CAL.—Auditorium, 2 story and base, brick. Cost not stated. Architect, C. K. Kirby, Jr., Fresno. Owners, City of Fresno. Bids will be advertised for on December 23rd for the completion of the Rowell Auditorium, construction of which was abandoned on account of the lack of funds. Bids will be opened about January 6th. Full particulars can be secured from the City Clerk or from Architect Kirby.

LARKSPUR, MARIN CO., CAL.—City Hall, 2 story frame construction, $30,000. Architect, C. O. Clausen, Pacific Bldg., S. F. Owners, City of Larkspur. Plans of Architect Clausen, submitted in competition with 18 other architects have been accepted by the Board of Town Trustees. The building will contain the various city offices and space for the fire and police department. Exterior will be finished in stone and redwood. The exterior of the building will be covered with cement plaster. Plans will be completed at once and figures advertised.

LOS ANGELES, CAL.—Hospital, grade Class A construction. Cost not stated. Architects, Austin & Pemgel, Wright and Callender Bldg., L. A. Owner, Good Samaritan Hospital Association. Dr. Walter Lindley, President. Preliminary plans have been prepared of a grouped class A buildings, which are to take the place of the brick and frame structures now in use on Hope street near 16th. No particulars of the work are available at this time, but will be given later. Definite action will be taken by the owners within the next week or ten days. Preliminary plans are now under consideration.

HOSPITALS.

SAN FRANCISCO—The building, 2 and 3 stories and base, brick and steel. Cost not stated. Architects, McDougall & Sloss, Hass Bldg., S. F. Owners, San Francisco Polyclinic. The building will be erected on Jackson street, between Larkin and Polk streets, and will have a frontage of 40 feet and a depth of 137½ feet. The institution is to be designed for the most modern, and of its kind in the state. There will be large number of special rooms besides lecture rooms and operating department. A central heating and ventilating system will be installed. A large number of the rooms will be finished in tile. The exterior of the building will be faced with pressed brick and ornamental cut stone. Plans are nearly complete.

FULLERTON, ORANGE CO., CAL.—Hospital, 1 story and base, reinforced concrete. Cost not stated. Architect, Theodore C. Kimball Masonic Bldg., L. A. Owners, Fullerton Hospital Association. This building will be 84x34 feet, with a wing 37x40 feet, and will contain the emergency treatment rooms, besides eight private wards, operating room, kitchen and six bedrooms. Floors will be of maple, cement, linoleum and composition floors. Steam heat will be installed and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Roof will be of red clay tile. Plans are complete and bids are being taken.

HOTELS.

SAN FRANCISCO—Hotel addition, 1 to 5 stories and steel, $11,000. Architect G. Albert Lansburgh, 761 Mission st., S. F. Owner, Donald Rose. The work is to be addition of an additional story to the present two story and cellar building, 1,257 O'Farrell street. The new story is to be used for banquet rooms. Interior will be remodeled to suit the owner, and a mezzanine floor is to be added to the present plant. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 6 story and base, Class C construction, $45,000. Architect, Albert Schroepfer, Foxcroft Bldg., S. F. Owner, I. Mensor. This building will be erected at the southeast corner of Geary and Jones streets. The work will be reinforced concrete walls faced with pressed brick. A total of 50 rooms will occupy the upper floors. First floor will contain the hotel lobby and office. There will be steam heat and elevator service. Plans are complete and figures are being taken by the architect.

LODI, SAN JOAQUIN CO., CAL.—Hotel, 4 story and base, brick, $50,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, James Whittaker. The building will cover a ground area of 55x120 feet and will be modern in every particular. The first floor will contain the office, lobby and public dining room. Upper floors will be arranged for a number of guest rooms, many of which will have connecting baths. There will be steam heat, one freight and two passenger elevators and modern kitchen equipment. Interior will be finished in pine and hardwood. Considerable steel and ornamental iron will be used. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The main portion of the building will be 100x120 feet with a wing 30x40 feet. There will be four stores besides the office and hotel lobby on the first floor. Upper floors have been arranged for 100 guest rooms. There will be steam heat, two elevators and a vacuum cleaning system. Metal window sash and frames will be used. Many of the rooms will have private baths. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, J. P. Parks. This building is to be erected on Fowler street near Fourth, and will contain a total of 100 rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. Interior finish will be of pine and hardwood. Baths will be finished in tile with cement floors. The exterior of the building will be faced with pressed brick. Plans are to be prepared at once.

LOS ANGELES, CAL.—Hotel, 5 story and base, brick. Cost not stated. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, I. Eisner. The building is in the nature of an addition to the present Eisner Hotel, and will cover an area of 114x120 feet. There will be two stores on the first floor and 14 rooms and baths on the second floor. Store floors will be of cement. Interior finish is to be of pine throughout. There will be copper store fronts. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SPOKANE, WASH.—Hotel to store and lofts, Class A construction, $2,000,000. Architects, Cutter & Malmgren, Paulson Bldg., Portland. Owner, Davenport Hotel. All figures recently received for this work have been rejected and new bids will be called for at once. The following firms submitted figures on the work: James Black Masonry Construction Co., St. Louis and Helena; Lewis A. Hicks Co., Portland and San Francisco; Hurley-Mason Co., Tacoma and Portland; Brayton Engineering Co., Portland; Dinwiddie Construction Co., Portland; Sound Construction and Engineering Co., Seattle; Geo. C. Dettrick, Seattle, and Olson & Johnson, Missoula, Mont.

The main auditorium will have a seating capacity of 1500. This building will also contain the offices of the Bible Institute, lecture rooms, class and club rooms, study rooms, etc. On the roof will be a tile paved roof garden 112x150 feet. The men's dormitory will provide sleeping apartments for 350 people. The basement and sub-basement will contain the dining rooms, kitchen, laundry and storage rooms. The other building will also accommodate 350 students and will have private rooms, music studios and the printing plant in the basements. Both dormitories will also have libraries, assembly rooms, private and public offices, waiting and social rooms, tub and shower baths, etc. The building will be of reinforced concrete construction with cement plastered exterior and artificial stone trim, composition roofing, pine interior trim, metal lath and plaster partitions, cement and hardwood floors, plate and art glass windows, metal frames and sash, elevators, steam heat, vacuum cleaning system, etc. A complete power plant will be installed. Plans will be complete about January 1st and figures will be asked.

PROSSER, WASH.—School, 2 story and base, brick, $75,000. Architects, Wetherwax & Son, North Yakima. Owners, Prosser School District. Notice was just been given that the competitive plans of the above named architects have been selected. None of the particulars can be learned at this time. Further notice will be given when bids are called.

POINT GREF, B. C.—University group, reinforced concrete construction, $1,500,000. Architects, Sharp & Thompson, 536 Hastings street, Vancouver. Owners, University of British Columbia. The plans of Sharp & Thompson were selected from nineteen competitive sets of which five were submitted by Vancouver men and the balance from Eastern Canadian architects. The plans of Douglas Scott Bow, Powell street, won second prize. Third and fourth prizes went to Philip T. Turner & Co., Montreal, and Simons & Rae, Toronto, respectively. First prize was $4,000 cash, and the usual architectural fee, and second, third and fourth, cash prizes of $3,000, $2,000 and $1,000. The sum of $500,000 is now available for construction. Working drawings will be prepared at once.

HAYWARD, ALAMEDA CO., CAL.—School, 1 story, frame, $6,000. Architect, William Wilde, Albany Bldg., Oakland. Owners, Fairview School District. The building will contain two class rooms. Interior finish will be of pine throughout. Furnace heat will be installed. The exterior of the building will be covered with rustic. Plans are complete and out for figures. Plans can be obtained from either the architect or from the Clerk of the School Board at Hayward.

RODEO, CONTRA COSTA CO., CAL.—School, 1 story and base, brick, $10,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owners, Rodeo School District. Plans of Architect Sexton have just been selected from a competition of eight architects. The building will contain four class rooms.

There will be furnace heat. Interior trim will be of pine throughout. The exterior of the building will be faced with pressed brick. Working drawings will be completed as rapidly as possible and tenders will be called shortly.

SAN JOSE, SANTA CLARA CO., CAL. School, 1 story and base, reinforced concrete, $65,000. Architect Norman F. Marsh, Broadway Central Bldg., L. A. Owner, Hester School District. Word was just received from Herbert Jones, Clerk of the Hester School District, to the effect that plans were complete for the new building and that bids will be called for at once. About forty days will be given contractors in which to figure the work. Plans can be secured from either Mr. Jones at San Jose or from the architect.

Contracts Awarded.

OAKLAND, CAL. Schools, 2 story reinforced concrete fireproof east buildings. Cost not stated. Architect, J. J. Donovan, Security Bldg., Oakland. Owner, City of Oakland. Bids were opened at the last meeting of the Board of Education for the Peralta High School and for the shop buildings for the Polytechnic High School. The former was let to C. Christensen at $39,950, and the latter to W. W. Anderson, at $17,500. For a complete list of all figures received see under Oakland, Local Affairs Column in this issue.

SAN DIEGO, CAL. School, 2 story and base reinforced concrete, $120,000. Architect T. C. Kistner, San Diego. Owner, City of San Diego. Contractors, Wolfe & Wright, San Diego, general construction, $113,000. Note. The building is to be known as the Washington School. A contract for the heating and ventilating will probably be awarded to E. F. Hulse of Los Angeles.

SEWERS, STREET WORK AND WATER SYSTEMS.

HANFORD, KINGS CO., CAL. Sewer system, $40,000. Engineer, City Engineer Hanford. Owners, City of Hanford. Plans have been completed and approved by the Board of Trustees for a complete sewer system. Bids will probably be called for in the course of a week or ten days. Work will be started early in January. Full particulars can be secured from the City Clerk.

BERKELEY, ALAMEDA CO., CAL. Grading in the street. Cost not stated. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. The following bids were received by the City Council at their last meeting for the work of grading in the street: Dennison & New York, $86,500; Universal Contracting Co., S. F., $1,650; Scott, $69,847. Dixon Engineering & Construction Co., Toledo, Ohio; Reese Disposal Co., S. F., figures were taken under advisement.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO. Stores and lofts, 3 story and base. Class C construction, $50,000. Architect, O'Brien Bros., Crocker Bldg. Owner, Union Pacific Realty Co. The building will occupy a lot 137.6 feet 6 inches by 100 feet and will have a steel front. The entire building will be occupied by the owners. The front portion of the first floor will be fitted up for offices and the rear for shipping department. The second floor will be used for storage purposes. Contruction will be of the extra heavy type. The exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for next week.

SAN FRANCISCO. Stores and nickelodeon, 1 story, reinforced concrete, $10,000. Architect, none. Owner, R. W. Moller, 185 Stevenson St., S. F. The building will have a frontage of 15 feet and a depth of 100 feet. There will be two stores and a nickelodeon. Interior will be finished in pine. There will be a system of ventilation installed. The entrance to the nickelodeon will be finished in tile and marble. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL. Store, 1 story, frame, $3,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, John Mitrovich. The building will be erected on Grove street near 35th, and has been arranged for one store. Interior finish will be of pine. There will be plate glass display windows and some prism glass. The exterior will be covered with cement plaster. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Stores and nickelodeon, 1 story, brick, $7,000. Architect, Turner Dahnkin, Berkeley. Owner, F. E. Armstrong, 2249 Hearst Ave. Berkeley. The building has been designed to contain two stores besides the nickelodeon. Interior will be finished in pine and some ornamental plaster. Tile and marble will be used in the entrances. There will be patent store fronts. Metal lath and plaster partitions are to be used. The exterior will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FRESNO, FRESNO CO., CAL.—Stores and offices, 10 story and base. Class A construction, $275,000. Architect, Geo. William Kelham, Crocker Bldg., S. F. Owners, Fresno Estate Co. This building, which has been mentioned here before, will be erected at the corner of Mariposa and J streets, and covers an area of 100x140 feet. There will be a number of stores on the first floor and 189 offices in the upper floors. Provision is made for three elevators. There will be a complete steel frame, reinforced concrete floor slabs, metal window frames and sash, steam heat, mail chutes and a vacuum cleaning system. Exterior walls will be of brick, faced with pressed brick and terra cotta. Bids have been taken for the steel work and plans will be out for figures for the general construction shortly.

LOS ANGELES, CAL.—Lofts, 5 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, Stephens Investment Co. The building is to be erected on the west side of Hill street near First. A contract for the excavating has been awarded to E. N. Girard. Further details will be given later.

Contracts Awarded.

LOS ANGELES, CAL. Loft, 9 story and base reinforced concrete, $82,000. Architect none. Owner, A. L. Cheney. Contractors, Richard-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, $83,000. Note. This building was originally intended for a four-story structure and the above named contractors held the contract.

LOS ANGELES, CAL.—Lofts, 7 story and base, reinforced concrete, $85,000. Architect, none. Owner, M. J. Connell. Contractor, Hugo Eckhardt, Wilcox Bldg., L. A. Contract price, $85,000.

PORTLAND, ORE.—Stores and offices, 4 story and base, brick and steel. Cost not stated. Architects, MacNaughton & Raymond, Portland. Owners, Multnomah Securtiy Co. Contractors, Moore Bros., Portland, carpentry and mill work. Contract price not stated.

SAN DIEGO, CAL. Telephone exchange, 3 story and base, brick, $90,000. Architects, Architectural Dept. Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific Tel. and Tel. Co. Contractor, A. T. Spence, S. F. Contract price $90,000.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C., December 12th 1912.—Sealed proposals will be received at this office until **3 o'clock p. m. on the 23rd day of January, 1913,** and then opened for the construction complete (including plumbing, gas piping, heating apparatus, electric donduit and wiring and lighting fixtures) of the the United States post office building at Billings, Montana. The building is three stories and basement with a ground area of approximately 7,250 feet. Fireproof construction, stone and brick facing and tin roof. Plans and specifications may be obtained from the custodian of the site at Billings, Montana, or at this office at the discretion of the Supervising Architect. OSCAR WENDEROTH, Supervising Architect.

PROPOSALS FOR CEMENT.

CEMENT—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, 408 Commonwealth Building, Denver, Colo., until **10 o'clock a. m January 6, 1913,** for furnishing 210,000 barrels of Portland cement f. o. b. cars at the works of the bidder. For particulars address the U. S. Reclamation Service, Washington, D. C., or 408 Commonwealth Building, Denver, Colo. A. P. DAVIS, acting director.

PROPOSALS FOR CANAL SUPPLIES.

C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until **2 o'clock p. m. January 10, 1913,** for the construction of about two miles of the Dodson North Canal, Milk River project, Montana. The work involves the excavation of about 205,000 cubic yards of material and is situated on the north side of Milk River and adjacent to the main line of the Great Northern Railway near Wagner and Exeter, Mont. For particulars address the United States Reclamation Service, Washington, D.

C.; Helena, Mont., or Malta, Mont. A. P. DAVIS, acting director.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery streets, San Francisco, California, at **11 a. m. on December 28th, 1912** for the following work:

For Contract No. 22.

For constructing the Machinery Building, in accordance with the specifications on file in the office of the Director of Works.

Each proposals must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Building, by depositing $25.00, which will be refunded upon the return of the plans in good condition within seven days from the date they are taken out, and the return of the specifications not later than January 1st, 1913.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman.

The building will be erected on Fulton street near Franklin, and will contain 18 modern two-room apartments with connecting bath and wall beds. There will be steam heat and an automatic elevator. Interior finish will be of pine, redwood and elm. Some hardwood floors will be used. There will be a vacuum cleaning system. Bath rooms will have tile floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owner will take figures on the work.

APARTMENT HOUSE 9 story and base. Class A construction, $350,000 San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Apartment Co. Architect Sawyer states that the specifications are being written for the nine-story Class A apartment house, which is to be erected at the northwest corner of Sacramento and Mason streets for the Burlingame Court Apartments Co. The scheme is one in which the majority of the tenants will be householders. Apartments will consist of four rooms and up. Many special features are being specified to meet the ideas of the various owners who have already taken stock. The building will cost $500,000. Specifications will be complete in about three weeks.

FLATS 3 story and base, frame, $12,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Shaw. The building will be erected on Jackson street, and has been designed as an apartment flat structure. There will be a total of eight apartments of four rooms and bath each. Interior will be finished in pine and redwood with some elm panels. There will be gas grates and a hot water heater. Entrance will be finished in marble and tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is to do the work by Day Labor.

FLATS—3 story and base, frame, $4,400. San Francisco. Architect, none. Owner, J. B. Pene, 1655½ Mason St. The building will be erected on Wayne street near Broadway, and will have a frontage of 25 feet and a depth of 137½ feet. There will be three small apartment flats with baths. Interior will be finished in pine and redwood. Entrance will be finished in marble and tile. There will be gas grates. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LODGE HALL—3 story, base and two mezzanine floors, steel and brick, $150,000. San Francisco. Architect, Will D. Shea, 244 Kearny St., S. F. Owners, Young Men's Institute. Architect Shea has been selected by the members of the Building Committee of the Young Men's Institute to prepare plans for their new $150,000 structure which will be erected on the north line of Oak street west of Van Ness avenue. A competition was held among four architects, members of the Institute, to secure a design. The building lot has a frontage of 89 feet 9 inches on Oak street and a depth of 120 feet. The new building will be three stories high with a basement and two mezzanine floors. There will be a complete steel frame with the Class A type of construction from the basement through the first floor and Class C above that. Plans provide for a modern club building, including a gymnasium, ball room, lounging rooms, card rooms and ladies' and gentlemen's parlors. Interior will be handsomely finished throughout. Working drawings will be completed as rapidly as possible and construction started early in the coming year.

MACHINERY HALL—2 story, frame construction. Cost not stated. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed by the architects for Machinery Hall, the largest of the Panama-Pacific Exposition buildings. Working drawings have received the approval of the Director of Construction and bids are now being advertised. The building will be 360 feet wide and 900 feet long. The roof will be supported by wooden arches of 75 foot span. The average height of the building will be 100 feet. Bids for the construction will be opened on December 28th at 11 a. m. The official proposal appears in another column of this issue.

HOTEL ADDITION—1 story, brick brick and steel, $14,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owner, Daniel Roth. This work is in the nature of an additional story to the present five-story hotel building at 275 O'Farrell street. The new story is to be used for banquet rooms. Interior will be handsomely finished in hardwood and ornamental plaster. Plans are complete and figures are being taken.

HOTEL—6 story and base. Class C construction. $45,000. San Francisco. Architect, Albert Schroepfer, Foxcroft Bldg., S. F. Owner, I Mensor. This building will be erected at the southeast corner of Geary and Jones streets. There will be reinforced concrete walls faced with pressed brick. A total of 50 rooms will occupy the upper floors. First floor will contain the hotel lobby and office. There will be steam heat and elevator service. Plans are complete and figures are being taken by the architect.

CLINIC BUILDING—2 and 3 story and base, brick and steel. Cost not stated. San Francisco. Architects, McDougall Bros., Russ Bldg., S. F. Owners, San Francisco Polyclinic. The building will be erected on Jackson street, between Larkin and Polk streets, and will have a frontage of 40 feet and a depth of 137½ feet. The institution has been designed for the most modern clinic of its kind in the state. There will be a large number of special rooms besides lecture rooms and operating department. A central heating and ventilating system will be installed. A large number of the rooms will be finished in tile. The exterior will be faced with pressed

brick and terra cotta. Plans are nearly complete.

STORES AND LOFTS 3 story on base. Class C construction, $30,000, San Francisco. Architects, O'Brien Bros., Chunie Bldg., S. F. Owners, Union Pacific Salt Co. The building will be erected in the heart of the wholesale district and will have a street frontage of 50 feet and a depth of 196 feet. The entire building will be occupied by the owners. The front portion of the first floor will be fitted up for offices and the rear for shipping department. The second floor will be used for storage purposes. Construction will be of the extra heavy type. The exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for next week.

STORES AND NICKELODEON 1 story, reinforced concrete, $10,000, San Francisco. Architect, none. Owner, R. W. Moller, 185 Stevenson St., S. F. The building will have a frontage of 45 feet and a depth of 100 feet. There will be two stores and a nickelodeon. Interior will be finished in pine. There will be a system of ventilation installed. The entrance to the nickelodeon will be finished in tile and marble. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

Bids For New Ford Plant Are Opened.

Figures Show Clinton Fireproofing Co. Low. Nine Close Figures Were Submitted by Bidders.

Bids have been opened for the construction of the new distributing plant of the Ford Motor Car Company, which is to be erected on Harrison street, between 21st and 22nd streets, at a cost of approximately $200,000. The Clinton Fireproofing Company are low on the job at $171,000 and will probably be awarded the contract.

Considerable anxiety is felt over the opposition to a permit for spur trackage from 21st street into the company's holdings which has recently developed among two or three disgruntled property holders. Just how much this feeling will effect the carrying out of the project it is impossible to tell at this time. The question of granting the permit will come up before the next meeting of the Board of Supervisors on Monday.

The following is a complete list of all figures submitted for the work.

General Construction.

Clinton Fireproofing Co...	$171,000
Lindgren & Co.	176,600
Lange & Bergstrom	177,897
Charles Wright	177,942
Frank M. Garden Co.	180,600
Bluxom & Co.	184,190
Foster & Voght Co.	189,873
J. J. Leonard	191,400
Williams Bros & Henderson	191,900

ARCHITECT'S CERTIFICATE.

Dec. 17, 1912—Abe Appleton has filed his certificate of Architecture for San Francisco County.

Paint That Is Fireproof.

Friday, the thirteenth, may be an unlucky day for some, but for the Liquid Stone Paint Company of this City, it was a red letter day.

On the Exposition Grounds were erected two small houses, one plain and the other painted with two coats of Liquid Stone. Each house was filled with kindling, saturated with five gallons of kerosene. To make the test doubly severe, no roof was put on the unpainted house.

At exactly three o'clock, both houses were fired and at seven minutes past three, the walls of the unpainted house were entirely consumed while the painted house was holding a roaring fire. One of the Architects present made the remark that, the Liquid Stone Paint Company were asking something of wood that sheet steel would not withstand. This remark was later proven when the heat melted the nails and the four walls dropped outward, intact.

The interior of the painted walls were scorched and charred, but the outer walls were not even discolored, let alone blistered. The test proved beyond doubt that it is possible to fireproof frame dwellings.

Big Construction Fund is Raised.

Money For First Congregational Church Practically Pledged in One Day. Will Build at Once.

The sum of $82,000, subscribed in practically one Sunday by the members of Dr. C. F. Aked's congregation for the construction of a new edifice on the property of the present First Congregational Church, at the southeast corner of Post and Mason streets, will long stand as an unprecedented record for raising a building fund in San Francisco.

An estimate of from $175,000 to $200,000 has been placed on the cost of the new building. Besides the subscribed $82,000, the First Congregational Church has a standing offer of $25,000 for the property on Post street, between Buchanan and Webster streets, which with other money available leaves but $13,000 to be raised before construction can be started. There is every assurance that this amount will be forth coming and that the work will be undertaken at an early date.

Plans prepared by Reid Bros., Architects, have been selected by the Building Committee and provide for a classic structure built of white stone in the Italian Renaissance style and supported by massive Corinthian columns on all sides, the building will be one of the most handsome and stately churches in the country.

The new church will have a seating capacity that will exceed 1,500 and the building will be provided with an additional lecture hall, a large Sunday school room with nine classrooms, several withdrawing rooms, a library, a dining room and kitchen, in addition to the spacious auditorium and accommodation for the minister and trustees.

The building departs from the conventional church style and form and no efforts have been spared to make convenience stand hand in hand with beauty. The new First Congregational Church is to be a building of which San Francisco will be proud.

The whole building covers an area of 104 by 137 feet. The main entrance is made through a vestibule 20 by 76 feet in area and bordered by a Corinthian colonade.

The auditorium, lighted from the Roman ceiling by a large art glass skylight, will match in splendor the stately edifice of Kubla Kahn in Xanadu. The walls will be of Cuen stone inset with colored glass windows of a Burne-Jones design. A sloping floor with accommodation for 1,100 people will be centered by a six-foot aisle for ceremonial purposes.

The pulpit platform is to be surrounded by a wide, semi-circular space and surmounted by a choir with seating capacity for forty.

The organ at present in use in the church on Post and Mason streets will be transferred to the new church. This organ was built since the fire and is of the most modern type of construction.

Masons' and Builders' Banquet.

THIRTY-SEVENTH ANNUAL FESTIVAL HELD AT THE PALACE HOTEL.

Banquet and Ball Marks The Reunion of The Contractors In Brick And Clay.

The Thirty-seventh Annual Banquet of the Masons' and Builders' Association was held in the Ball Room of the Palace Hotel on Saturday Evening, December the fourteenth.

An unusually large number were present, one hundred and fifty or more sitting down to the splendid repast prepared for them. James A. Wilson, the genial president of the Builders' Exchange, acted as Toastmaster, and in that capacity he has no superiors and few equals. An elaborate and splendid menu card had been prepared by the committee in charge which bore and historical introduction tracing the building industry back to the kings of Ancient Assyria in the beginning of civilization. It was profusely and appropriately illustrated and humorous in its allusions to ancient customs followed by the brick builders of the present day. Some facts and foibles concerning various members and invited guests were set forth in a series of verses purported to have been written on Jonah's Gourd by no less a person than Patrick McGushin, Poet Laureate to his majesty, King Budweiser I. A series of wise sayings ascribed to Sardanapalus, King or Assyria completed the card, which among other things included the following

MENU

Palace Hotel Cocktail
Toke Points, Faust
Cream of Peas, St. Germain
Olives Celery
Mixed Salted Nuts
Inglenook Vineyard Sauternes
San Dabs, Miller Style
Parisienne Potatoes
Mignonette of Lamb, Bourguignonne
Sugar Peas Normande
Inglenook Vineyard Red Letter Claret
Punch Cardinal
Roast Squab, au jus
Cold Asparagus Tips, Paprika Dressing
Roederer's Brown Label
Ice Cream, Bonbon Nationale
Assorted Fancy Cakes
Demi Tasse

A splendid orchestra of five pieces discoursed pleasing music during the meal, their selections being [illegible] for their good taste and [illegible]. Following the banquet the following program was rendered

Overture—American ..... Medley
Weisel's Orchestra
Vocal Solo ..... M. J. Hynes
Cornet Solo ..... Selected
Vocal Selections (a) "Wake Song"
Romeo and Juliet (by Request)
(b) "I Hear You Calling Me"
Miss Ruby E. Stewart
Irish Songs and Sayings
D. F. Casey
Song and Dance—Miss Anna Taylor
Duet—Cornet and Flute
Bass Solo ..... A. Lucas
Among the invited guests were [illegible]

the Chief of the Fire Department, Mr Murphy, Chief Building Inspector Mc Jensen, and three members of the Board of Supervisors. Mr George C Gregory, Mr Rube Metzler and Mr Ivan Nelson. Some 3000 persons witnessed the crowning of the queen from the balcony of the Fairmont Hotel. Many of the ladies wore handsome and splendid appearance, as every one seated in the balcony had been told that evening dress was all that was one of the most elegant and brilliant functions of the season, as noted by, doing their most exclusive and expensive wear, some believe that even in most of the big cities. The following is a list of those present:

Messrs. and Mesdames: Edwin Wilkins, W. S. Scott, J. E. Steele, Thomas Campbell, Vincent Donovan, A. H. Fabre, Jean Collin, C. S. Benevich, Ralph Mclearan, W. L. Neale, S. G. Kinne, I. M. Wade, Robert Alexander, W. C. Harding, John P. Hodges, James Macaulay, George Gallagher, Thomas Mullaly, Charles Hook, E. E. Cleveland, George Farrell, M. F. Ross, R. J. Collins, J. J. Butler, M. J. Haines, F. A. John, E. S. Mulford, C. Valon, Matt Farrell, James Odgers, M. B. McGowan, James S. Fennell, W. J. McWilliams, Sidney Hunn, Philip Millerick, Paul Koldenstrodt, C. J. Lundgren, John Ludwig, H. H. Larsen, I. C. Larsen, W. C. Murray, R. Forbes, C. F. Pratt, J. E. Brennan, M. J. Mealey, H. E. Dierks, M. V. Mowbray, N. Larsen, N. Anderson, William A. Rainey, E. S. Rainey, Joseph J. Phillips, E. J. Brandon, Thomas R. Murphy, Thomas W. Butterer, S. H. Kent, Nat Ellery, L. V. Larsen, B. R. Walcott.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, $5,000. Berkeley, Alameda Co., Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owner, N. L. Blake. The house has been designed for a nine room dwelling with bath, sleeping porch and laundry. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with shingles. Plans are complete and figures are being taken.

BUNGALOWS 3, 1 story and base, frame, $2,000 each. Livermore, Alameda Co., Cal. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner H. Murphy, Hearst Bldg., S. F. These houses have been designed to contain five rooms and bath. All interior finish will be either of pine or redwood. Oak flooring will be used in the living and dining rooms. There will be open fire places with tile work mantels. The exteriors of the houses will be covered with cement plaster. Plans are complete and in the hands of the owner purchasing all materials. The work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $4,000. Berkeley, Alameda Co. Architect, Home Owners, Newell-Mitchell Co., 2637 Shattuck Ave., Berkeley. The dwelling will contain seven rooms and sleeping porch. Interior finish will be of pine, redwood and cedar. There will be oak floors in the principal rooms and open fire places. Mantels will be of brick. The bath room will have tile wainscot and composition floor. The exterior of the dwelling will be covered with cement plaster and shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Julia Morgan, Mercantile Exchange Bldg., S. F. Owner, Ralph A. White. The house has been designed for an eight room house with bath, sleeping porch and laundry. There will be pine and redwood finish, oak floors in the principal rooms and furnace heat. A range for the whole will be used in the living room. Mantel will be of brick. An automatic water heater will be installed. The bath room will be floored with tile. Tile will also be used in the kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are complete and out for bids.

RESIDENCES — 2 stories and base, frame, $5,000 each. Berkeley, Alameda Co. Architect, Olen S. Grove, 2 Telegraph Ave., Berkeley. Owner, E. C. Wood. Each of these houses will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have tile wainscot and composition floors. The exteriors will be covered with cement plaster. Plans are complete and out for bids.

RESIDENCE — 2 story and base, frame, $3,000. Oakland, Cal. Architect, owner. J. A. Brett, 727 50th St., Oakland. The house has been designed for a seven room dwelling with bath. Interior will be finished in pine and redwood with some hardwood veneer. Floors in the principal rooms will be finished in oak. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, owner, John Worthington, 1419 Grant St., Berkeley. This dwelling has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Some oak flooring will be used. There will be open fire places and brick or tile mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans have been completed and are now in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owner, Mrs. Annie N. McGee. This dwelling has been designed for a six-room house with bath and laundry. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

APARTMENT HOUSE — 3 story and base, frame, $40,000. Oakland, Cal. Architect, O. E. Evans, 2367 Mission St., S. F. Owners, Surety Investors Realty Co. The building will contain in the neighborhood of 35 apartments of two and three rooms each. There will be wall beds and connecting baths. Interior finish will be of pine and redwood with some hardwood veneer and floors. There will be steam heat and a vacuum cleaning system. Bath rooms will be finished in tile. Entrance will be of marble and tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE ALTERATIONS—Frame construction, $10,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. This work will include the alteration of a two-story frame building, now arranged for flats, into a modern apartment house containing twelve two-room suites with baths and wall beds. There will be new interior trim, electric wiring, plumbing and plastering as well as considerable exterior alteration. Steam heating will be installed. Plans are complete and figures are being taken.

FLATS 2 story and base, frame, $4,000. San Francisco, Architect, O. E. Evans, 2367 Mission St., S. F. Owner, F. Schwenkler. The building will contain two flats of four and five rooms each, and will cover an area of 25x50 feet. Interir finish will be of pine and redwood with some oak floors. There will be either gas grates or open fire places. Mantels will be of tile. Tile will be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

FACTORY 5 story and base, reinforced concrete, $200,000. San Francisco. Architect, John Graham, Lyon Bldg., Seattle, Supervising Architect, W. J. Wood, 100 Van Ness Ave., S. F. Owners, Ford Motor Car Co. Supervising Architect W. J. Wood, of the Ford Motor Car Co., now located at 100 Van Ness avenue, will be ready abut January 1st to receive bids for two large freight elevators, the plumbing, automatic sprinkler system, electric fixtures and interior office finish for the new five-story and basement distributing plant which is to be erected on the west line of Harrison street between 21st and 22nd streets. A contract for all other parts of the work

except those above mentioned has been awarded to the Clinton Fireproofing Co. on their bid of $171,000. For a complete list of all other figures submitted on this work see under San Francisco in this issue.

FLATS—2 story and base, frame, $7,000. Oakland, Cal. Architect, J. W. Dolliver, Royal Insurance Bldg., S. F. Owner, E. B. Noegemann. The building has been arranged for four modern flats of three rooms and bath each. There will be wall beds. Interior finish will be of pine and redwood with some oak veneer. Entrance will be finished in marble and tile. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

CLUB HOUSE—2 story and base, frame, $20,000. Berkeley, Alameda Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Twentieth Century Club. The building will be erected on a corner lot and will be designed in the Mission style, with a red clay tile roof. The interior was been arranged for a number of large club rooms, and will be finished in pine, redwood and hardwoods. Hardwood floors will be used throughout. There will be a central heating system and open fire places with brick mantels. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will be out for figures shortly after the first of the year.

GARAGE—2 story and base frame, $4,000. Piedmont, Alameda Co., Cal. Architect, Edward R. Seeley, 255 California St., S. F. Owner, W. E. Creed. This building was been designed for a private garage and will contain a completely equipped garage in the first floor, two bed rooms, bath and kitchen in the upper floor. Interior finish will be of pine. A cement floor will be used on the first floor. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

SCHOOL—1 story, frame, $6,000. Hayward, Alameda Co., Cal. Architect, William Wilde, Albany Bldg., Oakland. Owners, Fairview School District. The building will contain two class rooms. Interior finish will be of pine throughout. Furnace heat will be instaled. The exterior of the building will be covered with rustic. Plans are complete and out for figures. Plans can be obtained from either the architect or from the Clerk of the School Board at Hayward.

GARBAGE INCINERATOR. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. The following bids were received by the City Trustees at their last meeting for the new garbage incinerator: Destructor Co., New York, $85,500; Universal Engineering Co., S. F., (1) $74,431; (2) $82,102, (3) $69,527; Dixon Engineering & Construction Co. Toledo, $65,000; Refuse Disposal Co. S. F. $61,250. All figures were taken under advisement.

STORE—1 story, brick, $3,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, John Miscovich. The building will be erected on Grove street near 81st and has been arranged for one store. Interior finish will be of pine. There will be plate glass display windows and some prism glass. The exterior will be covered with cement plaster. Plans are complete and figures are being taken.

STORES AND NICKELODEON—1 story, brick, $7,000. Berkeley, Alameda Co., Cal. Architect, Turner Dahnkin, Berkeley. Owner, F. E. Armstrong, 2249 Hearst Ave., Berkeley. The building has been designed to contain two stores besides the nickelodeon. Interior will be finished in pine and some ornamental plaster. Tile and marble will be used in the entrances. There will be patent store fronts. Metal lath and plaster partitions are to be used. The exterior will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

Base, reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Shattuck Hotel Co. Contractor, Arthur Arlett, 2133 Grant St., Berkeley. Note: This contract was been taken on the percentage basis.

SCHOOL—1 story and base, brick, $40,000. Redeo Contra Costa Co., Cal. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owners, Redeo School District. Plans of Architect Sexton have just been selected from a competition of local architects. The building will contain four class rooms. There will be furnace heat. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Working drawings will be completed as rapidly as possible and figures will be called shortly.

CITY HALL, 2 story, frame construction, $10,000. Larkspur, Marin Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, City of Larkspur. Plans of Architect Clausen submitted in competition with sixteen other architects have been accepted by the Board of Town Trustees. The building will contain the various city offices and space for the fire and police departments. Interior will be finished in pine and redwood. The exterior of the building will be covered with cement plaster. Plans will be completed at once and figures advertised.

RECTORY—2 story and base, frame, $10,000. Richmond, Contra Costa Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Roman Catholic Archbishop. The rectory will contain ten living rooms on the first and second floors and a large assembly and meeting room in the basement. Interior finish will be of pine and elm. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. There will be two baths, finished in tile. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, $3,500. Richmond, Contra Costa Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Tcherassy. The dwelling will contain seven rooms and bath. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are still in the preliminary stage.

RESIDENCE — 2 story and base, frame, $3,500. Richmond, Contra Costa Co. Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Burt G. Clark. The dwelling will contain six rooms, Bath and laundry. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot and tile will also be used in the kitchen. The exterior of the dwelling will probably be covered with cement plaster. Plans are being prepared.

RESIDENCE — 2 story and base, frame, $5,000. Richmond, Contra Costa Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, T. W. Mulfich. The dwelling is to be designed for a seven-room house with bath and laundry. Interior finish will be of pine, redwood and some hardwood veneer. There will be hardwood floors in the principal rooms. Furnace heat will be installed. Open fire places will be used with tile or brick mantels. Bath room will be finished in tile. The exterior of the house will be covered with cement plaster. Plans are still in the preliminary stage.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg. L. A. Owner, S. L. Weintraub. The building will cover an area of 50x90 feet and will contain 40 housekeeping rooms, lobby, [illegible] guest rooms. Suites will be arranged in two and three room apartments with [illegible] and connecting baths. There will be steam and [illegible] heating system. Bath room will have tile floors. Entrance will be finished in marble and tile. The [illegible] building will be faced with red pressed brick. Plans are complete and figures are now being taken on the work.

APARTMENT HOUSE—3 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, Taunton Flindall, Pacific Electric Bldg., L. A. Owner, Mrs. [illegible]

The apartment house is to occupy the corner of Fonnie Brae and Orange Streets, and has been designed to have columns effect. Composition will be hardpitch and of the corrugated concrete type. Floors were to be all cut for figures. Lowest figures being presented by Kline & Co. $8,000, of the Los Angeles Planing Mill, 325 Central avenue are to be taken to the plans and specifications and these two firms will be asked to submit new figures.

APARTMENT HOUSE—3 story and base brick. Cost not stated. Los Angeles, Cal. Architect, George M. Easton Los Angeles Investment Bldg., L. A. Owner, O. Wilson. The building will have a frontage of 47 feet and a depth of 108 feet. The first floor is to be arranged for two stores. The upper two floors will be divided into 56 rooms, which will be arranged for twenty apartments. There will be steam heat, wall beds, pine and oak wood trim and a hot water heater. Floors in the stores will be of cement. There will be patent store fronts. The exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who is taking figures on the work.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. W. Rice, California Bldg., L. A. Owner, Virgil V. Robertson. The building will be 45x125 feet and will contain 66 rooms, which will be arranged in suits of two and three rooms each. There will be connecting baths and wall beds. Entrance will be finished in marble and tile. Interior trim will be of pine. Bath rooms will have cement floors. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FACTORY GROUP—Reinforced concrete construction. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Bradford Baking Co. The present building, which is one story, 65x150 feet, will be increased to four stories in height. There will also be a two-story building, 74x45 feet, and a one-story structure triangular in shape, 165x120x200 feet. All the buildings will be of reinforced concrete, Class A construction, with plastered exterior finish, composition roofing, concrete floors, plate and wired glass, metal frames and sash, elevators, plumbing and electric wiring. Plans are complete and figures are being taken.

HOSPITAL—1 story and base, reinforced concrete. Cost not stated. Fullerton, Orange Co., Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital Association. This building will be 84x84 feet, with a wing 37x40 feet and will contain the emergency treatment rooms, nurses', eight private wards, operating room, kitchen and six baths. There will be hollow tile interior partitions and composition floors. Steam heat will be installed and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Roof will be of red clay tile. Plans are complete and bids are being taken.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Iosup. The main portion of the building will be 100x120 feet with a wing 40 feet. There will be four stories besides the office and roof lobby on the first floor. Upper floors have been arranged for two guest rooms. There will be steam heat, two elevators and a vacuum cleaning system. Metal windows, doors and frames will be used. Most of the rooms will have private baths. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

WHARF CONSTRUCTION—Reinforced concrete, to cost $150,000. Los Angeles, Cal. Harbor City Engineer, Los Angeles. Owners, City of Los Angeles, The Santa Fe Trust Company, 113 Liberty street, New York, are the lowest bidders, at $11,000 for the construction of 2,000 lineal feet of reinforced concrete wharf. Public Works of Los Angeles, Tacoma and received by the Board of Public Works were: Rasell Grave Engl Co., $117,150.00 and Stone & Land $50,763.00. The bids were opened by unit prices on the following estimated quantities: 120 piles of steel columns in place, 60 tons of steel reinforcing rod and mesh, 14,280 lineal feet of 12-inch reinforced concrete piles in place, 6,120 lineal feet of 16-inch reinforcing concrete piles in place (at a total of 20,400 lineal feet of reinforced concrete piles in place), 80 cubic yards of Class A concrete in place, 620 cubic yards of Class B concrete in place, 650 cubic yards of class C concrete in place, 60 additional piles driven and cut off, 20 tons of structural steel work, placed in concrete, 60 cubic yards of brick placed in concrete, 60 cubic yards of rock placed in concrete, 60 cubic yards of sand placed in concrete, 60 cubic yards of cement placed in concrete, 60 cubic yards of gravel placed in concrete, 60 cubic yards of broken stone

windows, metal frames and sash, elevators, steam heat, vacuum cleaning system, etc. A complete power plant will be installed. Plans will be complete about January 1st and figures will be called.

LOFTS—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect's name not given. Owners, Stephens Investment Co. The building is to be erected on the west side of Hill street near First. A contract for the excavating has been awarded to E. N. Girard. Further details will be given later.

Contracts Awarded.

IMPORTATION OF ARTICLES OF LUXURY.

Importation of luxuries into the United States is now running at the rate of $[illegible],000 a day. Of course the [illegible] is an elastic one and [illegible] determined, to some extent, by the viewpoint from which [illegible] but it is at least a fact that during the months of October, 1912, the importations included $11,000,000 worth of art works, $5,000,000 worth of tobacco, [illegible] smokers' materials; [illegible] on diamonds and other [illegible] $1,000,000 worth of [illegible] as over $1,000,000 [illegible] natural and artificial [illegible] than $1,000,000 worth of [illegible] over $1,000,000 worth of [illegible] $1,000,000 worth of Champagne, cordials, liquors, and other articles of this class; nearly $1,000,000 worth of cabinet woods, of which mahogany formed the principal part, and many other articles usually considered as luxuries, bringing the total imports of this class of materials for the month of October up to $32,000,000.

While the heavy importation of articles of this character naturally occurs during the closing months of the year, the figures of October are exceptionally large, probably the highest on record as regards importations of luxuries, this being the most considerable degree to the unprecedented importation of art works. The single item having amounted to practically $11,000,000 in the month of October, against $4,500,000 in October of last year, while for the ten months ended with October the total importation of art works was $49,000,000, against $18,500,000 in the corresponding months of 1911 and $14,000,000 in the corresponding months of 1910.

The figures for October and the ten months ended with [illegible] suggest that the imports of [illegible] which may fairly be classed as luxuries will probably aggregate $250,000,000 in the calendar year 1912. Of this sum art works will, according to the latest estimate of the statistical divisions of the Bureau of Foreign and Domestic Commerce, approximate $70,000,000; precious stones, between $40,000,000 and $50,000,000; laces and embroideries, between $40,000,000 and $50,000,000; cigars, cigarettes and other articles for use of smokers, between $40,000,000 and $50,000,000; and numerous other articles of less value, including toys, approximately $9,000,000; champagne, about $5,000,000; feathers, natural and artificial (chiefly ostrich feathers), about $10,000,000; beads and bead ornaments, $2,000,000; automobiles, $2,000,000, and perfumeries and cosmetics nearly $2,000,000.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS PRACTICE. Highest references. Send model, sketch or photo, for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents, What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. *Address,*

H. B. WILLSON & CO. Patent Attorneys
Box 239 Willson Bldg. WASHINGTON, D. C.

IRONWORKER BANKRUPT.

Bert Nichols, an ironworker of San Francisco and Turlock, filed a petition in bankruptcy Monday. He owes $1918, and has no assets.

CONTRACTOR'S BOND.

Dec. 13, 1912—HYDE nr Peralta Ave Oakland. Owner, Nora Batten; contractor, Zachary P Beachboard; surety, Massachusetts; bond, $1000.

CONSULTING EXPERT

Heating, Ventilating, Electrical Wiring, Plumbing, Etc.

Expert Architects assistant for laying out work as above. Highest references. Formerly Mechanical Engineer for State Department of Engineering also Bureau of Architecture of San Francisco.

Albert G. Wright Tel. Douglas 2841 445 Sheldon Bldg., S. F.

Editorial Comment.

"Hath not old custom made life more sweet," is a saying that is particularly felicitous at this season of the year. For the gospel of Christ was to preach good will toward men and the birth of the Savior at Jerusalem was heralded as a sign of peace on earth. Christmas among the Christian nations is therefore a period of general happiness and good cheer. When old differences are forgotten. When old friends are remembered. And generally when there are good things to eat and good things to drink and a general God speed to the departing year.

Religious customs hold longest and are most permanent. For they are grounded in the faith and longing of the race and take hold of the imagination and emotions of mankind. Good Saint Nicholas comes from our German ancestors. Back in the dawn of history when the grown ups were children in mind the patron saint was a real person. And today he still comes to the children laden with toys and presents that make Christmas time the most delightful of all the illusions of childhood.

All over the world is being remembered the birth date of the lowly Nazarene who afterward became a carpenter and builder. And perhaps from his occupation came many of his views of life and particularly much of his illustration and symbolism.

The hereafter of the metaphysical Hindoo is Nirvana, when the soul of the individual is absorbed into the primal essence. The Mohammedan looks forward to a voluptuous paradise. The old Greek's hereafter was the Elysian fields where the righteous found their happiness in the out-of-doors that was the perfection of the scenes that were present in the Isles of the Aegean sea.

But the vision of Saint John on the Isle of Patmos was a golden city where the faithful found happiness and rest.

Building is a constructive occupation. From his daily occupation the Savior was wont to draw his teachings and his parables. On its symbolism is erected many of the great moral truths of the scriptures. And so at this season of the year the "BUILDER" offers its best wishes to the members of the craft who follow the occupation that was honored by the Nazarene and extends the Season's greetings to all on the anniversary that marked the birth of the Savor 1912 years ago.

While the great irrigation projects of the west are attracting attention and the great dams that are being built in the mountains to conserve flood waters and develop power are attracting attention there are other small irrigation projects being put into operation by individual farmers. These in the aggregate amount to something. For with a subterranean water supply and cheap power the farmer is more independent when he has his own system than when he has to depend upon some other system or outside source.

And California is rich in power. The high Sierras are the roof of the continent and from their snowy summits come the life giving streams that furnish unlimited power and underflow the great valleys. And California also is rich in oil and its products. The gas engine is a common source of power on the farm and is used in a hundred different ways. Under these conditions wells are an ideal source of irrigation when the water supply is sufficient.

Now that the San Francisco Call was burned the hammer, the Examiner proposes to have a committee of one thousand appointed to formulate policies for the city and submit measures to the voters. Mayor Rolph is to appoint a committee of fifty and these fifty are to select the full one thousand. These are to be taken from every walk of life and are supposed to be ideal persons who will represent every department of the city's welfare.

According to the signed statement in yesterday's paper the Mayor is in accord with the movement. It will be interesting to see how long the big daily newspapers themselves will adhere to their resolutions.

The new management of the Call starts out to burn the hammer. The Examiner goes them one better and proposes the big committee. If the Examiner can shoulder the whole work and claim all the credit all will be well. If it don't there will no doubt be a knock. If we are to judge the future by the past the thing that needs reforming in San Francisco is the newspapers. Unless they shoulder any reform that anybody starts they immediately start a dissension. That has been Hearst's policy in the city and in the nation and the other papers have not been far behind him. So when the Examiner proposes a committee of one thousand and Mayor Rolph accepts the proposition the average citizen looks upon the proposition with some lack of confidence. As long as the Examiner is the high priest of the concern well and good. But let it exercise independence or go contrary to its wishes and it will be the same old rat by Mr. Hearst, the same old imbecilic editorials in big type that there was from the graft prosecution, the car strike, prize fighting and everything else. The committee of one thousand may be all right. But it is at least to be desired that a larger sense of civic duty and it needs better support from the character of newspapers that San Francisco has to-day.

THE WAY OF THE AIR.

The disappearance and death of the two aviators who left Los Angeles to go to San Francisco by hydroplane illustrates another still unsolved problem of flying that of finding the way. A compass apparently will not work on an aeroplane, on account of the iron in the engine, and there is therefore no way to find the way except by seeing. That is impossible over any considerable body of water, and it is impossible on land if there is a mist below. The trouble with these two boys seems to be that they simply lost their way. At one point, instead of heading up the coast they headed out to sea and disappeared in a fog. Then something happened, nobody knows what and they were never heard of again.

Flying looks easy. Doubtless it is easy until something happens. Then the next trip is made by somebody else. And always there is the new difficulty of knowing which direction is straight up and which way is straight ahead. The birds, somehow know. And man, somehow, has not yet found out. -Fresno Republican.

The Southern Pacific Company has issued a little booklet entitled "In The Trail of The Sunset." It is a fine example of the printer's art and is profusely illustrated with scenes to be found on the line of the Southern Pacific and the accommodations of the train de Luxe. It takes in the entire continent in a continuous story of travel and adventure and shows the wonderful extent of the Southern Pacific lines. Starting from the East it ends at the Golden Gate, which is the end of the trail and the story stops with the exclamation of the narrator that

"From sea to sea the train has run,
From rising to the setting sun"

The post office records show that $3000 was spent for stamps at Christmas time in one day in excess of any previous record. Also that 350,000 more letters were mailed than on any previous day at a like period. This is a good record and shows two things. First prosperity of the people and second increase of population. The post office records are always taken as an indication of population. Generally speaking the average person sends and receives about so many letters. So that outside of mail order merchandise houses the average person's mail is about the same. Hence a marked increase in mail means an increase of population and more than that the records of delivery show the actual increase in names.

The year 1913 promises to be the opening of a substantial increase in population on the western coast.

The California Conservation Commission under the recent authorization of the Legislature has been making special investigation into the water resources of the state. This has been done by cooperation with the United States Geological Survey and the result has been published by the United States Geological Survey in six volumes.

The greatest asset of the state is its water supply. Not only for power purposes but for irrigation and reclamation of arid lands. By the decisive and wise administration of Governor Johnson, the State Board of Control and the Railroad Commission have taken up this vital question and secured authentic information on all the water supplies of the state. Thus grabs of the valuable water sites have been prevented under misinformation and the state itself has a complete record the result of the investigation of competent engineers.

Captain Mooney of the Detective force announces that there is to be a shake up in his department.

The detective department certainly needs it. For there are a lot of detectives whose appointment was certainly not made because of their peculiar fitness. There are some whose minds move with about the rapidity of that of an ox and who are about as capable of detecting out a crime as a school boy. A shake up along the line and a selection for merit would materially increase the efficiency of the

---

The city is making a great fuss over burning the summer. That is all well and good only it is not a new discovery. Nor does there seem to be any demand for very much noise about it. The discussion that it seeks to spell was occasioned chiefly by the graft prosecution and there is only one way to settle that. Right is right and wrong is wrong whether it is committed by a board of Supervisors or by Patrick Calhoun. So long as people recognize wrong when it is committed and by some one outside of their own class there will always be some one who has the courage to attack them and it will be a sad day for any community when there are not any people of that kind.

But these differences are gradually dying out. It is well for all that they are. The Christmas festival and the street sprinkling ones again with appropriate good will. And one event in the hammer burning business is the absence of the fragement of the Call and its petty and intemperate attacks upon those who differed from it on political questions.

MUSEUM LECTURE.

This week's specialty offering, beginning Sunday, at the Affiliated College University Museum in San Francisco, is a collection from the aborigines of New York, the famous Iroquois Indians, who for centuries terrorized first their native neighbors and later the Dutch, French, and English settlers, and whose power was not broken for two hundred years.

While offering a larger resistance to the encroachment of Caucasian than any other Indians, they ranked high in the arts of peace and it is this little known side of their life that the Museum has moved, except for the week chiefly displays.

Belts of silver jewelry, baskets, calfes and stones demonstrate the importance and exceptionally high position of women among them. Flutes, rattles and ceremonial masks illustrate the influence of religion which bore no traces of such savage cruelty as we. Their proficiency in fighting would be unsuspected from the display, were it not for a rare old war club, of interest as the original prototype of the tomahawk.

The lecture on the Ancient Mexicans will be given for the last time at three o'clock on Sunday.

A SWAMP REVERIE.

This is written on the train, crossing the peat bogs of the lower Sacramento, better known as the Suisun marsh. The land is practically uninhabited. Its principal products are tules, which no one harvests, and wild ducks, which are preserved for the game clubs. For the most part, it is simply a stagnant and noisome advertisement of the failure of California to utilize one of its richest natural resources.

This is the sort of country that nature made Holland. But the reclamation of Holland was already ancient tradition, a thousand years ago. In fact, some parts of Holland were farmed in the twelfth century which are now under water and are just in process of being again reclaimed. On such marsh lands as these, Holland raises rich crops of food, and supplies the world with flower bulbs. In such a land as this, Holland developed the best cows and the best draft horses in the world. To protect such a land as this, Holland has actually carried the granite from Norway, to face its sand dunes and clay flats with an artificially rock-bound coast. To reclaim such land as this, Holland was made a forest of windmills, and now a popping griddle of gas engines, draining the polter-fields upward into the canals, and running these uphill into the "bosoms," inundating some land for the use of the rest. On such a country—and on no more of it than we have now lying empty—Holland supports a population of more than five million happy and prosperous people. Out of the problems of such a land, Holland has developed one of the most remarkable national characters and lived one of the most remarkable histories in the world. Out of the inspiration of the flats and swamps, Holland developed an art which taught the world the beauty of ugliness and the nobility of the commonplace. In Holland was developed the patriotism of drainage, the heroism of dykes, and the courtly grace of wooden shoes. Farming became poetry in Holland, when a whole stolid nation went daft over tulips. Scrubbing is a fanaticism in Holland, and cleanliness superior to godliness, for such is the reaction of the human soul to an enviornment of mud. The scrub-women of Holland have inspired the pens of poets, and demonstrated for all time man's superiority to the pig. These are the things, material and spiritual, which the Dutch have dykel from the sea and raised from the swamps.

As to Holland, this is history. You can read it in a book, or go on a ship, to see it. As to California, it is a dream of the future, a realization to be reached only on the wings of the imagination. But, except that its date is from the twentieth century to the thirtieth, instead of from the tenth to the twentieth, the reality of the dream is as certain as the truth of the history. Fresno Republican.

Steel In Building Work. Some Facts and Figures Concerning This Important Subject.

By J. R. Grant, As. M. Can. So. C. E.

(From the Architect. Builder and Engineer.)

An engineer who was to present a paper on "Steel in Public Buildings Construction," before a society in Philadelphia, was told when he arrived at the society rooms that some of the members expected him to speak on "Graft in Connection with Public Buildings."

In introducing his subject he mentioned this mistake, and made some of those present indignant by saying that he could tell them nothing about that kind of steel.

The commercial term "steel" includes widely different materials, as every demand for new properties has been met by a new product, and these have been produced in such rapid succession that the last few years in the history of metallurgy read like a fairy tale.

Many of these products as the alloy steel for automobiles, are of great interest, but none have been of greater value to mankind than structural steel. As accepted by the best authorities, structural steel for buildings is a low carbon product. This is not injured by the punching and shearing required for fabrication as a high carbon steel.

Only two things are necessary in the design of steel structures. The first is to properly design the steel for the work it has to do; the second is to properly design the steel so that the necessary work can be done in fabrication and erection, and that at a minimum cost.

The first unit to be considered in a design, is the beam. Where the load is a uniform one, the handbooks published by the different steel companies give the size required. These tables assume that the top flange of beams, and that both the top and bottom flanges of channels, are supported laterally. If this is not the case the values should be reduced as for long and slender columns. Care should be taken to select a beam of sufficient depth to avoid excessive deflection. If the span is unusually short, the beam may be weak, due to the excessive horizontal shear. This is more apt to be the case with the light wide-flanged beams placed on the market the last few years, than the old standard sections. If the beam rests on a bracket or wall plate, a section with a thicker web may be required to prevent the web buckling over the support.

When the span is short, a beam is apt to receive its greatest stress from the concentrated loads, such as safes, usually found in an office building. Where square panels are used, one-quarter of the load of a panel is carried on each beam, but it is not applied uniformly, but increases from the support to the center. If considered as a uniform load, the beam would be 33 per cent light.

In rectangular panels with intermediate beams, it is usually economy to use three beams per panel, as this reduces the size of the girders.

For rolled beams, the shop work is usually a very small item. Sometimes the cost is unnecessarily increased by using more than one size of holes in the same beam, which means that the beam must be handled twice.

Although it is a departure from my subject, I wish to call attention to faults often found in timber designs. Douglas fir is strong in resisting tensile and compressive stresses applied with the grain, but is weak in its resistance to crushing across the grain, and to shearing with the grain. Timber beams although of sufficient strength to resist the bending stresses, are often dangerously weak, due to the excessive horizontal shear. They should not be of greater depth than about one-tenth of the span unless this horizontal shear has been considered. Beams should have sufficient bearing area to prevent crushing the fibers. I have seen columns on which beams rested directly cut nearly two inches into the beam before the load was reduced to a point of safety. Using a fir corbel with grain horizontal does not help, as the crushing is simply transferred to the corbel.

Timber trusses are often very weak on account of the difficulty of transferring the stresses from the diagonals to the chords. Bolts bearing on the side grain of timber are of very little value as they soon crush into the fiber of the wood.

Built girders should be used instead of the heavier sections of I beams. Part of the strength of steel shapes depends on the work done on the material in rolling. With angles and plates this work is uniform throughout the whole section, but with beams the web is practically the only part of the section on which work is really done, the angle is produced largely by crowding the metal in the flange grooves of the rolls. This is only partly overcome by the new Grey roll, which does some work on top and bottom of the beam.

Tests made of pieces cut from the web and flange of the same beam show that the metal of the web is considerably stronger than that of the flange. Internal stresses set up in the beam while cooling, due to the different thickness of metal in web and flange, also tend to reduce the theoretical strength of the beam. This is particularly the case with large and heavy beams.

The built girder being composed of plates and angles is a more reliable product.

It is necessary in considering the design of a girder to have the different parts so proportioned that they will act as one piece. To accomplish this it is necessary to have a sufficient number of rivets connecting the web and flange angles to properly transfer the increment of flange stress from the material forming the the flanges to the web. It is not sufficient to develop the full flange area between the end and center of the girder, as the amount of stress transferred is not uniform throughout this distance, for even with a uniformly loaded girder seventy-four per cent of the flange area is required before reaching the quarter points.

A few years ago I had to revise a design for a building having some girders of 40-foot span, carrying a uniform load of about sixty-eight hundred pounds per foot of span.

The flanges were sufficient to carry all the bending stresses, and the web was heavier than was required for the shearing stresses, but it was not possible to get a sufficient number of rivets through the vertical legs of the angles and the web to develop the proportion of flange required in the first six to ten feet of the girder.

The trouble was overcome by using 14-inch cover plates and 16X6-inch Ls, allowing two rows of rivets through the vertical leg. The increase in the weight of the girder was less than 1 per cent.

A few years ago I had to revise a design made by a firm of engineers from the United States of a steel frame for a building in Canada. The change in column spacing above the ground floor in the front of the building necessitated large girders at the second floor. These girders were the best example of faulty design I have ever seen.

Although the girders had a span of about 30 feet, the point of maximum moment was only 7 feet from one support, on account of the 4-inch leg of the 6X4-inch L being vertical it was only possible to use sufficient rivets through the angles and the web to develop more than two-thirds of the flange area. Neither was it possible to develop the cover plates in the space allowed.

One web and one pair of angles of these girders were made continuous over the four points of support, the eccentricity thus introduced gave excessive stresses in one half of the girders and also in the reider supporting columns.

I could not get the man who designed this work to give any good reason why he had used a box girder in this place and I am certain no one else could. Every condition called for a girder with a single web. It meant a saving of material of over 1,000 each, 30% less work in fabrication and efficient details and connections. Of course, it was necessary to use flange angles with 6 in. vertical legs in order to have sufficient rivets to develope the flange.

In designing plate girders it is not always sufficient to have enough rivets in the web to take care of the shearing stresses. This is apt to give too thin a web, particularly for long deep girders. The web should be [illegible] to give the necessary bearing area for

the flange rivets, and for good design it should not be less than 1/60 the depth. Sometimes it is economy to use a web of greater thickness, and so avoid the need of stiffening, which reduces the work required to fabricate, but usually increases the weight. When it is necessary to splice the web of a girder, wide plates should be riveted on each side, and enough rivets used to develop the strength of the plate in bending.

The top flange of a girder should be supported latterly to prevent the tendency to buckle which gives an increased stress to certain portions of the material. It is sometimes economy to use large angles and no cover plates as the saving in cost of fabrication may more than offset the extra material required.

Wide plates are not always true to width, or the edges perfectly straight. This sometimes means expensive clipping of the webs of plate girders. Where the depth back to back of flange angles has not been made greater than the width of the web plate, it is best to allow from one-quarter to one-half inch, in this distance.

Holes of different size in the same piece of material always means increased cost, and the larger the piece the greater this increase will be. I know of the steel from a building that was designed by an engineer who was unacquainted with the methods of handling material in the shops. In some large box girders as laid called for open holes through the webs for tying in pending to be ⅝ inch. The rivets were all ¾ inch, requiring 13-16 inch holes. In estimating on this work the company that secured the contract added 5c per 100 lbs. for the increased cost of handling due to these holes being of different sizes, which amounted to about $800. Before proceeding with the work the contractors engineer asked permission to make these holes all 13-16 inch. As it did not in any way influence the strength, the permission was granted, but the owner did not get the $800.

The weakest link in modern fireproof building construction is the column. In beams and girders the factor of uncertainty usually increases the factor of safety. The continuous action at supports and the arch action tend to reduce the stresses in the floor members. These actions in the floor members only make conditions worse, for the column, by changing the distribution of load between the columns and introducing a certain amount of bending.

The greatest source of weakness in columns is the eccentric applications of the loads. This should always be considered and provided for, but it is not always done even in steel designs, while with reinforced concrete it is usually neglected.

One man who has designed considerable reinforced concrete work told me that he considered there were no eccentric stresses in reinforced concrete columns, and to prove his statement gave the example of one of a row of columns being destroyed by a derailed car and the upper portion of the column being suspended from the floor until wooden supports were put in place. Of course, "like the flowers that bloom in the spring" it has nothing to do with the case. Any column on which the loads are not symmetrically applied has to withstand the bending stresses due to this eccentricity.

For very large buildings, or where the loads are very great, the box column composed of two channels and two or more cover plates, or four angles and four or more cover plates, is the most economical section, for most buildings up to twelve or fourteen stories the H section composed of plates and angles is the best to adopt. The rolled H section is sometimes used, but although sometimes cheaper, the material is not as good as the built member.

The connections for beams and girders are also more expensive than with the H column, so that of late years it has had a very small place in building construction.

A column section which was very popular for bridges and buildings from twenty to thirty years ago, was the Phoenix column. It was an efficient section, but it was impossible to get good connections for the floor members at a reasonable cost. Being the product of only one rolling mill, the lack of competition in the price limited its use as it is today it is practically not on the market.

Other columns of special sections have been used to a small extent, but the tendency has been to eliminate all but the standard sections and simple forms. This has been clearly due to the reduction in the price of steel, and the increase in the cost of labor used in fabrication. The standard shapes, particularly the plates and angles can be obtained with less delay from the rolling mills and time of delivery is often a most important factor in building construction.

The use of standard shapes does not necessarily mean clumsy column design.

When the designer was told that this introduced a big stress in the column due to bending he said the stiffness of the girder would take care of that entirely neglecting the fact that the column was there to carry the girder and not the girder the column.

The bending of the girder due to its load inclined to carry the columns in the same direction as the eccentricity of the load to the girder itself, so that the stresses in both the girder and the column were increased.

The usual connection to sections of this description is the cost due to the extra time required to punch the material and rivet to the section.

The cost of the cast iron base required to distribute the column load over the masonry footing is also unnecessary.

The connections of the floor beams and girders to the columns should receive careful consideration as the stiffness of the building, if less than non-yielding, usually depends upon these joints. These connections, many building specifications call for the connection between beams and columns being made by angles riveted on each side of the web of the beam in the shop and to the field riveted to the column. This is the method always adopted when one beam frames into another and for this case the connection angles have been standardized so that the shop cost is small, for all cases it is the standard efficient connection for the beam.

When the beam frames into a column it is not often possible to set the standard connection angles on account of the spacing of the rivet holes in the outstanding legs of the angles not being the same as required to fit the section of the column. As the column sections change for different tiers, these angles would change, making beams which would otherwise be alike, different. And the way to get cheap steel work is to make not only the section, but also the details so as to allow as great a duplication as possible.

The column bracket has been produced to give economy in spite of using a greater weight of material. It gives a considerable reduction in the cost of erection as it greatly reduces the number of field rivets and erection bolts required. It reduces the amount of shop work required on the beams and allows for greater duplication.

Column brackets for the smaller beams consist of a single angle riveted to the face of the column, but for the larger beams one or two stiffer angles are fitted to the under side of the seat angle, with the outstanding legs under the wet of the beam.

For all beams resting on column brackets, top angles must be provided tying the top flange into the column. As these top angles are usually shipped loose or only bolted to the column they are sometimes misplaced or lost, the inspector should see that they are replaced and riveted before he passes the work, as they are very necessary for the stiffness of the building.

When the center line of the beam does not coincide with the axis of the column the eccentric connection required should be carefully figured.

If the load on this bracket was centrally applied, the bracket would be good for sixty-three thousand pounds but with twelve inches eccentricity it is only good for twenty-one thousand pounds. Or only 33% of the value of the rivets being required for the vertical component or the direct load, the balance resisting the torsional component due to the eccentricity. These connections should all be figured from the Polar moment of inertia of the Rivet Group. This connection is for a beam not over 12 inches deep. For a large beam stiffer angles would have to be used under the beam.

Sometimes the eccentric connections are left for the company furnishing the steel to design. This should not be, for often the detail is determined by nothing but a guess, and as the guess is usually made by an experienced draftsman, the result is apt to be a weak spot in the frame work.

When it is necessary to splice a very light column, it is best to use sufficient rivets to take care of the whole load as this saves the expense of milling or planing the ends. For heavy columns, it is best to mill the ends to give a true bearing of the different pieces, and use splice plates with only sufficient rivets to take care of the bending, and hold the members true to line. If the metal in the one section does not come directly over that in the other, it is necessary to use a bearing plate between the sections. All the pieces forming the section of a column should be the same length or it will not be possible to mill the ends after the member is assembled.

I have been building columns composed of four I beams arranged in

shape of a box with the flanges of two of the beams projecting. This is the poorest column section I have ever seen. I can imagine no other excuse for using it than the possession of the material for which one could find no other use. In place of milling the ends of this section so as to transfer the stress from tier to tier, the outer beams were cut back a couple of feet so as to form a lap joint, and splice plates riveted to the lower section. This gave a very difficult and expensive piece of erection, and when erected the two halfs of the section did not come to a true bearing, but in places sheet metal was driven in between the two surfaces. The ends of the different pieces forming the section had been milled or finished before the columns were assembled, but this is practically of no value. To be effective for end bearing, the milling must be done after the section is assembled and riveted together, and this can only be done when the ends are on one plane, and this plane must be perpendicular to the axis of the member.

The influence of the wind forces should be considered in column design, but it is not often necessary to increase the sections above those required for the dead and live load stresses, unless the building is very narrow or over twelve stories high, unless it be in the first or ground floor tier, where it is usually better to add the necessary material to the columns rather than use brackets or kneebraces, which would interfere with the architectural treatment.

Where special wind bracing is necessary, there are two methods that can be adopted, either of which will give the necessary stiffness. The most direct means is by the use of diagonal bracing such as was used for the Singer Tower, New York city. In this case each of the four corner panels is braced on all four sides. The bracing was arranged in alternate panels of shallow and deep diagonals so as to allow for windows and doors; diagonals were also used on the closed faces of the elevator shafts. One of the reasons why this was an economical arrangement for this building was that the panels were very small, being only twelve feet square. The tower is 60 feet square, so that large window openings are obtained in the three center 12 foot bays.

The most common method of stiffening a building to take care of the wind forces is by means of horizontal wind girders, and brackets or kneebraces. Unless the kneebraces are run up half the story height this method gives bending stresses in the columns, but for buildings of ordinary height, this bending can be easily taken care of.

This method was adopted for the Metropolitan Life Building, New York city, the tower of which is 75 feet by 85 feet, is 48 stories high. The exterior faces alone are braced at the corner columns with kneebraces half a story high, at the center columns, with brackets having solid webs 8 feet 6 inches deep, including the wind girder. A the panel lengths were very long this was the best system to adopt.

In the Woolworth Building, the steel work for which has just been completed, there is a tower about 85 feet square, and 55 stories high. For bracing they have used different systems for different floors, and different faces, using diagonal or X bracing, brackets kneebraces or curved plate girder portal bracing depending upon which best suited the architectural features. The curved plate girder portal bracing is usually too expensive to receive much consideration.

For mill buildings and similar structures where a wide open space is obtained by using steel columns and trusses. The wind forces are usually taken care of by kneebraces and bending in the columns.

For an armory or rink roof, where the span is great, and the appearance is a consideration, it is best to use a steel arch, and carry the wind forces directly to the foundation by means of the arch truss.

The efficiency of kneebraces and diagonals is sometimes very low on account of poor connections.

Where it is desirable to obtain a clear open space on one of the lower stories of a high building, where the width is fifty feet or greater, it is often best to use trusses the depth of one floor, rather than shallow plate girders. The deflection is less, and the web members can be so arranged so as to leave good openings for doors and corridors. The trusses are lighter and very much easier to handle and erect than the heavy girders usually required.

In the design of trusses for buildings it is usually necessary to proportion the chords for the load from the floor, carried between panel points as well as the direct stress of compression or tension. If the outline of the truss is not the proper one for the location, the area required to resist the secondary stresses may be larger than that required for the direct load.

The top chord of the truss usually consists of two channels and a cover plate, the lower side being latticed. The channels should always be turned with the flanges out standing. The cost of driving the rivets connecting the channel and cover plate is excessive if the flanges are turned in.

The web members should be made as narrow as possible in order not to use up too much of the floor space with the partitions, but it is absolutely necessary to fireproof every member of the trusses.

Very close inspection of the work in the field is required for trusses. The inspector must see that milled ends come to true bearing, and that all rivets are properly driven so as to fill the holes and grip the pieces connected firmly together.

During the erection of the steel frame, it is important to see that everything is plumb before the riveting of the beams, girders and columns splices is done. The neglect of this point even in a couple of tiers may lead to trouble in the elevator shafts.

Before allowing any of the steel work to be covered, the inspector should see that all rivets are driven. Loose rivets are of no value and should be cut out and redriven. If a rivet can not be driven a bolt should be substituted having a perfect driving fit in a reamed hole.

If the building is going to be a fireproof one, careful attention should be given to this point, particularly for the columns. To wrap the columns with wire mesh or expanded metal and incase in concrete, is the best method. The floor space taken up by the fireproofing is a minimum, and the fireproofing besides being able to withstand the action of the fire, is able to resist a strong stream of water such as thrown by the high pressure systems which cities are apt to install.

Plaster block is the most easily applied, but it uses up a large portion of the floor space, and it is not practicable to so anchor it to the columns so as to prevent its being loosened or knocked out of place, thus exposing the column to the heat of a fire with the chance of the destruction of the whole building.

For columns it is best to use a cast iron base or if the load is large cast steel may be cheaper. These should be designed for the loads they have to carry, and a factor of safety used to allow for the defects which are always present in cast material.

The design should be such that with the necessary strength the pattern is a simple one, and not difficult to cast in the foundry. Duplication is one of the greatest factors in reducing the price of castings.

For high buildings not built on a rock, the most important point is the foundation. It is not alone the safe bearing capacity of the material which has to be considered, but it is necessary to have the load per square foot uniform so that the settlement which is always present may be the same for all the columns.

The bearing capacity of the soil should be reduced to the dead load equivalent for the column having the largest proportion of live to dead load, and all footings should be proportioned for the dead load only, at this value. If the footings are properly proportioned, cracks are very apt to occur due to unequal settlement.

HOW TO LAY CEMENT PIPE.

Correct Methods Explained for Placing Drain and Sewer Tile so as to Insure Satisfactory Service.

Many failures in cement pipe are merely the result of carelessness in laying, and not attributable to inherent weakness in the pipes themselves, says M. Bazin in **Nouvelles Annales de la Construction.**

Assuming, for purpose of discussion, a common type of pipe section with male and female ends, the joints being a simple one with two vertical faces connected by a 45 degree bevel, the female end of the section should always be laid in the direction of the digging. After the first section is laid and properly supported, the male end of the second section should then be brought adjacent to the female end of the first, and supported at that end on a template of some sort. A particularly desirable form is one that serves both as a support and also as a guide to the beveled portion of the male end. The lower end is then brought to the desired grade by tamping earth in small quantities beneath its section. The exact method of procedure followed from this point depends upon the type of joint employed on the work.

With the two ends supported, it is then necessary to provide a uniformly solid support beneath the entire section. An important element in the

success of the part of the work is the size of the hitch, which should be of working room either side of the pipe. In placing the back-fill, small quantities of earth should be used and thoroughly tamped before additional filling is placed. The employment of a circular section greatly facilitates this part of the work. A pipe of equivalent section, with a flat base will require a wider hitch and much additional labor in order to secure results equal to those that may be obtained with the circular section. This difficulty is however, sometimes obviated by prepacking a bed for the pipe section before laying it, but this method is expensive and as frequently proven rather unsatisfactory. It is also to be noted that the flat section, while no stronger, is heavier and more difficult to handle than the circular one.

In the matter of the quality of the back-fill, where it is possible to do so, and particularly where the quality of the ground is not uniform, the use of lean concrete, of about 1 part by weight of Lag cement and 12 parts of coarse sand has proven very satisfactory. Where this is used, the common practice has been either to enclose the pipe completely or else bring the concrete up to the level of the center line. Such treatment materially adds to the resistance of the pipe line to fracture from outside cause. However, the main factor is to secure uniform support; and when pipe is laid in solid ground, and the back-fill is thoroughly tamped to a height of about 6 inches above the top of the pipe, little difficulty should be experienced from breakage due to ordinary loading.

Cement pipes of elliptical or egg-shaped section have been used to some extent. They cost more to manufacture and have proved less strong and more difficult to handle than those of circular section but for certain purposes notably in the case of sewers they possess superior hydraulic properties.

In sealing the joints between the pipe sections, the simplest case is that of the pipe used to conduct water under no head and where slight leakage in the line is of no importance. With these conditions a mortar made of 1 part by weight of cement and 2 parts by weight of fine sand is placed in the female section of the joint, pressure being applied from the bottom. In this way the mortar is uniformly distributed over the joint, and it is then pointed up inside and out with a trowel. If the pipe section does not permit of entering a screed covered with felt is used in the inside of the pipe to remove any excess mortar.

When it is desired to secure a water-tight joint between such pipes, a cement collar or strap is ordinarily applied. When this is used, it is sometimes placed before the back-fill is started, and is backed up with rock and bricks. Another method is to thoroughly tamp the back-fill in place, leaving an annular space about the joint by the use of a sectional wooden collar around the pipe, which is removed and the space then grouted with a rich cement grout.

A third, and according to M. Bazin, the most efficient method of securing a tight joint, is to use of a cement collar with an annular space between it and the pipe. The collar is from 6 to 8 inches wide, and the annular space varies from ¾ to ⅝ inch. This space is filled with grout through a hole in the collar left for that purpose. These collars are frequently reinforced at a slight increase in the cost, and, when thus placed, they materially add to the stability of the line and have proven quite satisfactory.

UNITED STATES CIVIL-SERVICE EXAMINATION.

TARIFF CLERK (MALE).

January 22, 1913.

The United States Civil Service Commission announces an open competitive examination for traffic clerk, for men only, on January 22,1913. From the register of eligibles resulting from this examination certification will be made to fill vacancies as they may occur in this position, at $1,200 per annum, in the Interstate Commerce Commission, Washington, D. C., and vacancies as they may occur in positions requiring similiar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

Competitors will be examined in the following subjects, which will have the relative weights indicated.

Subjects.	Weights.
1. Spelling (twenty words of more than average difficulty)	6
2. Arithmetic (fundamental rules, fractions, percentage, interest, discount, analysis, and statement of simple accounts)	15
3. Penmanship (the legibility, rapidity, neatness, general appearance, etc., of the competitor's handwriting in the subject of report writing)	9
4. Report writing (test in writing in letter form a report not more than 200 words in length, summarizing and arranging in logical order a series of facts included in a given statement of 400 or 500 words)	15
5. Copying and correcting manuscript (test in making a smooth, corrected copy of a draft of manuscript which includes erasures, misspelled words, errors in syntax, etc.)	9
6. Geography and civil government of the United States	6
7. Training and experience in tariff and rate departments of railroads	40
Total	100

Applicants must show that they are thoroughly conversant with the intricacies of the variour railroad freight classifications, tariffs, and divisions, or passenger tariffs and divisions, and circulars pertaining to rates charged for transportation. Separate registers will be established as a result of this examination for freight-tariff clerks and for passenger-tariff clerks.

Competitors who fail to receive an average percentage of at least 70 on the first six subjects of the examination combined with the relative weights indicated above will not be eligible for appointment, and the subject of training and experience will not be rated.

Statements as to training, experience, and fitness are accepted subject to verification.

Age, 18 years or over on the date of the examination.

This examination may be taken at any place where held regardless of the applicant's place of residence, but under an act of Congress only those persons who are examined in the State in which they reside, and who have been actually domiciled in such State for at least one year previous to the date of the examination, will be eligible for appointment to a position in the apportioned service in Washington, D. C.

This examination is open to all men who are citizens of or owe allegiance to the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply to the United States Civil Service Commission, Washington, D. C., for Form 1312. No application will be accepted unless properly executed and filed with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used.

As examination papers are shipped direct from the Commission to the place of examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

DANGER IN WATER SUPPLY.

Over a large pant of the country streams and rivers form the most available source of water supply, and in thinly settled regions they are usualy free from contamination, although even here a tan bark plant or sawmill may lessen the desirability of the water for domestic uses.

Mines, especially coal mines, may likewise discharge into streams their drainage of acid and otherwise polluted waters with similar effect, but the most common soudce of pollution is the sewerage from towns and cities. In fact, practically all of the larger streams become gradually purified and ones are highly polluted by such sewage or by refuse from various manufacturing plants. It is true that such streams become gradually pudified and under ordiaary conditions may be fairly safe, but the periodic outbreaks of typhoid fever that occur among the users of their water are sufficient to indicate the imperfect nature of this purification.

Large cities without other acessible sources will doubtlessly continue to use river waters, but these waters are now, as a rule, sceitlaificnlUlrsretaoin now, as a rule, scientifically filtered before distribution. On most farms however, other and safer sources are available, and stream waters that are known to have received drainage or sewage from any source should not be used for drinking.

Many facts regarding suburban and farm water supplies are discussed in Bulletin 255 of the United States Geologicial Survey, which has just been reprinted and can now be had on application to the Director of the Survey, Washington, D. C.

Plans Wanted.

A schedule, according to the requirements of the American Institute of Architects, has been arranged for the competition which is to be held to secure plans and specifications for the new County Hospital buildings for Alameda County. Architect Henry H. Meyers, Kohl Bldg., San Francisco, has been appointed Advisory Arachitect, and he, together with the members of the Building Committee, have completed the requirements of the schedule. It is the intention of the committee to secure a building or group of buildings second to none in the country and which will be an architectural attraction. Bonds will shortly be voted on to defray the cost of construction, and it is hoped to raise at least a million dollars. Competitive plans for this work are to be opened on April 10th, 1913. Complete information can be secured from Architect Meyers.

After over a year's controversy the school situation in Sacramento County appears no nearer a settlement than before. Mr. Whitton, of Willis Polk & Co., has been appointed Advisory Architect and is endeavoring to have the Board call for plans on at least one of the new buildings. Last year's bond election gave the City of Sacramento over $800,000 with which to construct several new school buildings. In the neighborhood of $200,000 of this sum is now available, but plans have not been called for on even one of the buildings. The selection of Mr. Whitton will undoubtedly hasten this part of the work. It is the understood intention of the Board of Educaion to construct buildings of 18 class rooms, and in the districts where this number of rooms are not required at the present to have the building so designed that it can be made a unit of the completed building. It is reported that an additional $400,000 will be required to carry out this program.

Interest in the construction of a new court house and jail for Yolo County has been revived again. Sometime ago a bond election was submitted to the voters calling for $50,000 worth of bonds for the construction of a new County building, but this was defeated by the large business interests, which regared this amount as excessive. A compromise has been reached by which it is understood these interests will lend their support to an election for a $250,000 bond issue. An election will probably be called for shortly. Funds for the construction of a new jail building, which will be separate from the County Court House, will probably be raised by special tax. No definite steps have yet been taken with either of these measures. Due notice will be given out as to these projects progress.

A competition will shortly be called for to secure plans for a new building to replace the school house destroyed by fire some months ago at Menlo Park, San Mateo County, between $15,000 and $20,000 will be available for this construction. Insurance money together with an additional sum raised by a bond election will be used for the construction. Full particulars of this work can be secured by addressing County Superintendent of Schools Roy Cloud, Redwood City.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base, Class C construction, $50,000. Architect, August Nordin, Mills Bldg., S. F. Owner's name withheld. The building will be erected on Broadway, near Laguna street, and has been arranged for 100 guest rooms, which will be arranged in suites of three and four rooms each. There will be private baths, wall beds and elevator service. Interior will be finished in pine and redwood with some hardwood. Steam heat will be installed. There will be a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are still in the preliminary stage and working drawings will not be completed for some weeks.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, $25,000. Architect, A. W. Smith, 1007 Broadway, Oakland. Owner, W. B. Rinehart. The building will be arranged for 24 apartments of the two and three room type. All apartments will have wall beds and connecting bath rooms. There will be furnace heat. Interior finish will be of pine and redwood with some oak floors. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL. Apartment house, 5 story and base. Class B construction. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Julius Smith. The building will be an addition to a present five-story apartment house on an adjacent lot, and will cover an area of 100x80 feet. There will be a total of 85 guest rooms, which will be arranged in two and three room suites with baths. There will be steam heat, vacuum cleaning system and elevato, service. The first floor will contain lobby, ladies' parlor and storage space. Interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

VANCOUVER, B. C. — Apartment house, 6 story and base brick and steel, $100,000. Architect, Emil Guenther, Norta West Trust Bldg., Vancouver. Owner, T. Scott. The building will cover an area of 66x142 feet, and is to be arranged for 96 large apartments. There will be wall and disappearing beds, connecting baths, steam heat, vacuum cleaning system and elevator service. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick on two street frontages. Plans are nearly complete and figures will be called for at once.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architects, Stingluff & Ena, Security Bldg., L. A. Owner, Ward Dawson. The building is to be arranged for 56 rooms, which will be divided into two and three room suites with private baths. There will be pine and hardwood trim, marble and tile entrance, steam heat, wall beds, an automatic electric elevator and a vacuum cleaning system. Besides the 56 rooms there will be a large lobby, ladies parlor and amusement room. The exterior of the building will be faced with pressed brick. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, W. J. Sircy, I. W. Hellman Bldg., L. A. Owner, Jessie F Warwick. Contractor, W. J. Sircy, I. W. Hellman Bldg., L. A. Contract price not stated.

LOS ANGELES, CAL. — Apartment house, 3 story and base, frame, $28,000. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. E. H. Schuster. Contractors, May & Grinwood, Security Bldg., L. A. Contract price, $28,000.

BATH HOUSES.

SAN FRANCISCO—Bath house, 1 story and base, reinforced concrete, $13,389. Architect, Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Park Commissioners at their last meeting show Carnahan & Mulford low at $13,389. No action on the award has been taken. For a complete list of all figures presented see under San Francisco in this issue.

BRIDGES, DAMS AND HARBOR WORK.

Contracts Awarded.

MADERA, MADERA CO., CAL.—Bridge, steel and concrete, $5,549. Engineer, County Engineer, Madera. Owners, Madera County. Contractors, Wilson & Fossler Construction Co., Madera. Contract price, $5,549. Note: The bridge will be 300 feet long, 18

feet wide and erected on reinforced concrete piles.

HERMOSA BEACH, LOS ANGELES CO., CAL. Wharf, reinforced concrete, $56,200. Lindley, City Engineer. Hermosa Beach Citizens, City of Hermosa Beach. Contractors, Metcream Bridge and Construction Co., Pacific Electric Bldg., L. A. Contract price, $56,200.

—CHURCHES—

LOS ANGELES, CAL.—Church, Class A construction. Cost not stated. Architect, Leon C. Smith, H. W. Hellman Bldg., L. A. Owners, Fourth Church of Christ Scientist. The new building will occupy the site of the former edifice and the old buildings are now being removed. There will be a complete steel frame with exterior walls of reinforced concrete faced with terra cotta and stone. Construction will be fireproof throughout. The interior will be handsomely finished. There will be a central heating system. No description of the work has been issued by the architect. Mr. Smith states that the construction of the building will be started early in January.

Contracts Awarded.

INGLEWOOD, LOS ANGELES CO., CAL. Church, 1 story and base, brick and concrete, $35,000. Architects, Fleming & Martin, Slavin Bldg., Pasadena. Owners, Episcopal Congregation. Contractor, R. S. Martin, 507 North Magnolia Ave., Alhambra, general construction, $17,100. Smith & Stewart, Los Angeles, artificial stone work, $1,842. E. P. Hulse, 137 Rose St., L. A., heating and ventilating, $1,-194.

FACTORIES & WAREHOUSES.

SAN FRANCISCO. Factory, 5 stories and base, reinforced concrete, $125,000. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Gantner & Mattern, Co. The work has been mentioned once before when the architect was first commissioned to prepare plans. Working drawings are now complete and figures are being taken. The building will cover an area of 136x160 feet. Construction will be practically fireproof. There will be metal window sash and frames, fireproof doors and an automatic sprinkler system. The exterior will be faced with cement plaster. Bids will be opened within a week or ten days.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 2 stories and base, brick. Cost not stated. Architects, Krempel & Erkes, Heinke Bldg., L. A. Owners, Brunswick-Balke-Collender Co. Contractors, Kelch & Sharp, Stimson Bldg., L. A. Contract price not stated.

LOS ANGELES, CAL.—Warehouse, 1 story and base, brick, $99,735. Engineer, Edward S. Cobb, Central Bldg., L. A. Owner, D. Oyharzadal. Contractors, J. B. Dawson and C. G. De Planty, Pacific Electric Bldg., L. A. Contract price, $99,735. Note.—The building will be 126x150 feet with a one-story wing of the same dimensions.

FLATS.

SAN FRANCISCO.—Flat, 2 story and base, frame, $4,800. Architect, Fred D. Boese, 45 Kearny St., S. F. Owner, Fred D. Boese. The building will contain two flats of five and six rooms each. The building will have a frontage of 27 feet and a depth of 55 feet. The interior will be finished in pine and redwood with some hardwood veneer. There will be open fire places and brick mantels. The baths will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

GARAGES.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Garage, 2 story and base, brick, $12,000. Architect, A. L. Haley, California Bldg., L. A. Owner, T. A. Stephens. Contractors, N. L. Hagan Construction Co., 1261 East Factory Place, L. A., general construction, except elevator. Contract price, $12,000.

LOS ANGELES, CAL.—Garage, 1 story and base, brick, $20,000. Architect, none. Owner, Max Lowenthal. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, $20,000.

GOVERNMENT WORK AND SUPPLIES.

Appropriations Requested for the Next Fiscal Year.

The various departments of the Government have submitted to Congress, through the Secretary of the Treasury, the following estimates of appropriations for the next fiscal year, except those submitted by the Supervising Architect for public buildings and by the army chief of engineers for the improvements of rivers and harbors:

Mention is here made of only such requests as concern construction work in the districts covered by this paper. The grand total is, therefore, much in excess of the amounts given below.

Panama Canal.

The total estimated expense of the Canal Commission for the next fiscal year, exclusive of fortification work, is $23,404,909.

Fortifications, Isthmian Canal.

Surveys for military purposes, $12,-000.

Purchase of land, $50,000.

Construction of seacoast batteries, $2,365,000.

Electric light and power plants, $206, 550.

Searchlights for seacoast fortifications, $285,000.

Construction of field fortification, $126,000.

Purchase, manufacture, and test of seacoast cannon, $1,006,000.

Purchase, manufacture, and test of ammunition for seacoast cannon, $575,-000.

Construction of fire-control stations, $200,000.

Construction of barracks and quarters for the mobile army of the Canal Zone, $1,594,520.

Public improvements, division of public works, $35,440.

Ordnance Department.

Benicia Arsenal, increasing the facilities for fire protection, $8,000; electric wiring, $8,000.

Quartermaster Corps.

Construction and enlargement of military posts as follows: Fort Mason, Cal., two additional storehouses on wharves, $140,000; Presidio of San Francisco, Cal., one battalion barrack for signal corps, one company hospital corps, and school for cooks and bakers, $100,000; Schofield Barracks, two quarter barracks for infantry, $640,000.

Fort Winfield Scott, Cal., Engineers' storehouse, $10,000; addition to quartermaster storehouse, $10,000; fire apparatus house, $5,000; one additional barrack building, $40,000; one four-set apartment house, $30,000; seven double sets N. C. O. quarters, $49,000.

Fort Worden, Wash.: Commissary storehouse, $12,000; one 4-set officers' apartment house, $25,000; four sets N. C. O. quarters, $16,000.

Continuing construction accommodations for seacoast artillery, Philippine Islands and Hawaii, $250,000.

Completing cavalry post, Hawaii, $172,750.

Fort Casey, Wash., shed for storage of ammunition boxes, $628,000.

Department of Commerce and Labor.

Santa Barbara, Cal.: Tower and fog signal house, $6,700. for signal apparatus, $1,000; quarters for two additional keepers, $9,000; improving present quarters, $1,500.

Santa Cruz, Cal., Light Station: Tower, $4,500; fog signal building and apparatus, $9,000; keepers' quarters, $11,-500; improving buildings, grounds, etc., $5,000.

Cape Kumukahi, Hawaii: Road, $6,-500; tower, etc., $11,000; illuminating apparatus, $4,000.

North Farallon Island, Cal.: Tower and fog signal building, $40,000; illuminating apparatus, $8,500; fog signal apparatus, $9,000; boats, derrick, piping, etc., $17,500.

Hilo, Hawaii: Two towers, $7,500; illuminating apparatus, $5,500; for light keeper's dwelling and appurtent structures, $75,000.

Pearl Harbor, Hawaii: Aids to navigation, foundations, $30,000; towers, $18,000; illuminating apparatus, $13,-500, two entrance gas buoys, $10,000.

Hawaiian Islands Light House depot: Dredging, $20,000; dock, $50,000; buoy space, $10,000; general store house, $10,000; carbide store house, $2,-000; repair plant, $18,000; contingencies, $11,000.

Point Vincinti, Cal.: Tower, including site and water supply, $29,000; illuminating apparatus, $5,000; fog signal apparatus and building, $9,000; dwelling for three keepers, $18,000; out buildings, fences, oil storage, piping, etc., $6,500.

Point Pinos, Cal.: Fog signal, $6,000; building for same, $3,400; dwellings for two keepers, $12,000; improvements to present station, $5,400.

Kauhola Point, Hawaii: 75 foot structural steel tower, $9,000; erection at site, complete, $4,000.

Kellett Bluff, Wash., Life Station: Fog signal building and tower, $12,000; dwellings of two keepers, $13,000; illuminating apparatus, $1,000; fog signal apparatus, $4,000; derrick and hoisting engine, $1,000; oil house, outbuildings, boats, walks, etc., $5,000.

Puget Sound, Wash.: Aids to navigation, $30,000.

Coquille River, Ore.: Tower complete, $1,500; illuminating apparatus, $2,000.

Warrior Rock, Ore.: Improvements, $2,000.

Alaska: Additional aids to navigation, $40,000.

Alaska, Lighthouse depot: Purchase of site and necessary equipment as far as funds permit, $40,000.

Yerba Buena Island, Cal.: Wharf, $30,000; improvements to buildings, $10,000.

Canal Circular No. 752.

The Isthmian Canal Commission has issued a call for bids to furnish material and equipment for the Cristobal-Balboa transmission line, including steel track, span bridges, copper wire, insulators, ground plates, and equipment for substations. These bids will be opened January 30, 1913.

It is the purpose of the Isthmian Canal Commission under this circular to purchase the materials and equipment which are required for the installation of the above named transmission line. This line is to be the principal one of the isthmian transmission system, connecting a terminal substation at Cristobal with a similar substation at Balboa. This line will be fed normally from the Gatun hydro-electric station and will be tied into the permanent steam station at Miraflores.

The above named line is to be in duplicate, insuring continuity of service in event of accidental interruption of one circuit. The two lines are to be suspended from bracket arms on either side of a track span bridge. The bridge is to be of skeleton steel construction and is shown upon drawings which will be submitted to all bidders. It is contemplated to install the track span bridge on approximately 300-foot centers where track is on the tangent and on 200-foot centers at curve. The design of the bridge is to be such that the suspension of a catenary trolley may be readily performed. The specifications give in detail the exact materials and equipment required. Attention is directed to the hot and humid atmosphere and also to the climatic condition, which cause metals, especially iron and steel, to corrode very quickly and insulation, especially rubber and compounds of low-melting point, to deteriorate and to break down quite rapidly.

Further details as to the requirements under the proposal are fully given in the specifications.

Class 1 calls for the following material:

Item 1. 725 steel track-span bridges (single track), type "A."

Item 1-a. 725 steel tract-span bridges (single track), type "B."

Item 2. 100 steel track-span bridges (double track), type "A."

Item 2-a. 100 steel track-span bridges (double track), type "B."

Item 3. 2,000,000 feet copper wire, No. 00, bare (base price, 17c per lb).

Item 4. 4,000 insulators, 3-unit, suspension type.

Item 5. 2,500 insulators, 3-unit strain type.

Item 6. 1,000 ground plates.

Class 2 calls for the following material:

Item 1. 1 Cristobal substation, complete.

Item 2. 1 Balboa terminal substation, complete.

Item 3. 1 Gatun tie-in substation equipment, complete.

Item 4. Miraflores tie-in substation equipment, complete.

In this class the commission also reserves the right to increase or reduce any or all of the above items by any quantity not to exceed 25 per cent of the total amount of the bid.

North Platte Reclamation Project.

The Secretary of the Interior has authorized the Reclamation Service to award contracts for the earthwork on the Low Line Interstate Canal, North Platte Project, Neb., to the following contractors whose bids are given herewith: Schedule 1, Ira M. Hewitt, of Minatare, Neb., $6,752; schedules 2, 3, 4, 9, and 15, W. L. Townsend, Morrill, Neb., $33,424.50; schedule 5, Fred Larsen, Minatare, Neb., $2,799; schedules 6 and 7, A. J. Parrish, Mitchell, Neb., $8,776.50; schedule 8, F. J. McAllister, Minatare, Neb., $2,707.50; schedules 10 and 11, Peterson & Christenson, Minatare, Neb., $9,929; schedule 12, James W. Talmage, Mitchell, Neb., $2,959; schedules 13 and 14, Lacey Bros., Scottsbluff, Neb., $8,716.50; schedules 16 and 17, W. C. Broadbent, Morrill, Neb., $6,393; total, $82,457. The total yardage of all contracts is 580,700 cubic yards.

Alcatraz Light Station, Sirens.

The following bid was received by the lighthouse inspector, 18th district, San Francisco, Cal., for furnishing two electric sirens for use at the Alcatraz light station, Cal.:

The Sireno Co., 39 Cortlandt street, New York city, $315 each; accepted.

San Francisco, Quarantine Station.

The contract for making repairs and alterations in connection with the U. S. quarantine station, San Francisco, Cal., has been awarded to E. Rothblum at $1,915.

Dredging, Honolulu.

The following bids were opened by the U. S. engineer, Honolulu, Hawaii, for dredging:

Item 1, Hilo Harbor. 2, Kahului Harbor.

Hawaiian Dredging Co., Honolulu, H. T., item 1, $79.5c; 2, 19.5c if awarded separately, or item 1, 59.9c, 2, 65c if awarded together.

Standard American Dredging Co., San Francisco, Cal., item 1, 89c; 2, 75c if awarded together.

Indian Reservation, Bridge.

The contract for the construction of a steel highway bridge across the Little Big Horn River, Crow Indian Reservation, Mont., bids for which were opened November 26, has been awarded to A. T. Bayne & Co., Minneapolis, Minn., at $7,760.

—HALLS & SOCIETY BLDGS.—

LOS ANGELES, CAL. Museum, 2 story and tower. Class A construction. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Southern Museum Association. The building will cover and area of 166x30 feet and will have a tower 100 feet in height. Construction will be entirely of reinforced concrete, the exterior being faced with cement plaster. Roof will be of red clay tile. The main portion of the building will contain the exhibition rooms. Upper floors in the tower will be used for offices and library. A reinforced concrete stairway will lead to the upper floors. Construction will be fireproof. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Lodge hall, 6 story and base. Class A construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. A site for this building has been secured, but only preliminary plans have so far been prepared. No details of the construction have been settled. Complete information will be given as the plans progress.

SAN FRANCISCO—Machinery Hall, 2 story, frame and steel construction. $500,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of the Machinery Hall building were opened last Saturday and show W. W. Anderson low man at $509,600. For a complete list of all names presented see under San Francisco in this issue.

HOSPITALS.

SAN FRANCISCO—Clinic building, 2 story and base, frame and brick $20,000. Architects, McDougall Bros., Russ Bldg., S. F. Owners, San Francisco Polyclinic Association. This work has been mentioned here before when the plans were being prepared. The structure will cover an area of 137½ feet. The street elevation will be three stories in height and will be faced with pressed brick veneer. Interior will be finished in pine throughout. A central heating system will be installed. The cost given does not include a number of special equipment departments and fixtures for the operating rooms. Plans are now out for figures.

LOS ANGELES, CAL.—Hospital, 2 or 4 story and base, fireproof. Architects, Garrett & Blanchard, Garrett Bldg., L. A. Owners, Methodist Hospital of Southern California. The Ways and Means Committee of this organization are now raising funds for the construction of a new hospital building at 2826 South Hope street.

Only preliminary plans have been prepared and details of the building can not be given at this time.

Contracts Awarded.

LOS ANGELES, CAL.—Hospital, 2 story and base, reinforced concrete, $50,000. Architect, George Low, L. A. Owners, County of Los Angeles. Contractors, Willard Slater Co., 2311 Santa Fe Ave., L. A., general construction, $41,770. Lobman Bros., 105 East Second St., L. A., plumbing, $6,989.

HOTELS.

SAN FRANCISCO.—Hotel, 5 or 6 story and base. Class C construction. Cost not stated. Architect, Maxwell G. Bugbee, 127 Montgomery St., S. F. Owners, E. J. Pringle and C. F. Hanlon. The building will be erected at one of the corners of Bush street, and will contain in the neighborhood of 120 rooms, nearly all of which will have connecting baths. Preliminary plans only have been prepared and a complete description cannot be given at this time. The first floor will be arranged for hotel lobby and office. The exterior of the building will be faced with pressed brick. There will be steam heat, elevator service and running hot and cold water. Plans are being prepared and figures will be called for soonthly.

SAN FRANCISCO.—Hotel, 4 story and base. Class C construction, $30,000. Architects, Havens & Toepke, 16 Kearny St., S. F. Owner, Mary Gay. The building will be erected at 8th and Minna streets, and is to cover an area of 30x75 feet, and will contain in the neighborhood of 60 rooms and several baths. There will be steam heat, elevator service and running hot and cold water in all rooms. Interior finish will be of pine and redwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, none. Owner, Eugene Pourroy. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated.

—LIBRARIES—

Contracts Awarded.

LOS ANGELES, CAL.—Library, 2 story and base, reinforced concrete, $21,500. Architect, George Low. County Superintendent of Construction L. A. Owners, Los Angeles County. Contractors, Smith & Stallbirth, 550 South Fair Oaks Ave., L. A. Contract price, $21,500.

RESIDENCES.

SAN FRANCISCO.—Residences, 2, 2 story and base, frame, $5,000 each. Architect, Leonard, Pochan Bldg., S. F. Owners, Pilan Realty Co. These dwellings, each of which has been designed for a seven-room house, will be erected on Victoria street. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and tile will be used in the kitchens. The exteriors will be covered with shingles, rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, $3,500. Architects, Hutchinson Bros., 470 13th St., Oakland. Owners, Extension Building Co. The house has been designed for a seven-room dwelling with bath, sleeping porch and laundry. Interior finish will be of pine and redwood. Oak floors will be used in the dining and living rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor under the supervision of the architects.

OAKLAND, CAL. — Residence, 2 story and base, frame, $4,000. Architect, none. Owner, T. Anderson, 5456 College Ave., Oakland. The dwelling will contain eight rooms, bath, and laundry. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Bath room will be finished in tile and have a composition floor. Furnace heat is to be installed and there will be open fire places. Mantels will be of brick and tile. An automatic water heater will be used. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, $8,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, J. E. Gardner. This house has been designed to contain nine rooms, sleeping porch, laundry and two baths. Interior finish will be of pine and redwood with some hardwood veneer. Floors will be of oak. There will be a large brick piece. Furnace heat and open fire places will be used. Mantels will be of tile and brick. An automatic water heater is to be installed. Bath rooms will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, $4,600. Architect, none. Owners, Realty Syndicate, 1440 Broadway, Oakland. The house will contain seven rooms and bath. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster or metal lath. Plans are complete and the work will be done by Day Labor. Owners are now purchasing materials.

BERKELEY, ALAMEDA, CO., CAL.—Residence, 2 story and base, frame, $2,500. Architect, none. Owner, D. F. Warren, 741 Durant Ave., Berkeley. The dwelling will contain five rooms and bath. All interior finish will be of pine or redwood. Floors in the principal rooms will be finished in oak. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, $2,000. Architect, none. Owner, J. W. Monroe, 690 61st St., Oakland. This house will contain six rooms and bath. All interior trim will be of pine. Hardwood floors will be used in the living and dining rooms. A large attractive fire place with a brick mantel will be used in the living room. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA, CO., CAL.—Residence, 2 story and base, frame, $6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. J. Sill. The dwelling has been designed for an eight-room house with baths, sleeping porch and laundry. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used throughout. There will be open fire places and tile and brick mantels. An automatic water heater will be installed. The dwelling will be heated by a warm air furnace. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BERKELEY, ALAMEDA, CO., CAL.—Bungalow, 1 story and base, frame, $2,000. Architect, none. Owner, E. B. Spitler, 2154 Ashby Ave., Berkeley. The house will contain five rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. A large open fire place with brick mantel will be a feature of the living room. Bath room will have tile wainscot. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

BERKELEY, ALAMEDA, CO., CAL.—Residence, 2 story and base, frame, $9,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, E. E. Kindespine. The dwelling will contain eight rooms, baths and sleeping porches. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and an automatic water heater. Open fire places and tile mantels will be used in several of the rooms. Bath will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Note: Plans for this work have been revised, and this is the second time that figures have been taken.

SAN FRANCISCO—Residences, 3, 2 story and base, frame, $2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on 10th avenue, near C street. Each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and brick and tile mantels. Tile will be used in the bath rooms and kitchens. The exteriors will be covered

with cement plaster, shingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LOS GATOS, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Ye Plan Shop, Theatre Bldg., San Jose Owner, H. E. Smith. The dwelling has been designed for a 12-room house with several bath rooms, sleeping porch and laundry. Interior finish will be of pine, redwood and some hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOLS.

GALT, SACRAMENTO CO., CAL.—School, 2 story and base, brick, $45,000. Architect, C. H. Russell, 510 Humboldt Bank Bldg., S. F. Owners, Galt Joint Union High School. This building has been mentioned in these columns before when the architect first secured the work. Working drawings are complete and bids for the construction will be opened on January 14th. Plans and specifications can be secured from the architect's office in this city or from the Clerk of the Board of Education at Galt. The building has been designed for a fourteen-room school, but several of the rooms will not be finished at this time.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 story and base, reinforced concrete, $65,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. Notice has been given in these columns before to the effect that figures were being taken on this work. Plans and specifications may be seen at this office. Herbert C. Jones, Knox Bldg., San Jose, is the Clerk of the Hester School District and plans may also be obtained from him.

SOUTH PASADENA, LOS ANGELES CO., CAL.—Schools, 2, 2 story and base, brick, $70,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of South Pasadena. The two buildings will be the Household and Fine Arts building and the Manual Training building. The former will be 64x100 feet and the latter 84x100 feet. Besides the construction of these two buildings, the present auditorium will be enlarged and altered. Construction will be of brick with the exteriors faced with sandstone brick. Plans are being completed as rapidly as possible. Further notice will be given in these columns when figures are called.

LACEY, WASH.—College building, 3 tory and base, mill construction, $55,000. Architect, C. Frank Mahon, Savage-Scofield Bldg., Tacoma. Owners, St. Martin's College. This building, which is to be the first of a $275,000 institution, will cover an area of 80x200 feet. Construction will be of the mill type with brick exterior walls faced with pressed brick. Interior will be finished in pine and hardwoods. There will be steam heat, modern plumbing and fixtures. Plans are complete and figures will be called for on January 1st.

SAN FERNANDO, LOS ANGELES CO., CAL. School, 2 story and base, reinforced concrete, $40,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School. Contractors, Dawson & Daniels, 915 Boston Court, Pasadena, general construction, $34,325. Cooney & Wintermottom, Alhambra, plumbing, $3,325.

SEWERS, STREET WORK AND WATER SYSTEMS.

TURLOCK, STANISLAUS CO., CAL. Irrigation dams, concrete. Cost not stated. Engineers, Engineering Dept. Turlock Irrigation District, Turlock. Owners, Turlock Irrigation District. Bids will be received up to and including January 13th for the construction of 18 dams in the Davis Reservoir. Full particulars of this work can be secured from the Secretary of the Turlock Irrigation District at Turlock.

STORES & OFFICE BUILDINGS.

SAN FRANCISCO.—Saloon fixtures and interior decoration, $45,000. Architect's name not given. Owners Waldrof Saloon, S. F. Mr. Roop, manager of the Waldrof at 618 Market street, states that they have secured a long lease on the New Tivoli Theatre on Eddy street, and that they will spend in the neighborhood of $45,000 for finish and fixtures. Mr. Roop will not disclose the name of the designer for a few days.

SAN FRANCISCO.—Stores and lofts, 3 story and base, brick. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Union Pacific Salt Co. The building will cover an area of 50x196 feet and is to be erected on Sacramento street near Drumm, in the heart of the wholesale district. Construction will be of the extra heavy type. The first floor will contain the offices of the company in the front portion of the building and city delivery and shipping departments in the rear. Upper floors will be used for storage and packing space. There will be a freight elevator installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Stores and lofts, 2 story and base, brick, $10,000. Architect, A. W. Smith, 1007 Broadway, Oakland. Owner, Mr. Leisz. The building will be erected on Webster street, and will be arranged for a store on the first floor and lofts above. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. An elevator will be installed. Plans are complete and figures are being taken.

OAKLAND, CAL.—Stores and lofts, 2 story and base, brick. Cost not stated. Architect, A. W. Smith, 1007 Broadway, Oakland. Owners, Isaac & Neppoch. The building will be similar in design to another [illegible] plans for which are now out for figures from Architect Smith. The store will be one story high on the first floor and [illegible] lofts. A freight elevator will be installed. Interior

finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

MARTINEZ, CONTRA COSTA CO., CAL.—Store, 1 story, brick, $10,000. Architect, F. W. Reid, Concord. Owner, Joseph Poss. The building will be designed for a nickelodeon. Interior will be finished in pine throughout. There will be a cement floor. The exterior will probably be faced with cement plaster. Some tile and ornamental plaster are to be used. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Dunn-Alcorn-Ames Co. The building is to be 33x77 feet. The first floor will contain one large store and the upper two floors light lofts. There will be a freight elevator, modern plumbing and an automatic sprinkler system. Interior finish will be of pine throughout. The exterior will be faced with cement plaster or pressed brick. Plans are nearly complete and figures will be called for at once.

TACOMA, Wash.—Stores and offices, 3 story and base, brick, $20,000. Architect, S. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owner, F. G. Kellogg. The building will occupy a corner site and is to contain stores on the first floor and a number of modern offices on the upper two floors. There will be steam heat. Entrance will be inclosed in marble and tile. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

THEATRES.

PORTLAND, ORE.—Theatre, 1 story and base, reinforced concrete, $50,000. Architects, Camp & Du Puy, Portland. Owners, Rector Realty Company. The building, which is designed for the most moving picture house in the west will cover an area of 50x100 feet. Construction will be fireproof throughout. Interior finish will be of metal and ornamental plaster. Tile and marble will be used extensively in the entrance. The exterior of the building will be faced with cement plaster. Plans now ready for a $10,000 organ. Bids will be called for on the general construction about January 10th.

MEDFORD, ORE.—Theatre, 2 story and base, reinforced concrete. Cost not stated. Architect, C. O. Powers, Medford. Owner, Dr. F. E. Page. The building will cover an area of 50x100 feet, and is to be the most modern and up-to-date theatre along the Willamette River. Construction will be of reinforced concrete throughout with metal window frames and sash, fireproof doors and fire escapes. First floor will be of concrete. The interior will be finished in metal trim and of latticed panels. The building will have a seating capacity of 1,100. Plans can be secured from Architect Charles N. Elliott, Failing Bldg., Portland, or direct from Architect C. O. Powers, Medford. Plans are complete and figures are being taken.

S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR TRANSMISSION LINE.

TRANSMISSION LINE—Department of the Interior, United States Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m., December 31, 1912,** for furnishing the material for the Roosevelt-Mesa transmission line, Salt River project, Arizona. Proposals will be considered on one or more items as listed in the circular. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal. O. H. ENSIGN, operating engineer.

PROPOSALS FOR APPARATUS.

HYDRAULIC AND ELECTRIC APPARATUS—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m. January 22, 1913,** for furnishing hydraulic and electrical apparatus for St. Mary storage unit, Milk River project, Montana. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. A. P. DAVIS, acting director.

PROPOSALS FOR CEMENT.

CEMENT—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, 408 Commonwealth Building, Denver, Colo., until **10 o'clock a. m. January 6, 1913,** for furnishing 210,000 barrels of Portland cement, f. o. b. cars at works of the bidder. For particulars address the U. S. Reclamation Service, Washington, D. C., or 408 Commonwealth Building, Denver, Colo. A. P. DAVIS, acting director.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until **2 o'clock p. m. January 10, 1913,** for the construction of about two miles of the Dodson North Canal, Milk River project, Mont. The work involves the excavation of about 205,000 cubic yards of material and is situated on the north side of Milk River and adjacent to the main line of the Great Northern Railway, near Wagner and Exeter, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C., Helena, Mont., or Malta, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR WHARF WORK.

WHARF—Office of the Quartermaster, Fort Rosecrans, Cal.—Sealed proposals, in triplicate, will be received in this office until **11 a. m. January 9, 1913,** and then opened, for construction of timber wharf, landing float and board walk at Fort Pio Pico, San Diego, Cal. Further information may be obtained by applying at this office. C. A. LOHR, first lieutenant, coast artillery corps, quartermaster.

PROPOSALS FOR OIL TANKS.

OIL TANKS—Sealed proposals, indorsed "Proposals for Oil Tanks," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. January 25, 1913,** and then and there publicly opened for three steel oil-storage tanks at the naval station, Pearl Harbor, Hawaii. Estimated cost, $56,000. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until **3 o'clock p. m. on the 23rd day of January, 1913,** and then opened for the construction, complete (including plumbing, gas piping, heating apparatus, electric conduit and wiring, and lighting fixtures), of the U. S. post office at Billings, Mont. The building is three stories and basement, with a ground area of approximately 7,250

square feet; fireproof construction, stone and brick facing, tin roof. Drawings and specifications may be obtained from the custodian of site at Billings, Mont., or at this office at the discretion of the supervising architect. O WENDEROTH, supervising architect.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—2, 2 story and base, frame, $3,000 each. San Francisco. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. These dwellings, each of which has been designed for a seven-room house, will be erected on Victoria street. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and tile will also be used in the kitchens. The exteriors will be covered with shingles, rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—5 story and base. Class C construction, $50,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner's name withheld. The building will be erected on Broadway near Laguna street and has been arranged for 100 guest rooms, which will be arranged in suites of three and four rooms each. There will be private baths, wall beds and elevator service. Interior will be finished in pine and redwood with some hardwood. Steam heat will be installed. There will be a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are still in the preliminary stage and working drawings will not be completed for some weeks.

FACTORY—5 story and base, reinforced concrete, $125,000. San Francisco. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Gantner and Mattern Co. This work has been mentioned here before when the architect was first commissioned to prepare plans. Working drawings are now complete and figures are being taken. The building will cover an area of 130x160 feet. Construction will be practically fireproof. There will be metal window sash and frames, fireproof doors and an automatic sprinkler system. The exterior will be faced with cement plaster. Bids will be opened within a week or ten days.

FLAT—2 story and base, frame, $4,800. San Francisco. Architect, Fred D. Boese, 45 Kearny St., S. F. Owner, Fred D. Boese. The building will contain two flats of five and six rooms each. The building will have a frontage of 27 feet and a depth of 55 feet. The interior will be finished in pine and redwood with some hardwood veneer. There will be open fire places and brick mantels. The baths will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

CLINIC BUILDING—2 story and base, frame and brick, $20,000. San Francisco. Architects, McDougall Bros., Russ Bldg., S. F. Owners, San Francisco Polyclinic Association. This work has been mentioned here before when the plans were being prepared. The structure will cover an area of 40x137½ feet. The street elevation will be three stories in height and will be faced with pressed brick veneer. Interior will be finished in pine throughout. A central heating system will be installed. The cost given does not include a number of special equipment departments and fixtures for the operating rooms. Plans are now out for figures.

HOTEL—5 or 6 story and base. Class C construction. Cost not stated. San Francisco. Architect, Maxwell G. Bugbee, 127 Montgomery St., S. F. Owners, E. J. Pringle and C. F. Hanlon. The building will be erected at one of the corners of Bush street, and will contain in the neighborhood of 120 rooms, nearly all of which will have connecting baths. Preliminary plans only have been prepared and a complete description cannot be given at this time. The first floor will be arranged for hotel lobby and office. The exterior of the building will be faced with pressed brick. There will be steam heat, elevator service and running hot and cold water. Plans are being prepared and figures will be called for shortly.

HOTEL—4 story and base. Class C construction, $30,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner, Mary Gay. The building will be erected at 4th and Minna streets, and is to cover an area of 30x75 feet, and will contain in the neighborhood of 60 rooms and several baths. There will be steam heat, elevator service and running hot and cold water in all rooms. Interior finish will be of pine and redwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCES—3, 2 story and base, frame, $2,500 each. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on 10th avenue, near C street. Each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. The exteriors will be covered with cement plaster, shingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SALOON FIXTURES AND INTERIOR DECORATION—$45,000. San Francisco. Architects' name not given. Owners, Waldrof Saloon, S. F. Mr. Roop, manager of the Waldrof at 648 Market street, states they have secured a long lease in the New Tivoli Theatre on Eddy street, and that they will spend in the neighborhood of $45,000 for finish and fixtures. Mr. Roop will not disclose the name of the designer for a few days.

STORES AND LOFTS—3 story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Union Pacific Salt Co. The building will cover an area of 50x196 feet, and is to be erected on Sacramento street near Drumm, in the heart of the wholesale district. Construction will be of the extra heavy type. The first floor will contain the offices of the company in the front portion and city delivery and shipping departments in the rear. Upper floors will be used for storage and packing space. There will be a freight elevator installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

MACHINERY HALL—2 story, frame and steel construction, $500,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of the Machinery Hall building were opened last Saturday and show W. W. Anderson low man at $509,600. For a complete list of all figures presented see under San Francisco in this issue.

BATH HOUSE—1 story and base, reinforced concrete, $13,389. San Francisco. Architect, Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Park Commissioners at their last meeting show Carnahan & Mulford low at $13,389. No action on the award has been taken. For a complete list of all figures presented see under San Francisco in this issue.

Figures Opened For Machinery Hall.

W. W. Anderson & Company Will Probably Build Largest of Panama-Pacific Buildings For $509,900.

Ten bids were received by the Panama-Pacific Exposition Company on Saturday for the general construction of the Machinery Hall, one of the largest of the Panama-Pacific Buildings. The lowest figure was presented by W. W. Anderson & Co. for $509,900. One bid was received too late for consideration and was, it is understood, the lowest figure. The following is a complete list of all figures presented:

Machinery Hall.

W. W. Anderson & Co.	$509,900
Spilho-Freeze & Peterson	519,999
Neil A. McLean	527,000
Commary-Peterson & Co.	649,209
P. T. Quinn	569,000
Lange & Bergstrom	546,499
Mose Fisher	542,000
Lindgren & Co.	563,000
McLaren & Peterson	599,000
Fred P. & L. F. Fisher	593,616

No action was taken on the award and all figures were taken under advisement.

Bids Received For Playground Work.

Work For The North Beach Playground Proves Attractive and Twelve Sets of Figures Are Submitted.

Twelve sets of figures were received by the Playgrounds Commissioners at their meeting held in the Temporary City Hall, Tuesday afternoon, for the construction of a one-story reinforced concrete bath house. The building will be erected at the North Beach Playgrounds, Powell and Lombard streets. No action will be taken on the award until the next meeting of the Commissioners. The lowest figure was received from Carnahan & Mulford at $13,389. A complete list of all figures follows:

J. W. Carr	$13,819
Carnahan & Mulford	13,389

ered with cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $60,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. J. Sill. The dwelling has been designed for an eight-room house with baths, sleeping porch and a laundry. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used throughout. There will be open fire places and tile and brick mantels. An automatic water heater will be installed. The dwelling will be heated by a warm air furnace. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW - 1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Spitler, 2154 Ashby Ave., Berkeley. The house will contain five rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. A large open fire place with brick mantel will be a feature of the living room. Bath room will have tile wainscot. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, $9,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, E. E. Kindespine. The dwelling will contain eight rooms, baths and sleeping porches. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and an automatic water heater. Open fire places and tile mantels will be used in several of the rooms. Bath will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Note: Plans for this work have been revised and this is the second time that figures have been taken.

APARTMENT HOUSE—3 story and base, frame, $25,000. Oakland, Cal. Architect, A. W. Smith, 1007 Broadway, Oakland. Owner, W. B. Rinehart. The building will be arranged for 24 apartments of the two and three room type. All apartments will have wall beds and connecting bath rooms. There will be furnace heat. Interior finish will be of pine and redwood with some oak floors. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES AND LOFTS—2 story and base, brick, $10,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mr. Leisz. The building will be erected on Webster street and will be arranged for a store on the first floor and lofts above. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. An elevator will be installed. Plans are complete and figures are being taken.

STORES AND LOFTS—3 story and base, brick. Cost not stated. Oakland, Cal. Architect, A. W. Smith, 1007 Broadway, Oakland. Owners, Kratz and Neppoch. The building will be similar in design to another structure, plans for which are now out for figures from Architect Smith's office. There will be one large store on the first floor and light lofts above. A freight elevator will be installed. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Building Contracts Awarded.

This building has been mentioned in these columns before when bids are first sought for work. Working drawings are complete and bids for the construction will be opened on January 14th. Plans and specifications can be secured from the architect's office in this city or from the Clerk of the Board of Education at Galt. The building has been designed for a 12-room school, but several of the rooms will not be installed at this time.

Building Contracts.

SACRAMENTO COUNTY.

NO. 41 WEST CURTIS OAKS. Five-room bungalow.
Owner ... Alice Hallifax.
Plans by ... W. D. McKey.
Contractor ... W. D. McKey.
Filed Dec. 24, '12. Dated Dec. 23, 1912
COST, $2900

LOT 4, J, K, 4TH AND 5TH STS., Sacramento. Plumbing for reinforced concrete hotel building.
Owner ... Marsh Investment Co.
Architect ... Cuff & Diggs, Elk's Bldg., Sacramento.

... Ransome Concrete Co., 328 J St., Sacramento.
Sub-Contractor ... Hateley & Hareley.
Filed Dec. 27, '12. Dated Nov. 8, '12.
COST, $26,700

W. 60 FT. OF LOT 2, K. L. 10TH AND 11th Sts., Sacramento. Painting on additional story on present roof of Hotel Sacramento.
Owner ... Sacramento Hotel Co.
Architect ... E. C. Hemmings, 1005 K St., Sacramento.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base. Class B construction. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Julius Smith. The building will be an addition to a present five-story apartment house on an adjoining lot, and will cover an area of 18x83 feet. There will be a total of 85 guest rooms, which will be arranged in two and three room suites with baths. There will be steam heat, vacuum cleaning system and elevator service. The first floor will contain lobby, ladies' parlor and storage space. Interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

CHURCH — Class A construction. Cost not stated. Los Angeles, Cal. Architect, John C. Smith, H. W. Hellman Bldg., L. A. Owners, Fourth Church of Christ Scientist. The new edifice will occupy the site of the former church and the old buildings are now being removed. There will be a complete steel frame with exterior walls of reinforced concrete faced with terra cotta and stone. Construction will be fireproof throughout. The interior will be handsomely finished. There will be a central heating system. No description of the work has been issued by the architect. Mr. Smith states the construction of the foundations will be started early in January.

MUSEUM—2 story and tower. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Southern Museum Association. The building will cover an area of 166x30 feet, and will have a tower 100 feet in height. Construction will be entirely of reinforced concrete, the exterior being faced with cement plaster. Roof will be of red clay tile. The main portion of the building will contain the exhibition rooms. Upper floors in the tower will be used for offices and library. A reinforced concrete stairway will lead to the upper floors. Construction will be fireproof. Plans are complete and figures are being taken.

LODGE HALL—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. A site for this building has been secured, but only preliminary plans have so far been prepared. No details of the construction have been settled. Complete information will be given as the plans progress.

SCHOOLS—2, 2 story and base, brick, $70,000. South Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of South Pasadena. The two buildings will be the Household and Fine Arts Building and the Manual Training Building. The former will be 64x109 feet and the latter 84x100 feet. Besides the construction of these two buildings, the present auditorium will be enlarged and altered. Construction will be of brick with the exteriors faced with sandstone brick. Plans are being completed as rapidly as possible. Further notice will be given in these columns when figures are called.

STORES AND LOFTS—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Dunn-Albright-Ames Co. The building is to be 33x77 feet. The first floor will contain one large store and the upper two floors light lofts. There will be a freight elevator, modern plumbing and an automatic sprinkler system. Interior finish will be of pine throughout. The exterior will be faced with cement plaster or pressed brick. Plans are nearly complete and figures will be called for at once.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Slaughtff & Ena, Security Bldg., L. A. Owner, Ward Dawson. The building is to be arranged for 56 rooms, which will be divided into two and three room suites with private baths. There will be pine and hardwood trim, marble and tile entrance, steam heat, wall beds, an automatic electric elevator and a vacuum cleaning system. Besides the 56 rooms there will be a large lobby, ladies' parlor and amusement room. The exterior of the building will be faced with pressed brick. Bath rooms will be finished in tile. Plans are complete and figures are being taken.

HOSPITAL—3 or 4 story and base, brick, $100,000. Los Angeles, Cal. Architects, Garrett & Blaby, Currier Bldg., L. A. Owners, Methodist Hospital of Southern California. The Ways and Means Committee of this organization are now raising a fund for the construction of a new administration building at 2826 South Hope street. Only preliminary plans have been prepared, and details of the building cannot be given at this time.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, W. J. Sircy, I. W. Hellman Bldg., L. A. Owner, Jessie F. Warwick. Contractor, W. J. Sircy, I. W. Hellman Bldg., L. A. Contract price not stated.

WAREHOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Krempel & Erkes, Henne Bldg., L. A. Owners, Brunswick-Balke-Collender Co. Contractors, Kelch & Sharp, Stimson Bldg., L. A. Contract price not stated.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, Eugene Pourroy. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated.

APARTMENT HOUSE—3 story and base, frame, $28,000. Los Angeles, Cal. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. E. H. Schuster Contractors, May & Grimwood, Security Bldg., L. A. Contract price, $28,000.

WHARF—Reinforced concrete, $56,390. Hermosa Beach, Los Angeles Co., Cal. Engineer, City Engineer Hermosa Beach. Owners, City of Hermosa Beach. Contractors, Mercereau Bridge and Engineering Co., Pacific Electric Bldg., L. A. Contract price, $56,390.

CHURCH—1 story and base, brick and concrete, $35,000. Inglewood, Los Angeles Co., Cal. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Episcopal Congregation. Contractor, R. S. Martin, 507 North Marguerita Ave., Alhambra, general construction, $17,100; Smith & Stakbuth, Pasadena, artificial stone work, $7,642; B. F. Hulse, 137 Rose St., L. A., heating and ventilating, $1,194.

Garage—2 story and base, brick, $12,000. Long Beach, Los Angeles Co., Cal. Architect, A. L. Haley, California Bldg., L. A. Owner, T. A. Stephens. Contractors, N. L. Hagan Construction Co., 1261 East Factory Place, L. A. general construction except elevator. Contract price, $12,000.

GARAGE—1 story and base, brick, $20,000. Los Angeles, Cal. Architect, none. Owner, Max Lowenthal. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A.

Contract price, $20,000.

WAREHOUSE—4 story and base, brick, $99,735. Los Angeles, Cal. Engineer, Edward S. Cobb, Central Bldg., L. A. Owner, D. Oyharzadal. Contractors, J. B. Dawson and C. G. Planty, Pacific Electric Bldg., L. A. Contract price, $99,735. Note: The building will be 126x150 feet with a one-story wing of the same dimensions.

HOSPITAL—2 story and base, reinforced concrete, $50,000. Los Angeles, Cal. Architect, George Low, L. A. Owners, County of Los Angeles. Contractors, Willard Slater Co., 2314 Santa Fe Ave., L. A., general construction, $41,770. Lohman Bros., 105 East Second St., L. A., plumbing, $6,989.

LIBRARY 2 story and base, reinforced concrete, $21,500. Los Angeles, Cal. Architect, George Low, County Superintendent of Construction, L. A. Owners, Los Angeles County. Contractors, Smith & Stahlhuth, 550 South Fair Oaks Ave., L. A. Contract price, $21,500.

SCHOOL—2 story and base, reinforced concrete, $40,000. San Fernando, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School. Contractors, Dawson & Daniels, 915 Boston Court, Pasadena, general construction, $34,325; Cooney & Winterbottom, Alhambra, plumbing, $3,325.

PORTLAND AND OREGON.

THEATRE—3 story and base, reinforced concrete, $70,000. Portland, Ore. Architects, Camp & Du Puy, Portland. Owners, Rector Realty Co. The building, which is designed for the finest moving picture house in the west, will cover an area of 50x100 feet. Construction will be fireproof throughout. Interior finish will be of metal and ornamental plaster. Tile and marble will be used extensively in the entrance. Plans provide for a $10,000 organ. Bids will be called for on the general construction about January 10th.

THEATRE 2 story and base, reinforced concrete. Cost not stated. Medford, Ore. Architect, C. O. Powers, Medford. Owner, Dr. F. E. Page. The building will cover and area of 85x100 feet, and is to be the most modern and up-to-date theatre along the Willamette River. Construction will be of reinforced concrete throughout with metal window frames and sash, fireproof doors and fire escapes. First floor will be of concrete. The interior will be finished in metal trim and ornamental plaster. The building will have a seating capacity of 1,100. Plans can be secured from Architect Charles N. Elliott, Failing Bldg., Portland, or direct from Architect C. O. Powers, Medford. Plans are complete and figures are being taken.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—6 story and base, brick and steel, $100,000. Vancouver, B. C. Architect, Emil Guenther, North West Trust Bldg., Vancouver. Owner, T. Scott. The building will cover an area of 65x132 feet, and is to be arranged for 56 large apartments. There will be wall and disappearing beds, connecting baths, steam heat, vacuum cleaning system and elevator service. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick on two street frontages. Plans are nearly complete and figures will be called for at once.

COLLEGE BUILDING—3 story and base, mill construction, $55,000. Lacey, Wash. Architect, C. Frank Mahon, Savage-Schofield Bldg., Tacoma. Owners, St. Martin's College. This building, which is to be the first of a $275,000 institution, will cover an area of 80x200 feet. Construction will be of the mill type with brick exterior walls faced with pressed brick. Interior will be finished in pine and hardwoods. There will be steam heat, modern plumbing and fixtures. Plans are complete and figures will be called for on January 1st.

STORES AND OFICES—3 story and base, brick, $20,000. Tacoma, Wash. Architect, S. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owner, F. G. Kellog. The building will occupy a corner site and is to contain stores on the first floor and a number of modern offices on the upper two floors. There will be steam heat. Entrance will be finished in marble and tile Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GREAT BRITAIN AND THE EXPOSITION.

Having been afforded the opportunity of examining in detail the scheme and plans for the great exhibition projected here for 1915, and having visited the site, some notes written from the spot upon the subject may not be unacceptable. A preliminary competition was held before the site was finally selected, and that now chosen could hardly be surpassed, with its water front upon the renowned fairway known as the Golden Gate.

The general scheme of building is already approved, subject only to the working out of minor details. It has the novelty of being conceived in courts rather than independent blocks, and bids fair to be really monumental in character. If adequate in achievement, it promises to surpass any exhibition hitherto attempted, not even excepting Chicago. Architects will be interested to know that what has justly been called the "ginger-bread" of exhibition design, known so well by all of us, is being studiously avoided, and a classic dignity sought in its place, and certainly achieved on paper in the designs I have seen.

The means of carrying such a scheme upon a colossal scale to a successful conclusion are peculiar to this country. One learned with amazement that £1,000,000 (not dollars) was guaranteed by the citizens at the first meeting of the project, and that ten times that amount is likely to be at their disposal before the actual construction begins, every state in the Union and the Federal Government itself being contributors.

There is, however, the keenest desire expressed to make the occasion international, and specially that Great Britian should come forward in a manner worthy of her position in the world of commerce and the arts. Several admirable suggestions have been made to me as to the form which a British architectural court or pavilion might appropriately take, but it is obviously premature to enter into such details. It is not difficult to gather that there is, as I write, some misgiving over here, lest a recent unhappy event in the relations of the two countries may cause Great Britain to hold aloof.

To judge from a personal experience, and I have discussed the matter quite freely, it is well to state that American opinion as reflected in ordinary conversation upholds the justice of the British standpoint and regrets the action of the paid politicians.

I can add that the cordiality of San Franciscans to their British visitors knows no bounds, while the country and climate of California (which knows neither summer heats nor winter snows) are of unrivaled charm. Exhibitors and visitors may well look forward to the most cordial welcome in ideal surroundings...W. D. Caroe, in London Times.

FIRE PROOF REBUILDING.

Down town in almost every city, one will find blocks of old buildings filled with dry timber and inflammable materials. They are fire breeders as well as fire spreaders.

While it is economically possible at one swoop to tear these all down and replace them with modern fire-resisting construction, yet one great step toward reduction of the fire hazard—and a step quite feasible—would be the passage of ordinances providing that all changes must be of a fire-resisting nature. Only non-combustible material should be allowed to go into an old building for alterations. Whenever new floors or partitions are needed, they should be made of concrete, tile, metal, or some other material that will lessen the fire risk. It is easily possible to remodel old buildings, using the walls and framework, so as to make them practically fireproof within, by the use of such materials for floors and partitions. The building thus protected commands a better class of tenants and higher rentals; while the saving in insurance cost gives a good return on the investment, to say nothing of the owner's responsibility for the life and property of his tenants and his obligation to do his share to reduce the fire waste of the country.—Cement World.

J. A. LEVENSALER & CO. APPOINTED SELLING AGENTS.

The Mound House Plaster Co. announce that their business has grown to such magnitude where it is advisable to devote all their efforts to the producing and manufacturing end, and have accordingly unloaded the burden of the specification work and selling of their plaster and Colonial Wall Board on J. A. Levensaler and Company, whose offices are at 519 California street, (3rd Floor Clunie Bldg.).

This firm was chosen after careful deliberation, knowing that the requirements of the trade will be intelligently handled. Architects are urged to look them up at once, for owners are entitled to the best and the

claim is made that the best can be obtained by specifying the "Colonial Board."

PROPOSED EXTENSION OF BRITISH POWER PLANT.

The growing use of electricity for power purposes in Leeds is causing some discussion of its development in the local press and by the city council. Authority for additional expenditure on the part of municipality will be sought from Parliament. The present city plant has a capacity of 15,440 kilowatts (20,500 horsepower). A new turbo-generator of 7,500 kilowatts [mentioned in Daily Consular and Trade Reports for October 1, 1912] is ordered, and the present plant has room for one other of like capacity.

The use of electricity as a motive power during the last year increased 20 per cent. At this rate the demand will be far in excess of the available supply by 1915, without any provision for emergency power. The maximum load the present plant had to carry up to December, 1911, was 9,570 kilowatts. Increased orders for 1912 bring it to 12,000 kilowatts—16,000 horsepower (a kilowatt is considered as approximately 1 1-3 horsepower).

The report of the former electrical manager urging preparation for the future demand gives some data as to the present condition, the figures being based on conditions on March 31, 1912. He estimates the amount of motive power used in Leeds for industrial, commercial, and domestic purposes as 155,585 horsepower. Of this the Leeds electricity supply department furnished 17,472 horsepower.

Growing Use of Current—American Supplies.

Electricity is also being more largely used for street, store, and house lighting. There is evidence of a growing demand for it for heating and cooking. The custom of an open fire and its supposed cheerful appearance have prevented the use of stoves to the extent required for comfort. The electric heater gives the glow without attendant dirt and stands a better chance of winning a place than do the ordinary stoves. The cost of electricity was recently reduced from 8 cents to 7 cents per unit.

Even with the electric plant developed to the capacity recommended it would be able to furnish only 30 to 40 per cent of the present rated power, without taking into consideration any increased demand for street, store, and house lighting or for domestic use and business growth. The cost of the proposed extension will be $2,500,000 to $3,000,000. This expenditure will likely be made within the next five years. American firms desiring to participate should make arrangements promptly. They can accomplish more by having their products presented by some English representative or by a branch within England than by direct effort. This is especially true of the municipal side of this development. Manufacturers whose wares are intended for private firms and individuals may adopt either way safely.

COST OF NEW YORK STATE ROADS.

Mr. Baker's letter to the Times carries conviction as to some of the fallacies of the financial plan under which many of us have recently voted for a second issue of fifty-year State road bonds to the amount of $50,000,000. No argument should really be needed with our lawmakers and financial officers to bring about a radical change in the prevailing method of issuing such long-term bonds for improvements such as these State road pavements that will go to pieces and require several renewals before the maturity of the bonds and their payment by the next generation.

The theory on which the State is entering half of a $100,000,00 investment is unsound and unfair to the taxpayer at large, essentially because like an payers cannot have anything like an equal share in the benefits derived from the investment. Fundmentally, original physicial improvements of this character should be paid for, in great part, by an assessment on the property in the districts served and benefited, and the remedy Mr. Baker proposes, that of making these bonds of shorter term with an annual sinking fund, does not reach this question. Here in the City of New York we have met and, perhaps, solved the same question in improveing and providing for the paving of several thousand miles of roadways and their maintenance and replacement. For original improvements the city has established a trust or "street improvement fund," out of which contracts are made for the first permanent pavements laid on these roadways, and subsequently the actual cost of the work, including all interest paid out by the city, is asessed directly on the property benefited. The cost of maintenance of these paved roadways and their replacement by new paving when worn out is provided for in the annual tax levy. In other words, city pavements are paid for in the first place by the abutting property in a direct assessment, and the maintenance and resurfacing by the annual tax levy. Under pressure from automibile clubs and other interests, one or more of the funds out of the city treasury to improve the main arteries of heavy traffic where it was believed an assessment for local benefit could not be equitably made, but this is an exception in the city procedure.

The $50,00,000 fund might be conserved for a more extended public benefit by additional legislation to provide that part of the cost of new State roads be carried by the property in the districts benefited, and that part of this first cost and the maintenance be contribnted by an autobile tax, the high cost of special construction being directly due to the destructive effect of such vehicular traffic.—R Walter Creuzbaur in New York Times.

LOCAL FIRM GET BIG CANADIAN JOB.

Burch & Hoffmar of This City Awarded General Contract for Twelve-Story Building in Calgary.

Burch & Hoffman, 480 Ellis street, have just been awarded the contract on a percentage basis for the construction of a twelve-story Class "A" office building, which is to be erected in the heart of the business section of Calgary, Alberta Province, Canada, at a cost of $325,000. The big structure is to be erected for a company of Buffalo, New York and Toronto capitalists and was designed by Peter McDuffie, Architect and Civil Engineer, of Toronto. The building will cover an area of 100x165 feet and is to be 134 feet high. There will be a complete steel frame, reinforced concrete walls, faced with Alberta stone and metal interior trim. Construction will be fireproof throughout. Foundations, steel frame and walls have been designed for a sixteen-story structure, only twelve of which will be erected at this time. A contract has been let for the steel work and Mr. Burch will leave for Calgary early in March, when actual building operations will be started.

FOREIGN TRADE OPPORTUNITIES.

[No further particulars are available in the Bureau of Foreign and Domestic Commerce regarding these projects. Correspondence should be direct with the offices named.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10083. Electric vacuum cleaners. An American consular officer in Canada reports that a member of a firm in his district wishes to correspond with some American firm that handles electric vacuum cleaners. Correspondence may be in either French or English.

No. 10084. Capital for cement factory A report from an American consular officer in Canada states that cement property of large extent has been discovered in his consular district. It is stated that conditions are favorable for the development of this property, as cheap coal and cheap electric power can be obtained, while transportation facilities are also good This land is now owned by a company of several men, who are desirous of interesting capital for the establisnment of a plant.

No. 10065. Grain elevators and mechanical apparatus.—The Russian State Bank, St. Petersburg, Russia, will receive tenders for 71 grain elevators (772,800 tons). Tenders will be received through the local agnets only. The War Department, Verdum, France, invites tenders for mechanical apparatus for working a set of grain elevators. Particular may be obtained of the Sous-intendant Militaire.

CALIFORNIA LEADS WEST IN MINERAL PRODUCTION.

California ranks first among the States west of Mississippi River in the value of its mineral production, according to the United States Geological Survey. In former years California's claim to distinction as a mineral producer rested on its output of gold, in which, in fact, it held first place in 1911, although in recent years it has usually fallen behind Colorado in the production of gold. The premiership of gold in the State has, however, been succeeded by petroleum, the value of which in California exceeds that of gold by 91 per cent and gives the State first place among the States in the production of crude oil. California leads also in the production of asphalt, of platinum, and of quicksilver and enjoys a monopoly in the production of borax and magnesite. It is second in

the production of tungsten ores, third in the production of cement, and sixth in the production of copper and stands well up among the States in the production of a mnuber of less important minerals.

The total value of the minearl production of California in 1911 was $90,517,566, compared with 186,721,069 in 1910.

GREAT VALUES IN GOVERNMENT COAL LANDS.

During the past three and one-half years the United States Geological Survey has classified as coal land 17,459,105 acres in the public land States, and this land has been restored to sale. The appraised value of this land, as fixed by the Survey as a result of geological examinations, and promulgated by the General Land Office aggregates a total of $742,620,649. The minimum valuation for the same lands, at which they might have been purchased a few years ago before the policy of classification was adopted, is but $295,989,140.

GREAT BUILDING FOR COUNTIES IS ASSURED.

California's $1,000,000 world's fair building, in which the counties will house their displays and the social life of the year 1915 will center, became in one stride an assured thing by the action taken Thursday in the convention of county representatives.

Sixty delegates, representing forty-seven counties, met in the Exposition building, reviewed the building plans and toured the fair site, and then settled down to the work of organizing a definite campaign for securing an appropriation which will make the hostess' building of the world's fair for the first time in the history of big expositions the building of the hostess State.

From now on the bill, which was drafted by a committee of seven, will be urged systematically all over the State. Boards of Supervisors and county exposition commissions will pass indorsements, chambers of commerce will be enlisted and members of the Legislature, which convenes next month, will be bombarded from every quarter to include in the year's appropriation the sum needed to place the California building on the Exposition map.

SIMPLE TEST OF CEMENT.

What simple test can be made on cement without employing laboratory methods and apparatus? Some cement has been received here, and is now on the market, which is not up to the standard, and it is necessary to give some test to the cement shipment before the cement goes into the work.—S., Nebraska.

Briefly, the best way to test cement without laboratory apparatus is to make the cement up with water in such as way as to form a pat about 3 inches in diameter and about ½ inch thick in the center, tapering to nothing at the edges. This pat should be spread out on glass and the cement and water permitted to dry out, keeping the pat from sun and wind. The behavior of the cement can be watched from all sides in this manner. If the neat cement and water set promptly and do not crack or blister in curing, it is a fairly good indication that the cement is all right. You must understand, of course, that this is merely a rough test, and where any considerable quantity of cement is to be used, a laboratory examination is an economy. Concrete-Cement Age.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at the Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10092. Timber sale.—The American consulate general at Vancouver, British Columbia, has forwarded copies of newspaper clippings advertising the sale of licenses to cut timber in the Dominion of Canada. Bids will be received until March 3, 1913. Particulars can be obtained from the Chief Forester, Victoria, British Columbia, Canada.

No. 10093. Cotton goods, yarn, and textile machinery.—A report from an American consular officer states that a foreign business man is anxious to secure agencies of American manufacturers of printed or woven cotton goods or yarn, which might compete with the domestic articles produced locally. He is also open to undertake agencies for patent machines for cotton spinners or cotton goods manufecturers. He states that he has been engaged in the cotton trade for many years, and can handle agencies profitably to his principals. He is prepared to furnish any references required.

No. 10094. Machines for sawing steel A European business man informs an American consular officer that he desires to be placed in communication with American manufacturers of circular or band saws or devices for sawing large pieces of steel, such as old armor plates, solid masts, shafts, and other hard steel or iron parts of war vessels and other ships. He states that he desires to purchase at least two such machines, as there is use for them at the port where he is located. He estimates that 20,000 tons of scrap steel, mostly discarded parts of war vessels, and 10,000 tons of old cannon are lying in need of being cut up by such machines. Correspondence with the inquirer may be in English, and references will be furnished.

No. 10095. Motor engines.—An American consul in the West Indies reports that a business firm in his district desires to secure an agency for American motor engines of 10 to 20 horsepower, for use on a marine railway track, for hauling ships of about 100 tons.

No. 10096. Office furniture and supplies.—A report from an American consular officer in Italy states that business man in his district desires to be placed in communication with American manufacturers and exporters of office furniture anl office supplies, with a view to securing the agency for that market. Filing cabinets, card-index cabinets, etc., are particularly desired. Light oak is preferred. Correspondence should be in Italian or French. References can be furnished.

PROPOSALS FOR GOVERNMENT SUPPLIES.

[No further particulars are available in the Bureau of Foreign and Domestic Commerce regarding these projects. Correspondence should be direct with the officers named.]

No. 960. Long-leaf-pine piling.—Sealed proposals for furnishing and delivering long-leaf-pine piling for the construction of Lock and Dam No. 1, at Kings Bluc, N. C., will be received at the United States Engineer Office, Wilmington, N. C., until January 9, 1913. Information an application to H. W. Stickle, Major, Engineers.

No. 963. Hydraulic and electric apparatus.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until January 22, 1913, for furnishing hydraulic and electric apparatus for St. Mary storage unit, Milk River project, Montana. For particulars address United States Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,047,191. Swinging Stop Device for Sliding Sashes. Louis Fontannaz, New York, N. Y.

1,047,233. Scow for Transporting Gravel. Geo. W. Jackson, Chicago, Ill.

1,047,234. Scow for Transporting Gravel. Thomas C. Jackson, Chicago, Ill.

1,047,244. Fuel Chute and Locking Device therefor. Emanuel Kleinknecht, Spokane, Washington, assignor to Holley-Mason Hardware Co., Spokane, Washington.

1,047,251. Ladder Attachment. B. G. Larson, Jamestown, N. D.

1,047,254. Mold for Concrete Construction. Aaron F. Leiter, Dayton, O.

1,047,263. Metal Building Construction. M. J. McMartin, Duluth, Minn., assignor to Duluth Corrugating & Roofing Co., Duluth, Minn.

1,047,332. Roof Bracket. A. E. Tebbetts, East Rochester, N. H.

1,047,434. Fireplace Damper. Samuel F. Meyers, University City, Mo.

1,047,453 Cast Wall for Buildings. H. J. Schubert, Hackensack, N. J.

1,047,481. Concrete Binder and Preservative. Nelson B. Arnold, New York, New York.

1,047,572. Paint Remover. George F. Sayres, Stokesville, Va.

1,047,613. Shingling Gage. Chas. K. Brown, Malden, Mass.

1,047,614. Building Block. Ferdinand Burchartz, New York, N. Y.

PAINTING ON BRICK WORK.

If you have a wall of brickwork, and the bricks are very soft, then broom down clean and apply a size of acrid

water, just enough muriatic acid to cover the water. Let this be rinsed off with clear water, let it dry, then apply all the raw oil the wall will take. This is for a first-class job, and the oil will prevent the chipping of the brick afterward. The oil makes the soft bricks harder, and also waterproof. Hard bricks will not need so much oil. Where the wall has been filled with raw oil the first coat of paint should be of good quality, and according to what the finish is to be; if to be painted like wood, it should be thinned with oil and turpentine until the last coat, which should be done with all oil. But if a dead brick finish, then use all turpentine color for the finish, though the priming may be all oil, and the next coat or two, half and half, as the dead effect is surer on a partly lustrous ground, or on a perfectly full luster.—Construction Record.

ESTIMATE OF STATE MINERALOGIST.

Official Figures For The Expense of Next Two Years.

Estimate of appropriation for the support of the State Mining Bureau made by the State Mineralogist and approved by the Board of Trustees for the sixty-fifth and sixty-sixth fiscal years, a period of two years ending June 30th, 1915.

For salary State Mineralogist..		$ 6,000
For support of the State Mining Bureau, including salaries....		40,000
For geological survey and preparation of General Report....		
6 field men, salaries.	$21,600	
6 field men, expenses	17,400	
		$39,000
Special work on Mother Lode...		2,000
Special work on Iron Deposits..		2,500
Special work on Metallurgy....		2,000
Special work on Mining Methods		2,500
Special work on Ancient Channels		6,000
Panama Pacific Exposition.....		25,000
For printing, binding, ruling, and all other work performed materials furnished by the State Printing Office.....		10,000
Total		$135,000

BIG DEAL IN RIVER LANDS.

SACRAMENTO, Dec. 23.—With the change in ownership of 8000 acres of land on the Yolo side of the river above Elkhorn, where the Northern Electric interests have been carrying on development, a reclamation project which will involve $680,000 has been inaugurated by a coterie of local capitalists, who acquired the property from the original holders.

The land is of the river bottom type and heretofore has been overflowed each year. It lies just above Elkhorn across from the great Natomas Consolidated district of 60,000 acres, which is gradually being surrounded by high dykes, and between the river and the proposed Yolo By-pass. In fact an application has been made to Major S. A. Cheney of the California Debris Commission to have the east levee of the by-pass moved back a few hundred feet to permit a greater amount of land being taken into the reclamation district.

The new owners of the property are Fred W. Kiesel, A. A. Merkeley, Egbert A. Brown, H. T. Silvius, James Beach, Dr. T. J. Cox and the firm of Brown & Rose. The land is a part of the old Rancho Jesus Maria grant and was purchased from Mrs. Virginia M. Davis and from Cal Perkins, who had held it for many years.

The reclamation district will add 8,000 mores acres to the thousands that are being prepared for cultivation on either side of the river about Sacramento. The land was purchased for $55 per acre, a total of $440,000, and the reclamation will cost $240,000 or $30 per acre.

MAKE POWER CONTRACT.

A contract for the delivery of 20,000 horse power of hydro-electric energy to the Oro Electric Corporation by the Northern California Power company was signed last Friday afternoon in this city. Northern California Power will deliver the power at a point four miles north of Colusa, where it will be picked up by the Oro Electric and distributed as far south as Stockton. The life of the contract ceases upon the completion of the ellow Creek plant of the Oro Electric, when it will be in a position to generate power for its own retail markets.

HIGHWAY CHANGE IS URGED.

SACRAMENTO, Dec. 23.—One delegation from Hanford and another from Visalia, meeting in Sacramento, combined and appeared before Governor Johnson and President Towne of the state highway commission, urging the routeing of the main state highway through Kings and Tulare counties so as to touch both county seats, instead of following the railroad right of way. The proposed route goes between the towns and connects them with a lateral highway running east and west. President Towne announced that the matter would be taken up by the commission.

GENERAL CONTRACTORS' ASSOCIATION.

Please take notice that the next regular meeting of the stockholders of the General Contractors' Association will be held at the meeting quarters, 402 Kearny street, San Francisco, California, on Thursday evening, December 26th, 1912, at the hour of eight o'clock P. M.

WM. E. HAGUE,
Secretary

CHAS. A. DAY
President.

SEVEN STATES HAVE MOUNTAINS ABOVE 13,000 FEET.

There are three States which can boast of mountain peaks exceeding 14,000 feet in height above sea level, according to the United States Geological Survey. They are California, with Mount Whitney, 14,501 feet—the highest mountain in the United States, exclusive of Alaska—Colorado, with Mount Massive and Mount Elbert, each 14,402 feet; and Washington, with Mount Rainier, 14,363 feet. Wyoming, Utah, New Mexico, and Nevada all have mountain peaks exceeding 13,000 feet in height.

ESSENTIAL OF FIRE PROTECTION.

Those who have studied the problem of fire protection for workers and property in factory and other industrial buildings, are unanimously agreed that its chief essentials are as follows: Fireproof or slow-burning construction, elimination of vertical openings, restrictions of large areas by fire walls, protection of window openings by metal sash and wired glass, and installation of automatic sprinklers.

POWER EARNINGS INCREASE.

The November business of the Northern California Power Company, Consolidated, as well above the monthly average for the year, according to the November statement of earnings submitted recently as follows: Gross earnings, $68,509.14; operating and general expenses, $17,250.84; net earnings, $51,258.30; maintenance and depreciation reserve, $10,062.92; interest on bonds and debentunres, $28,910.99; available for surplus and dividends $12,284.39.

NEW SCHOOL BUILDING FOR ORLAND.

ORLAND (Glenn Co.), December 26. The Trustees of the Orland Joint Union High School District, which consists of twelve Grammar School districts in Glenn County and one partly in Glenn and Tehama Counties, will meet early in January and take steps to secure the site recently selected for a new High School building and decide upon the manner of securing the funds for the erection of a building.

Present Building Inadequate.

The present building is inadequate to house the students, who have increased in numbers rapidly in the last three years.

Whether the money shall be raised by direct taxation or by bonds will be decided. It is probable that the preferences of the majority will be ascertained by means of a post-card vote.

The assessed valuation of the district is nearly $5,000,000.

TO BUILD FIREHOUSE.

SEATTLE, Dec. 26.—City Architect Daniel Huntington will shortly start plans for the construction of seven fire houses which will be erected this spring at the following locations: Densmore avenue and N-45th street, cost $10,000; California avenue and W-Alaska street, cost $4500; Rainier Beach, $3500; 24th avenue NW and W-65th street, cost, $4000, Hunter's Blvd. and Spokane street, $5000; Washington Park, $4500, Magnolia Bluffs, $2500, total cost, $34,000.

U. S. CIVIL SERVICE TESTS.

The United States Civil Service Commission announces that examinations will be held in San Francisco at an early date for:

Alloy chemist (male), Bureau of Mines, salary $2400 to $3000 per annum.

Junior chemist (male), Bureau of Mines, Pittsburg, Pa., and Washington, D. C., salary $1020 to $1380 per annum.

Engineer (male), Indian service, salary, $480 to $1000 per annum.

Junior computer (male), Bureau of Mines, Washington, D. C., salary $900 to $1320 per annum.

Laboratory assistant in ceramics (male), Bureau of Standards, salary

$900 to $1,200 per annum.

Medical interne Government Hospital for the Insane, Washington, D. C., salary $600 per annum.

Four Line hemstitchers, salary $40 per month and rations.

Packer who can talk salary $50 per month and rations.

MILLION TO IMPROVE HARBOR AT CRESCENT.

WASHINGTON (D. C.), December 28. A preliminary survey of Crescent City Harbor has been made by Colonel Reese and Lieutenant Emerson, corps of engineers, according to a report to the War Department. It is proposed that the Government spend $1,000,000 on this harbor, and it is said that the citizens of Crescent City will spend $200,000 more.

LINDGREN COMPANY SUED.

SACRAMENTO, Dec. 28.—Co-pounding that he received injuries which have left him practically unable to follow his profession as a surgeon, it is declared at the Court House, caused by the negligence of the Lindgren Company, Garfield J. Leftwich has begun suit for $50,000 damages against the company. Leftwich asserts that a poorly constructed scaffold on which he was standing to put a picture mould on a ceiling in the Court House collapsed, and he broke several bones in his ankle and the left leg. The accident occurred last April.

POWER SITES WITHDRAWN.

REDDING (Cal.), Dec. 28.—The Redding Land office received notice recently that by an Executive order on December 12 the Government withdrew from entry 640 acres on McCloud River and 2,000 of the Sacramento, north of Cisco, and created the acreage "for water power sites as Power Site Reserves No. 1 and No. 325," respectively, subject to the limitations, provisions, exceptions and conditions contained in the Act of Congress approved June 25, 1910.

This establishment of power site reserves, Register C. W. Lethaby explains, will not interfere with homesteads and settlement claimants who comply with the law, but it will "clamp off" unperfected scrip.

The notice is accompanied by a detailed description of the land by subdivisions. The land withdrawn includes every possible power site on the Sacramento from Copley north to Canton between Dunsmuir and Sisson.

On the McCloud the sites withdrawn are directly east of Sims and other respectively. One site withdrawn is on Squaw Creek, a tributary of the McCloud.

PLANS ON FILE AT THIS OFFICE.

Plans and specifications have been placed on file at this office for the new Grammar School building which is to be erected in the Hester School District at San Jose. Plans were prepared by Architect Norman F. Marsh, Broadway Central Bldg., Los Angeles. Herbert C. Jones, Knox Bldg., San Jose, is the Clerk of the Board. Local contractors and supply men may call and inspect the plans and specifications at their convenience.

FINE FOR VIOLATION OF IMMIGRATION LAW.

BOSTON, December 28.—The Federal Government's proceedings against the Maine Wood Coverage Company, Limited, of Saco, Me., for violations of the contract labor law, were ended Friday on the payment of the company's attorney in the United States District Court for $20,000 in fines.

The settlement was the result of an agreement with Attorney-General Wickersham by which criminal action against E. Vernon Willey, manager of the company, and Arthur T. Saville of Liverpool, England, an agent, was abandoned.

EQUITABLE LIFE TO BUILD.

NEW YORK, December 26.—Plans for a fifty-seven story fireproof building to house the Equitable Life Assurance Society were filed today.

TO VOTE SCHOOL BONDS.

MAXWELL (Colusa Co.), December 28.—The Board of Trustees of the Maxwell Grammar School District today decided to submit to the voters on January 21st a proposition to bond the district for $14,000 the money to be used in erecting a handsome Grammar School building in the district.

FOREIGN TRADE OPPORTUNITIES.

No. 10078. Gasoline motors. An agent of a German concern informed an American consular officer in Germany that a boat builder, intending to construct a small motor boat to be sent as an exposition, is planning to May 1 Kiel, in order to secure offers from American manufacturers of the smallest gasoline motors, 1 to 2 horsepower. Agent's commission and prices f. o. b. steamer Hamburg or Bremen should be clearly stated in first letter to agent, in order to avoid delay. The agent would also seek orders from other manufacturers in the district.

No. 9978. Pine, fir, and larch lumber.—One of the commercial agents of the Department of Commerce and Labor has furnished the names of three firms in the United Kingdom that desire quotations on Pacific coast white pine, sugar pine, Oregon fir, and Montana larch.

No. 9979. Machinery for making steel balls.—The Bureau of Foreign and Domestic Commerce is in receipt of a communication from a American manufacturing company stating that it has received an inquiry from a foreign concern institute for information in regard to machinery for manufacturing steel balls. This institute intends to install a factory making steel balls, which would produce 100,000 to 150,000 balls per day, and desires an estimate for the complete installation. Correspondence could be sent to the institute.

No. 9980. Lumber and paving block machine.—A report from one of the commercial agents of the Department of Commerce and Labor states that a firm in the United Kingdom desires quotations on Montana larch and also prices and other particulars from American manufacturers of a good paving block machine.

No. 9981. Portable buildings.—An American consular officer in a Mediterranean country reports that he has been informed by a local business firm that it desires to be placed in communication with exporters of portable buildings, ready built sectional houses, portable garages, and bungalows, with a view to negotiating such firms as agent or of importing direct. Correspondence may be in English, and references will be furnished.

No. 9982. Laundry journals.—A report in the Far East states that a resident of his district desires to secure the name of American publishers of laundry journals, preferably those in the Southern States.

No. 998. Larch, cypress, hickory, and ash lumber.—A commercial agent of the Department of Commerce and Labor reports that a foreign business firm desires quotations on Montana larch, lumber, also on round ash logs.

No. 9985. Harbor cranes and machinery.—A business firm in a European country has informed an American consular officer that it desires to be placed in communication with American manufacturing and exporting cranes for coal or use, machinery for operating same, and apparatus used in harbor construction. Correspondence may be in English or German. References will be furnished.

No. 9986. Coal-handling plant.—The American consul at Lourenco Marquez, East Africa, has transmitted the call for bids, in Portugese, on the coaling plant for that port, with carbon specifications, etc., all of which can be obtained from the Bureau of Foreign and Domestic Commerce. Bids for the installation of this plant must be received by January 17, 1911.

No. 9938. Carriage sundries.—An American consul reports that a carriage repair concern in an Asiatic country wishes prices and catalogues on carriage saddlery, including bolts, nuts, rod wheels, in small lots.

Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.

No. 10040. Hotel equipment and building materials.—A report from an American consular officer in a European country states that a contract has been let to a firm of building contractors in his district for the construction of a large modern hotel. Firms having hotel equipment and building supplies to offer would get in touch with this at once.

No. 10045. Cement machinery.—An American consular officer in a European country states that a resident of his district is interested in machines and processes which will further the use of cement by the employment of cheap unskilled labor. Correspondence may be in English.

No. 10046. Electric lighting traction, and general engineering specialties.—An American consular officer in the United Kingdom reports that an engineer in his district has made known his desire to undertake agencies for American electric lighting, traction, and general engineering specialties.

No. 10047. Hardeware, jewelry, and household articles.—A business man in Scotland was written to an American consulate that he desires to corres-

pond with American firms manufacturing all kinds of articles suitable for the wholesale trade in that country and Ireland in hardware, jewelry, and household articles lines. He intends to represent some capable American manufactures in the above and other lines. He states he has an old and first-class connection in both countries and can provide the best of references.

No. 10048. Steel and office furniture.—A report from an American consular officer states that a business house in Germany is shortly to open a branch house in German East Africa and would like to receive catalouges, price lists, etc., from American manufacturers of steel office furniture. Correspondence may be in English or German. The consular officer writes that it probably would be advisable to make quotations c. i. f. Hamburg or f. o. b. Hamburg American Line steamers, New York.

No. 10050. Machine for grinding cassava or manioc.—A report from an American consul states that the manager of a large local firm has made inquiry at his office to ascertain if any American manufacturers turn out a machine for grinding cassava or manioc. It is suggested that any American dealer in such a machine should at once submit catalogues and quote prices to the inquirer. All correspondence regarding this matter should be in English.

No. 10051. Steel plates and angle iron for ships.—A European business man has requested an American consular officer to place him in communication with American steel and ironmanufacturers and exporters who are in a position to furnish large quantities of steel plates, angle iron and steel, and such for ships and ships' boilers. The inquirer, who was formerly manager of a shipbuilding company in a Mediterranean country, states there is a large demand for such products, as the local steel mills have all the orders they can fill for about six months, and that shipbuilding requires extra importations. The general forms of angle iron and steel in use, he states, are the ordinary L-shaped and also the bar-shaped with bulbed end, the Z and the T shaped. Correspondence may be in English. Satisfactory references can be furnished.

Christmas Jinks At Architectural Club.

San Francisco Club Members Enjoy Big Time Saturday Evening at Their Club Rooms.

On Saturday Evening, December 28th, 1912, the San Francisco Architectural Club held their annual Christmas Jinks in their spacious club rooms, which were beautifully decorated for the occasion. The affair being one of the most successful in the history of the organization.

At least 200 members attended, and from their expression of pleasure the Committee in charge felt their efforts had been well appreciated. During the course of the evening, a varied entertainment, in which talent from the local playhouses participated, boxers and wrestlers from the Olympic Club, who through the kindness of John A. Hammersmith had been allowed to participate in the affair, furnished a very interesting and lively program. The entertainment culminated in a screamingly funny farce, en-acted by the members of the Club, this appeared to be the banner number of the evening.

George Greenwood had the pleasure of making the presentation of the Past President's Jewel to the Retiring President, Tobias Bearwall, and with a few well chosen words complimented that officer upon the efficiency and thoroughness of his management of the Club affairs through the past year. In response, Mr. Bearwall thanked the members of the Club for their hearty support, and in particular, paid a glowing compliment to the efficiency of Vice-President, Harry E. Nye, and the other officers of the Club.

A buffet supper was served during the evening, by a well known downtown caterer. Toasts were drunk to the absent members, and a standing toast to the 1915 Fair.

The Jinks ended with all members singing Auld Lang Syne and wishing one another compliments of the season.

John Beauttler was in charge of the affair and was ably assisted by the Entertainment Committee. The music of the evening was furnished by the Architectural Club Orchestra.

Clinton Day Receives High Honor At A. I. A.

Local Architect Is Made a "Fellow" at the Annual Convention Held at Washington, D. C.

A signal honor was conferred on one of the leading members of the architectural profession of San Francisco at the 46th Annual Convention of the American Institute of Architects, held this month in Washington, D. C., when Architect Clinton Day of this city was elected a "Fellow."

The honor of "Fellow" of the American Institute of Architects, to quote from the By-Laws, is "conferred upon a member who is a citizen of the United States, who, in the opinion of an authorized Jury of Fellows, shall have notably contributed to the advancement of the profession in design, construction, literature or education."

The election of officers resulted as follows: President, Walter Cook, New York; 1st Vice-President, R. Clipston Sturgis, Boston; 2nd Vice-President, Frank C. Baldwin, Fredericksburg, Va.; Secretary-Treasurer, Glenn Brown, Washington, D. C. All of the above were re-elected. The following were elected Directors for a term of three years: Burt L. Fenner, New York; C. Grant La Farge, New York, and H. Van Buren Magonigle, New York. Robert Stead of Washington, D. C., was elected Auditor.

The honor of "Fellow" was conferred upon the following members:

Wm. D. Austin, Boston, Mass.
W. Dominick Bones, Cleveland, O.
Henry Clay Cartel, New York, N. Y.
Walter B. Chambers, New York, N. Y.
Clinton Day, San Francisco, Cal.
Wm. Adams Delano, New York, N. Y.
L. C. Holden, New York, N. Y.
Walter G. Peter, Washington, D. C.
Arthur Wallace Rice, Boston, Mass.
Charles A. Rich, New York, N. Y.
Horace Wells Sellers, Philadelphia, Pa.
Frank E. Wallis, New York, N. Y.
Arthur F. Woltersdorff, Chicago, Ill.

TO MAKE MUNICIPAL IMPROVEMENTS.

EDMONTON, Dec. 30.—The municipality of Edmonton will expend $6,000,000 for street railway, paving, park, waterworks and telephone extensions in 1913. One and a half million dollare will be used in improving the street railway system and a similar amount will be expended for paving about 30 miles of streets. The estimate for the water department is $320,000. Four new fire stations and equipment will cost $150,000.

1913 bids fair to be a prosperous year for San Francisco. Prosperous because a great number of enterprises will be started here or in the immediate vicinity of San Francisco. Plans for the Exposition and for the Civic Center are well under way. There must be of necessity an expenditure of public money in California far above the average. The large development work of the interior will bring people and money into the farming districts. So that the year opens with good omens for prosperity and progress. With visions of a more than average year and of good business for the builders, the Daily Pacific Builder wishes all a Prosperous and Happy New Year.

The demonstration at the opening of the Geary Street Municipal Railroad last Saturday was a notable one. The enthusiasm shown by the people at the consummation of the event was ample proof of the public feeling in regard to the arogant trolley trust that has stolen the streets of the city. It has been a long and tedious fight for the city to get back its own property. Every obstacle has been placed in its way. And now that at last there is an accomplished fact of the city owning at least one street car line the people are anxious to see it succeed. There will be no dearth of passengers on the new municipal line. People will walk for blocks to ride on it in preference to the cars of the trolley trust, for one reason that there are better accommodations and for a further reason that the people feel they are paying their money into their own enterprise and not for the payment of dividends on a lot of watered stock. San Francisco municipal railway is said to be the first railroad in the United States to be owned by a municipality. There is every reason to believe it will be a great success. And if it is a success it will point the way to other cities to own their own public service.

Now if we could have the Home Telephone owned or operated under city control there would be another service that would be vastly improved and the public benefitted incomparably.

PATENTS

promptly obtained OR NO FEE. Trade-Marks, Caveats, Copyrights and Labels registered. TWENTY YEARS' PRACTICE. Highest references. Send model, sketch or photo for free report on patentability. All business confidential. HAND-BOOK FREE. Explains everything. Tells How to Obtain and Sell Patents. What Inventions Will Pay. How to Get a Partner, explains best mechanical movements, and contains 300 other subjects of importance to inventors. Address,

H. B. WILLSON & CO. Patent Attorneys
Box 239 Wilson Bldg. WASHINGTON, D. C.

NO WIPE JOINTS WHERE THE FORSTER IS USED.

A peculiar feature of the Forster Water Closet Waste Connections, is the groove which holds the putty or other packing. This groove prevents the packing from spreading and makes a gas-tight joint. Ask your wholesale supply agent to show you a sample.

POWER RATE WAR AT OROVILLE.

OROVILLE, Dec. 23.—A power war is on in Oroville. It is asserted that the Oro Electric corporation, which now has a monopoly of the local electric field, is signing up residents for a term of five years in an effort to keep the Great Western Power company out of Oroville. Many residents are refusing to sign and have appealed to the city trustees for redress. The trustees had promised an ordinance prescribing rates for the first of the year. Since the promise was made residents say the Oro company has signed up many users at a meter rate, little different than the present rate. Residents of Oroville claim that the electric rates are higher than in Chico and Marysville.

HANGER AND OPERATING DEVICE.

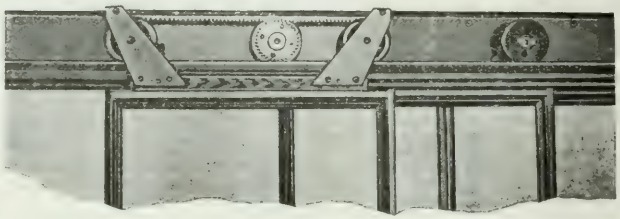
Some Distinctive Features of the Improved Monarch Hanger.

The Monarch Improved Hanger and Operating Device is an entirely new combination of hanger and operator for two doors opening doors. This hanger has several advantages over other hangers in the market at the present time, because it combines all good features of other hangers. The Monarch Hanger is practically noiseless and does not have the unsightly operating device such as bars connecting the doors which are found on most elevator fronts.

Another good feature of importance especially where automatic elevators are used is the spring mechanism attached to one wheel making it possible to close doors tightly merely by starting them. As generally known, the Automatic Elevator Cars are not a success unless the lock has a perfect electrical contact. This is assured by using the Monarch, as the spring is so strong that it carries the door far enough to give the lock the proper contact. By merely revolving the wheel right or left, the spring tightens or loosens and accordingly the door moves quickly or slowly to suit conditions.

The Monarch Hangers are noiseless due to the fact that the wheels have wide bearing surface and run on hardwood tracks, therefore, it is not necessary to use oil or grease on tracks as are required on other hangers and which is usually overlooked by the elevator operator. The Monarch Hangers are roller bearing with 3-16 inch diameter steel pins rolling in graphite. The track and gear wheel device is an extra feature of the Monarch which makes one door travel twice as fast as the other door. It is made of machine brass thereby making it strong and having very little friction.

The Monarch Hanger and Operating Device is used throughout the State of California and has proved entirely satisfactory. It is furthermore, a California product.



CONSULTING EXPERT

Heating, Ventilating, Electrical Wiring, Plumbing, Etc.

Expert Architects assistant for laying out work as above. Highest references.
